CKB, ONE OF THE LEADING LOGISTICS PROVIDERS IN INDONESIA, SUCCESSFULLY GOES LIVE WITH AURIONPRO'S SCMPROFIT PRODUCT

The new supply chain management solution will help CKB centralize and scale their logistics operations

August 1, 2013 – Singapore (Marketwire)

Aurionpro is proud to announce that CKB, a leading Indonesia-based logistics provider focused on the energy industry and a subsidiary of ABM Investama, has successfully gone live with Aurionpro's Supply Chain Management software product suite, SCMProFit. The solution will offer CKB a level of flexibility and scale previously unachievable due the limitations of its legacy SCM software platform. The initial phase of the initiative, focused on deployment of the SCMProFit Warehousing module, has gone live successfully this past month. The next phase of the deployment has already started, and CKB will benefit from SCMProFit's Freight Forwarding, Distribution, Project Logistics, and Shore base Management functionality upon completion. The full solution will support CKB's objective of continuing to scale their business through industry-leading customer support, tailor-made customer offerings, and advanced intelligence through operational dashboards.

Commenting on the successful initial rollout of SCMProFit, Iman Sjafei, Director, CKB Logistics, remarked, "Upgrading our IT capability is key in order to improve our operations and link up to our customers to serve them better. We are impressed with the Aurionpro team's knowledge and capability to understand our business and assist us to achieve our objectives."

CKB's legacy SCM solution was functionally limiting and costly to maintain, and significant operational and reporting challenges hindered the growth and efficiencies of the business. CKB selected Aurionpro's platform over two local and one International SCM solution providers based on SCMProFit's ability to manage end-to-end integrated logistics operations most effectively. Aurionpro's local presence, our deep expertise in Indonesian logistics operations, and our proven success across other deployments in Indonesia were also significant factors during the comprehensive software selection process.

When fully rolled out, the SCMProFit-based solution is expected to enable CKB to comfortably handle the growing volume of customers and transactions, effectively scaling with business demand. The centralized system will manage company-wide operations and will accelerate efficiencies through the platform's alerts, exceptions, and to-do list features while allowing the tracking of P/L costs at the transaction level. Deep insights into business operations and key performance indicators will also be facilitated through SCMProFit's advanced reporting and dashboard features.

"We are so pleased to be able to work alongside leaders of the logistics industry such as CKB," added Ashish Pujari, President of Aurionpro SCM. "Their vision for scaling their business fits extremely well with SCMProFit's architecture and feature set and I am certainly looking forward to seeing Aurionpro's product suite help CKB transform their logistics operations and achieve their business and growth objectives."

About Aurionpro
