Dear Sir,

Sub : Submission of Media Release

Kindly find enclosed herewith Media Release pertaining to “**Adani Power Limited Synchronises 2nd Supercritical unit of 660MW at Mundra Power Plant.**”

Kindly take the same on record.

Thanking You,

Yours faithfully,
For Adani Power Limited

Rahul C. Shah
Company Secretary

ADANI POWER SYNCHRONISES 2ND SUPERCRITICAL POWER UNIT OF 660 MW AT MUNDRA : BECOMES LARGEST THERMAL POWER PRODUCER IN INDIAN PRIVATE SECTOR

Editor's Synopsis:

- Adani Power synchronises its 2nd super critical power unit of 660 MW at Mundra, Gujarat
- Total generation capacity stands at 2640 MW at Mundra power plant
- Other three units of 660 MW each at Mundra Power plant are also be synchronized within FY 2011-12
- 2 Units of 660 MW supercritical at Tiroda will also commission by FY 2011-12
- Total 6000 MW will be operational in FY 2011-12 out of total 16500 MW in development

Adani Power Ltd, a subsidiary of Adani Enterprises – India's leading integrated infrastructure conglomerate, today announced a successful synchronization of its second supercritical unit of 660 megawatt (MW) at its state-of-the-art power plant in Mundra, in Kutch district of Gujarat, taking its total generation capacity to 2,640 MW.

Shri Gautam Adani, Chairman Adani Group, said, "I am happy that our project team has been establishing new benchmarks and has synchronized second supercritical unit of 660 MW within three months from hydro, which is unparalleled feat in Indian Power industry. This success has enhanced my confidence in achieving 20,000 MW well before 2020."

According to available data, with this capacity addition, Adani Power has now emerged as the largest private thermal power producer in Indian private sector.

Adani Power is setting up a 4620 MW coal fired power plant at Mundra, comprising five units of 660 MW and four units of 330 MW each. All the 660 MW units are designed as per the energy efficient and environment friendly supercritical technology. The financial closure of this entire 4620 MW project at Mundra has already been achieved and it is well on schedule for timely commissioning by end of financial year.

Shri Ravi Sharma, CEO, Adani Power, said, "We take pride in synchronizing country's first and now third supercritical unit of 660 MW at Mundra. This will help us in achieving our vision of becoming the leading integrated power company in India".

The company will evacuate the electricity from the Mundra power plant via a 400 kV transmission line from Mundra to Dehgam in Gujarat covering 430km and a dedicated 500 kV high voltage direct current line from Mundra to Mohindergarh in Haryana, covering 1000 km.

Adani Power is currently implementing 16,500 MW of power generation projects across six locations in India. The company is confident of meeting its planned target of generating 20,000 MW by 2020.

About Supercritical Technology

The Supercritical power plants operate at higher temperatures and pressures and therefore achieve higher efficiencies (above 40%) than conventional sub-critical power plants (32%). The use of supercritical technology leads to significant CO₂ emission reductions (above 20%).

The Supercritical technology is an established and matured technology. This technology provides the environmental and financial benefits. This technology has become the system of choice for the new commercial thermal power plants in many countries.

ABOUT ADANI POWER LTD

Adani's initiatives in into power sector are spearheaded by Adani Power Ltd. It is implementing power projects for generating 16500 MW of power at Mundra (4620), Bhadreshwar (3300) and Dahej (2640), Tiroda (3300), Kawai (1320) and Chhindwara (1320).

The company aims at owning and operating 20,000 MW generation capacity by 2020. In addition to generation the company is also actively investing in cross country power transmission lines on license basis as well as for evacuating power from its own generation facilities.

Adani Power has entered into long term power purchase agreements with various state electricity utilities for supplying 7144 MW of power, Gujarat (2000 MW), Haryana (1424), Maharashtra (2520) and Rajasthan (1200).

ABOUT THE ADANI GROUP:

The Adani Group, founded 1988, is one of India's fastest-growing business houses, having metamorphosed from being a trusted trading house into a multi-business multi-national conglomerate. The Adani Group today ranks amongst India's top 10 business houses by market capitalization and employs over 8500 persons. As a conglomerate the Group has business interests ranging from commodity trading on the one hand and the development of infrastructure to the energy business on the other.

OUR BUSINESSES:

Power: The Adani Group is implementing 16,500 MW of thermal power generation projects at seven locations in India with the objective of raising this to 20,000 MW by 2020. It is also investing in cross country power transmission lines to evacuate power from our generation facilities.

Coal: The Adani Group is India's the largest importer and supplier of coal and also the number one private mine developer and operator in the country. It owns development rights in massive coal mines in Australia and Indonesia. The group supplies nearly 30 million tonnes of coal to Indian companies and hopes to manage 200 million tonnes of coal by 2020.

Oil and Gas: The energy business basket of the Adani Group also includes the supply of Compressed Natural Gas to automobiles and piped natural gas to household users. Adani also entered into oil and gas exploration and production with development and production sharing rights in assets in India, Thailand and Egypt.

Port Infrastructure: The Adani Group has been engaged in the creation of a port and special economic zone, logistics management (shipping to container train movement), storage and movement (food grain and orchard products) as well as realty development. The group established India's largest private sector port and Special Economic Zone at Mundra (Gujarat) and is engaged in developing ports/terminals at Dahej, Hazira, Mormugao and Visakhapatnam in India and Abbot Point in Australia. The group aims to handle 200 million tonnes of cargo by the year 2020.

Agro-products: The Adani Group is also engaged in the business of agro-products (wheat, pulses and edible oil); its 'Fortune' brand is the largest edible oil brand in India today.
