## Press Release

### Blue Dart Launches India's Largest Integrated Operating Facility at Bijwasan, Delhi

New Delhi, 14th January 2025: Blue Dart, South Asia's premier express air and integrated transportation and distribution company, has launched India's largest Low-Emission Integrated Operating Facility in Bijwasan, Delhi. This facility, equipped with solar power installations, connects multiple air and ground services between North India and the rest of the country, marking a significant milestone in the company's journey toward operational excellence and environmental stewardship.

Strategically situated along the prominent Dwarka Expressway in Bijwasan, Delhi, the facility enjoys a prime location and is set to be just 20 minutes from Indira Gandhi International Airport. This positions it as a critical logistics hub, enhancing connectivity across the Northern region and beyond. With direct access to the IGI Airport, Indian Railways, metro corridors, and key national highways, the Bijwasan facility seamlessly integrates with the upcoming Gati Shakti Logistics Corridor.

By fortifying freight movement and providing robust multimodal connectivity, this state-of-the-art, 2.5 lakh sq. ft. facility aligns with the PM Gati Shakti National Master Plan and exemplifies Blue Dart's focus on advancing India's express logistics infrastructure.

On the launch, **Tobias Meyer, CEO, DHL Group**, emphasized the importance of low-emission operations, stating, "We want to be 'the green logistics provider of choice' as sustainability is an increasingly vital differentiator in our industry. Supporting our customers' decarbonization journey remains crucial as we continue to lead in low-carbon logistics solutions. This facility underscores our global commitment to efficient, more sustainable logistics and reinforces our investment in India's economic potential."

Highlighting the facility's strategic value, **Pablo Ciano, CEO, DHL eCommerce**, said, "This milestone demonstrates our focus on delivering superior infrastructure and innovative solutions that empower customers and fuel their growth. Our core principles, sustainability and operational excellence, remain integral to our global strategy, and this facility stands as a testament to that vision."

**Balfour Manuel, Managing Director, Blue Dart**, added, "The Bijwasan facility is more than an infrastructure investment—it reflects Blue Dart's commitment to sustainability, scalability, and service excellence. As India's largest low-emission integrated logistics hub, it enhances our distribution capabilities, reinforcing our promise of efficient, more sustainable cargo movement. By strategically expanding our network with state-of-the-art facilities and adopting advanced technologies, we continue to drive flexibility, accuracy, and speed across our operations. These investments position Blue Dart to seize emerging opportunities and deliver exceptional value to our customers and stakeholders."

The facility is fully equipped for palletized cargo handling, with the capacity to handle over 5.5 lakh shipments per day (inbound and outbound), optimizing cargo throughput for high-volume shipments. State-of-the-art automated systems ensure precise and rapid sorting, reducing manual handling and improving resource utilization to meet evolving business demands. Solar power installations with a 600-kW capacity are pivotal in minimizing carbon emissions and supporting more sustainable energy practices.

With over 250 ground network routes and eight dedicated freighters, Blue Dart continues to expand its infrastructure to address India's growing logistics needs. The Bijwasan facility strengthens Blue Dart's position as a leading trade facilitator, supporting over 19,000 pin codes and more than 56,000 locations nationwide.

Blue Dart's sustainability initiatives extend beyond operational enhancements. The company also offers decarbonisation options to its customers to reduce their carbon footprint via its GoGreen Plus service. Additionally, Blue Dart incentivizes subcontractors to adopt more sustainable transport solutions by providing education, standards, and financial support. The launch of the Bijwasan facility reaffirms Blue Dart's leadership in more sustainable logistics, exemplifying its focus on innovation, environmental responsibility, and reliable express logistics services across India.
