Dear Sir/Madam,

Sub: Disclosure under Regulation 30 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015

We wish to inform you that the Hon'ble National Company Law Tribunal, Mumbai Bench, ("**NCLT**") vide its order pronounced on 26th October 2021, copy received by the Company today i.e. 29th October 2021, has taken on record the re-stated financial statements of the Company and its subsidiaries, as listed in the order, for the five financial years i.e. from 2014-15 to 2018-19. A copy of the NCLT's order is enclosed.

The NCLT has also directed the Company to make available the restated financial statements, along with a copy of the order, on the website of the Company. Accordingly, the Company would be placing a copy of the said restated financial statements, along with a copy of the NCLT's order, on the website of the Company.

Further, a copy of the said re-stated financial statements of the Company is enclosed.

We would appreciate if you could take the same on record.

Thanking you

Yours faithfully,
For **CG Power and Industrial Solutions Limited**

P Varadarajan
Company Secretary and Compliance Officer

CG Power And Industrial Solutions Limited * Mumbai-400030 *

Encl. as above

P.S. : Due to large file size, the re-casted financial statement of each year is filed separately.

INDEPENDENT AUDITOR'S REPORT

To the Members of CG Power and Industrial Solutions Limited

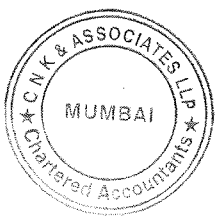

Report on the Recasted Standalone Financial Statements

We have been appointed as auditors of CG Power and Industrial Solutions Limited (the 'Company') vide Appointment Letter issued by Ministry of Corporate Affairs ("MCA") dated 1st February, 2021 pursuant to the order of Hon'ble National Company Law Tribunal (NCLT) dated 5th March, 2020 to carry out audit of Recasted Standalone Financial Statements as recasted by another firm of Chartered Accountants ('Recasting Accountants') appointed under section 130 of Companies Act, 2013 ("the Act") by MCA. We draw attention to Note 1B of the Recasted Standalone Financial Statements (hereinafter referred as 'Recasted Standalone Financial Statements') which describes in detail the significant developments which have resulted in reopening and recasting of the standalone financial statements.

We have audited the accompanying Recasted Standalone Financial Statements of the Company, which comprise the Recasted Balance Sheet as at 31st March, 2017, the Recasted Statement of Profit and Loss (including Other Comprehensive Income), Recasted Statement of Changes in equity and the Recasted Statement of Cash flows for the year then ended and recasted notes to the standalone financial statements, including a summary of significant accounting policies and other explanatory information.

Responsibility of Recasting Accountants and Management for the Recasted Standalone Financial Statements

The Recasting Accountants are primarily responsible for preparation of the Recasted Standalone Financial Statements that give a true and fair view of the financial position, financial performance including Other Comprehensive Income, Cash Flows and Changes in Equity of the Company in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards specified under Section 133 of the Act, read with Rule 7 of the Companies (Indian Accounting Standards) Rules, 2015 as amended. The present Management of the Company is responsible for providing sufficient appropriate information required by the Recasting Accountants for the preparation of these Recasted Standalone Financial Statements to the extent of their knowledge and are also responsible for maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgements and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the accompanying Recasted Standalone Financial Statements that give true and fair view and are free from material misstatements, whether due to fraud or error.

Auditor's Responsibility

Our responsibility is to express an opinion on these Recasted Standalone Financial Statements based on our audit.

We have taken into account the provisions of the Act, the accounting and auditing standards and matters which are required to be included in the audit report under the provisions of the Act and the Rules made thereunder.

We conducted our audit in accordance with the Standards on Auditing specified under Section 143(10) of the Act. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the Recasted Standalone Financial Statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and the disclosures in the Recasted Standalone Financial Statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the Recasted Standalone Financial Statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal financial control relevant to the Company's preparation of the Recasted Standalone Financial Statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of the accounting estimates made by the Company's Directors, as well as evaluating the overall presentation of the Recasted Standalone Financial Statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Recasted Standalone Financial Statements.

Opinion

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid Recasted Standalone Financial Statements give the information required by the Act in the manner so required and give a true and fair view in conformity with the accounting principles generally accepted in India, of the state of affairs of the Company as at 31st March, 2017, its profit (including Other Comprehensive Income); changes in equity and its cash flows for the year ended on that date.

Emphasis of Matter

1. We refer to Note 1D (i) of the Recasted Standalone Financial Statements wherein the impact of the recasting adjustments has been stated and Note 1D (iii) of the Recasted Standalone Financial Statements wherein it is stated that impact, if any, arising from the ongoing Serious Fraud Investigation Office (SFIO) investigation is not considered in the Recasted Standalone Financial Statements due to reasons mentioned therein. Our report has to be read in conjunction with those disclosures;

2. We draw attention to Note 1B (ii) to the Recasted Standalone Financial Statements regarding the possible outcome of the various regulatory proceedings which are currently in progress and may result in a possible non-compliance with applicable laws and regulations, the impact whereof is currently not ascertainable. As stated in Note 1D (iv) of the Recasted Standalone Financial Statements, the Company believes that the Board of

C N K & ASSOCIATES LLP MUMBAI Chartered Accountants

Directors and Key Managerial Personnel appointed after the change of Management on 26th November, 2020 cannot be made liable for any violations or non-compliance of any of the provisions of law in respect of certain past transactions up to 31st March, 2017 arising out of the above;

3. We draw attention to Note 1E to the Recasted Standalone Financial Statements wherein it is stated that all events that occurred up to the date of approval of the original financial statements have been considered in the preparation of these Recasted Standalone Financial Statements;

4. We have carried out the process of obtaining external confirmations for the parties selected by us for the purpose of checking the correctness of the outstanding balances. Such confirmations have been received from few parties. We have relied upon the balances as per Recasted Standalone Financial Statements in cases where no responses were received.

Our opinion is not modified in respect of these matters.

Report on Other Legal and Regulatory Requirements

1. We have been appointed as the auditors of the Company vide Appointment Letter issued by Ministry of Corporate Affairs ("MCA") dated 1st February, 2021 pursuant to the order of Hon'ble National Company Law Tribunal (NCLT) dated 5th March, 2020 to carry out audit of Recasted Standalone Financial Statements prepared under section 130 of the Act and as given to understand, we are not required to comment on the reporting required by the Companies (Auditor's Report) Order, 2016 issued by the Central Government in terms of Section 143(11) of the Act.

