

Acquiring Spikes Security

Unlocking embedded value in
Aurionpro's security business by
combining IDAM and Cyber security

Deal Parameters

- Create a dedicated subsidiary focused on Enterprise Security by merging Aurionpro's Enterprise Security divisions (US, UK, Australia) and Spikes Security
- Fresh equity investment from new and existing investors including Benhamou Global Ventures (BGV) and Javelin Venture Partners
- Aurionpro will own 80% in the combined subsidiary giving new company the strength of a larger organization

Spikes Security - An Overview

ABOUT SPIKES

- Founded in 2012 by Branden Spikes who was instrumental in building technology for Zip2, PayPal and SpaceX
- Spikes security is a pioneer in network security aimed to eliminate the #1 vector for cyber attacks on any organisation - the web browser.
- Isla, the flagship product leverages game-changing 'isolation' technology as against the traditional 'detect and protect' approach thereby completely eliminating all malware outside the enterprise's network perimeter proactively.

TARGET MARKET

Advanced malware attacks - such as spear phishing, zero-day malware, APTs, malvertising, are becoming increasingly undetectable

\$77B

Financial Services Cyber Security
Market cumulative – 2015-2020
growing at 19%
