Dear Sir/Madam,

**SUB.: Intimation under Regulation 30 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 – Inclusion in Indian Navy's Approved Vendor List for WECDIS Systems**

**Ref: - Symbol: C2C | ISIN INE0U7V01015 | Series: ST**

Dear Valued Investors,

We are pleased to inform you that C2C Advanced Systems Limited has been formally included in the Indian Navy's Approved Vendor List for supply and fitment of **Warship Electronic Chart Display and Information Systems (WECDIS)**.

This is a significant strategic development and marks a major step forward in our positioning as a systems partner of choice for critical naval technologies.

### About the System

**WECDIS** stands for **Warship Electronic Chart Display and Information System**. It is a specialized form of ECDIS (Electronic Chart Display and Information System), tailored to meet the unique operational, tactical, and security requirements of naval vessels.

Key features include:

- Military Chart Support
- Tactical Layering for Mission Planning
- Multi-sensor Data Integration (radar, AIS, GPS, gyro, speed log, nav sensors)
- Real-time Track Management & Route Control

## C2C's Qualification Process

C2C successfully completed a rigorous 18-month trial process on two operational naval platforms, covering:

- Complete system installation
- Integration with onboard navigation sensors
- Validation through sea trials

Post successful demonstration, C2C has been cleared for nomination on both:

- New construction vessels
- Retro fitment across the existing fleet

## Strategic Relevance

Inclusion in this vendor list is a critical entry point into high-trust, long-cycle defence procurement. Once approved by the Indian Navy for a sensitive system like WECDIS, it not only unlocks access to related navigation systems across Indian naval and coast guard platforms but also serves as a powerful validation for export markets.

With over 96 Ships and Submarines will be inducted into the Indian Navy in the coming ten years and retrofitting of the existing old vessels. C2C is well-positioned to play a critical role in this expansion and modernisation drive.

The Indian Navy is widely recognised as one of the most demanding maritime forces in the Indo-Pacific, and approval by its technical directorates enhances C2C's credibility with navies in Southeast Asia, the Middle East, and Africa especially those pursuing interoperability with Indian platforms or adopting similar standards.

## Management Commentary

Mrs. Lakshmi Chandra, Managing Director of C2C Advanced Systems, said:

“This is a proud moment for the team at C2C. The inclusion reflects our deep engineering and systems integration capabilities, our commitment to operational excellence, and our focus on delivering Made-in-India defence solutions at global standards. This recognition by the Indian Navy is not just a validation of our platform performance, it also unlocks significant long-term growth in the maritime defence segment.”

We believe this development adds a strategic dimension to our naval systems portfolio and further strengthens our long-term partnership with the Indian armed forces.

We remain committed to creating value for our shareholders through execution in high-barrier, high-value technology domains.

*We appreciate your continued support as we advance our mission to become world's leading integrated defence technology and platform solutions provider.*