2. As required by section 143 (3) of the Act, we report that:

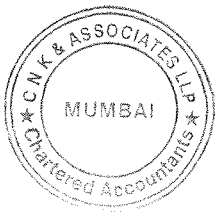

a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purpose of our audit except as mentioned in the Emphasis of Matter paragraph;

b) In our opinion, proper books of accounts as required by law have been kept by the Company so far as it appears from examination of those books;

c) The Recasted Standalone Balance Sheet, Recasted Statement of Profit and Loss (including other comprehensive income), Recasted Statement of Changes in Equity and Recasted Cash flow statement dealt with by this report are in agreement with the books of accounts;

d) In our opinion, the aforesaid Recasted Standalone Financial Statements comply with the Indian Accounting Standards specified under Section 133 of the Act, read with Rule 7 of the Companies (Indian Accounting Standards) Rules, 2015 as amended;

e) We have relied on the written representations received from the directors and taken on record by the Board of Directors, while adopting the original financial statements and in terms thereof none of the directors was disqualified as on 31st March 2017 from being appointed as a director in terms of section 164 (2) of the Act;

f) We have been appointed as the auditors of the Company vide Appointment Letter issued by Ministry of Corporate Affairs ("MCA") dated 1st February, 2021 pursuant to the order of Hon'ble National Company Law Tribunal (NCLT) dated 5th March, 2020 to carry out audit of Recasted Standalone Financial Statements prepared under section 130 of the Act and as given to understand, we are not required to comment on the reporting required in respect of the adequacy of the internal financial controls over financial reporting of the Company and the operating effectiveness of such controls,.

g) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to explanations given to us:

i) The Company has disclosed the impact of pending litigation on its financial position in its Recasted Standalone Financial Statements - Refer Note 39 to the Recasted Standalone Financial Statements;

ii) The Company did not have any long-term contracts including derivative contracts for which there were material foreseeable losses;

iii) There has been no delay in transferring amounts, required to be transferred, to the Investor Education and Protection Fund, by the Company.

iv) We have relied on the report of the auditors on the original financial statements with respect to reporting on the requisite disclosures in Note 40 to the recasted financial statements as to the holdings of the specified bank notes on 8th November, 2016 and 30th December, 2016 as well as dealings in specified bank notes during the period from 8th November, 2016 and 30th December, 2016.

CG POWER AND INDUSTRIAL SOLUTIONS LIMITED
NOTES FORMING PART OF THE RECASTED STANDALONE FINANCIAL STATEMENTS FOR THE FINANCIAL YEAR ENDED MARCH 31, 2017

1. Basis of Preparation and Presentation of Recasted Financial Statements

1A. Corporate Information:

CG Power and Industrial Solutions Limited ('the Company') is a limited Company incorporated and domiciled in India whose shares are publicly traded. The registered office is located at 6th Floor, CG house, Dr. Annie Besant Road, Worli, Mumbai – 400 030, India

The Company was formerly known as Crompton Greaves Limited. Pursuant to the approval of the members of the Company vide special resolution dated January 25, 2017 and the Central government/ Registrar of companies, Mumbai on February 27, 2017, the Company changed its name from "Crompton Greaves Limited" to "CG Power and Industrial Solutions Limited effective February 27, 2017.

The Company is a global enterprise providing end-to-end solutions to utilities, industries and consumers for the management and application of efficient and sustainable electrical energy. It offers products, services and solutions in three main business segments, viz. Power Systems Industrial Systems and Automation Systems for the year ended March 31, 2017.

1B. Background for reopening and recasting of standalone financial statements:

i) On August 19, 2019, the Company filed information with the Bombay Stock Exchange (BSE) and the National Stock Exchange (NSE) and disclosed as under:

a) That the Company had constituted an Operations Committee (Ops Committee) in March,2019 under the Chairmanship of one of the independent Director of the Company;

b) That the Committee found some unauthorised transactions by certain identified "Company personnel , including certain non-executive directors, certain Key Management Personnel and other identified employees" ("CIP");

c) That the Committee came to know certain interest payment failure, but the committee was unable to trace the said transactions from the financials of the Company;

d) That the Managing Director of the Company received a request from a Bank to replace a cheque but the obligation could not relate to any obligations of the Company;

e) That the Company appointed an independent law firm to conduct an investigation on certain transactions. Further, S R B C & Co. LLP, Chartered Accountants, one of the joint statutory auditors of the Company, had vide letter dated May 9, 2019 sought information and explanation from the Company under section 143(12) of the Companies Act, 2013;

f) That the law firm submitted its interim report dated August 05, 2019 to the Risk and Audit Committee ('RAC') and an analysis of the report has also been submitted by Ops Committee;

g) Those unauthorised and undisclosed transactions and accounting entries identified during further verifications, have been brought to the knowledge of RAC;

h) That the RAC has received from the management, the compilation of unaudited standalone and consolidated financial position and profit and loss of the Company for the year ended March 31, 2019 and restated financial information and profit and loss for the year ended March 31, 2018 and statement of financial position as on April 01, 2017.

ii) Ministry of Corporate Affairs (MCA) by its order dated November 6, 2019 ordered investigation to be carried out by the Serious Fraud Investigation Office (SFIO), into the affairs of the Company, 2 of its subsidiary companies and 13 other companies;

iii) On filing of petition of MCA, the National Company Law Tribunal (NCLT) vide its order dated March 5, 2020 allowed for reopening of the books of account and re-casting of financial statements of CG Power and Industrial Solutions Limited and its subsidiary companies for 5 (Five) years ended as on March 31, 2019;

iv) Pursuant to the above Order of NCLT, MCA under section 130 of the Companies Act, 2013 ('the Act') vide their letter dated February 1, 2021 appointed Kalyaniwalla & Mistry LLP, Chartered Accountants ('Recasting Accountant') to Recast the financial statements and C N K & Associates LLP, Chartered Accountants baudit the Recasted financial statements of the Company for period of five years ended March 31, 2019.

1C. Approval of Standalone Financial Statements:

i) The original standalone financial statements of the Company for the year ended March 31, 2017 were authorised for issue in accordance with a resolution of the erstwhile Board of Directors on May 26, 2017 and approved by the shareholders in the General Meeting held on September 22, 2017;

ii) These Recasted standalone financial statements of the Company for the year ended March 31, 2017 were noted and taken on record by the present Board of Directors in its meeting held on September 9, 2021

1D. Summary of recasting adjustments and impact on the standalone financial statements:

i) Pursuant to the above background, the following table summarises the recasting adjustments identified by Recasting Accountants based on the findings of investigation reports, review of books of account, various records and minutes, scrutiny of material transactions as per previously audited financial statements, inquiry with the management and considered in preparation of the Recasted standalone financial statements for the year ended March 31, 2017

ii) The recasting adjustments disclosed in the above table may also have an impact on other disclosures to the Recasted standalone financial statements. These disclosures should also be read in conjunction with the above.

iii) As on the date of adoption of these Recasted financial statements, the Company is not aware about submission of investigation reports by SFIO to the Central Government. Therefore, no adjustments and disclosures that may arise in this regard have been considered in these Recasted financial statements.

iv) The Company believes that the Board of Directors and Key Managerial Personnel appointed after the change of Management on November 26, 2020 cannot be made liable for any violations or non-compliance of any of the provisions of law in respect of certain past transactions pertaining up March 31, 2017 arising out of the above.

