SUITS & SAYINGS

ET's roundup of the wackiest whispers in corporate corridors

Hidden Costs

When rising costs become difficult to defend, one solution is to make them slightly harder to spot. That, at least, seems to be the playbook at parts of the mutual fund industry. Sebi's rules require all expenses to be reflected in the Total Expense Ratio (TER), pushing up the headline cost of several schemes, particularly those with high portfolio churn. The timing is awkward. Investors and distributors have begun asking uncomfortable questions about fatter expense ratios at a time when returns have been underwhelming and churn remains high, especially in arbitrage funds. We hear at least two listed fund houses—one backed by a large private-sector bank and another by a diversified conglomerate—have quietly taken to highlighting only the Base Expense Ratio (BER) in their factsheets.

BDR Eyes Controlling Stake in Acme Formulation

ON THE BLOCK Mumbai drug co in talks to buy private equity firm PAG's stake in a deal that values the CDMO firm at about $250 million

Reghu Balakrishnan & Rica Bhattacharyya

Mumbai: BDR Pharmaceuticals, the Mumbai-based specialty drugmaker, is in advanced talks to acquire contract development and manufacturing organisation (CDMO) Acme Formulation from private equity firm PAG, according to multiple people with direct knowledge of the matter. The proposed transaction is expected to value Acme at $200-250 million, the sources said.

PAG acquired a controlling stake in Acme Formulation for $145 million (₹1,054 crore) through its PAG Asia III buyout fund in 2021. Founder and managing director Viral Shah retained a significant minority stake after the transaction and continued as managing director and CEO. PAG owns about 62% of the company, while Shah holds around 31%, with the balance owned by other investors.

According to people familiar with the discussions, BDR will acquire PAG's controlling stake, while Shah is expected to continue with the company as a minority shareholder. Several private equity firms and strategic buyers, including Akums Drugs & Pharmaceuticals, had also evaluated the asset, the sources added.

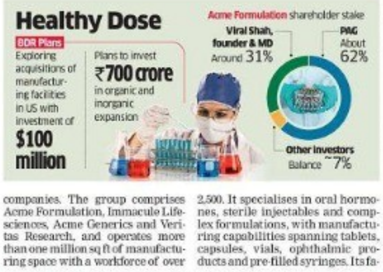
Founded in 2005 and headquartered in Himachal Pradesh, Acme is among India's leading CDMOs, providing integrated R&D, product development and contract manufacturing services to leading domestic and multinational pharmaceutical companies. The group comprises Acme Formulation, Immacule Lifesciences, Acme Generics and Veritas Research, and operates more than one million sq ft of manufacturing space with a workforce of over 2,500. It specialises in oral hormones, sterile injectables and complex formulations, with manufacturing capabilities spanning tablets, capsules, vials, ophthalmic products and pre-filled syringes. Its facilities are approved by major global regulators, including the US FDA, UK MHRA, EU GMP and Health Canada, while its growing US generics business has secured 38 approved ANDAs with another 18 under review.

The company exports to more than 40 countries and counts Abbott, GSK, Sandoz, Biocon, Merck, Alkem, Baxter, Torrent Pharmaceuticals, Cipla, Emcure, Mankind Pharma, Dr Reddy's Laboratories, Lupin and Zydus among its customers.

Financially, Acme has delivered a sharp improvement in profitability despite softer sales over the past two years. According to Tracxn, revenue declined to $68.3 million in FY25 from $71.3 million in FY24, but Ebitda rose 26% to $14.6 million from $11.9 million, reflecting improved operating efficiencies and tighter cost management. Net profit jumped 35% year-on-year to $8.5 million from $6.4 million, while registering a five-year CAGR of 45%.

A BDR Pharmaceuticals spokesperson declined to comment. Emails sent to PAG remained unanswered until press time.

The acquisition would strengthen BDR's fast-growing CDMO business, which focuses on oncology, critical care, women's healthcare and dermatology. The company is also known for developing and commercialising new and fourth-generation medicines across complex therapeutic segments. Speaking to ET last year, BDR chairman Dharmesh Shah said the company was exploring acquisitions of manufacturing facilities in the US.



Q1 SHOW: KEEPING THE MOMENTUM

L&T Net Up 14% as Focus Across Sectors Pays Off, But Margins Slide a Little

Our Bureau

Mumbai: Infrastructure major Larsen & Toubro (L&T) on Tuesday reported a 14% year-on-year increase in consolidated profit after tax (PAT) at ₹4,123 crore for the quarter ended June 30, 2026, compared with ₹3,617 crore in the year-ago period.

