Antony Waste Handling Cell expands and strengthens its leadership team

- Mr. Mahendra Ananthula as Group - President (Operations, Business Development & Diversification)

Mumbai, August 10, 2022: Antony Waste Handling Cell Limited, a market leader in the Indian MSW service industry, has appointed Mr. Mahendra Ananthula as Group - President (Operations, Business Development & Diversification) to its leadership team. The appointment will be effective from August 16, 2022.

Welcoming Mr. Mahendra Ananthula, Mr. Jose Jacob Kallarakal, Chairman and Managing Director, Antony Waste Handling Cell Limited said, *"We are excited to welcome Mahendra to be a part of the Antony family. His expertise in urban infrastructure and waste management sectors will play a vital role in strengthening and expanding our existing and future business which will lead to better profitability. With his varied domain as well as functional area experience of over 30 years, we are confident of accelerating our growth over the medium to long term."*

The brief profile has been provided below.

Brief Profile:

Mr. Mahendra Ananthula has 30 years of professional experience, out of which last 25 years he was in the urban infrastructure and waste management sectors, with extensive experience in areas of corporate strategy, project development, sales and business development and consulting in water and urban infrastructure. In the first 15 years of his career, he worked in consulting / advisory companies (Feedback Infra, ICRA, and Padco Inc) where he managed urban infrastructure advisory vertical with P&L responsibilities. Thereafter, he joined JUSCO (now called Tata Steel Utilities and Infrastructure Services Ltd) in 2008 and subsequently joined SUEZ in India in January 2011. At Suez, he was responsible for Sales and Development of Water and Waste Management business, where he worked upstream with stakeholders in translating project concepts to tenders and then anchor the tendering process leading to project award. He had played a strong role in development of Suez's water management business in India, which has a portfolio of 10 water management contracts with order book of about \$800 Mn. These projects also helped Suez, traditionally a company working in metropolitan cities, to diversify geographically and work in tier-1 and tier-2 cities in India. The water management projects of Coimbatore, Davanagere and Mangaluru cities in last 4-5 years are classical cases of successful project development (project structure, contract document, and cost estimates), which has changed the landscape of Suez's business in India. Currently, he is spearheading development of waste management platform - municipal waste treatment, industrial waste management (landfill /incineration), recycling and various circular economy themes. He has extensive experience of working with government and private sector companies. In his 30 years of professional career, he has often switched domains and functional areas successfully. The success, he has achieved in developing the nascent and non-existent water management business in India, is testimony of his persuasiveness and focused efforts.

About Antony Waste Handling Cell Limited

Antony Waste Handling Cell limited is one of the top five players with an established track record of more than 21 years, providing full spectrum of MSW services which includes solid waste collection, transportation, processing and disposal services across India, majorly catering to municipalities. The Company has pioneered both MSW collection and transportation business in the country. They are also key players in the landfill construction and management sector with in-house expertise for construction and management of landfills. They focus on the emerging waste management areas in India such as waste to energy. During their journey of over two decades, they started the business with MSW C&T and built their way in the solid waste management business, having worked with more than 23 Municipal Corporations. At Kanjurmarg, Mumbai, the Company is operating the largest single location waste processing plant in Asia.
