

BETA DRUGS LIMITED

Beta's Oncology Manufacturing Plant Receives ANVISA Approval

Beta Drugs Limited, a leading Oncology company, has received approval from ANVISA, the Brazilian Health Regulatory Agency, for its state-of-the-art oncology manufacturing plant located in Kharuni Lodhi Majra Road, Village Nandpur, Baddi, Himachal Pradesh, India.

The company received ANVISA for its oral solids (Tablets and capsules) and Injectables (Liquid and Lyophilized) formulations. Thus, Beta Drugs now has PICS certification (The Pharmaceutical Inspection Co-operation Scheme).

Following this, the gateway for several new opportunities in Brazil market (the 12th Largest Pharma market in the world) and other key potential markets like Thailand, Malaysia, Singapore, Iran, Mexico, Vietnam, Ukraine, and South Africa will open for the company. It has already shortlisted its partners in these countries and product registrations for both injectables and oral formulations will follow in the coming months.

Beta is also expecting EAEU (Eurasian Economic Union) audit in the month of May. The company is committed to providing innovative and effective healthcare solutions to patients around the world. The ANVISA approval demonstrates Beta's "Quality First" approach to work.

The oncology market is growing rapidly across the world, and Beta Drugs Ltd is well-positioned to meet the increasing demand for effective cancer treatments in India and international markets.