1E. Subsequent Events:

All events that occurred up to the date of approval of the original financial statements by the Board of Directors as stated in Note 1C (i) have been considered in the preparation of these Recasted standalone financial statements.

1F. Balances of Trade Receivables, Trade Payable, Loans and Advances, certain Bank Balance and Borrowings are subject to confirmations/reconciliations/adjustment if any.

2. Basis of preparation:

The recasted standalone financial statements of the Company have been prepared in accordance with Indian Accounting Standards (Ind AS) notified under Section 133 of the Companies Act, 2013 read with the Companies (Indian Accounting Standards) Rules, 2015, as amended from time to time and presentation requirements of Division II of Schedule III of the Companies Act, 2013.

The Recasted standalone financial statements have been prepared on a historical cost basis, except for the following assets and liabilities which have been measured at fair value:

- Derivative financial instruments,
- Certain financial assets and financial liabilities measured at fair value (refer accounting policy regarding financial instruments).
- The financial statements are presented in Indian Rupees ('INR') and all values are rounded to the nearest crore, except when otherwise indicated.

3. SIGNIFICANT ACCOUNTING POLICIES

3.1. Property, plant and equipment:

Property, plant and equipment are stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. The cost comprises the purchase price, net of trade discounts and rebates, directly attributable costs of bringing the asset to its working condition for its intended use and capitalised borrowing costs. When significant parts of the plant and equipment are required to be replaced at intervals, the Company depreciates them separately based on their specific useful lives.

Subsequent expenditure related to an item of property, plant and equipment is capitalised only if it is probable that future economic benefits associated with the item will flow to the Company. All other repair and maintenance costs are recognised in the statement of profit and loss as incurred.

Capital work- in- progress includes cost of property, plant and equipment under installation / under development as at the balance sheet date and stated at cost, net of accumulated impairment loss, if any.

An item of property, plant and equipment and any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset is recognised in the statement of profit and loss when the asset is derecognised.

Depreciation is provided on straight- line method over the useful lives of assets. Depreciation commences when an asset is ready for its intended use. The management's estimates of useful lives are in accordance with Schedule II to the Companies Act, 2013, other than the following asset classes, where the useful lives were determined by technical evaluation. Freehold land is not depreciated. Depreciation on additions to / deductions from assets is provided on pro- rata basis with reference to the month of addition / deletion.

The range of useful lives of the property, plant and equipment are as follows:

- Plant and machinery - 1 to 21 years
- Furniture and fittings - 1 to 15 years
- Office equipment - 1 to 15 years
- Buildings - 3 to 60 years
- Vehicles - 1 to 8 years
- Leasehold land - 24 to 999 years

The estimated useful lives, residual values and depreciation method are reviewed at the end of each financial year end, with the effect of any changes in estimate accounted for on a prospective basis.

On transition to Ind AS, the Company has elected to continue with the carrying value as per the previous GAAP for Plant and machinery, Furniture and fittings, Office equipment and Vehicles as its deemed cost. Also, the Company has elected to measure Freehold land, Leasehold Land and Building at its fair value and considered it as deemed cost as on the date of transition to Ind AS.

Leased Assets

Leasehold lands are amortised over the period of lease. Buildings constructed on leasehold land are depreciated based on the useful life specified in Schedule II to the Companies Act, 2013, where the lease period of land is beyond the useful life of the building.

In other cases, buildings constructed on leasehold land are amortised over the primary lease period of the land.

3.2. Investment properties:

Investment properties comprise portions of freehold land and office buildings that are held for long-term rental yields and / or for capital appreciation. Investment properties are initially recognised at cost. Subsequently investment property comprising of building is carried at cost less accumulated depreciation and accumulated impairment losses.

The cost includes the cost of replacing parts and borrowing costs for long-term construction projects if the recognition criteria are met. When significant parts of the investment property are required to be replaced at intervals, the Company depreciates them separately based on their specific useful lives. All other repair and maintenance costs are recognised in profit and loss as incurred.

Depreciation on building is provided over the estimated useful lives as specified in Schedule II to the Companies Act, 2013. The residual values, useful lives and depreciation method of investment properties are reviewed, and adjusted on prospective basis as appropriate, at each financial year end. The effects of any revision are included in the statement of profit and loss when the changes arise.

Though the Company measures investment property using cost-based measurement, the fair value of investment property is disclosed in the notes. Fair values are determined based on an annual evaluation performed by an accredited external independent valuer applying a valuation model recommended by the International Valuation Standards Committee.

Investment properties are derecognised when either they have been disposed of or when the investment property is permanently withdrawn from use and no future economic benefit is expected from its disposal.

The difference between the net disposal proceeds and the carrying amount of the asset is recognised in the statement of profit and loss in the period of derecognition.

3.3. Intangible assets:

Intangible assets are recognised when it is probable that the future economic benefits that are attributable to the assets will flow to the Company and the cost of the asset can be measured reliably.

Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less accumulated amortisation and accumulated impairment losses.

The useful lives of intangible assets are assessed as either finite or indefinite. Intangible assets with finite useful lives are amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis.

Intangible assets are amortised as follows:

(1) Specialised software : Over a period of five to six years;
(2) Technical know-how: Over a period of five years (from the date of availability for its use);
(3) Commercial rights : Over a period of ten years

Intangible assets with indefinite useful lives, if any are not amortised, but are tested for impairment annually, either individually or at the cash- generating unit level. The assessment of indefinite life is reviewed annually to determine whether the indefinite life continues to be supportable. If not, the change in useful life from indefinite to finite is made on a prospective basis. The amortisation expense on intangible assets with finite lives is recognised in statement of profit and loss.

Gains or losses arising from de- recognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the statement of profit and loss when the asset is derecognised.

