**Beacon Trusteeship Limited**

5W, 5th Floor, The Metropolitan,  
E Block, Bandra Kurla Complex (BKC),  
Bandra (East), Mumbai 400 051.

Dear Sir/Madam,

**Subject: Valuation of security offered by The Andhra Pradesh Mineral Development Corporation Limited ("APMDCL") for the issue of Senior, Secured, Rated, Listed, Non-Convertible Debentures having face value of Rs. 1,00,000/- each aggregating to Rs. 3,473.73/- crores (Tranche-I Issue Size) and Senior, Secured, Rated, Listed, Non-Convertible Debentures having face value of Rs. 1,00,000/- each aggregating to Rs 5526.18/- crores (Tranche-I Re-issue Size).**

**I. Purpose:**

We have been engaged by Beacon Trusteeship Limited having its registered office at 5W, 5th Floor, The Metropolitan Bandra Kurla Complex Chambers, Bandra (E), Mumbai – 400051.

We understand that Beacon Trusteeship Limited has sought our assistance in arriving at the valuation based on the Net Present Value of estimated revenues from the sale of minor minerals from identified mines which is being offered as a security against issue of Senior, Secured, Rated, Listed, Non-Convertible Debentures having face value of Rs. 1,00,000/- each aggregating to Rs. 3473.73/- crores (Tranche-I) and issue of Senior, Secured, Rated, Listed, Non-Convertible Debentures having face value of Rs. 1,00,000/- each aggregating to Rs. 5526.18/- (Tranche-I Reissuance) crores on Private Placement Basis by The Andhra Pradesh Mineral Development Corporation Limited ("APMDCL"). The estimated revenue is based on the valuation reports provided by the Recognized Qualified Person (RQP) dated 17-02-2025 for the mines pursuant to Memo. No. from 2713031/2025-M-III-1 to 2713031/2025-M-III-478 dated February 11, 2025, and March 10, 2025, respectively (***Attached as Annexure-I***).

**II. Background / Information about APMDCL**

APMDCL, is classified as state government company and incorporated on 24<sup>th</sup> February 1961 having its registered office at D.No.6-1-67/19/1 & 67/20, Flat No.302, Super Classic Apartments, Saifabad, Lakdikapool, Hyderabad, Telangana, India, 500004. APMDCL is the wholly owned

undertaking of Government of Andhra Pradesh. The primary objective of APMDCL is the development of mineral resources and the promotion of mineral-based industries within the state.

The Government of Andhra Pradesh Industries and Commerce (M-III) Department (hereinafter referred to as “Authority”) had pursuant to Memo. No. from 2713031/2025-M-III-1 to 2713031/2025-M-III-478 dated February 11, 2025 and March 10, 2025 respectively (**Attached as Annexure-I**) has decided to grant APMDCL quarry lease on identified minor mineral bearing areas on a nomination basis for taking up mining projects.

### **III. Scope and Limitations**

Our valuation is inter-alia based on the financial and other information provided and certified by the Management of APMDCL dated May 06, 2025 (**Attached as Annexure-II**) and Valuation Report of Recognized Qualified Person (RQP) (**Attached as Annexure-I**). Our valuation does not constitute as an auditor review in accordance with the auditing standards applicable in India, accounting / financial / commercial / legal / tax / environmental due diligence or forensic / investigation services and does not include verification or validation work. Accordingly, we assume no responsibility for any errors in the information furnished by the Client and their impact on the Report. If there were any omissions, inaccuracies or misrepresentations of the information provided by the Management, it may have a material effect on our findings.

While information obtained from the public domain or external sources have not been verified for authenticity, accuracy or completeness, we have obtained information, as far as possible, from sources generally considered to be reliable. We assume no responsibility for such information.

This Report is prepared on the basis of the sources of information listed below in the report has relied upon their presentation provided by the Management that the information contained in the Report is materially accurate and complete, fair in its manner of portrayal and therefore forms a reliable basis for the Valuation.

It is inappropriate to use this Report for financing or any purpose other than the purpose mentioned above. We are not responsible for the unauthorized use of this Report. We shall not assume any responsibility to any third party to whom the Report is disclosed or otherwise made available. Except as may be required under SEBI Regulations, it shall not be provided to any third party without our prior written consent.

The value achieved, in case of a transaction, may be different than our valuation depending upon the circumstances and timing of the transaction, if any. The knowledge, negotiability and motivations of the buyers and sellers will also affect actual price achieved. Accordingly, our valuation will not necessarily be the price at which any agreement proceeds. The final transaction price is something on which the parties themselves have to agree.

This Report forms an integral whole and cannot be split in parts. The outcome of the valuation can only lead to proper conclusions if the Report as a whole is taken into account.

Valuation report may contain and/ or are based on estimates of future financial performance or opinions that represent reasonable expectations at a particular point of time, but such information, estimates or opinions are not offered as our predictions or as our assurances that a particular level of income or profit will be achieved, that events will occur, or that a particular price will be offered or accepted. Because events and circumstances frequently do not occur as expected, there will usually be differences between predicted and actual results, and those differences may be material. We take no responsibility for the achievement of the predicted results.

