Sub: Newspaper advertisement regarding Notice of Postal Ballot/ E-voting

Dear Sir/Ma'am,

Please be informed that the dispatch of Notice of Postal Ballot/ E-voting was completed electronically on Monday, June 29, 2026, to the eligible members of the Company seeking their consent for the matter stated in the Notice.

Accordingly, newspaper advertisements confirming completion of dispatch were published today i.e., on Tuesday, June 30, 2026, in the following newspapers:

1. Mint (English); and
2. Hindustan (Hindi).

A copy of the above is enclosed herewith.

The above information is also available on the website of the Company at <https://www.industowers.com/investor/>.

Kindly take the same on record.

Thanking you,

For **Indus Towers Limited**

Samridhi Rodhe
Company Secretary & Compliance Officer

Predictions markets emerge in Japan, with shopping vouchers

Rise of tech hits China's energy forecasts

Leading the charge are homegrown platforms launched by Gen Z entrepreneurs

Even as prediction platforms like Polymarket and Kalshi surged into the global mainstream in recent years, Japan—like its Asian neighbours China and South Korea—remained a no-go zone due to strict anti-gambling regulations. That may be starting to change, thanks to enterprising new startups that are finding ways to skirt regulations. Leading the charge are homegrown platforms launched by Gen Z entrepreneurs. Spearheaded by seven-month-old Miraima, the apps allow users to wager on real-world events and win points that can be converted into monetary rewards such as gift cards—an indirect payout system that's similar to the workload reward by pachinko, the country's \$800-billion pinball gaming industry, to remain legal.

It's a bit addictive, said Ryoga Kamet, an IT engineer in his twenties who says he's earned more than 10,000 yen a month in points on Miraima and similar apps. A soccer fan, he mostly bets on sports matches. "I find myself opening the apps whenever I have spare time," he says. "There's news that might move the odds," he said.

While the apps are still in their infancy, their compulsive appeal has nonetheless fueled rapid user growth. Miraima, Japan's largest such platform, has amassed close to 1 million monthly users since its debut in November, helped by interest in recent sporting events like the World Cup. Rival Poppy rolled out a similar app earlier this year, while mobile gaming developer Gumi Inc. also

launched a point-based prediction game in June. Japan's nascent prediction market platforms are closely modelled on Polymarket and Kalshi in that they enable users to bet on the outcomes of live events ranging from sports matches to stock movements and reality television. Players choose from binary or multiple-choice outcomes and are rewarded if they're correct. But unlike Polymarket or Kalshi, no money changes hands: the entire system is built on non-monetary virtual tokens that can later be swapped for gift coupons or retail loyalty points.

The apps tap into the recent popularity of *poi-katsu* (short for point *katsudo*, or point activities) where Japanese consumers gamify shopping to collect reward points on payment platforms like PayPay and Rakuten, much like frequent flyers accumulating airline miles.

Miraima users initially make bets using points earned from setting up an account, watching adverts or playing in-app games. When players win a wager, they earn points which can be used for more bets, converted into digital rewards like Amazon gift cards, or used for payments on PayPay and Rakuten.

"I saw prediction markets exploding in the US and immediately thought there was huge potential for this in Japan," said Miraima founder Keita Adachi, a 27-year-old tech entrepreneur who previously founded blockchain startup Mosaic with backing from Japanese soccer star Keisuke Honda. "Since real money gambling isn't possible, we built the platform around Japan's strong gaming and point-collecting culture."

The apps' popularity underscores

While the apps are still in their infancy, their compulsive appeal has nonetheless fueled rapid user growth.

the country's reputation as one of the world's most potentially attractive markets for gaming, with a deep-seated betting culture and high levels of household wealth. To curb illegal, black-market gambling, the government has long limited the pastime to outlets including pachinko and local lotteries. Pachinko parlors circumvent gambling bans by awarding winners tokens, which are traded for cash at separate stand-down the block.

Japan's state-backed betting on horse racing, speed boating and keirin bicycling, but these operations have recently seen action move online. Pachinko has also been

falling out of favor with younger generations who prefer scrolling online at home over sitting in front of machines. But even in a decline, the industry was still worth over \$100 billion in 2024—more than Las Vegas and Macau combined.

Most popular among men in their 20s, Miraima's growth was boosted by Japan's lower house election in February, a key political moment that users promptly turned into a national guessing game. Many were galvanized by the rise of Prime Minister Sanae Takahashi, whose assertive style and projection of economic security and national strength resonated with young male voters and

translated into engagement on the platform. In recent months, however, the most active wagers on the platform have been sports-related.

Polymarket and Kalshi currently block or discourage users in Japan from betting on their platforms and have not conducted an official marketing in the country. Habitual gambling is punishable in Japan by up to three years in prison, a law that deters most would-be users from attempting to use a VPN to access the sites.

Seeing long-term possibilities, Polymarket recently appointed a local representative to spearhead a lobbying campaign for government approval, according to people familiar with the matter. Polymarket declined comment on its activities in Japan but said it has seen growing interest in the country and across Asia. Kalshi declined comment.