Research and development expenditure:

Revenue expenditure on research activities is expensed under the respective heads of accounts in the period in which it is incurred. Development expenditure on an individual project is capitalised as intangible asset, if all of the following criteria can be demonstrated:

(i) the technical feasibility of completing the intangible asset so that it will be available for use or sale;

(ii) the Company has intention to complete the development of intangible asset and use or sell it;

(iii) the Company has ability to use or sell the intangible asset;

(iv) the manner in which the probable future economic benefit will be generated including the existence of a market for output of the intangible asset or the intangible asset itself or if it is to be used internally, the usefulness of the intangible asset;

(v) the availability of adequate technical, financial and other resources to complete the development and to use or sell the intangible asset; and

(vi) the Company has ability to reliably measure the expenditure attributable to the intangible asset during its development.

Following initial recognition of the development expenditure as an asset, the asset is carried at cost less any accumulated amortisation and accumulated impairment losses. Amortisation of the asset begins when development is complete and the asset is available for use. It is amortised over a period of five years. During the period of development, the asset is tested for impairment annually.

3.4. Impairment of non- financial assets:

At least at the end of each reporting period, the Company assesses whether there is an indication that an asset may be impaired and also whether there is an indication that previously recognised impairment losses no longer exist or have decreased. If any indication exists, or when annual impairment testing for an asset is required, if any, the Company determines the recoverable amount and impairment loss is recognised in the statement of profit and loss, when the carrying amount of an asset exceeds its recoverable amount.

Recoverable amount is determined:

- In the case of an individual asset, at the higher of the fair value less cost to sell and the value in use; and
- In the case of cash generating unit (a group of assets that generates identified, independent cash flows), at the higher of the cash generating unit's (CGUs) fair value less cost to sell and the value in use.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre- tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

3.5. Inventories:

Inventories are valued as under:

- Raw materials, packing materials, construction materials, stores and spares, loose tools and traded goods at lower of cost and net realisable value. Cost is determined on weighted average basis.
- Work-in-progress and finished goods (manufacturing) at lower of cost and net realisable value. Cost includes an appropriate share of production overheads based on normal operating capacity. Finished goods cost is determined on weighted average basis.

The cost of inventories comprises all cost of purchases, cost of conversion and other costs incurred in bringing the inventories to their present location and condition. Obsolete and slow moving items of inventories are valued at cost or net realisable value, whichever is lower. Goods and Materials in transit are valued at actual cost incurred up to the reporting date. Materials and supplies held for use in the production of inventories are not written down if the finished products in which they will be used are expected to be sold at or above cost

Net realisable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and estimated costs necessary to make the sale.

3.6. Cash and cash equivalents:

Cash and cash equivalents in the balance sheet comprise cash at banks and on hand and short- term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the statement of cash flows, cash and cash equivalents consist of cash and short- term deposits, as defined above.

3.7. Foreign currency transactions:

The Company's Recasted standalone financial statements are presented in Indian Rupees ('₹'), which is also the Company's functional currency. Foreign currency transactions are recorded on initial recognition in the functional currency, using the exchange rate at the date of the transaction. At each balance sheet date, foreign currency monetary items are reported using the closing exchange rate. Exchange differences that arise on settlement of monetary items or on reporting of monetary items at each balance sheet date at the closing rate are recognised in the statement of profit and loss in the period in which they arise. Non- monetary items which are carried at historical cost denominated in a foreign currency are reported using the exchange rate at the date of the transaction. Non- monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. The gain or loss arising on translation of non- monetary items measured at fair value is recognised in line with the gain or loss of the item that gave rise to the translation difference (i. e. translation differences on items whose gain or loss is recognised in other comprehensive income or the statement of profit and loss is also recognised in other comprehensive income or the statement of profit and loss respectively).

i)Service concession arrangements

The Company constructs or upgrades infrastructure (construction or upgrade services) used to provide a public service and operates and maintains that infrastructure (operation services) for a specified period of time.

These arrangements may include Infrastructure used in a public-to-private service concession arrangement for its entire useful life.

Under Appendix A to Ind AS 11 – Service Concession Arrangements, these arrangements are accounted for based on the nature of the consideration. The intangible asset model is used to the extent that the Company receives a right (i.e. a franchisee) to charge users of the public service. The financial asset model is used when the Company has an unconditional contractual right to receive cash or another financial asset from or at the direction of the grantor for the construction services. When the unconditional right to receive cash covers only part of the service, the two models are combined to account separately for each component. If the Company performs more than one service (i.e., construction or upgrade services and operation services) under a single contract or arrangement, consideration received or receivable is allocated by reference to the relative fair values of the services delivered, when the amounts are separately identifiable.
The Company manages concession arrangements which include constructing power distribution assets for distribution of electricity. The Company maintains and services the infrastructure during the concession period. These concession arrangements set out rights and obligations related to the infrastructure and the service to be provided.

The right to consideration gives rise to an intangible asset and financial receivable and accordingly, both the intangible asset and financial receivable models are applied. Income from the concession arrangements earned under the intangible asset model consists of the (i) fair value of contract revenue, which is deemed to be fair value of consideration transferred to

acquire the asset; and (ii) payments actually received from the users. The intangible asset is amortized over its expected useful life in a way that reflects the pattern in which the asset's economic benefits are consumed by the Company, starting from the date when the right to operate starts to be used. Based on these principles, the intangible asset is amortized in line with the actual usage of the specific public facility, with a maximum of the duration of the concession.

Financial receivable is recorded at a fair value of guaranteed residual value to be received at the end of the concession period. This receivable is subsequently measured at amortised cost.

Any asset carried under concession arrangements is derecognised on disposal or when no future economic benefits are expected from its future use or disposal or when the contractual rights to the financial asset expire.

3.8. Revenue recognition:

a) Sale of goods

Revenue from sale of goods is recognised, when all significant risks and rewards are transferred to the buyer, as per the terms of the contracts and no significant uncertainty exists regarding the amount of the consideration that will be derived from the sale of goods. It also includes excise duty and price variations based on the contractual agreements and excludes value added tax / sales tax. It is measured at fair value of consideration received or receivable, net of returns and allowances, trade discounts and volume rebates.

b) Rendering of services

Revenue from sale of services is recognised as per the terms of the contract with customers based on stage of completion when the outcome of the transactions involving rendering of services can be estimated reliably. Percentage-of-completion method requires the Company to estimate the services performed to date as a proportion of the total services to be performed.

c) Revenue from construction contracts

Revenue from construction contracts is recognised by applying percentage of completion method after providing for foreseeable losses, if any. Percentage of completion is determined as a proportion of the cost incurred upto the reporting date to the total estimated cost to complete. Foreseeable losses, if any, on the contracts is recognised as an expense in the period in which it is foreseen, irrespective of the stage of completion of the contract. While determining the amount of foreseeable loss, all elements of cost and related incidental income not included in contract revenue is taken into consideration. Contract is reflected at cost that are expected to be recoverable till such time the outcome of the contract cannot be ascertained reliably and at realisable value thereafter. Claims are accounted as income in the year of acceptance by customer.

