PRESS RELEASE

AREVA T&D India Ltd Announces Q 3 Results of 2010: Sales increase 40% to Rs.1044 Crores; Profit After Tax increases 181 % to Rs. 63 Crores; Order backlog increases 8 % to Rs.4921 Crores

NOIDA, 1 November, 2010

The Board of Directors of AREVA T&D India Ltd. met on October 30th, 2010 to approve the third quarter and nine month results of the Company.

Boosted by an order intake of Rs. 855 Cr for Q 3 2010, the company order book has increased by 8% over last year. During the same period, Sales grew 40% to 1044 Cr and Operating Profit increased by 136% to 109 Cr, while Profit After Tax (from ordinary activities) jumped 181% to 63 Cr.

Cumulative Sales for nine months were Rs.2701 Cr, which is an increase of 12% over the corresponding period last year, supported by good all round burning of order backlog.

During the third quarter of 2010, AREVA T&D continued to strengthen its leadership in the market via several orders in the Transmission and Distribution segments, with both Public and Private customers. These included Power Grid's 765 kV Substation at Sasaram and 500 MVA Transformers. Several substations in 400 kV and 220 kV from MSETCL; 132 kV substations from WBSETCL; 765 kV Circuit Breakers and Distribution Transformers ordered by Reliance Infra for their Sasan plant and Generating Transformers for India Bulls. In addition several more orders were won from Aditya Aluminium, Enercon, Monnet Ispat and other leading customers. .

Mr. Rathin Basu, Managing Director of AREVA T&D India, said: *"The depressed international market has resulted in several Chinese and Korean competitors entering the T&D market with very challenging prices. In the last 18 months the domestic Utility market has not yet shown growth due to postponement of projects, arising from issues such as land acquisition, coal linkages, etc. Furthermore, Industry and Infrastructure segments continue to be in negative growth mode for the last 20 months as they are yet to launch new or significant Capex. The resultant pricing pressures have profoundly impacted and led to the need for serious measures in terms of productivity improvement, cost and process optimization. We are happy that AREVA T&D India's resilience in the face of such adverse forces has been successful in delivering on our KPIs to our stakeholders and at the same time, maintaining our market leadership position in the Indian T&D market".*