#### **IV. Opinion On Value**

##### **Methodology Adopted for opinion on fair value:**

Valuation of Business entails estimation of Fair value of Non-Convertible Deep Discount Bonds (NCDs) of the company. In valuing business, three different approaches may be employed to determine the value:

- A. The Income Approach
- B. The Market Approach
- C. The Asset Approach.

#### **A. Income Approach**

##### **(i) Discounted Free Cash Flow Method (DCF)**

- Under a DCF approach, forecast cash flows are discounted back to the present date, generating a net present value for the cash flow stream of the business. A terminal value at the end of the explicit Forecast Period is then determined and that value is also discounted back to the valuation date to give an overall value for the business.
- DCF methodology typically requires the Forecast Period to be of such a length to enable the business to achieve a stabilized level of earnings, or to be reflective of an entire operation cycle for more cyclical industries.
- The rate at which the future cash flows are discounted (“the discount rate”) should reflect not only the time value of money, but also the risk associated with the business’ future operations. The discount rate most generally employed is Weighted Average Cost of Capital (“WACC”) or Cost of Equity (Ke), reflecting an optimal as opposed to actual financing structure.
- In calculating the terminal value, regard must be had to the business’ potential for further growth beyond the explicit Forecast Period. The “constant growth model”,

which applies an expected constant level of growth to the cash flow forecast in the last year of the Forecast Period and assumes such growth is achieved in perpetuity, is a common method. These results would be cross-checked, however, for reasonability to implied exit multiples.

- The rate at which future cash flows are discounted should reflect not only the time value of the cash flows but also the risk associated with the business' future operations. This means that in order for a DCF to produce a sensible valuation figure, the importance of the quality of the underlying cash flow forecasts is fundamental.

**(ii) Net Present Value (NPV)**

- Net present value (NPV) is the difference between the present value of cash inflows and the present value of cash outflows over a period of time. NPV is used in capital budgeting and investment planning to analyse the profitability of a projected investment or project.
- NPV is the result of calculations used to find today's value of a future stream of payments. It accounts for the time value of money and can be used to compare similar investment alternatives. The NPV relies on a discount rate that may be derived from the cost of the capital required to make the investment, and any project or investment with a negative NPV should be avoided.

**B. Market Approach**

**(i) Comparable Companies Multiples (CCM)**

- This methodology uses the valuation ratio of a publicly traded company and applies that ratio to the company being valued. The valuation ratio typically expresses the valuation as a function of a measure of financial performance or Book Value [e.g. Revenue, EBITDA, EBIT, Earnings per Share or Book Value). A key benefit of Comparable Company Market Multiple analysis is that the methodology is based on the current market stock price. The current stock price is generally viewed as one of the best valuation metrics because it is based on observable inputs. In the instant case, the Company belongs to Road and Infrastructure Industry and in absence of any comparable of similar companies, it is inappropriate to use this methodology for this valuation.

**C. Asset Approach**

**(i) Net Asset Method (NAV) or Underlying Asset Method**

- The Asset based method views the business as a set of assets and liabilities that are used as building blocks of a business value. The difference in the value of these assets and liabilities on a Book Value basis or Realizable Value basis or Replacement Cost basis is the business value. However, this methodology recognizes historical cost of net assets only, without recognizing its present earnings, comparative financial performance of its peers and their Fair values, etc.
- In general, Net Asset Value only reflects the minimum proxy value of the company, therefore, we deemed it appropriate to ignore this methodology for this valuation.

## V. Approach Adopted for Valuation

### ❖ Net Present Value (NPV)

- NPV is considered a superior method of evaluating the cash flows from a project because it is able to rank projects of different sizes over varying periods of time to determine the most profitable course of action. It is the discount rate that is used to calculate a zero NPV for a series of cash flows.
- Because the NPV method uses a reinvestment rate close to its current cost of capital, the reinvestment assumptions of the NPV method are more realistic than those associated other method.
- NPV is considered superior to payback, the other method popular capital budgeting techniques, because it is the most complete picture of future cash flows.
- Advantages of the Net Present Value Method Cash flow from future years is discounted back to the present to find their worth. The NPV method produces a dollar amount that indicates how much value the project will create for the company. Stockholders can see clearly how much a project will contribute to their value.

The details related to calculation of Net Present Value of the Estimated Revenue as follows:

Assumptions:

[INR In Crs.]

|                                                           |                                       |
|-----------------------------------------------------------|---------------------------------------|
| Discount Rate                                             | 9.50%                                 |
| Effective Discount rate                                   | 9.50%                                 |
| Net Present Value for the quarter ended June 30, 2026     | INR 10,733                            |
| Outstanding Total Borrowing (Principal and Interest) (II) | INR 9,124                             |
| Security Cover Asset                                      | Estimated Revenue from minor minerals |
| Estimated Revenue                                         | INR 10,733                            |
| Security Cover Ratio (I/II)                               | 1.18                                  |

As seen from above table, the Net Present Value of the Estimated revenue from minor minerals of

**INR 10,733 cr. for the quarter ended June 30, 2026. (Refer Annexure III attached separately as part of this certificate presenting the calculation of NPV and Future Projections).**
