# Celebrating an icon of Green Revolution

M S SRIRAM

August 7 was the birth centenary of M.S. Swaminathan, one of the architects of the Green Revolution and more recently known for delivering the landmark report of the National Commission of Farmers — popularly known as the Swaminathan Commission report. Priyambada Jayakumar's biography of Swaminathan is a celebration of the person and his work and is timed well to coincide with the centenary year commemorations.

As one reflects on Swaminathan's life and time, it is worth wondering if India could produce towering figures like him today — people who have not only worked in their narrow field of specialisation with depth but have had a larger than life influence on society at large. Swaminathan's generation included contemporaries such as Verghese Kurien, Vikram Sarabhai, and Homi Bhabha. All these visionaries benefited from a supportive political environment under leaders such as Indira Gandhi, who provided the necessary space and influence to further their contributions.

Swaminathan's approach towards agriculture and food is remarkable. His research spanned two ends of the spectrum: starting with research in genetic strains to develop high yielding variety seeds in wheat that brought about the Green Revolution and moving towards sustainable and organic agriculture. One is completely embedded in science and technology and the other in traditional sys-

tems of sustainability. Clearly, Swaminathan did not see this as a dichotomy. Or if he did, the book does not capture this aspect of his scientific outlook. We also know from public sources that Swaminathan had a somewhat nuanced view of genetically modified crops and was cautiously sceptical about them. It would have been important to capture this ambivalence towards cutting-edge agricultural science research by someone who had worked on plant genetics in the early part of his career and found a miracle solution for India's food security.

**BOOKS & IDEAS**

This is a missed opportunity by the author, who had access to Swaminathan when he was alive and the people around him.

This omission highlights the key limitation of this biography. It is an easy and feel-good read. With some minor hiccups, Swaminathan appeared to have a fairytale-like existence — moving from one successful assignment to the other, solving multiple problems in multiple locations while navigating a world of conflicting interests.

In the enthusiasm to celebrate Swaminathan (which we ought to), the book papers over

**M.S. Swaminathan: The Man Who Fed India**  
by Priyambada Jayakumar  
Published by HarperCollins  
Pages: 323  
Price: ₹699

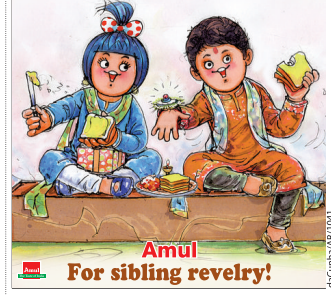

as a human being. Alas, the author's note was a false start because the main text of the book lacks this personal touch. It lapses into a monotone, generally describing Swaminathan's professional career (but for the first few pages of his childhood) and his achievements. It does capture flashes of his personality, particularly in his commitment to going into the fields and interacting with farmers at every opportunity. But family members, including Mina Swaminathan, his wife, a fine profes-

sional in her own right, play only cameo roles. The only significant pushback that Swaminathan seems to have faced in his professional career was from VKRV Rao, a Planning Commission member who did not see merit in investing resources in the research Swaminathan proposed. Obviously, he must have faced more roadblocks. The biography would have done well to capture these. We also do not get a sense of the personalities who were part of his team. Apart from the collaboration with Norman Borlaug and cross-disciplinary collaboration with Vikram Sarabhai and the mention of Kurien, there is little detail of the core scientific team that stood by Swaminathan during his early research.

These shortcomings notwithstanding, this is an important book. In the context of India's current trade negotiations and the conflicts that we are facing on the foreign policy front, it is important to acknowledge the fact that we are negotiating on strong ground. That we have food security is no mean factor contributing to that confidence. India could deal with the Covid-19 crisis by providing free rations to a large part of the population; that it can still do so is not due to a financial miracle but the agricultural miracle. The credit goes to Swaminathan for this. We certainly need to thank him for the bread on our plates (even if it is an unleavened flatbread), and then spare a thought for Kurien for the butter.

The reviewer is a Professor at the Centre for Public Policy, Indian Institute of Management, Bangalore. mssriram@pm.me

## Happy Maska Bandhan!

**Amul For sibling revelry!**

## TECHDIGEST mybs.in/tech

**Asus launches Vivobook S16**  
Asus has launched the Vivobook S16 Copilot Plus PC in India. It features a 16-inch WUXGA OLED screen offering a 60 Hz refresh rate and runs on the Qualcomm Snapdragon X processor. It is now available for purchase at ₹79,990.

## xAI makes Grok Imagine free for everyone Microsoft Copilot platforms get GPT-5

xAI has announced that Grok Imagine, its image and video generation tool, is now free for all users. Leveraging multimodal AI, the feature enables the transformation of text prompts into both images and videos. It is now live on the Grok app for both iOS and Android.

Microsoft is integrating OpenAI's latest GPT-5 model into its Copilot platform. The AI model is now available across Copilot for consumers, Microsoft 365 Copilot for businesses, GitHub Copilot, and Azure AI Foundry for developers. It combines prior iterations into a unified, automatically switching system and brings enhancements to writing, coding, and conversational abilities.

# Discounts, campaigns and more: Qcom's gifts on Raksha Bandhan

UDISHA SRIVASTAV  
New Delhi, 8 August

On the occasion of Raksha Bandhan, quick-commerce (qcom) firms are curating collections, offering discounts, launching campaigns, and one of them has even opened deliveries for the Indian diaspora to meet last-minute demand.

"We've switched on international orders on Blinkit again this year. Folks

living abroad can now send rakhis and gifts to their siblings in India," said Albinder Dhindsa, chief executive officer, Blinkit. The firm has partnered with PayU India and Razorpay to facilitate international card payments.

"Swiggy Instamart, which says it received almost 700 rakhi orders every minute last year, is stocking its shelves with chocolates, silver rakhis, and other gifts. As part of its marketing campaign called 'Gehna To Your

Behna,' every customer placing an order above ₹499 is eligible to receive a voucher worth ₹2,100 from Kalyan Jewellers. "We have teamed up with Kalyan Jewellers to bring something meaningful to our users — a gift that will last a lifetime," said Manender Kaushik, associate vice-president and category head, Instamart.

Zepto said it had optimised its dark store inventory, integrated gifting SKUs (stock keeping units) throughout the

app journey, and introduced festive-ready packaging. Devendra Meel, chief business officer, Zepto, said over 65 per cent of Rakhi-related orders in metros last year came within 72 hours of the festival, and he expected a similar trend this year. "We are witnessing a nearly 30 per cent rise in average order value and about a 150 per cent surge in volumes compared to the same time last year."

In the past few days, the most active shopping window on Flipkart Minutes

was observed between 7 pm and 9 pm, with 8 pm emerging as the busiest hour.

Mynta also observed a surge in demand on M-Now. "During the lead-up period to Raksha Bandhan, M-Now witnessed a 1.5x spike in orders placed," the firm said in a statement.

Uncommerce, a software-as-a-service platform, reported a 24 per cent growth in e-commerce order volumes for the pre-Raksha Bandhan sales during 2025 as compared to 2024.
