Ather Energy Limited introduces 450S with a longer IDC range of 161 kms powered by a 3.7 kWh battery pack

Introduced at INR 145,999 (ex-showroom Bengaluru) the 450S 3.7kWh bridges the gap between entry-level performance scooters while offering extended range

Bengaluru, 31st July 2025: Ather Energy Limited, India's leading electric two-wheeler manufacturer, has introduced the 450S with a longer IDC range of 161 kms strengthening its performance-focused 450 Series portfolio. The newly introduced 450S variant is now available with a 3.7kWh battery pack catering to riders who demand both thrilling performance and extended range capability. The new variant addresses a key market gap by offering a higher range at a more accessible price point, expanding choices for enthusiasts who appreciate the 450 series' sporty character and advanced technology.

Ravneet Phokela, Chief Business Officer, Ather Energy Limited, said, *"The 450 series has always set the bar for performance, technology, and reliability in the Indian electric scooter market. With the launch of the 450S featuring a 3.7 kWh battery pack and an IDC range of 161 kms, we're bringing the extended range previously exclusive to the 450X. The new 450S variant is specifically designed for riders who prioritize the sporty appeal and long-range capability of the 450 series over the advanced software features of the 450X. With an IDC range of 161 kms offered by the new 450S, riders can now confidently plan longer journeys and still experience the thrilling performance the 450 series is renowned for, all at a more accessible price."*

The 450 line has been appreciated for its performance, technology, and reliability since its inception. The top-tier 450X 3.7 kWh stands out for its impressive 161 kms IDC range and its premium positioning, The 450S 2.9 kWh provided a reasonable entry point into the 450 family but the new 3.7 kWh variant bridges this gap by offering extended range at a more attainable price point.

Sporty Design and Premium Build Quality

The new 3.7 kWh variant retains all the sporty design elements that define the 450 experience. The sharp and angular stance with its distinctive LED headlamp unit maintains the premium appeal that performance enthusiasts love. Despite the larger battery pack, the new variant maintains Ather's renowned engineering standards with stringent testing and attention to detail that performance riders expect.

Extended Range Without Compromise

In a segment where riders often choose between performance and practical range, the 450S with 3.7 kWh battery pack offers the perfect balance. The 3.7 kWh variant delivers all the performance characteristics that make the 450 series exciting - the same 5.4 kW motor producing 22 Nm of torque, 0-40 km/h acceleration in 3.9 seconds, and a top speed of 90 km/h. The enhanced battery capacity extends the IDC range to 161 km while maintaining the zippy performance and agile handling that defines the 450 DNA. The scooter comes with four ride modes - Smart Eco, Eco, Ride, and Sport - allowing riders to choose between maximum range and thrilling performance based on their mood and requirements.

Advanced Features and Connectivity

The 450S 3.7 kWh comes loaded with best-in-class technology and safety features. The scooter features a 7-inch DeepView™ Display with Bluetooth connectivity, turn-by-turn navigation, and automatic brightness adjustment. For safety and convenience, it includes AutoHold™, Fall Safe, Emergency Stop Signal, auto indicator cut-off, Tow & Theft Alerts, Find my scooter, and Amazon Alexa Skills integration (all available with the AtherStack™ Pro). The 3.7 kWh variant receives over-the-air (OTA) updates, ensuring the scooter stays current with the latest software enhancements. The scooter provides seamless access to Ather's comprehensive fast-charging network, the Ather Grid, which spans over 3300+ charging points across the country. For home charging, the variant includes Ather's efficient charging solution with 0-80% charging in 4 hours 30 minutes.

Comprehensive Ownership Support

Like all Ather scooters, the 450S with 3.7 kWh battery pack comes with the option of Ather's comprehensive warranty programme, 'Ather Eight70', that provides a comprehensive 8-year or 80,000 km (whichever comes first) warranty that guarantees a minimum 70% battery health over the ownership period. The scooter is supported by Ather's expanding network of experience centres across the country, where customers can test ride, purchase, and receive after-sales service.

Availability and Booking

Bookings for the 450S with 3.7 kWh battery pack are now open across India through Ather's retail network and online platforms. Deliveries are expected to commence from August 2025.

The 450S with 3.7 kWh battery pack will be available at INR 148,047 (ex-showroom) in Delhi, INR 148,258 (ex-showroom) in Mumbai, INR 145,999 (ex-showroom) in Bengaluru and INR 147,312 (ex-showroom) in Chennai, positioning it competitively in the extended-range performance electric scooter segment while maintaining Ather's value proposition for performance enthusiasts.

About Ather Energy Limited

Ather Energy Limited (ATHERENERG | 544397 | INE0LEZ01016), a pioneer in the Indian electric two-wheeler ("E2W") market, (CRISIL Report) was founded by Tarun Mehta and Swapnil Jain in 2013. The company's current E2W portfolio comprises two product lines -- the Ather 450 line, which caters to customers seeking performance scooters, and the Ather Rizta line, which is targeted at customers seeking convenience scooters for their families. The company was the first two-wheeler ("2W") OEM to establish a 2W fast charging network, the Ather Grid, in India (CRISIL Report). Ather has installed 3,611 Fast chargers and Neighbourhood chargers globally, which includes 3,578 Fast chargers and Neighbourhood chargers across India and a total of 33 Fast chargers across Nepal and Sri Lanka as of March 31, 2025. As at March 31, 2025, globally, Ather Energy had 309 registered trademarks, 203 registered designs, and 47 registered patents, in addition to pending applications for 97 trademarks, 10 designs, and 313 patents.
