Press Release

BEL signs MoU with ADA, DRDO, for Advanced Medium Combat Aircraft programme

Bengaluru, February 21, 2023: Navratna Defence PSU Bharat Electronics Ltd (BEL) has signed an MoU with Aeronautical Development Agency (ADA), DRDO, for the Advanced Medium Combat Aircraft (AMCA) programme. The MoU was announced on the sidelines of the "Bandhan" event held at Aero India 2023.

The Advanced Medium Combat Aircraft is a 5th Generation, multi-role, all-weather fighter aircraft designed with high survivability and stealth capability. The MoU aims at leveraging the complementary strengths and capabilities of BEL and ADA, wherein both the parties will co-operate for the design, development, qualification, production and supply of Internal Weapon Bay Computer and other LRUs for AMCA and provide lifetime product support to the Indian Air Force.

About ADA

The Aeronautical Development Agency (ADA) was established under the Department of Defence Research and Development (DR&D), Ministry of Defence (MoD), Government of India, at Bangalore, in 1984 to oversee the development of the nation's Light Combat Aircraft (LCA) programme. The primary objective of ADA is the design and development of LCA to meet the Air Staff Requirements (ASR) specified by the Indian Air Force, and subsequently, the design and development of carrier borne naval variant and advance version of LCA (Mk1A, Mk2), Advanced Medium Combat Aircraft (AMCA), Twin Engine Deck Based Fighter (TEDBF) Aircraft, etc.

About BEL

Navratna PSU Bharat Electronics Limited (BEL) was established in 1954 under the Ministry of Defence, GoI, with a farsighted vision to make the country self-reliant in Defence electronics. Today, BEL is a multi-product, multi-technology, multi-Unit conglomerate which designs, manufactures and supplies state-of-the-art products and systems in a wide variety of fields including Radars, Missile Systems, Military Communications, Naval Systems, Electronic Warfare & Avionics, C4I Systems, Electro Optics, Tank Electronics & Gun/Weapon System Upgrades, and Electronic Fuzes in the Defence segment.

BEL's non-Defence business segment includes areas such as Electronic Voting Machines, Homeland Security & Smart Cities, Satellite Integration & Space Electronics, Railways, Artificial Intelligence, Cyber Security, Software as a Service, Energy Storage Products, besides Composite Shelters & Masts. BEL is fast expanding its global presence, putting its best foot forward to give a thrust to exports worldwide. All-out efforts are being made to tap new markets across the globe, including the Indian Ocean Region and friendly foreign countries.

Be it the efforts that the Company has been putting in to engage in collaborative R&D in addition to augmenting its own R&D set up — its recent attempts to outsource work to Indian private industries and MSMEs, or the path breaking decision to go in for Public-Private partnerships to execute turnkey projects, BEL is leaving no stone unturned to ensure that it is in sync with the Government's larger goal of indigenisation and self-reliance.
