FINANCIAL HIGHLIGHTS Q1FY27

Key Highlights of the Quarter

Mr. Dundurapu Ram Reddy
Managing Director

We have commenced FY27 on a strong note, delivering healthy operational and financial performance with resilient margins, supported by improving demand across key end-user industries. Our diversified portfolio, integrated manufacturing platform and strong customer relationships have enabled us to capitalise on operational efficiencies and sustain performance despite global macroeconomic headwinds and the West Asia crisis.

During the quarter, we achieved a significant milestone with the commissioning of India's first commercial-scale 100,000 TPA Dimethyl Ether plant - an important step in our vision to diversify into new-age chemicals and alternate fuels, while reinforcing our commitment to import substitution.

Our NMM and Acetonitrile expansion projects remain firmly on track for commissioning by the end of the financial year, and the expansion at Balaji Speciality Chemicals Limited is progressing as planned. Backed by a healthy order pipeline, improving demand and disciplined execution, we remain confident of delivering sustainable growth in the coming years.

Executing the Next Growth Phase

Commissioning key projects while advancing the next phase of speciality chemicals expansion.

DME Successfully Commissioned (Q1 FY27)

STATUS: OPERATIONAL

- 100,000 TPA DME plant commissioned in Q1 FY27, marking India's first commercial-scale DME manufacturing facility.
- Creates exposure to clean fuel, LPG blending and aerosol propellant applications, strengthening the Company's energy transition portfolio.

NMM & ACN Expansion Progressing as Planned

STATUS: UNDER EXECUTION

- N-Methyl Morpholine (NMM) project progressing expected towards commissioning during FY27.
- Acetonitrile (ACN) expansion under execution, expected to be commissioned during FY27, supporting a broader speciality chemicals portfolio.

R&D Mechanism

IN-HOUSE R&D PROGRAMME

- Higher utilization of recently commissioned capacities expected to improve operational efficiency.
- Ongoing capacity additions continue to strengthen the Company's speciality chemicals platform.

As new capacities come on stream and ongoing projects progress toward commissioning, Balaji Amines is well positioned to leverage emerging opportunities in speciality chemicals, supporting long-term growth and value creation.

BSCL – Building Future Capabilities

Driving import substitution through phased commissioning of high-value speciality chemical platforms

BSCL Unit II – Phase I Progress

STATUS: UNDER EXECUTION

- Greenfield project comprising HCN, Sodium Cyanide, EDTA & EDTA-2Na under execution.
- Commissioning targeted by end-FY27, creating a new speciality chemicals platform for pharmaceuticals, agrochemicals, mining and water treatment.

BSCL Unit I – EDA Derivatives Platform

STATUS: UNDER EXECUTION

- EDA derivatives project (DETA, TETA, PIP, AEEA & AEP) progressing as planned.
- Commissioning targeted during FY27, expanding the company's portfolio of high-value speciality amines.

Phase II Expansion

STATUS: PLANNED

- Tri Ethyl Ortho Formate (TEOF) identified as the next phase of expansion.
- Expands BSCL's value-added product portfolio and supports future commercialization.

CYANATION R&D PROCESS

IN-HOUSE R&D PROGRAMME

- Translating complex cyanide chemistry processes into commercial production to replace current import dependencies for domestic pharma and agrochemical sectors

BSCL is progressing through a phased expansion program that strengthens Company's speciality chemicals platform, enhances import substitution capabilities, and creates long-term growth opportunities across regulated and industrial markets.

Positioned for Sustainable Growth

Capex-to-Cashflow Inflection

- **₹1000 Cr+** expansion cycle nearing completion on consolidated basis
- FY27 volume growth guided at **10-15%**, medium-term growth at **20-30%**
- Earnings acceleration expected as **DME, NMM, ACN** and BSCL projects ramp up

Unique Import-Substitution Franchise

- Only Indian producer of **Electronic Grade DMC** for EV battery applications
- India's first commercial-scale **DME (100 KTPA)** manufacturer
- The first and sole domestic manufacturer of **N-Methyl-2-Pyrrolidone (NMP)** in India
- Upcoming **HCN, Sodium Cyanide and EDTA** projects further strengthen import-replacement portfolio

Growth Without Leverage

- Standalone business remains **debt-free**
- Expansion funded largely through internal accruals
- Strong balance sheet with **₹2,152 Cr net worth** provides downside protection

Structural Margin Expansion

- Indigenous technology with **no royalty burden**
- Backward integration and methylamines scale-up driving cost leadership
- EBITDA margin targeted at **22-23% in FY27** vs ~20% in FY26

Balaji Amines is transitioning from an amines manufacturer to a speciality chemicals platform, driven by import substitution, EV-linked products, strong balance sheet strength and a large earnings-led capex payoff cycle.
