Ather Energy Doubles its Service Network in a Year, Expands to 500 Centres Across India

National, March 17th, 2026: Ather Energy Limited, one of India's leading electric two-wheeler manufacturers, today announced that it has expanded its service network to 500 authorised centres across India, in tandem with its growing retail footprint. From the beginning, Ather has focused on ensuring service support in every city where it sells its scooters, reinforcing its emphasis on making EV ownership seamless and convenient for riders across markets.

In addition to expanding its service network, Ather continues to invest in service quality, efficiency, and the customer experience. Ather's Gold Service Centres, for instance, are equipped with modern customer lounges, advanced service equipment, and streamlined processes that enhance transparency and reliability. Alongside standard servicing, Ather's ExpressCare initiative, a 60-minute periodic maintenance service, is available at 82 centres, allowing riders to complete routine maintenance quickly and conveniently without compromising quality. In FY26, Ather Energy nearly doubled its service network, expanding from 277 to 500 service centres and significantly increasing its service footprint. These initiatives reflect Ather's ongoing focus on continuously improving the service experience at every touchpoint.

Commenting on the milestone, **Ravneet Singh Phokela, Chief Business Officer, Ather Energy**, said, *"Crossing 500 service centres is an important milestone as we continue to scale our retail footprint and customer base across the country. From the early days, we have focused on building service capacity alongside sales because reliable after-sales support is a core part of the overall ownership experience. As our presence grows, having a strong service network becomes even more critical. Our focus is on ensuring that riders have access to trained technicians, transparent processes, and consistent service quality wherever they are."*

The expansion comes amid strong demand for Ather scooters, including the Ather 450 performance line and the Rizta family scooter, which have broadened the company's reach into new customer segments and markets. By expanding its service network alongside retail, Ather now offers reliable and timely support across Tier-1, Tier-2, and emerging cities, complementing its plan to scale to 700 Experience Centres by FY26. As of December 31, 2025, Ather Energy has 600 Experience Centres.

Alongside service expansion, the company continues to strengthen India's EV ecosystem through the Ather Grid, the country's largest two-wheeler fast-charging network with over 4,357 fast-charging points and neighbourhood chargers globally (as of December 31, 2025), ensuring convenient charging and comprehensive support for riders.

About Ather Energy Limited

Ather Energy Limited (ATHERENERG | 544397 | INE0LEZ01016) is a pioneer in the Indian electric two-wheeler ("E2W") market (CRISIL Report). Founded in 2013 by Tarun Mehta and Swapnil Jain, Ather designs and manufactures high-performance electric scooters. Ather launched its first electric scooter in 2018. Its current E2W portfolio consists of two distinct product lines: the Ather 450 series, focused on performance-oriented customers, and the Ather Rizta, a convenience-first family scooter line launched in 2024. Together, these product lines offer a total of 9 variants. Ather was the first two-wheeler OEM in India to establish a dedicated fast-charging network, the Ather Grid, which is designed and built in India. Today, Ather operates the widest 2W fast-charging network in the

country. As of December 31, 2025, Ather has installed 4,357 fast chargers and neighbourhood chargers globally. With a strong emphasis on R&D and innovation, as of December 31, 2025, Ather holds 321 registered trademarks, 247 registered designs, and 50 registered patents, along with pending applications for 120 trademarks, 64 designs, and 536 patents globally.