d) Power distribution

Revenue from power distribution business is accounted on the basis of billings to the customers and includes unbilled revenues accrued upto the end of accounting year. Customers are billed as per the tariff rates issued by Electricity Regulatory Commission. Interest is accounted on accrual basis on overdue bills.

e) Dividend Income

Dividend income is accounted for when the shareholder's right to receive the same is established, which is generally when shareholders approve the dividend.

f) Lease Income

Lease arrangements where the risk and rewards incidental to the ownership of an asset substantially vest with the lessor are recognized as operating lease. Lease rental are recognized on the straight line basis as per the term of the agreements in statement of profit and loss.

g) Interest Income

For all financial instruments measured at amortised cost, interest income is recorded using the effective interest rate (EIR), which is the rate that exactly discounts the estimated future cash payments or receipts through the expected life of the financial instrument or a shorter period, where appropriate, to the net carrying amount of the financial asset. Interest income is included in finance income in the statement of profit and loss.

3.9. Employee benefits:

Short- term employee benefits:

All employee benefits payable wholly within twelve months after the end of the annual reporting period in which the employees render the related services, are classified as short term employee benefits. Benefits such as salaries, wages, short- term compensated absences, performance incentives etc. and the expected cost of bonus, ex- gratia are recognised during the period in which the employee renders related service. Liabilities recognised in respect of short term employee benefits are measured at the undiscounted amounts of the benefits expected in exchange for the related services.

Post- employment benefits

Defined Contribution Scheme:

Payments to defined contribution retirement benefit plans are recognised as an expense when employees have rendered the service entitling them to the contributions.

Provident Fund:

Contributions to Provident Fund are made to a Trust administered by the Company and are charged to profit or loss as incurred. The Company is liable for the contribution and any shortfall in interest between the amount of interest realised by the investments and the interest payable to members at the rate declared by the Government of India in respect of the Trust administered by the Company making interest shortfall a defined benefit plan. Accordingly, the Company obtains actuarial valuation and based on the valuation if there is no deficiency as at the balance sheet date then, the liability is restricted towards monthly contributions only.

Defined Benefit Plans:

The cost of providing benefits under the defined benefit plan is determined using the projected unit credit method with the actuarial valuations being carried out at the end of each annual reporting period. Remeasurements, comprising actuarial gains and losses, the effect

of the asset ceiling and the return on plan assets (excluding net interest) , are recognised immediately in the balance sheet with a corresponding debit or credit to other comprehensive income in the period in which they occur. Remeasurements are not reclassified to the profit or loss. Past service cost is recognised in the statement of profit and loss in the period of plan amendment or when the Company recognised related re- structuring costs. The Company recognises the following changes in the net defined benefit obligation under employee benefit expenses in profit or loss:

- service costs comprising current service costs, past- service costs, gains and losses on curtailments and settlements;
- net interest expense or income.

Gratuity:

The cost of providing benefit under gratuity plan is determined on the basis of actuarial valuation using the projected unit credit method at the reporting date. The scheme is funded with the CG Gratuity Fund. Remeasurements, comprising of actuarial gains and losses are recognised in full in other comprehensive income in the reporting period in which they occur. Remeasurements are not reclassified to profit and loss subsequently.

Leave encashment:

Accumulated leave, which is expected to be utilised within the next twelve months, is treated as short- term employee benefit. The Company measures the expected cost of such absences as the additional amount that it expects to pay as a result of the unused entitlement that has accumulated at the reporting date. The Company treats accumulated leave expected to be carried forward beyond twelve months, as long- term employee benefit for measurement purposes. Such long- term compensated absences are provided for based on the actuarial valuation using the projected unit credit method at the reporting date. Remeasurements, comprising of actuarial gains and losses are recognised in full in the statement of profit and loss.

Termination benefits:

Termination benefits are recognised as an expense when the Company can no longer withdraw the offer of the termination benefits or when the Company recognises any related restructuring costs whichever is earlier.

3.10. Borrowing costs:

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time (generally over twelve months) to get ready for its intended use or sale are capitalised as part of the cost of the asset.

All other borrowing costs are expensed in the period in which they occur. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds.

3.11. Segment accounting:

Operating segments are those components of the business whose operating results are regularly reviewed by the Chief Operating Decision Maker in the Company to make decisions for performance assessment and resource allocation. Segment performance is evaluated based on the profit or loss of reportable segment and is measured consistently. The Operating segments have been identified on the basis of the nature of products / services.

a) Segment revenue includes sales and other income directly identifiable with / allocable to the segment including inter- segment revenue.
b) Expenses that are directly identifiable with / allocable to segments are considered for determining the segment result. Expenses which relate to the Company as a whole and not allocable to segments are included under unallocable expenditure.
c) Income which relates to the Company as a whole and not allocable to segments is included in unallocable income.
d) Segment result includes margins on inter- segment sales which are reduced in arriving at the profit before tax of the Company.
e) Segment assets and liabilities include those directly identifiable with the respective segments. Unallocable assets and liabilities represent the assets and liabilities that relate to the Company as a whole and not allocable to any segment.

Inter-Segment transfer pricing:

Segment revenue resulting from transactions with other business segments is accounted on the basis of transfer price agreed between the segments. Such transfer prices are either determined to yield a desired margin or agreed on a negotiated basis.

3.12. Leases:

The determination of whether an arrangement is, or contains, a cash is based on the substance of the arrangement at the inception date, whether fulfillment of the arrangement is dependent on the use of a specific asset or assets or the arrangement conveys a right to use the asset, even if that right is not explicitly specified in arrangement.

Finance Lease that transfer substantially all the risk and benefits incidental to ownership of the leased item, are capitalized at the commencement of the lease at the fair value of the leased property or if lower, at the present value of the minimum lease payments. Lease payments are apportioned between finance charges and reduction in lease liability so as to achieve constant interest rate on the remaining balance of liability. Finance charges are recognised in finance costs in the statement of profit and loss.

A leased asset is depreciated over the useful life of the asset. However, if there is no reasonable certainty that the Company will obtain ownership by the end of the lease term, the asset is depreciated over the shorter of the estimated useful life of the asset and the lease term.

Asset acquired on leases where a significant portion of the risks and rewards of ownership are retained by lessor are classified operating leases. Lease rentals are charged to statement of profit and loss.