"Japan still has an arcade market where people are willing to spend enormous amounts of money," said Masa Suganuma, a gaming analyst and former manager at videogame firm Konami. "Foreign companies think that Japanese consumers love this kind of thing, and they definitely see the potential."

Because of real money or cryptocurrency changes hands on apps like Miraima and Poppy, the risk of losing significant sums is much lower than on global platforms that allow betting with cash and its equivalents. However, the gamified pursuit of these point voucher rewards can still be considered addictive, and some lawyers say it could yet face scrutiny under Japan's regulations covering sweepstakes.

Long term, both Shirasaka and Miraima's Adachi harbour ambitions to monetize via real-money prediction

markets, if they're re-approved in Japan. Shirasaka said he plans to join Polymarket's lobbying efforts.

Lawyers say it won't be easy, and warn that the platforms could attract a crackdown on the slightest negative publicity. While Japan legalized casino resorts in 2018 to attract tourists and is set to open its first-ever casino resort in Osaka in 2030, it will come with tight restrictions, including steep entrance fees designed to prevent players from getting hooked.

The potential involvement of minors further complicates the legal outlook. While Polymarket and Kalshi require users to be at least 18 years old, Japanese point-based services currently do not impose age restrictions. "The presence of minors on these platforms would increase both the legal risk profile and the likelihood of regulatory intervention," said Shinichiro Mori, a managing partner at Tokyo-based law firm Mori & Partners.

Already, some lawmakers are calling for a closer look at real-money prediction markets. The opposition Democratic Party for the People called for regulatory discussion on the industry in parliament in April.

Many of Japan's Asian neighbours have moved more quickly to restrict the platforms. South Korea's media regulator said last month that it had opened a formal review into whether Polymarket hosts illegal gambling content. India has asked internet providers to block access to Polymarket, Kalshi and other similar sites, while Indonesia banned Polymarket in May due to gambling concerns.

While China has explicitly outlawed prediction markets, its strict ban on gambling is seen as covering platforms like Polymarket.

China faces greater uncertainty in forecasting energy demand as structural changes in the economy and the rapid expansion of new industries reshape consumption patterns, according to top government officials.

Demand over the past five years surpassed the government's expectations, said Ren Yuzhi, director general of the planning department at the national energy administration (NEA). The growth of artificial intelligence (AI), electric vehicles (EVs) and other emerging sectors is compounding the problem for energy planners.

Deliberations extend to potentially rethinking China's geography and where electricity is consumed.

"Forecasting future energy demand, especially electricity, is a key challenge in the next planning cycle," Ren said in an interview on Friday, after his agency released more details on the energy component of China's next five-year plan that runs through 2030.

"AI computing centres and the development of electric vehicles are important factors," he said. "EVs, in particular, have seen faster growth in recent years—especially this year—and charging demand has risen significantly."

The task is made more complicated by China's transition to cleaner but less consistent renewable energy. It expects an average annual increase in power demand of 600 billion kWh in the next five years, according to the NEA, which would be more than Germany produces in a year. That compares to 570 billion kWh over the past five years, said Ren.

मुनाफा घटता देख पुराने सोने की बिक्री बढ़ी भारतीय परिवारों में नकद रखने का चलन फिर तेज

बाजार 30 S

रिपोर्ट

नई दिल्ली, एजेंसी। सोने की रिपोर्ट तेजी के बाद अब इसकी कीमतों में गिरावट देखने को मिल रही है। इसी के चलते भारतीय परिवारों ने अप्रैल-जून तिमाही में करीब 50 टन पुराना सोना बेच दिया।

इसलिए टूट रहे सोने के भाव

वर्तमान में अंतरराष्ट्रीय बाजार में सोने की कीमतों पर दबाव बना हुआ है। वहीं, अमेरिकी फेडरल बैंक की ओर से ब्याज दरों में और बढ़ोतरी की संभावना ने भी सोने की कीमतों को कमजोर किया है।

आयात पर निर्भरता कम होगी

भारत दुनिया के सबसे बड़े सोना उपभोक्ताओं में शामिल है, लेकिन अपनी जरूरत का ज्यादातर सोना आयात करता है। वित्त वर्ष 2025-26 में देश ने करीब 72.4 अरब डॉलर का सोना आयात किया। अगर पुराने सोने की रीसाइक्लिंग का मौजूदा ट्रेंड जारी रहा, तो इससे आयात पर निर्भरता कम हो सकती है।

छोटे नोटों की बढ़ी चाहत

दिलचस्प बात यह है कि कुल नकदी बढ़ने के बावजूद ₹500 के नोटों की हिस्सेदारी में मामूली गिरावट आई है। 19 जून 2026 तक कुल प्रचलित मुद्रा में ₹500 के नोटों का हिस्सा 85.7 प्रतिशत से घटकर 85.4 प्रतिशत रह गया। इसके उलट ₹100 के नोटों की हिस्सेदारी 6.3 से बढ़कर 6.7 प्रतिशत और ₹200 के नोटों की 5.03 से बढ़कर 5.1% हो गई।

शेयर बाजार

सामान्य वेतन पर भी बढ़ी पेंशन मिलेगी

तैयारी

नई दिल्ली। कर्मचारी भविष्य निधि संगठन पेंशन व्यवस्था में बड़े बदलाव की तैयारी कर रहा है। प्रस्तावित बदलाव लागू होने पर सामान्य वेतन पाने वाले कर्मचारियों को भी सेवानिवृत्ति के बाद अधिक मासिक पेंशन मिलने का रास्ता खुल सकता है।

भविष्य में होंगे बड़े लाभ, लंबी नौकरी पर बड़ा होगा फंड

Table with 5 columns: Year, Monthly Income, Annual Contribution (12%), Savings Fund (Employee Share), and Pension (Employee Share).

