 Kroger

We began this journey in November 2024 with a goal to shift from reactive service delivery (traditional service desk and end-user computing) toward a proactive, AI-driven model that enhances the user experience. Tech Mahindra partnered with us to take over service desk and end-user compute from the incumbent and drive that transformation.

Together we introduced tools such as the AI-driven NextGen Service Desk chatbot and the Nexthink predictive endpoint visibility solution. Within a year we transformed how users experience the service desk, raising our customer satisfaction score from 95% to 98% and gaining comprehensive visibility into our device fleet. I'm proud of how the Tech Mahindra and Enbridge teams came together in a way that is responsive, collaborative, and focused on outcomes. Many thanks to the Tech Mahindra team for their work; I look forward to many more years of partnership and continued transformation. ”