3.13. Earnings per share:

Basic earnings per share are calculated by dividing the net profit for the year attributable to equity shareholders by the weighted average number of equity shares outstanding during the year. The weighted average number of equity shares outstanding during the reporting period is adjusted for events such as bonus issue, bonus element in a rights issue, share split, and reverse share split (consolidation of shares), if any occurred during the reporting period, that have changed the number of equity shares outstanding, without a corresponding change in resources. For the purpose of calculating diluted earnings per share, the net profit for the year attributable to the equity shareholders and the weighted average number of equity shares outstanding during the year, are adjusted for the effects of all dilutive potential equity shares. The number of shares and potential dilutive equity shares are adjusted retrospectively for all

periods presented for any bonus shares issues including for changes effected prior to the approval of the Recasted standalone financial statements by the Board of Directors.

3.14. Income taxes:

Income tax expense for the period comprises of current and deferred income tax. Income tax expense is recognised in the statement of profit and loss except when they are relating to items that are recognised in OCI or directly in equity, in which case, it is also recognised in relating to items recognised directly in OCI or equity respectively.

Current tax

Current tax comprises the expected income tax payable on the taxable income for the year and any adjustment to the tax payable or receivable in respect of previous years. It is measured using tax rates enacted or substantively enacted at the Balance Sheet date. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

Deferred Tax

Deferred tax Deferred tax assets and liabilities are recognised for all temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the Recasted standalone financial statements.

Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised. Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised.

Unrecognised deferred tax assets are reassessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Minimum alternate tax (MAT) credit is recognised as deferred tax asset only when and to the extent there is convincing evidence that the Company will pay normal income tax during the specified period. Such asset is reviewed at each Balance Sheet date and the carrying amount is written down to the extent the Company does not have convincing evidence that it will pay normal tax during the specified period.

3.15. Provisions, Contingent liabilities, Contingent assets and Commitments:

General

Provisions are recognised when the Company has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When provision is measured using the cash flow estimated to settle the present obligation, its carrying amount

is the present value of these cash flows (when the effect of the time value of money is material)

Disclosure of contingent liability is made when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non- occurrence of one or more uncertain future events not wholly within the control of the Company or a present obligation that arises from past events where it is either not probable that an outflow of resources embodying economic benefits will be required to settle or a reliable estimate of amount cannot be made.

Provisions, contingent liabilities and contingent assets are reviewed at each balance sheet date.

Warranty provisions

Provisions for the expected cost of warranty obligations are recognised at the time of sale of relevant product or service, at the best estimate of the expenditure required to settle the Company's obligation.

Onerous contracts

If the Company has a contract that is onerous, the present obligation under the contract is recognised and measured as a provision. An onerous contract is considered to exist where the Company has a contract under which the unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received from the contract.

Liquidated damages

Provision for liquidated damages are recognised on contracts for which delivery dates are exceeded and computed in reasonable manner.

Other Litigation claims

Provision for litigation related obligation represents liabilities that are expected to materialise in respect of matters in appeal.

3.16. Exceptional items:

An item of income or expense which by its size, type or incidence is such that its disclosure improves the understanding of the performance of the Company, such income or expense is classified as an exceptional item and accordingly, disclosed as such in the Recasted standalone financial statements.

3.17. Current and non- current classification:

The Company presents assets and liabilities in the balance sheet based on current / non-current classification.

An asset is treated as current when it is:

- Expected to be realised or intended to be sold or consumed in normal operating cycle,
- Held primarily for the purpose of trading,
- Expected to be realised within twelve months after the reporting period, or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period All other assets are classified as non- current. A liability is treated as current when:
- It is expected to be settled in normal operating cycle, • It is held primarily for the purpose of trading,
- It is due to be settled within twelve months after the reporting period, or

- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period. All other liabilities are classified as non- current. Deferred tax assets / liabilities are classified as non- current.

Operating cycle: A portion of the Company activities (primarily long- term project activities) has an operating cycle that exceeds one year. Accordingly, assets and liabilities related to these long- term contracts, which will not be realised / paid within one year, have been classified as current. For all other activities, operating cycle is twelve months..

3.18. Fair value measurement:

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the Company has access at that date. The fair value of a liability reflects its non- performance risk. A number of the Company's accounting policies and disclosures require the measurement of fair values, for both financial and non- financial assets and liabilities. Fair values are categorised into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

- Level 1 – Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 – Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 – Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

3.19. Non- current assets held for sale and discontinued operations:

Non- current assets and disposal groups are classified as held for sale if their carrying amounts will be recovered principally through a sale transaction rather than through continuing use. Non- current assets and disposal groups classified as held for sale are measured at the lower of their carrying amount and fair value less costs to sell. The criteria for held for sale classification is regarded as met only when the sale is highly probable and the asset or disposal group is available for immediate sale in its present condition. Management must be committed to the sale, which should be expected to qualify for recognition as a completed sale within one year from the date of classification.

Discontinued operations are excluded from the results of continuing operations and are presented as a single amount as profit or loss after tax from discontinued operations in the statement of profit and loss. Also comparative statement of profit and loss is re-presented as if the operation had been discontinued from the start of the comparative period.

Assets and liabilities classified as held for disposal are presented separately from other assets and liabilities in the balance sheet.

Property, plant and equipment and intangible assets once classified as held for sale are not depreciated or amortised.

3.20. Financial instruments:

The Company recognises financial assets and financial liabilities when it becomes a party to the contractual provisions of the instrument.

a) Financial assets

Initial recognition and measurement:

Financial assets are measured at fair value on initial recognition, except for trade receivables which are initially measured at transaction price.

Transaction costs that are directly attributable to the acquisition of financial assets, which are not at fair value through profit or loss, are added to the fair value on initial recognition.

Subsequent measurement

All recognised financial assets are subsequently measured in their entirety either at amortised cost or at fair value depending on the classification of the financial assets. Where financial assets are measured at fair value, gains and losses are either recognised entirely in the statement of profit and loss (i. e. fair value through profit or loss or 'FVTPL') , or recognised in other comprehensive income (i. e. fair value through other comprehensive income or 'FVTOCI') .

A financial asset is measured at amortised cost (net of any write down for impairment) if it is held within a business model whose objective is to hold the asset in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that represent solely payments of principal and interest on the principal amount outstanding.

A financial asset is measured at FVTOCI if it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that represents solely payments of principal and interest on the principal amount outstanding.

All other financial assets are measured at fair value through profit or loss.

All equity investments are measured at fair value, with fair value changes recognised in the statement of profit and loss, except for those equity investments for which the entity has elected to present fair value changes in 'other comprehensive income'. However, dividend on such equity investments are recognised in statement of profit and loss when the Company's right to receive payment is established.

