PRESS RELEASE

CEREBRA TARGETS TO ACHIEVE REVENUE OF ₹ 1000 CRORE BY 2020

Bangalore, May 03, 2016: Cerebra is targeting to achieve ₹ 1000 crores of business by year 2020 and has put in a proper team and planning to achieve this target. It is a very conservative target considering the enormous potential of its businesses like E waste and the manufacture of storage and servers. The Company is also expanding its manufacturing lines to ensure a healthy contribution from the EMS division. This initiative will also ensure a healthy bottom line. The Company had announced the signing of an MOU with a US based Company Echostreams for manufacture of Cerebra branded storage servers which will also give a boost to the company for partnerships in its above green initiatives. The Company is pleased to announce that the first storage servers will be launched very soon. The Company has also recently bagged a big order from the transport department and now the company is looking at orders from other states.

With enormous potential ahead, E-waste processing will be mainstay business for Cerebra going forward Country's largest e-waste processing plant to ensure 100% recycling of collected e-waste with zero landfill

For over two decades, Cerebra has been helping the country's IT ecosystem by providing IT hardware infrastructure services through its sales offices, sales/distribution partners, OEMs, governmental entities and academic institutions, among others. Now the current initiative to set up one of India's largest e-Waste Recycling Facilities will be a reverse process of collection of all IT, WEEE (waste electrical and electronic equipment) will be an added feather in the cap going forward.

Cerebra recently commenced construction of country's largest integrated e-waste recycling facility with a capacity to process 96000 ton of e-waste and equipped for 100% recycling of all collected e-waste with zero landfill. In an effort to garner the largest market share in e-waste business, Cerebra is signing up with channel partners and large corporates across India to expand its network of e-Waste collection. The plant will facilitate refining and recycling activities as well as enable refurbishment of e-waste.

"We are closer to our mission to make our environment cleaner and more valuable. E-Waste disposal is a critical issue in the world today with huge toxic accumulation. We at Cerebra understand it better and our e-Waste recycling management process goes about mitigating it by reclaiming valuable metallic and non-metallic by-products from discarded, unused or obsolete electrical & electronics appliances and products. With this world class plant coming up, Cerebra is poised to grow exponentially both in terms of revenue and profits in the years to come and this business will be our mainstay going forward". Said Mr V. Ranganathan, Managing Director, Cerebra.
