Sub.:- Intimation about new plans.

The Company has installed bio gas plants on research basis which uses agriculture organic waste, food left over or/and cow dung. This plant produces organic compost fertilizer with our additive and produces bio gas which is used for fuel in kitchen or fuel in generator of 1 kv for lighting purpose or fuel for big generators in dual mode for power, agriculture, and lift irrigation.

2. The composite income of this bio gas plant with fuel power and fertilizer makes it green alternative sustainable models with payback of investment in less then one year.
3. The fertilizer so developed is organic & certified by eco-cert.
4. We are successfully using the land full of chemical fertilizer and pesticides and converting them into organic.
5. We are successful in doing agriculture in absolute saline land and we are doing successful agriculture activity in contract farming in absolute saline water (15000 TDS).
6. These successful demo plant of total package is working successfully in 10 acres of land in contract farming in costal belt of Gujarat.
7. We estimate income of Rs. 1 lac per year per acre.

We target execution of minimum 1000 acres of 1st contract farming by January 2012.