Investment in associates, joint venture and subsidiaries

The Company accounts for its investment in subsidiaries, associates and joint venture, at cost less impairment loss except where investments is accounted for in accordance with Ind AS 105, Non- current Assets Held for Sale and Discontinued Operations, when they are classified as held for sale.

Impairment of financial assets

The Company uses 'Expected Credit Loss' (ECL) model, for evaluating impairment of financial assets other than those measured at fair value through profit and loss. Expected credit losses are measured through a loss allowance at an amount equal to:

- The 12- months expected credit losses (expected credit losses that result from those default events on the financial instrument that are possible within 12 months after the reporting date); or
- Full lifetime expected credit losses (expected credit losses that result from all possible default events over the life of the financial instrument).

For Trade Receivables the Company applies 'simplified approach' which requires expected lifetime losses to be recognised from initial recognition of the receivables. The Company uses historical credit loss experience to determine impairment loss on the portfolio of trade receivables. At every reporting date these historical default rates are reviewed and changes in the forward-looking estimates are analysed. For other assets, the Company uses 12 month ECL to provide for impairment loss where there is no significant increase in credit risk. If there is significant increase in credit risk full lifetime ECL is used.

Derecognition

The Company derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the financial asset and the transfer qualifies for derecognition under Ind AS 109.

b) Financial liabilities:

Initial recognition and measurement

Financial liabilities are measured at fair value on initial recognition. Transaction costs that are directly attributable to the issue of financial liabilities, which are not at fair value through profit or loss, are deducted from the fair value on initial recognition.
The Company's financial liabilities include trade and other payables, loans and borrowings including bank overdrafts, and derivative financial instruments.

Subsequent measurement

Financial liabilities are classified as measured at amortised cost or fair value through profit or loss ('FVTPL'). A financial liability is classified as at FVTPL if it is classified as held-for-trading, it is a derivative or it is designated as such on initial recognition. Financial liabilities at FVTPL are measured at fair value and net gains and losses, including any interest expense, are recognised in profit or loss. Other financial liabilities are subsequently measured at amortised cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognised in profit or loss. Any gain or loss on derecognition is also recognised in profit or loss.

Financial guarantee contracts

A financial guarantee contract is a contract that requires the Company to make specified payment to reimburse the holder for a loss it incurs because the specified debtor fails to make a payment when due in accordance with the terms of a debt instrument. Financial guarantee contracts issued by the Company are initially measured at their fair values and, if not designated as at FVTPL, are subsequently. measured at the higher of, the amount of loss allowance determined as per impairment

requirements of Ind AS 109 and the amount initially recognised less cumulative amount of income recognised.

Derecognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the de-recognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit and loss.

c) Derivative financial instruments and hedge accounting:

The Company uses various derivative financial instruments to hedge foreign currency / price risk on unexecuted firm commitments and highly probable forecast transactions. Such derivative financial instruments are initially recognised at fair value and are subsequently remeasured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative.
Any gains or losses arising from changes in the fair value of derivatives are taken directly to statement of profit and loss, except for the effective portion of cash flow hedges, which is recognised in other comprehensive income and presented as a separate component of equity which is later reclassified to statement of profit and loss when the hedge item affects profit or loss.

d) Offsetting of financial instruments:

Financial assets and financial liabilities are offset and the net amount is presented in the balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the assets and settle the liabilities simultaneously.

4. Significant accounting judgements, estimates and assumptions

The preparation of the Company's financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future periods.

Judgements

Service concession arrangement:

Management has assessed applicability of Appendix A of Ind-AS 11: Service Concession Arrangements to power distribution arrangements entered into by the Company. In assessing the applicability, management has exercised significant judgment in relation to the underlying ownership of the assets, terms of the power distribution arrangements entered with the grantor, ability to determine prices, fair value of construction service, assessment of right to guaranteed cash etc. Based on detailed evaluation, management has determined that this arrangement meet the criteria for recognition as service concession arrangements.

Discontinued operations:

Consumer Products segment

In pursuant to the demerger of the Consumer products business unit, the Board considered the consumer products business unit to meet the criteria to be classified as held for distribution at that date for the following reasons:

- The actions to complete the distribution were initiated and expected to be completed within one year from the date of commitment to demerger the business ie.February 19, 2015,
- Consumer product represents a separate major line of business of operations,
- The shareholders approved the distribution in August 2015,
- The Scheme of demerger was approved by the Honourable High court judicature at Bombay, November 20, 2015 (the Appointed date)

Power distribution business

In Pursuant to the certain unresolved disputes arising out of the Distribution Franchisee Agreement (DFA) of the Company with Maharashtra State Electricity Distribution Company Limited (MSEDCL) at Jalgoan in Maharashtra, MSEDCL has exercised its step in rights and taken over the Distribution Franchisee in Jalgoan from the Company with effect from August 12, 2015. The operations were terminated with immediate effect and the final claim settlement between the Company and MSEDCL is in progress. The Company have classified the Power distribution segment as held for disposal from August 12, 2015 for the following reasons:

- Power distribution segment represents a separate major line of business of operations
- The operations were abandoned with immediate effect from August 12, 2015 and hence the carrying amount will not be recovered principally through continuing use.

Automation business

In pursuance to the discontinuance of the Automation business unit, the Board considered the Automation business unit to meet the criteria to be classified as held for distribution at that date for the following reasons:

- The actions to complete the distribution were initiated and the business was sold during the year ended March 31, 2017,
- Automation business represents a separate major line of business of operations.

Lease of equipment not in legal form of lease

Significant judgment is required to apply lease accounting rules under Appendix C to Ind-AS 17: determining whether an Arrangement contains a Lease. In assessing the applicability to arrangements entered into by the Company, management has exercised judgment to evaluate the right to use the underlying assets, substance of the transaction including legally enforced arrangements and other significant terms and conditions of the arrangement to conclude whether the arrangements meet the criteria under Appendix C to Ind-AS 17.

Estimates and assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below.

(i) Useful lives of property, plant and equipment

Management reviews useful lives of property, plant and equipment at least once a year. Such lives are dependent upon an assessment of both the technical lives of the assets and also their likely economic lives based on various internal and external factors. This reassessment may result in change in depreciation expected in future period.

(ii) Fair value measurement of financial instruments

When the fair values of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the Discounted Cash Flow (DCF) model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. Judgements include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments.

(iii) Development costs

Development costs are recognised as an asset when all the criteria are met, whereas research costs are expensed as incurred. Management assesses and monitors whether the recognition requirements for development costs continue to be met. There is inherent uncertainty in the economic success of any product development. The Company uses judgement in assessment of development cost eligible for capitalisation.

