Media Release

Borana Weaves Strengthens Operations with Renewable Energy Integration and Complete Capacity Expansion

Surat, March 24, 2026: Borana Weaves Ltd., one of India's leading producers of Synthetic Greige fabric, has announced key operational milestones including the successful commissioning of its rooftop solar power project and operationalization of its expanded weaving capacity.

Renewable Energy Integration Enhances Cost Efficiency

The Company has successfully commissioned its **3.545 MW rooftop solar power project**, which is now operational across its manufacturing units. This initiative is expected to significantly reduce reliance on conventional power sources and improve cost efficiencies. With increasing integration of renewable energy, the Company anticipates **lower power costs, improved operating margins and greater energy cost stability**, while also strengthening its sustainability initiatives.

Full Operationalization of 160 Water Jet Looms Drives Capacity Expansion

The Company has now **fully operationalized all 160 high-speed Water Jet (WJ) looms** at Unit 4B. Earlier, 64 looms had commenced production; the remaining looms are now installed and operating at full capacity.

This milestone marks a significant scale-up in production capabilities and is expected to:

- Increase output capacity substantially
- Improve operational efficiency and asset utilization
- Enable faster turnaround and stronger order execution
- Support revenue growth through higher volumes

Speaking on the milestone, Mr. Rajkumar Borana, Executive Director and Chief Financial Officer of Borana Weaves, said: *"We are pleased to announce the successful commissioning of our 3.545 MW rooftop solar power project along with the full operationalization of 160 high-speed water jet looms at Unit 4B. These milestones significantly strengthen our integrated manufacturing capabilities, enhance production capacity and improve operational efficiency. The increased use of renewable energy is expected to optimize power costs and support margin expansion, while advanced looms enable higher throughput, better turnaround and improved cost competitiveness. We believe these initiatives reinforce our commitment to sustainable, efficient and profitable growth, while enhancing scalability and delivering long-term value for our stakeholders"*

About Borana Weaves

Borana Weaves Limited, established in 2020 and headquartered in Surat, is a leading manufacturer of unbleached synthetic greige fabrics used in dyeing, printing, home décor, fashion and technical textiles. Borana Weaves operates 4 manufacturing units supported by 1208 fully operational water jet looms. Leveraging advanced technology, sustainable practices and a team of around 666 employees, the company caters to a prestigious clientele across domestic and international markets.
