## **Beta Drugs completes "COFEPRIS" for its Oncology formulation & API manufacturing plants**

Beta Drugs, a leading name in oncology pharmaceuticals, proudly announces that it has completed COFEPRIS (Federal Commission for the Protection Against Sanitary Risk) i.e. Mexico regulatory authority for its formulation manufacturing plant in Baddi, Himachal Pradesh, and API manufacturing plant (Adley Lab Limited) located in Derabassi, Punjab.

This breakthrough approval reinforces the company's global compliance and commitment to quality manufacturing. It adds to the growing list of international accreditations, including recent approvals from ANVISA (Brazil) and the Eurasian Economic Union (EAEU). These approvals demonstrate Beta's 'quality first' approach to work.

The COFEPRIS approval will pave the way for entry into Mexico's \$ 1.3 billion oncology formulation market — the second largest in Latin America after Brazil. The company has submitted 22 dossiers for finished formulation and 10 DMF's to expand its presence in Latin America.

COFEPRIS approval for Adley Labs (API Facility) will enhance API export business and allow the company to control its supply chain end-to-end. This approval will improve margins, ensure quality consistency, and reduce dependence on third-party API suppliers.

As Mexico is a part of PICS nation, COFEPRIS approval will open doors to register the APIs & finished formulations of the company to other PICS nations.

The company has also filed an application for EU audit for its formulation plant, which is expected to happen by December'25. Over the past few years, the company has been upgrading its facilities and expanding its footprint into new international markets, and will continue to grow exponentially in exports in the coming years.

The oncology market is growing rapidly across the world, and the company is well-positioned to meet the increasing demand for effective cancer treatments in India and international markets.
