Dear Sir/Madam,

SUB.: Intimation under Regulation 30 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 – Successful Completion and Delivery of Proof of Concept in Industrial Transformation for Mohan Meakin Breweries

Ref: - Symbol: C2C | ISIN INE0U7V01015 | Series : ST

Dear Valued Investors,

We are pleased to inform you that C2C Advanced Systems Limited has successfully completed and delivered a **Proof of Concept (PoC)** in the area of **Industrial Transformation** for **Mohan Meakin Breweries**.

About the Implementation

In the last quarter, **C2C Advanced Systems** was engaged by **Mohan Meakin Breweries** to carry out a Proof of Concept an industrial transformation project on one of its production lines. This engagement has now been completed, with the PoC successfully delivered using C2C's proprietary devices.

The project marks the establishment of the company's **Industry Transformation practice** as a core vertical. It has also demonstrated the applicability of C2C's technology to industrial operations, with significant value in defence and other critical sectors, highlighting the **dual-use** nature of the company's solutions.

Post- Successful Implementation Outlook

The success of this **PoC** provides a clear pathway to replicate the solution across **160 production lines**, representing a **potential contract value in excess of ₹50 crore** within this year. The expanded scope also includes the creation of a **"Command and Control" center** at the headquarters level, designed to provide **real-time decision support** to senior management. With this foundation in place, the company expects this to translate into further orders for **data analytics, machine learning algorithm development, and enterprise system integration**.

This engagement reflects C2C's **innovation-driven, software-first approach** to industrial modernisation and is aligned with the principles of **Industry 4.0**, where enterprises are transforming their production systems through digitisation, automation, and AI-driven insights.

Management Commentary

Mrs. Lakshmi Chandra, Managing Director of C2C Advanced Systems, said:

“This Proof of Concept shows how C2C’s technology can move seamlessly from concept to execution, creating impact in both **industrial** and **defence** settings. What excites us is the opportunity to take these capabilities **global**, at a time when enterprises everywhere are embracing **Industry 4.0**.”

We remain committed to creating long-term value for our shareholders by driving innovation across both industry and defence.

We appreciate your continued support as we expand our Industry 4.0 and digital transformation solutions into global markets.

Industry 4.0 WAVE - Powered by C2C Advanced Systems

C2C Advanced Systems has successfully completed a **Proof of Concept (PoC)** for **Mohan Meakin Breweries**, digitising one production line using our **proprietary devices**. What makes this achievement significant is not just the delivery of the project itself, but the way it signals the start of a broader transformation journey.

This project is significant because it establishes **Industry Transformation** as a new core vertical for C2C, extending our expertise beyond defence into large-scale industrial modernisation. The technology demonstrated here is the same architecture that powers our defence systems — proving its **dual-use relevance** and adaptability across critical sectors.

At its heart, this project is about **Industry 4.0** — the integration of sensors, data analytics, automation, and AI to create smarter, more efficient factories. For C2C, it is not just an industrial milestone but also a demonstration of how **defence-proven technologies** can accelerate transformation in traditional sectors, in India and globally.

Beyond scaling within Mohan Meakin, this success positions C2C at the forefront of **India's Industry 4.0 shift** — where manufacturing is being redefined by digitisation, automation, and AI. From **data analytics and machine learning** to integration with enterprise systems, our roadmap builds on this foundation to create end-to-end digital transformation platforms.

This marks an critical inflection point: C2C is not only a defence technology partner, but also a driver of **industrial modernisation in India and global markets**.

Looking ahead, the company expects to see further opportunities for **data analytics, machine learning algorithms, and enterprise integration**, opening recurring revenue streams beyond the initial deployment. The success of this PoC positions C2C as a **credible partner in both industrial and defence transformation**, aligned with India's Atmanirbhar Bharat mission and global Industry 4.0 trends.
