Thangamayil Jewellery Q4 profit jumps to ₹142 cr; revenue crosses ₹2,839 cr

Our Bureau
Chennai

Madurai-based Thangamayil Jewellery Ltd posted a net profit of ₹142 crore for the fourth quarter ended March 2026, compared with ₹39 crore in the corresponding quarter last year. Revenue more than doubled to ₹2,839 crore (₹1,380 crore).

Gold jewellery sales went up by 105 per cent to ₹2,503 crore in Q4FY26. Non-gold (silver, diamonds, other products) sales rose 141 per cent to ₹227 crore.

For the full year FY26, net

profit stood at ₹352 crore as against ₹118 crore in FY25. Revenue went up to ₹8,514 crore (₹4,916 crore).

The number of retail outlets of Thangamayil Jewellery in operation stood at 66 as of March 2026, as against 60 at the same time last year.

Meanwhile, the company has flagged a possible compression of demand in the near term, given Prime Minister Narendra Modi's call to reduce the purchase of gold jewellery and the subsequent increase in gold import duty.

"The developments may have an impact on the de-

mand for gold & silver jewellery in the coming months in an already sagging demand scenario. However, customers have slowly shifted to exchange of gold for new jewellery purchases in the past several months. From a historic average of around 25 per cent, exchange gold sales rose from 50 per cent to 60 per cent of current sales. We have to wait and see the public reaction to these directives," the company said in an exchange filing.

The company has proposed a dividend of ₹18 per equity share for the financial year 2025-26.

Prime Minister's EV push can help grow penetration, say automakers

GROWTH CATALYST. Industry says affordable mass-market EVs crucial for wider electric mobility adoption

S Ronendra Singh
New Delhi

Automobile manufacturers have welcomed Prime Minister Narendra Modi's renewed push for electric vehicles (EVs), saying the transition to cleaner mobility is critical not only for sustainability but also for strengthening India's energy security by cutting dependence on costly crude oil imports.

Industry executives said the Prime Minister's appeal to citizens to reduce petrol and diesel consumption, use public transport, carpool and adopt EVs could accelerate consumer awareness and support the sector's long-term growth plans centred around localisation and innovation.

'MORE OPTIMISTIC'

Anurag Mehrotra, Managing Director of JSW MG Motor India, told *businessline* that the Prime Minister's message could encourage consumers to make more conscious mobility choices that help reduce fuel expenses as well as India's foreign exchange outgo on oil imports.

"The auto industry remains optimistic about a rapid shift towards EVs, a technology that is cost-effective for the consumer, supports India's sustainability goals, and helps reduce

VALUE DRIVE. Companies see charging infrastructure expansion supporting India's long-term EV transition REUTERS

crude oil imports. As the ecosystem continues to evolve, charging infrastructure will also expand, making EV journeys more seamless," he said.

Rahul Bharti, Senior Executive Officer at Maruti Suzuki India, said the company strongly supports the Prime Minister's emphasis on deploying multiple technologies to reduce oil imports.

"We are making India a global hub for EV manufacturing with e-Vitara sales, both in India and export to 100-plus countries. We will go beyond and showcase our next EV model at the Bharat Mobility Show," Bharti said.

During a recent speech in Hyderabad, Prime Minister Narendra Modi stressed the need for austerity measures amid the ongoing crisis in West Asia.

He urged citizens to reduce fuel consumption, use metro services more frequently, adopt carpooling

and increase EV usage. Modi also ordered a 50 per cent reduction in the number of vehicles in his official security convoy.

POLICY PUSH

The Centre has rolled out several policies and schemes over the past few years to accelerate EV adoption. Among them is the PM Electric Drive Revolution in Innovative Vehicle Enhancement (PM E-DRIVE) scheme, launched in 2024 with a budgetary outlay of ₹10,900 crore to support the adoption of electric two-wheelers, three-wheelers, buses, ambulances and trucks.

Earlier this week, the government also said EV charging proposals worth ₹503.86 crore had been approved for the installation of 4,874 charging stations across States and Central Public Sector Enterprises. The Centre has set a target of

achieving 30 per cent EV penetration in total vehicle sales by 2030.

VALUE MARKET

Industry players, however, said the biggest growth opportunity lies in the mass-market passenger vehicle segment priced below ₹12 lakh, which accounts for nearly 65 per cent of overall passenger vehicle sales but continues to see relatively low EV penetration because of limited affordable options.

Tata Motors said its strategy is focused on unlocking this segment by expanding the value proposition of its EV portfolio, which starts at around ₹8 lakh, while addressing adop-

tion barriers and making electric mobility more mainstream. "Tata Motors is aligned with this progressive national priority and remains committed to accelerating EV adoption through innovation, localisation and the development of accessible, future-ready mobility solutions that also contribute to India's net-zero and air quality goals," a company spokesperson said.

According to Alekhya Datta, Director, Electricity and Renewables Division at The Energy and Resources Institute, the global energy supply disruptions linked to the West Asia conflict underline the importance of reducing India's dependence on imported fossil fuels.
