Dear Madam/Sir

Sub. : Receiving of Orders/Contracts to Material Subsidiary Company

Ref. : Intimation under Regulation 30 (6) of SEBI (Listing Obligations and Disclosure Requirements), Regulations 2015 (“SEBI Listing Regulations”)

With reference to the captioned subject and in compliance with Regulation 30 read with and SEBI Master Circular SEBI/HO/CFD/PoD2/CIR/P/0155 dated November 11, 2024 and SEBI Circular No. SEBI/HO/CFD/CFD-PoD-2/P/CIR/2025/25 dated February 25, 2025, we wish to inform that one of our material subsidiary, Antony Lara Enviro Solutions Private Limited has received two new contracts for development of Waste-to-Energy Plants each with a capacity of ~15 MW at the Kadapa Cluster and Kurnool Cluster in Andhra Pradesh.

The details, as desired in above-mentioned Circulars, are as follows:

Sr. No.	Important Terms and Conditions	Kadapa	Kurnool
1	name of the entity awarding the order(s)/contract(s);	The New & Renewable Energy Development Corporation of Andhra Pradesh Limited has awarded two projects to Antony Lara Enviro Solutions Private Limited, a material subsidiary company.	
2	significant terms and conditions of order(s)/contract(s) awarded in brief;	Development of two ~15 MW Waste to Energy Plants	
3	whether order(s) / contract(s) have been awarded by domestic/ international entity;	Awarded by New & Renewable Energy Development Corporation of Andhra Pradesh Limited, a Domestic Entity	
4	Nature of order(s) / contract(s)	Processing of MSW waste through Material Recovery Facility and incinerate waste in Waste to Energy Facility.	
5	Whether domestic or international	Domestic	
6	Time period by which the order(s)/contract(s) is to be executed	Each project will have a construction period of ~24 months from the date of concession agreement signing, Power Purchase Agreement (PPA) execution, or land transfer whichever is later. The contract carries a concession period of 20 years,	
7	Broad consideration or size of the order(s)/contract(s)	~ ₹ 1,600 Crore	~ ₹ 1,600 Crore

Antony Waste Handling Cell Limited

CIN: L90001MH2001PLC130485

8	Whether the promoter/ promoter group / group companies have any interest in the entity that awarded the order(s)/contract(s)? If yes, nature of interest and details thereof	Promoter/ Promoter Group / Group companies is not interested in the entity i.e. NREDCAP which has been awarded the order(s)/contract(s).
9	Whether the order(s)/contract(s) would fall within related party transactions? If yes, whether the same is done at "arm's length"	The contract does not fall within Related Party Transactions.

Further, a Press Release in this regard, is also annexed herewith.

This is for your information and records please.

Thanking you,

Yours faithfully,

For and on behalf of

Antony Waste's Subsidiary, Antony Lara Enviro Solutions Secures ~₹3,200 Crore Waste-to-Energy Projects in Andhra Pradesh

Project Highlights:

- **Project Capacity:** ~15 MW Waste to Energy plant each at Kadapa & Kurnool, Andhra Pradesh
- **Total Contract Size:** ~₹1,600 crore per project, totaling ~₹3,200 crore, over 20 years
- **Awarding Authority:** NREDCAP (A Government of Andhra Pradesh Undertaking)

Mumbai, August 13, 2025: Antony Waste Handling Cell Limited ("AWHCL"), India's leading integrated solid waste management Company, announced that its material subsidiary, Antony Lara Enviro Solutions Private Limited, has been awarded two significant ~15 MW Waste-to-Energy (WTE) projects each in Andhra Pradesh by the New & Renewable Energy Development Corporation of Andhra Pradesh Ltd., with a total project value of ~₹3,200 crore. The projects will have a construction period of ~24 months from the date of concession agreement signing, Power Purchase Agreement (PPA) execution, or land transfer, whichever is later. The contract carries a concession period of 20 years, during which the power generated will be purchased by the Andhra Pradesh Southern Power Distribution Company Limited (APSPDCL), the distribution utility serving the Kurnool and YSR Kadapa regions, at a rate of ₹8.10 per unit.

The facility will house an advanced pretreatment Material Recovery Facility (MRF) for processing mixed municipal solid waste (MSW) prior to energy conversion. Using automated sorting and separation technologies, the MRF will recover recyclables, extract organic fractions for dedicated treatment, and process the remaining inorganic, non-recyclable residues into a calibrated feedstock for the Waste-to-Energy (WTE) plant. This feedstock will be thermally treated in high-efficiency incineration units to generate renewable electricity.

Designed to operate at high throughput, the facility will divert thousands of tonnes of waste from landfills daily, reduce methane and CO₂ emissions, and make a measurable contribution to the Government of India's renewable energy capacity targets and the Swachh Bharat Mission.

By reinforcing AWHCL's position at the forefront of sustainable waste management, this milestone paves the way for expanding our clean and green energy portfolio to ~44 MW once operational, accelerating India's progress toward a cleaner and more sustainable tomorrow.

These projects mark a significant entry for the Antony Group into Southern India, expanding both its geographical footprint and its capabilities in the waste processing activities, in line with its strategic objectives.

Commenting on the contract award, Jose Jacob, Chairman & Managing Director, Antony Waste Handling Cell Limited, said,

"The Company is honored to be selected by Andhra Pradesh Government for these landmark Waste-to-Energy projects, underscoring its proven technical leadership, strong execution capabilities, and deep commitment to sustainable waste management. By converting waste into clean, renewable energy, the Company addresses critical environmental and energy challenges while advancing Andhra Pradesh's vision for a greener, cleaner future. Building on its solid track record in integrated waste management, these projects will significantly expand the Company's renewable energy footprint, diversify revenue streams, and create lasting value for stakeholders—reinforcing its role as a key driver of India's clean energy transition."

About Antony Waste Handling Cell Limited

Antony Waste Handling Cell Limited is a recognized pioneer in India's municipal solid waste (MSW) management sector, with proven leadership in collection, transportation, landfill construction, and scientific landfill operations, all executed with comprehensive in-house expertise. Over more than two decades, it has transitioned from an early MSW collection and transportation operator to a fully integrated waste management leader, collaborating with more than 23 Municipal Corporations across India. The Company's strategic portfolio now includes cutting-edge domains such as Waste-to-Energy (WtE), where it champions innovation and sustainable power generation. Its operations at Kanjurmarg, Mumbai, comprise Asia's largest single-location waste processing facility, while its PCMC, Maharashtra project marks the state's inaugural WtE plant to commercialize power sales under Green Energy Open Access Rules. These accomplishments reflect the Company's steadfast commitment to advancing renewable energy, fostering circular economy principles, and supporting national sustainability objectives.
