Consulting ☐ Software Development ☐ Outsourcing

AURIONPRO ATTAINS THE HIGHEST LEVEL OF INTERNATIONAL VALIDATION FOR AN INFORMATION SECURITY PROGRAM BY ACHIEVING SSAE16 COMPLIANCE .

aurionPro announces the successful completion of its initiative to become SSAE16 compliant for its Pune software development center.

SAN FRANCISCO, CA - (Marketwire - March 22, 2012) - aurionPro today announced that its Pune, India Software Delivery Center, which provides expert-level Information Security, Enterprise Portal and Content Management Solutions, and SOA Management services delivered through its aurionPro SENA brand, has achieved SSAE16 (Statement on Standards for Attestation Engagements) Information Security compliance.

Independent auditors carried out the assessment and awarded the designation. This external validation builds on, and extends, the previously attained SAS70 Information Security designation. SSAE16 Type II, the replacement for the older SAS70 compliance program, provides a framework that more extensively embraces international accounting standards. It attests not only that security controls are defined, but that those controls are also being effectively used during the period of the examination. Successful completion of this process continues to highlight to our customers that aurionPro takes the security surrounding our development and operational systems very seriously. It also makes it easier for customers to engage with us since many questions from their internal auditing departments, Outside Service Provider programs and IT Controls are addressed by achieving the SSAE16 designation.

"This is the highest level of international compliance for an InfoSec program and is a very important milestone in terms of client assurance of the security of our operations", said Robert Levine, President of aurionPro Solutions, North America. "It also distinguishes us from our competitors in the market place, promoting confidence in our current and future Healthcare and Financial Services clients that they can confidently engage us for even the most data sensitive projects."

aurionPro has invested significantly in time and talent to achieve this goal. The result is that our customers and other auditors can be assured that we represent fairly the services that we provide, and that we have been independently validated regarding the effective operation of our controls.
