BikeWo Green Tech Signs Strategic MoU with Kwik Flite Support to Explore Aviation Logistics

Collaboration aims to evaluate integrated air cargo and aviation logistics solutions, strengthening BikeWo's vision of building a multimodal mobility ecosystem

Hyderabad, July 13, 2026– BikeWo Green Tech Limited has signed a strategic MoU with **Kwik Flite Support Private Limited**, operating under the brand **KlikAir**, to jointly evaluate and develop an integrated air cargo, aviation logistics, and multimodal freight platform that complements BikeWo's expanding mobility and logistics ecosystem.

The strategic collaboration marks another significant milestone in BikeWo's long-term vision of creating a comprehensive mobility and logistics ecosystem that seamlessly integrates **road, air, and future technology-enabled transportation networks**.

Under the proposed collaboration, both companies will jointly explore and evaluate pilot air cargo operations, assess commercial opportunities, and develop scalable operating models for high-value and time-sensitive logistics. The proposed pilot will initially focus on sectors such as **healthcare, pharmaceuticals, e-commerce, electronics, automotive components, industrial spare parts, and enterprise supply chains**.

The collaboration is expected to evaluate the complete **logistics value chain, including first-mile cargo collection, airport logistics and cargo handling, air transportation, last-mile delivery, technology-enabled shipment tracking and visibility, enterprise logistics solutions, and airport-to-airport as well as airport-to-door cargo movements**.

Subject to successful pilot outcomes, **BikeWo and KlikAir** will explore the feasibility of establishing a **scalable, technology-enabled air cargo platform connecting metropolitan cities with Tier-II and Tier-III markets through an integrated network of road and aviation logistics**. The partnership will also evaluate future opportunities in regional **air logistics, express cargo services, advanced air mobility, drone-enabled logistics, and other emerging transportation technologies**.

India's logistics industry is witnessing rapid transformation, driven by growing demand for faster, technology-enabled, and multimodal supply chains. Through this collaboration, BikeWo aims to assess how air logistics can complement its existing mobility ecosystem while creating new possibilities for businesses requiring speed, reliability, and nationwide connectivity.

Commenting on the development, **Hiten Pal Saklani, CEO, BikeWo Green Tech Limited**, said: *"Our vision extends beyond conventional road transportation. We believe the future belongs to integrated mobility platforms capable of moving goods seamlessly across multiple transportation modes. This collaboration enables us to evaluate air cargo as a strategic extension of our logistics platform and reinforces our commitment to building next-generation logistics infrastructure for India. By combining road mobility with aviation capabilities, we aim to explore innovative logistics solutions that can better serve enterprises across diverse industries."*

Prem Kumar, Director, Kwik Flite Support Private Limited, said: *"Combining BikeWo's logistics capabilities with KlikAir's aviation expertise creates an exciting opportunity to explore innovative air cargo solutions for India's rapidly evolving logistics market. We look forward to jointly evaluating commercially scalable opportunities that enhance speed, connectivity, operational efficiency, and customer experience across the country."*

The collaboration aligns with BikeWo's broader strategy of expanding its presence across integrated mobility and logistics while leveraging technology to build future-ready transportation infrastructure.

About BikeWo Green Tech Limited

BikeWo Green Tech Limited is a technology-driven mobility and logistics company focused on building sustainable transportation and integrated logistics solutions. The company is expanding its ecosystem across mobility, logistics, fleet solutions, and emerging transportation technologies to address the evolving needs of businesses and consumers across India.
