A Commitment Beyond Business

"If the distributor or investor who stood with you on the first day is still with you today, then you are on the right path."

*-Mr. Roshan Jain,
Managing Director,
Arham Technologies*

Established in 2013, Arham Technologies Limited is a leading name in India's electronic manufacturing sector, delivering innovation and quality from its headquarters in the Electronic Manufacturing Cluster, New Raipur. Specializing in Smart Televisions, Washing Machines, Fans, Cooler and Mixer Grinders, the company

has redefined excellence in the consumer electronics space. Arham Technologies prides itself on being a trusted Original Equipment Manufacturer (OEM) for regional brands across central India, emphasizing trust, accessibility, and uncompromising quality in every product.

Starshine: A Trusted Name in Electronics

Arham Technologies markets its products under the Starshine brand, a symbol of quality and reliability in the electronics market. Starshine offers a wide range of products, including Smart Televisions, Washing Machines, Fans, Mixer Grinders and Coolers. The brand is accessible through a robust distributor network and direct online delivery, ensuring a seamless connection with consumers.

Starshine's presence on social media reflects its aspirational ethos, offering slice-of-life content that resonates with young India. This digital engagement positions Arham Technologies as a brand that speaks the language of New India, setting benchmarks in both product quality and consumer trust. Being listed on the stock market further solidifies its credibility as a company the nation can rely on.

The Visionary Trio: "The Innovators' Alliance"

At the core of Arham Technologies is a dynamic trio—a father and his two sons—who bring diverse strengths and a shared vision of excellence to the company.

Mr. Roshan Jain: The Visionary Leader

The founder and Managing Director, Mr. Roshan Jain, combines business acumen and visionary thinking. He established Arham Technologies with a focus on trust, quality, and human values. His leadership has propelled the company to become a symbol of organized excellence. For Mr. Jain success is rooted in relationships: "Kaam hum technology wala karte hain, par values humans wali hain."

Mr. Ankit Jain: The Technological Trailblazer

Ankit Jain, the elder son and Chief Financial Officer (CFO), bridges the gap between technology and management. With a B.Tech in Electrical & Electronics and an Entrepreneurship course from IIT Delhi, he has seamlessly integrated modern tools into the company's operations. His focus on quality improvement and branding has established Starshine as a trusted name in the industry. "Branding is about becoming the consumer's first preference through unmatched quality," he emphasizes, linking this belief to Starshine's initiative of creating customer-focused products and fostering trust through post-purchase engagement programs. He firmly believes that "consumer recommendation to friends is the best promotion, and that is the true victory of a brand." "Branding is about becoming the consumer's first preference through unmatched quality," he emphasizes.

Mr. Anekant Jain: The Efficiency Architect

Anekant Jain, the younger son, drives innovation and efficiency at Arham Technologies. A B.Tech in Computer Science and an alumnus of XLRI, Jamshedpur, he has an acute understanding of the pulse of New India. By leveraging lean management and automation, he has significantly enhanced operational productivity. His keen insight into emerging trends ensures that Starshine's strategies resonate with the aspirations of young and dynamic consumers.

"Social media is not just about advertisement; it's about understanding and connecting with the evolving needs of today's audience," he explains, reflecting his broader approach to innovation and consumer engagement.

Arham Technologies embodies the aspirations of Tier 2 India—a growing powerhouse of economic and cultural dynamism. By focusing on durable, high-quality products, the company meets the needs of a market that values trust and reliability.

Listed on the stock market, Arham Technologies stands as a beacon of credibility, signaling its commitment to transparency and excellence. With the "Innovators' Alliance" at its helm, the company is not just a manufacturer but a harbinger of change, poised to lead India's electronics industry into the future.

No business operates in isolation; every enterprise is a part of society. The factors of production—land, labor, and capital—are all sourced from our community and country. Arham Technologies remains deeply aware of its responsibility to give back to society.

From generating employment opportunities to creating better prospects for investors and distributors, the company is committed to holistic growth. Above all, Arham Technologies aims to delight its customers by crafting products that exceed expectations.

As Mr. Roshan Jain aptly concludes, "Business is not just about profits; it's about creating value for everyone. From empowering our workforce to delivering excellence to our customers, and inspiring pride in 'Made in India' products, Arham Technologies strive to make a meaningful impact.

Looking ahead, Arham Technologies is steadfast in its commitment to empowering businesses. "Our mission is to ensure that every deserving business owner has the resources they need to grow and succeed,"

The story of Arham Technologies is a powerful reminder that true leadership lies in creating opportunities for others. Through Arham Technologies, they are not just addressing a business gap—they are enabling dreams, transforming lives, and shaping India's entrepreneurial landscape.

Ankit Jain
