Arham Technologies Unveils Next-Gen Premium Fan Range, Redefining Comfort for Modern Indian Homes

Raipur, 15th April 2026: Arham Technologies Limited (NSE-SME: ARHAM), a leading consumer electronics brand and manufacturer, has announced the launch of its new range of high-performance fans, comprising four models of domestic pedestal fans and one industrial stand fan.

The newly introduced domestic range includes **advanced air circulator models** designed for superior air delivery across modern living spaces, along with a **smart remote-operated pedestal fan equipped with a touch panel interface**, marking a shift away from conventional push-button controls. These products are engineered to **deliver high air thrust with minimal noise, while also catering to evolving consumer preferences around design, aesthetics, and smart functionality.**

As rising temperatures across the country drive demand for home cooling solutions, **escalating prices of air conditioners and coolers** have created a **significant affordability gap** in the market. Smart fans are uniquely positioned to bridge this gap by offering an energy-efficient, cost-effective alternative without compromising on comfort. With our combination of competitive pricing and superior product quality, **Starshine fans** are well-placed to capture this growing opportunity. Consumers today are seeking products that not only offer performance efficiency but also **blend seamlessly with contemporary home interiors.** Additionally, demand for low-noise, energy-efficient, and smart-enabled appliances is accelerating, particularly in Tier I and Tier II cities, expanding the total addressable market for premium fans.

The industrial stand fan launched as part of this portfolio is designed to cater to commercial and industrial environments, offering high durability, powerful airflow, and reliable performance suited for factories, warehouses, and large spaces.

This product expansion further strengthens the Company's presence in the fast-growing fan segment, enabling it to tap into both residential and institutional demand while diversifying its

product portfolio.

Commenting on the launch, Mr. Ankit Jain, Executive Director and Chief Financial Officer, said: *"This new product range reflects our continued focus on strengthening in-house manufacturing and technological capabilities. With a clear emphasis on design, performance, and affordability, we are aligned with the 'Make in India' vision while catering to the evolving needs of Indian consumers. Our goal is to bridge the gap between premium features and accessible pricing against ACs and Coolers, and this launch is a step forward in that direction. We believe this new range will gain strong market traction and contribute meaningfully to our revenue growth in the coming quarters."*

About Arham Technologies Limited:

Arham Technologies Limited is a leading Electronics Manufacturer and Original Equipment Manufacturer (OEM) specializing in Smart LED Televisions under the premium STARSHINE and economy ARATTON brand. Incorporated in 2013 and based in Raipur, Chhattisgarh, the company operates from the Electronic Manufacturing Cluster in New Raipur with State-Of-The-Art facilities including 1K standard clean rooms and advanced testing protocols. The company has established itself as a dominant player in Central India's consumer electronics sector, manufacturing LED Smart TVs, Ceiling Fans, Air Coolers along with other appliances like Washing Machines, and Mixer Grinders for both B2B and B2C segments.
