Encl.: H1 FY2026–27 Business Update

H1FY27 KEY OPERATIONAL AND FINANCIAL HIGHLIGHTS

Arham Technologies Limited, a leading Consumer Electronics Brand and Manufacturer under the **STARSHINE** brand, has delivered a strong first half of FY27, with **revenue expected at more than ₹80 crore compared with ₹45.62 crore in H1 FY26, representing growth of 80% YoY.**

Expanding into Interactive Flat Panel Displays

One of the key developments during H1 was Arham's entry into the **Interactive Flat Panel Display (IFPD)** segment, with the launch of **65", 75" and 86" displays.**

The expansion marks an important addition to Arham's existing product portfolio and opens a new addressable market across **schools, educational institutions, coaching centres, corporate meeting rooms and other interactive learning environments.**

Importantly, the Company is not limiting its focus to hardware manufacturing. Arham has also developed one of India's first **AI-enabled whiteboard feature** with capabilities such as automated tests and AI-assisted explanations. The objective is to combine the display hardware with useful learning features, allowing the Company to build greater product differentiation as it develops this vertical.

Strengthening Distribution Ahead of the Next Growth Cycle

Alongside product expansion, Arham continued to strengthen its market reach during H1 with the addition of **12 new distributors.**

The Company also participated in the **Fan Expo – Delhi Edition**, where it generated more than **50 serious business leads.** These interactions provide Arham with a wider potential channel base as it prepares for the upcoming summer season, an important demand period for its fan and cooling product portfolio.

The focus remains on building distribution alongside manufacturing capacity so that new products can be supported by a wider route to market.

H2 FY27: Increasing Brand Visibility

With manufacturing, products and distribution being strengthened, Arham is also preparing to increase its consumer-facing brand presence.

The Company's upcoming advertising campaign featuring **Vicky Kaushal** is expected to commence during H2 FY27. The campaign is planned to support greater visibility for the **STARSHINE** brand as the Company expands its product portfolio and distribution reach.

This represents an important next step in Arham's journey: moving from primarily building manufacturing and distribution capabilities towards simultaneously creating stronger consumer awareness for its own brand.

Building Greater Manufacturing Capabilities In-House

Arham's upcoming **Plastic Injection Moulding and Sheet Metal Unit** remains on track.

This investment represents an important step towards greater backward integration. As Arham's product portfolio and volumes expand, developing more manufacturing processes internally can provide the Company with **greater control over production, product development, quality and execution timelines**, while progressively reducing dependence on external vendors for key components and processes. The new facility is therefore being developed not only as an additional manufacturing asset, but as part of Arham's longer-term strategy to build a more integrated manufacturing platform.

Product Development Continues

The Company continues to invest in developing products internally. A **new, own-designed BLDC fan model** is scheduled to enter production during H2 FY27.

The development is aligned with Arham's strategy of gradually strengthening its own product capabilities while participating in the growing demand for energy-efficient consumer appliances.

Combined with the Company's progress in IFPDs, the BLDC fan development demonstrates an increasing focus on **product development alongside manufacturing scale**.

Building Multiple Growth Engines

H1 FY27 represents progress beyond the **80% YoY revenue growth** reported for the period.

Arham is simultaneously working towards a broader product portfolio, a larger distribution network, greater backward integration, stronger in-house product development and increased brand visibility.

With **IFPDs adding a new business vertical, AI-led features strengthening the product proposition, BLDC fans expanding the consumer portfolio, additional distributors increasing market reach, backward integration strengthening manufacturing capabilities and the Vicky Kaushal campaign planned for H2**, the Company is building multiple growth engines rather than relying on a single product category.

The focus for H2 FY27 will be on converting these investments and initiatives into greater scale while continuing to strengthen the foundation required for Arham's longer-term growth.

About Arham Technologies Limited:

Arham Technologies Limited is a leading Electronics Manufacturer and Original Equipment Manufacturer (OEM) specializing in Smart LED Televisions under the premium STARSHINE and economy ARATTON brand. Incorporated in 2013 and based in Raipur, Chhattisgarh, the company operates from the Electronic Manufacturing Cluster in New Raipur with State-Of-The-Art facilities including 1K standard clean rooms and advanced testing protocols. The company has established itself as a dominant player in Central India's consumer electronics sector, manufacturing LED Smart TVs, Ceiling Fans, Air Coolers along with other appliances like Washing Machines, and Mixer Grinders for both B2B and B2C segments.