Consolidated revenue stood at ₹67,942 crore, rising 6.7% year-on-year from ₹63,678 crore, driven by progress across its businesses.

Ebitda, however, came in at ₹6,116 crore, down 3.2% from ₹6,318 crore in the corresponding quarter last year. The Ebitda margin stood at 9% in the quarter, compared with 9.9% a year ago.

SN Subrahmanyan, chairman and MD, said, "The financial year has commenced against the backdrop of geopolitical uncertainties. The company has managed to maintain momentum by rotating its focus across sectors and geographies while maintaining robust cash flows. The performance for the quarter reflects our portfolio resilience."

During the quarter, L&T concluded the sale of Nabha Power and signed the share purchase agreement with Hyderabad Metro Rail (HMRL), a government of Telangana enterprise, to divest 100% of its stake in Hyderabad Metro SPV.

HUL Net Slips a Tad on Tax Outgo, But Maintains Margin Guidance

Profit, excluding the exceptional item, rises 9%; co to focus on volume-led revenue growth

Our Bureau

Mumbai: Hindustan Unilever (HUL) expects FY27 to be better than the previous year while maintaining its long-term Ebitda margin guidance of 22-23%, betting resilient consumer demand and calibrated pricing will help offset persistent commodity inflation and geopolitical uncertainty.

Shares of India's largest consumer goods maker fell 7% after the outlook, despite the company reporting its strongest quarterly growth in 13 quarters, as investors weighed continued input cost pressures and a subdued margin trajectory. HUL managing director Priya Nair said she remained obsessed with volume-led revenue growth, indicating the company will prioritise market expansion over aggressive pricing.

"When you look at the quarter that's gone by, we see stable demand between both urban and rural, continuing to be robust," Nair added. "We will be watchful of the two key issues that are the monsoon conditions and the El Niño impact. Monsoon agriculture is now only 15% of India's GDP, and, therefore, the impact overall of monsoon (to GDP) could be between 50 and 60 bps. But we have to watch the distribution of the monsoon geographically, and also the timing and the extent of the monsoon."

Revenue for the June quarter rose 10% to ₹17,184 crore from ₹15,565 crore a year earlier. Reported net profit declined 2% to ₹2,343 crore from ₹2,388 crore because the year-ago period included a one-time tax credit. Excluding the exceptional item, net profit increased 9%.

"In spite of the Middle East crisis, in spite of inflationary pressure, we continue to see a robust consumer demand and very good domestic demand in the country," Nair added.

The maker of Surf Excel detergent and Dove soap said underlying sales growth was driven equally by volume and pricing, while underlying volume growth stood at 5%.

She attributed the acceleration in growth to sharper resource allocation towards high-growth categories, stronger distribution, channel-specific execution and continued investments behind brands.

The company said commodity inflation remains volatile and expects sequential inflation of 2-5% in the coming quarter, driven by continued uncertainty in global markets and the Middle East conflict. HUL, which is considered as a proxy for consumer demand in India, said it would continue to rely on a mix of calibrated price increases, cost savings and supply-chain efficiencies rather than passing on the full impact to consumers.

"As of now, we are seeing stable consumer demand, and this is also a result of our very calibrated pricing approach. We have not done a 10% price hike against a 10% inflation, we do it in a manner that the consumer franchise is protected," said HUL chief financial officer Niranjan Gupta.

Home Care remained the strongest-performing business, with 14% underlying sales growth led by high single-digit volume growth as fabric wash and household care posted double-digit gains. Beauty & wellbeing grew 12%, driven by strong hair care and premium skincare, while personal care rose 4% as sustained palm oil inflation weighed on mass soaps despite double-digit growth in premium bars and body wash.

India a Key Contributor to Unilever's Growth Story, will Continue to Invest Here, says CEO Fernandez

Aanya Thakur

Mumbai: Unilever chief executive Fernando Fernandez said that the company will continue to invest in India to protect its leadership position in the country. "We believe that the next decade is the decade of India," he told investors, adding that the country will be a key contributor to the growth story of Unilever. The dove soap maker expects its India arm, Hindustan Unilever, to deliver a high-single digit growth in the coming quarters, with profit growth slightly outpacing revenue growth, according to chief financial officer Srinivas Phatak. HUL has outperformed its global counterparts in terms of significant metrics in the first quarter of FY27, such as volume and value growth which stood at 5% and 10%, respectively. It has also led the way in the home and personal care segment globally. "India, which is our second largest market, has accelerated strongly," said Fernandez, adding that the company has achieved a record market share in the country in both laundry and hair, its two biggest categories here. The company's performance in India was also strengthened by growth across channels, with an improvement in general trade. "This was a channel that was not growing for us, now it is growing in the mid to high single digit," said Fernandez.

