**For Immediate Release****31 October, 2012****Cairn India Board approves Interim Dividend payment**

The Board of Directors of Cairn India Ltd (CIL) today declared interim cash dividend of INR 5 per Equity share on a face value of INR 10 per share. The dividend is proposed to be paid on or before 15 November, 2012, to shareholders on record as on 6 November, 2012. This will entail an outflow of INR 1,109 crore including the dividend distribution tax of INR 155 crore. This is the maiden dividend declared by the company for its shareholders.

Cairn India is now well positioned to grow by building a balanced portfolio of assets and resources. The company is committed to deliver value through superior business performance and partnerships. While deciding the quantum of payout, the twin objective of stable dividend payout and investment for growth has been kept in view by the Board.

Earlier, in April 2012 the Board approved a dividend policy of around 20 percent of annual consolidated net profits. The payment of dividend was subject to the completion of Corporate reorganisation, which has occurred on 18 October, 2012.

Cairn India Limited Fact Sheet

On 9 January, 2007, Cairn India Limited was listed on the Bombay Stock Exchange and the National Stock Exchange of India. Cairn India is now part of the Vedanta Group, a globally diversified natural resources group with wide ranging interests in aluminium, copper, zinc, lead, silver, iron ore, etc.

Cairn India is headquartered in Gurgaon in the National Capital Region, with operational offices in Tamil Nadu, Gujarat, Andhra Pradesh, Rajasthan and Sri Lanka.

Cairn India is primarily engaged in the business of oil and gas exploration, production and transportation. Average daily gross operated production was 207,245 boe in Q2 FY2012-13. The Company sells its oil to major refineries in India and its gas to both PSU and private buyers.

The Company has a world-class resource base, with interest in eight blocks in India, one in Sri Lanka and one in South Africa. Cairn India's resource base is located in four strategically focused areas namely one block in Rajasthan, two on the west coast of India, six on the east coast of India (including one in Sri Lanka) and one in South Africa.

The blocks are located in the Barmur Basin, Krishna-Godavari Basin, the Palar-Pennar Basin, the Cambay Basin, the Mumbai Offshore Basin, Mannar Basin and Orange Basin.

Cairn India's focus on India has resulted in a significant number of oil and gas discoveries. Cairn made a major oil discovery (Mangala) in Rajasthan in the north west of India at the beginning of 2004. To date, twenty five discoveries have been made in the Rajasthan block RJ-ON-90/1.

In Rajasthan, Cairn India operates Block RJ-ON-90/1 under a PSC signed on 15 May, 1995. The main Development Area (1,859 km²), which includes Mangala, Aishwariya, Raageshwari and Saraswati is shared between Cairn India and ONGC, with Cairn India holding 70% and ONGC having exercised their back in right for 30%. The Operating Committee for Block RJ-ON-90/1 consists of Cairn India and ONGC.

Further Development Areas (430 km²), including the Bhagyam and Shakti fields and (822 km²) comprising of the Kaamoshwari West Development Area, is also shared between Cairn India and ONGC in the same proportion. The Mangala, Bhagyam and Aishwariya (MBA) fields have gross recoverable oil reserves and resources of approximately 1 billion barrels, which includes proved plus probable (2P) gross reserves and resources of 636 mmboc with a further 300 mmboc or more of EOR resource potential. The Rajasthan block is contributing more than one fifth of current

domestic crude production. The total resource base supports a vision to produce 300,000 bopd, (equivalent to a contribution of more than 35% of India's current domestic crude production), subject to further investments and regulatory approvals.

In Andhra Pradesh and Gujarat, Cairn India on behalf of its JV partners operates two processing plants, 11 platforms and more than 200 km of sub-sea pipelines with a production of approximately 30,000 boepd.

Block SL 2007-01-001 was awarded to Cairn Lanka in the bid round held in 2008. This offshore block is located in the Gulf of Mannar. The water depths range from 400 to 1,900 meter. Cairn Lanka (Private) Limited is a wholly owned subsidiary of Cairn India and holds a 100% participating interest in the block. The signing of the Petroleum Resources Agreement (PRA) to explore oil and natural gas in the Mannar Basin was held in July 2008 in Colombo.

The farm-in agreement has been signed with Petro SA on 16 August 2012, for 60% stake along with operatorship in the Block-I located in Orange basin, South Africa. The area of the Block is 19,922 sq km. The approval process of this agreement from Govt of South Africa is in progress.

India currently imports 3.4* million bopd of crude oil. The current domestic crude oil production is approximately 0.76** million bopd of which Cairn India operated assets (Ravva, CB/Q8-2 and the RJ-ON-90/1) contribute around one-fourth.