अधिक पेंशन के लिए दो विकल्पों पर चल रहा विचार

1 मंत्रालय में ईपीएफओ सदस्यों को दो तरह के विकल्प दिए जाने पर मंथन चल रहा है। पहला, अगर सदस्य 58 वर्ष में सेवानिवृत्त होता है और चाहता है कि उसकी पेंशन तत्काल शुरू न हो, बल्कि 65 या 70 वर्ष की आयु में शुरू हो।

पेट्रोल-डीजल की खरीद सीमा खत्म

नई दिल्ली, विशेष संवाददाता। पश्चिम एशिया में स्थिति सामान्य होने के साथ सरकार ने पेट्रोलियम पदार्थों की आपूर्ति सुनिश्चित करने के लगाई गई पारदर्शिता में छूट देनी तय कर दी है। सरकार ने पेट्रोल और डीजल की खरीद पर लगाई गई खरीद सीमा को एक जुलाई से खत्म करने का फैसला किया है।

कारोबारी को कार्रवाई से पूर्व सुधार का मौका मिलेगा

नई दिल्ली, विशेष संवाददाता। उपभोक्ता मामलों के विभाग ने जन विश्वास (प्रावधानों में संशोधन) अधिनियम 2026 के तहत विधिक माप विज्ञान अधिनियम, 2009 के तहत सुधार नोटिस व्यवस्था लागू की है।

मालदीव से सरकार के लिए वार्ता शुरू

नई दिल्ली, एजेंसी। भारत और मालदीव ने सोमवार को मुक्त व्यापार समझौते के लिए बातचीत शुरू कर दी है। वाणिज्य विभाग ने कहा कि यह बातचीत वर्चुअल माध्यम से हो रही है और 29 जून से सात जुलाई तक चलेगी।

मई में औद्योगिक उत्पादन 5.1% बढ़ा

नई दिल्ली, एजेंसी। देश की औद्योगिक गतिविधियों में मई के दौरान मजबूती देखने को मिली। पश्चिम एशिया में जारी तनाव के बावजूद मई 2026 में औद्योगिक उत्पादन सूचकांक सालाना आधार पर 5.1 प्रतिशत बढ़ा।

राजीव कुमार एचडीएफसी के अध्यक्ष बने

नई दिल्ली, एजेंसी। एचडीएफसी बैंक के निदेशक मंडल ने सोमवार को पूर्व वित्त सचिव राजीव कुमार को अपना नया चेयरमैन नियुक्त किया। एचडीएफसी बैंक ने नियामकीय सूचना में बताया कि निदेशक मंडल ने राजीव कुमार को चार साल के लिए बैंक का स्वतंत्र निदेशक नियुक्त करने को मंजूरी दी है।

कई एफटीए पर वार्ता फिलहाल अटकी

नई दिल्ली, एजेंसी। वाणिज्य एवं उद्योग मंत्री पीयूष गोयल ने सोमवार को कहा कि पश्चिम एशिया में जारी संकट के कारण इजरायल और छह सदस्यीय खाड़ी सहयोग परिषद (जोसीसी) के साथ भारत के मुक्त व्यापार समझौते (एफटीए) पर बातचीत अभी कुछ समय के लिए रुकी हुई है। हालांकि, उन्होंने कहा कि चिली, मेक्सिको, दक्षिण अफ्रीका के नेतृत्व वाले एसएसपीयू समूह, रूस के नेतृत्व वाले यूरेशिया ब्लॉक और मकोसूर के साथ व्यापार समझौते के लिए बातचीत जारी है।

सात हजार करोड़ का लाभांश सौंपा

नई दिल्ली, एजेंसी। सार्वजनिक क्षेत्र के केनरा बैंक, बैंक ऑफ बड़ोदा और इंडियन बैंक ने वित्त वर्ष 2025-26 के लिए केंद्र सरकार को कुल 7,023 करोड़ रुपये का लाभांश दिया है। केनरा बैंक ने वित्त मंत्री निर्मला सीतारमण को 2,397 करोड़ रुपये के लाभांश का चेक सौंपा। बैंक ऑफ बड़ोदा ने वित्त मंत्री को 2,811 करोड़ रुपये के लाभांश का चेक सौंपा। इसके अलावा, इंडियन बैंक ने वित्त मंत्री को 1,815.05 करोड़ रुपये के लाभांश का चेक सौंपा।