Suzlon Steps Up Expansion, Plans Global Market Push

Kalpana Pathak

Mumbai: Suzlon Energy plans to set up a rotor blade manufacturing plant each in Gujarat, Karnataka and Tamil Nadu in the next 12 months as the wind energy company accelerates its manufacturing expansion to meet an expected surge in domestic demand and a planned entry into international markets, said a senior executive.

This follows the commissioning of an ₹87 crore capacity addition at its Akal facility in Jaisalmer, Rajasthan, where rotor blade manufacturing capacity has been doubled to 1.26 GW from 600 MW. Suzlon's total blade manufacturing capacity is now about 4.5 GW across 15 facilities.

The capacity expansion comes as the company targets 10 GW of renewable energy sales by FY31, with wind expected to account for about 75% of the portfolio, and the balance coming from non-wind technologies.

Suzlon has earmarked capital expenditure of ₹600-700 crore this fiscal year on capacity expansion and strategic investments under its Suzlon 2.0 growth strategy, Ajay Kapur, CEO, Suzlon Group, told ET after the company's June quarter earnings.

6%
DECLINE IN ITS CONSOLIDATED NET PROFIT AT ₹305 CRORE

"We are going to have more demand coming in," he said. "We are also looking at international markets, and part of the production will get exported out of India," he said, explaining the rationale for the expansion.

Suzlon Tuesday reported a 6% decline in consolidated net profit at ₹305 crore for the June quarter. The company had posted a consolidated net profit of ₹324 crore in the corresponding quarter of the previous fiscal.

Varun Beverages Profit Rises Over 15% on Volumes, Overseas Growth

Our Bureau

New Delhi: Varun Beverages (VBL) reported a net profit increase of 15.5% year-on-year at ₹1,521 crore for the quarter ended June 2026 which it attributed to strong volume growth in India and international markets.

Total revenue from operations for PepsiCo's second largest bottling company, excluding excise duty, went up 20.4% year-on-year to ₹8,451 crore. PepsiCo's second largest franchise bottler outside US saw international operations driving higher growth in the June quarter, with volumes from overseas markets expanding at nearly three times the pace of its India business during the June quarter.

Its international volumes surged 38.4% year-on-year in the quarter under consideration, in comparison to 14.4% growth in India, with consolidated sales volumes increasing 19.8% to 466.7 million cases, the company reported.

However, VBL's earnings fell short of street estimates, with shares dropped 8% in Tuesday's trade to touch a low of ₹429 on the BSE. The company said in an exchange filing that finance costs climbed 55.8% year-on-year on account of its acquisition of beverage maker Twizza in South Africa. Income earned on surplus cash in India was accounted for under other income, it said.

VBL said it recorded healthy volume growth from March onwards, with peak summer setting in, except in the month of April when volumes were flat, leading to overall 14.4% volume growth for the quarter. However, its Ebitda margins declined to 27.7% from 28.5% a year ago, indicating higher operating costs despite healthy revenue growth.

VBL has also extended its exclusive bottling and trademark license agreement with PepsiCo till April 30, 2049. The updated agreement, announced by VBL this year in May, replaces the earlier term that was valid till April 30, 2039. The revised deal marks a shift in VBL's operational freedom. As per previous agreement, VBL was restricted to functioning as a special purpose vehicle (SPV) for PepsiCo, preventing it from pursuing independent ventures.

Ambuja Cements Profit Falls 37% on Weak Volumes

Co to focus on value ahead of volume as higher imported fuel prices and trade costs weigh on industry: CEO

Nikita Periwal

Mumbai: Ambuja Cements is shifting its focus to value over volumes, the country's second-largest producer of cement said on Tuesday, while maintaining that it would outpace the industry with a 8% volume growth for the fiscal.

The Adani-owned company's volumes fell a little over 7% year-on-year to 17.1 million tonnes in the June quarter; of all the listed cement majors which have reported earnings for the quarter so far, it is the only one to see a decline in volumes.

