## **BETA DRUGS RECEIVED DCGI NOD FOR MDS -O: A BREAKTHROUGH DRUG IN AML TREATMENT**

Beta Drugs Ltd (BDL) has developed an In-house Azacitidine Oral which is a New Drug Delivery System (NDDS) formulation of AzacytidineInj, with the brand name of MDS-O.

The company is introducing this novel breakthrough drug at very affordable cost to increase accessibility to Indian patients and thus will ensure the compliance to patients suffering from Acute Myeloid Leukaemia (AML), a type of blood cancer.

Oral Azacitidine is the only drug that improves overall survival in maintenance therapy for adult patients with AML

BDL had earlier brought a paradigm change in the treatment of myelodysplastic syndrome - with the launch of the brand "MDS" (Injectable Azacitidine). MDS-O is yet another progressive breakthrough in the treatment of Acute Myeloid Leukaemia.

Oral Azacitidine has huge scope in the Indian market considering high incidence of AML and the survival advantage it ensures, compared to existing chemotherapy drugs.

In this fiscal, the company is also strengthening its presence in the Renal cell carcinoma and Lung Cancer portfolio by introducing FTL's of Pazopanib & Afatinib generic version. Both these drugs will make product portfolio very robust.

The company is continuously strengthening its position in both Formulations & API market and expects to launch many novel FTL's in next 1-2 years.

BDL ensures the quality and affordability of its Oncology brands due to its ability to produce in-house API. It is proud to share that recently the company has developed & received approval to manufacture 2-DG API. In case of Covid spread out in the country, the company is ready to scale it.
