Mr. Srinivas Rao, AVP of Canarys' Water Resources Management Business (WRM) Division, announced signing the agreement and receipt of the prestigious order from Tamil Nadu Water Resources Department (TNWRD) to implement SCADA and Decisions Support System (DSS) for Chennai City water supply reservoir automation.

He cited that the customers confidence in Canarys packaged WRM solution which has led to multiple of such agreements. The first agreement is worth of Rs. 25 Crores which was signed in July 2024 with Gorakhpur City Muncipal and this second order, valued at Rs. 15.54 Crores was signed with WRD from Chennai.

Canarys integrated solution for identifying flooding risks, providing early warnings, and offering decision support to mitigate flooding and optimize drinking water management has gained wide acceptance, resulting in our recurring order for the package.

The DSS-based packaged solution is beneficial for Water Resources Departments (WRDs) and municipal organizations facing similar challenges, helping them identify risks and focus on mitigation.

Canarys innovative DSS packaged solution seamlessly integrates multiple disciplines, including hydrological and hydraulic modelling, real-time IoT-based flow and level sensors, telemetry data transmission, integration of nowcast feeds, weather forecasts, SCADA-based automation of pumps and gate control, and a DSS dashboard for easy stakeholder communication, live monitoring, and information-driven decision-making.

The replication of order underscores our dedication to delivering tech-driven solutions in Water Resources Management, aimed at mitigating risks to cities with similar problems. It introduces a new approach to managing urban floods and dam automation, unlocking opportunities for Canarys across several Indian states.

Our unwavering commitment to our customers is evident, as they continually approach us with ongoing challenges, trusting us to provide cutting-edge, tech-driven solutions.