"Our priority is no longer simply adding capacity, but it is converting scale into high productivity, superior profitability, and stronger returns on capital," chief executive officer Vinod Bahety said on a call post the earnings.

The weak volumes in the June quarter, along with cost pressures weighed on its consolidated bottom line, pulling it down by 37% year-on-year to ₹660 crore for the June quarter. Consolidated revenue from operations fell 8% on year to ₹9,500 crore, while earnings before interest, tax, depreciation and amortization (Ebitda) fell 19% to ₹1,589 crore.

"Our strategy remains clear and consistent, creating sustainable value ahead of volume," Bahety said. While demand for cement remained stable during the quarter, profitability across the industry remained under pressure from higher imported fuel prices, elevated trade costs, and geopolitical developments in West Asia, he said.

"We used this as an opportunity to perform scheduled maintenance for almost 12% of our kilns, absorbing additional costs of ₹50 per metric tonne this quarter, while we built up clinker inventory of one month and coal inventory of around three months, giving us a competitive edge in the second quarter," he said. The September quarter is seasonally the weakest for cement companies as demand slows down amid lower construction activity due to monsoon rains.

For the June quarter, Ambuja Cements managed to bring down its cost of production by around 2% on year to ₹4,241 per tonne, but the Ebitda made on each tonne of cement fell nearly 13% to ₹931 per tonne. Ebitda margins also fell by 240 basis points on year to 16.7%.

Ambuja Cements pegged the industry growth at around 5% for the fiscal amid headwinds, but remained confident of a 8% growth for itself.

मध्यप्रदेश खरीफ 2026 की बुवाई में तेजी, सोयाबीन और मक्का ने दिखाई मजबूती

22 जुलाई तक 122.49 लाख हेक्टेयर से अधिक बोवनी

सोयाबीन, मक्का, तुअर और मूंग की बुवाई में अच्छी प्रगति, धान और ज्वार की बुवाई अभी लक्ष्य से पीछे

स्वदेश समाचार ■ भोपाल

मध्यप्रदेश में खरीफ 2026 सीजन के दौरान फसलों की बुवाई तेजी से आगे बढ़ रही है। 22 जुलाई 2026 तक राज्य में प्रमुख खरीफ फसलों की बुवाई 122.49 लाख हेक्टेयर क्षेत्र में हो चुकी है, जो निर्धारित लक्ष्य 150.45 लाख हेक्टेयर का करीब 81.4 फीसदी है। राज्य के कृषि आंकड़ों के अनुसार, सोयाबीन अब भी किसानों की पहली पसंद बनी हुई है। सोयाबीन की बुवाई 51.40 लाख हेक्टेयर में हो चुकी है, जो लक्ष्य 54.09 लाख हेक्टेयर का करीब 95 फीसदी है। हालांकि यह आंकड़ा पिछले साल की समान अवधि में हुई 51.01 लाख हेक्टेयर बुवाई के लगभग बराबर है।

खरीफ अनाज फसलों में मक्का ने सबसे बेहतर प्रदर्शन किया है। 22 जुलाई तक राज्य में 25.61 लाख हेक्टेयर में मक्का बोई जा चुकी है, जो सामान्य क्षेत्रफल का 162.4 फीसदी है। यह पिछले साल की समान अवधि के 24.61 लाख हेक्टेयर से भी अधिक है। वहीं बाजरा की बुवाई 2.89 लाख हेक्टेयर और ज्वार की बुवाई 0.54 लाख हेक्टेयर में हुई है। धान की बुवाई 19.54 लाख हेक्टेयर क्षेत्र में हुई है, जो लक्ष्य का लगभग 49.3 फीसदी है।

राज्य में कुल तिलहन फसलों की बुवाई 58.66 लाख हेक्टेयर में हुई है, जो निर्धारित लक्ष्य का 93 फीसदी है। सोयाबीन के अलावा,

मूंगफली, 5.34 लाख हेक्टेयर, तिल 1.92 लाख हेक्टेयर नाइजर और अन्य 0.01 लाख हेक्टेयर,मूंगफली की बुवाई सामान्य क्षेत्रफल के मुकाबले लगभग 120 फीसदी तक पहुंच चुकी है।

