THE SOUTHWEST MONSOON

is likely to hit the Kerala coast on May 26, six days earlier than the usual onset of June 1, the India Meteorological Department (IMD) said on Friday.

The forecast of early monsoon arrival comes with a model error of +/- 4 days. If realised, the arrival of monsoon would be the second earliest since 2020.

Early onset and rapid progression across the country may boost early sowing of Kharif crops, officials said. Conditions are favourable for the advance of southwest monsoon over parts of south Bay of Bengal, Andaman Sea and Andaman and Nicobar Islands during next 24 hours, the Met Department said in a statement.

Typically, the monsoon, after onset over the Kerala coast in early June, covers the entire country by July. These southwest monsoon rains, which accounts for around 75% of the country's annual precipitation, gradually begins to recede from north India by mid-September.

In 2025, monsoon touched down on Kerala coast on May 27. According to the Met Department, its operational forecasts of monsoon onset over Kerala during 2005-2025, were proved to be correct except in 2015.
