Commenting on the financial performance, Management Team of Baheti Recycling Industries Ltd, stated, "With three decades of pioneering sustainable metal recycling, Baheti Recycling Industries Limited has evolved into one of India's leading aluminium recyclers, trusted by over 150 clients worldwide. We are consistently expanding, now with a new 12,500 MTPA wire rod facility on our freehold land, leveraging cost advantages and strengthening our market position. Our adherence to Extended Producer Responsibility (EPR) and carbon emission controls sets us apart by enhancing sustainability, attracting more ESG-focused clients, and facilitating access to green supply chains which will become mandatory in India in the next few years. We are modernising our melting operations with the second TRF-Skelner unit alongside existing electric furnaces, boosting efficiency, yield, and product consistency.

With demand for recycled aluminium at an all-time high in India and internationally, Baheti Recycling Industries Limited stands proud as a partner-of-choice to marquee clients, but remains uncompromising in our approach to quality and profitability. While our strong capacities allow us to take on bulk orders, our focus is always on *sustainable growth*: scaling responsibly, maintaining these margins, and steadily becoming a cash flow positive business. This disciplined mindset ensures we capture sector tailwinds without sacrificing long-term value for stakeholders. Lastly, we are focused on reducing working capital and improving cash conversion cycles in H2FY26 to strengthen liquidity and confidently scale revenues. These strategic moves position us to lead in sustainable aluminium recycling through innovation, operational excellence, and financial discipline."

#### **About Baheti Recycling Industries Limited:**

Incorporated in 1994, we are an Aluminium Recycling company, primarily engaged in processing Aluminium based metal scrap to manufacture Aluminium alloys in the form of Ingots and Aluminium de-ox alloys which take shape of cubes, ingots, shots & notch bars. Our recycled products have end user applications in various industries such as Auto Ancillary, Automobile, Electrical Components, Die-Casting, Steel, Conductors and more.