तुअर और उड़द का अच्छा प्रदर्शन

दलहन फसलों की कुल बुवाई 8.82 लाख हेक्टेयर तक पहुंच गई है, जो लक्ष्य का 106.6 फीसदी है। तुअर (अरहर) 2.11 लाख हेक्टेयर, उड़द 6.17 लाख हेक्टेयर, मूंग 0.53 लाख हेक्टेयर। तुअर की बुवाई सामान्य क्षेत्रफल से 115 फीसदी अधिक दर्ज की गई है, जबकि मूंग की बुवाई भी सामान्य स्तर से ऊपर बनी हुई है।

कपास की बुवाई लक्ष्य से अधिक

कपास की बुवाई 5.79 लाख हेक्टेयर में दर्ज की गई है, जो तय लक्ष्य 5.72 लाख हेक्टेयर से अधिक है। यानी कपास की बुवाई लक्ष्य का 101.2 फीसदी हासिल कर चुकी है। राज्य में कुल खाद्यान्न फसलों (अनाज और दलहन) की बुवाई 58.03 लाख हेक्टेयर तक पहुंच गई है। यह लक्ष्य का 71.1 फीसदी और पिछले साल की समान अवधि की तुलना में बेहतर प्रगति मानी जा रही है। कृषि विशेषज्ञों का मानना है कि मॉनसून की अनुकूल स्थिति बनी रही तो आने वाले दिनों में धान और अन्य खरीफ फसलों के रकबे में और बढ़ोतरी हो सकती है। सोयाबीन, मक्का और दलहनी फसलों की मजबूत बुवाई राज्य के खरीफ उत्पादन को सहारा दे सकती है।

सेंसेक्स 70 अंक फिसलकर 76,765 पर और निफ्टी गिरकर 23,985 पर बंद

स्वदेश समाचार ■ मुंबई

देश के शेयर बाजार में मंगलवार को बिकवाली के दबाव में हल्की गिरावट दर्ज की गई और बीएसई सेंसेक्स 69.86 अंक (0.09 प्रतिशत) गिर कर 76,765.92 अंक तथा नेशनल स्टॉक एक्सचेंज का निफ्टी-50 10.60 अंक (0.04 प्रतिशत) घट कर 23985.35 अंक पर बंद हुआ। पिछले सप्ताह लगातार पांच दिन की गिरावट के बाद सोमवार को बाजार में तेजी दर्ज की गई थी और सेंसेक्स 776.01 अंक (1.02 प्रतिशत) तथा निफ्टी 228.50 अंक (0.96 प्रतिशत) चढ़ा था। बाजार में आज सूचना प्रौद्योगिकी शेयरों में कुल मिला कर तेजी का रुख दिखा जबकि बैंकिंग और विद्युत कंपनियों में बिकवाली का जोर रहा। त्वरित उपभोक्ता उद्योग में मिला जुला रुख देखा गया।

सीमित उतार चढ़ाव भरे कारोबार में सेंसेक्स सुबह करीब करीब कल के ही स्तर 76,831.75 अंक पर खुला और ऊपर में 76,988.48 तथा नीचे में 76,672.77 अंक तक जाने के बाद अंत में 76,765.92 अंक पर बंह हुआ जो कल की तुलना में 69.86 अंक यानी 0.09 प्रतिशत नीचे है। कल सेंसेक्स 76,835.78 पर बंद हुआ था। सेंसेक्स में 30 में 17 शेयर लाभ में और 13 गिरावट में रहें। सेंसेक्स के लाभ में रहे प्रमुख शेयरों में आईटीसी 4.47 प्रतिशत लाभ में रहा जबकि इटरनल में 4.02 प्रतिशत की तेजी देखी गयी। टेक महिंद्रा और इन्फोसिस में क्रमशः 3.86 प्रतिशत और 2.47 प्रतिशत लाभ दर्ज किया गया। गिरावट में रहे शेयरों में हिंदुस्तान यूनीलीवर 6.97 प्रतिशत टूट गया। बीईएल, एनटीपीसी , पावर ग्रिड में भी तेज गिरावट दर्ज की गयी।

नेशलन स्टॉक एक्सचेंज का निफ्टी 23,971.25 पर खुल कर ऊपर में 24,041.15 और नीचे में 23,954.60 अंक तक जाने के बाद अंत में कल के बंद की तुलना में 10.60 अंक (-0.04 प्रतिशत) घट कर 23,985.35 पर बंद हुआ। अमेरिका और ईरान के बीच लड़ाइ थमने और कच्चे तेल के भावों में तेज गिरावट दिखने से बाजार में कल तेज सुधार दर्ज किया गया। वैश्विक बाजारों में कमजोरी का माहौल बना रहा।
