Bharat Forge to Establish State-of-the-Art Ring Mill for Aerospace Applications

Pune, India, 30th July 2025 – Bharat Forge Ltd. (BFL), a global leader in advanced forging and precision engineering, will establish a new advanced ring mill dedicated to aerospace applications, following the signature of contracts with **Pratt & Whitney, Canada** for the supply of aerospace components. The new ring mill will be set up as part of BFL's ongoing expansion of its aerospace manufacturing capabilities. This facility is designed to produce high-performance aerospace products for aero-engine applications, leveraging cutting-edge technologies and adhering to the highest global quality and traceability standards.

Amit Kalyani, Vice-Chairman and JMD, Bharat Forge Ltd., said, *"We are excited to deepen our strategic relationship with Pratt & Whitney Canada through the establishment of this new ring mill. It not only reinforces our commitment to the global aerospace ecosystem but also marks a significant step in advancing India's manufacturing capabilities in high-value aerospace components."*

Frederic Lefebvre, Vice President, Supply Chain, Pratt and Whitney Canada said, *"This underscores our commitment to building a resilient global supply chain and advancing India's aerospace ecosystem. Pratt & Whitney has been present in India for more than seven decades and has more than 800 employees who contribute to developing the next generation of dependable engines."*

The new ring mill is expected to be operational by 2026 and will support both domestic and international aerospace programs. It will also serve as a key contributor to India's vision of becoming a global aerospace manufacturing hub.

About Bharat Forge

Bharat Forge Limited (BFL), a Pune-based Indian multinational, is a technology driven global leader in providing high performance, innovative safety critical components and solutions for several sectors including automotive, power, oil and gas, construction & mining, rail, marine, defence and aerospace. BFL has a global manufacturing footprint with presence across five countries, with the largest repository of metallurgical knowledge and offers full service supply capability to its geographically dispersed marquee customers from concept to product design, engineering, manufacturing, testing and validation.
