# At nearly 400,000 units, car sales move in the fast lane

## FROM THE FRONT PAGE

**THE COMPANY SAID** production of the Sierra remained constrained because of localised supply issues despite healthy bookings. Electric vehicles continued to gain momentum, with domestic and export dispatches touching a record 14,800 units during the month, accounting for 23.4% of the company's passenger vehicle volume.

Mahindra & Mahindra continued its strong run, reporting domestic SUV sales of 60,393 units, up 28% from a year earlier. Domestic passenger vehicle dispatches crossed the 60,000 milestone for the first time, rising from 58,021 units in May. Hyundai Motor India reported domestic sales of 39,635 units, down nearly

10% year-on-year, after a fire at one of its suppliers disrupted the supply of critical components and resulted in a production loss of around 13,900 units. Managing Director and CEO Tarun Garg said the company has initiated alternate sourcing to stabilise production and restore output.

Among other manufacturers, Toyota Kirloskar Motor reported an 8% increase in domestic dispatches to 28,441 units. Executive Vice-President, sales-service-used car business, Sabari Manohar said the company's performance reflected sustained market momentum and a continued focus on customer-centricity. JSW Motor India posted its highest-ever monthly wholesales of 7,568 units, up 29.8% year-on-year, while Skoda Auto India recorded its best-ever first-half sales of 38,894 units. Nissan Motor India more than doubled domestic wholesales to 3,006 units, marking its fourth consecutive month of year-on-year growth.

# Govt's message to WhatsApp: Pause

**SOURCES SAID** EVERY WhatsApp account will continue to be linked internally to a verified mobile number, with users' names serving only as the public identity. Even so, officials are evaluating whether ceasing phone numbers from users could affect the ease with which complaints are lodged and investigated.

The development comes amid the government's broader push to tighten oversight of digital platforms and tackle the growing incidence of online financial fraud and cybercrime. The outcome of MeitY's consultations could determine whether WhatsApp rolls out the feature in its current form or is required to introduce additional safeguards for users in India.

Responding to the latest development, a WhatsApp spokesperson said, "We've announced the option for people to reserve their preferred username on WhatsApp. The ability to use a username is not yet live and will roll out slowly later this year. To protect against impersonation, we've held the highest-profile names — think public figures, government entities, celebrities, verified Meta accounts — so they can only ever be claimed by their legitimate owners and lookalike derivatives of known names are held as well."

Meta said that users still require a phone number to use WhatsApp and it has built multiple layers of defence against scammers in usernames. For instance, other users need to know the exact username to message, it will limit how many new people an account can contact, block repeated attempts to guess someone's username key, and have systems to detect and remove activity showing common impersonation and abuse patterns.

"When the feature becomes available and someone sends you a message for the first time via your username, we will show you if they're a new account, if they're your contact, if you have groups in common, and if they're based in a different country, so you can decide whether to respond," the spokesperson added.