(iv) Impairment of non-financial assets

In case of non-financial assets company estimates asset's recoverable amount, which is higher of an asset's or cash generating units (CGU's) fair value less costs of disposal and its value in use.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used.

(v) Impairment of financial assets

The impairment provisions for financial assets are based on assumptions about risk of default and expected loss rates. The Company uses judgement in making these assumptions and selecting the inputs to the impairment calculation, based on Company's past history, existing market conditions as well as forward looking estimates at the end of each reporting period.

(vi) Income taxes

Deferred tax assets for unused tax losses are recognised only when it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits.

(vii) Defined benefit obligation

In accounting for post-retirement benefits, actuarial method uses several statistical and other factors to anticipate future events that are used to calculate defined benefit obligation. These factors include expected return on plan assets, discount rate assumptions and rate of future compensation increases. To estimate these factors, actuarial consultants also use estimates such as withdrawal, turnover, and mortality rates which require significant judgment. The actuarial assumptions used by the Company may differ materially from actual results in future periods due to changing market and economic conditions, regulatory events, judicial rulings, higher or lower withdrawal rates, or longer or shorter participant life spans.

(viii) Contingencies

In the normal course of business, contingent liabilities may arise from litigation and other claims against the Company. Potential liabilities that are possible but not probable of crystallising or are very difficult to quantify reliably are treated as contingent liabilities. Such liabilities are disclosed in notes but are not recognised, The cases which have been determined as remote by the Company are not disclosed.

20. SHARE CAPITAL (Contd...)

(h) Dividend paid and proposed:
No dividends have been proposed, declared or paid during the financial year 2016-17 (Previous year 2015-16 ₹ Nil) or after the Financial year but before the financial statements were approved for issue.

(i) Nature and purpose of reserves:

(1) Capital redemption reserve:
Capital redemption reserve was created on buy back of shares. The Company may issue fully paid-up bonus shares to its members out of the capital redemption reserve account.

(2) Security premium account:
Security premium account is created when shares are issued at premium. The Company may issue fully paid-up bonus shares to its members out of the security premium reserve account, and Company can use this reserve for buy-back of shares.

(3) Capital reserve:
The Company had paid certain deferred sales tax liabilities in accordance with the scheme formulated by the State Government of Maharashtra for such optional prepayments. The resultant surplus of ₹ 19.12 crores, representing the excess of the recorded liability over the amount paid was credited to Capital reserve.

During the financial year ended March 31, 2016, the capital reserve of ₹ 652.53 crores is recognised due to demerger of consumer products segment pursuant to the transfer of all assets and liabilities to the resulting company i.e. Crompton Greaves Consumer Electricals Limited (Refer note 51).

Security created to the extend of :

(a) Secured term loans from banks:

The term loan of ₹ 412.71 crore (as at March 31, 2016 ₹ Nil) at an interest rate of 1 year Bank's MCLR (reset on the 1st day of the month falling after twelve calendar months from the date of relevant drawdown and every 12 months thereafter) plus a spread of 1.55% p.a. payable monthly. The loan is repayable within five years from the date of disbursement i.e. August 3, 2016, in 18 structured quarterly payments with a moratorium of 6 months. The loan is secured by First exclusive charge on plant and machinery and moveable fixed assets (Current maturity pertaining to the said loan is ₹ 22.30 crore, Refer note 27).

(b) Unsecured term loans from banks:

The term loan of ₹ 210.63 crore (as at March 31, 2016 ₹ Nil) at an interest rate of 10.15% p.a. linked to Bank's 1 year MCLR (Floating rate). The loan is repayable within 2.75 years from the date of disbursement i.e. July 11, 2016, in 10 equal quarterly installments with first installment starting after 6 months from the date of disbursement (Current maturity pertaining to the said loan is ₹ 97.44 crore, Refer note 27).

21. NON-CURRENT FINANCIAL LIABILITIES-BORROWINGS (Contd..)

Finance lease commitments

The minimum lease rentals as at March 31, 2017 and the present value as at March 31, 2017 of minimum lease payment in respect of assets acquired under finance leases are as follows:

₹ crore

Particulars	As at March 31, 2017 (Recasted)		As at March 31, 2017 (Original)		As at March 31, 2016 (Recasted)		As at March 31, 2016 (Original)

Less: amounts representing finance charges	-	-	-	-	0.80	-	0.80	-
Present value of minimum lease payments	-	-	-	-	**7.87**	7.87	**7.87**	7.87

The Company has during the financial year 2016-17, made reassessment of an arrangement after its inception, which was earlier assessed as containing a finance lease. The reassessment was necessitated on account of change in the contractual terms (which did not relate only to renewal or extension of the arrangement). The arrangement is now reassessed as not containing a lease and thus, lease accounting ceased to apply from the date when the change in circumstances giving rise to the reassessment occurred.

The difference between the carrying amount of the leased assets and the lease liability, amounting to ₹ 3.07 crore has been recognised in the Statement of profit and loss.

Additional provision made during the year and reversal of unused amount are included in the respective head of accounts.

* Carrying amounts comprise of non-current and current provisions.

(2) Nature of provisions:

(a) Product warranties: The Company gives warranties on certain products and services in the nature of repairs / replacement, which fail to perform satisfactorily during the warranty period. Provision made represents the amount of the expected cost of meeting such obligation on account of rectification / replacement. The timing of outflows is expected to be within a period of two years.

(b) Provision for sales tax / VAT represents liability on account of non-collection of declaration forms and other legal matters which are in appeal under the Act / Rules.

(c) Provision for excise duty /customs duty / service tax represents the differential duty liability that is expected to materialise in respect of matters in appeal.

(d) Provision for liquidated damages has been made on contracts for which delivery dates are exceeded and computed in reasonable and prudent manner.

(e) Provision for litigation related obligations represents liabilities that are expected to materialise in respect of matters in appeal.

Labour welfare scheme	0.02	0.02	0.02	0.02
Total	15.51	15.51	14.90	14.90

(b) Defined benefit plans:

Gratuity

The Company provides for gratuity, a defined benefit retirement plan covering eligible employees. The Gratuity Plan provides a lump sum payment to vested employees at retirement, death, incapacitation or termination of employment, of an amount equivalent to 15 to 30 days' salary for each completed year of service subject to a maximum of ₹ 0.10 crore. Vesting occurs upon completion of five continuous years of service in accordance with Indian law.

The Company makes annual contributions to the Crompton Greaves Limited Gratuity Trust, which is funded defined benefit plan for qualifying employees. The Board of Trustees is responsible for the administration of the plan assets and for the definition of the investment strategy.

Post-retirement medical benefit

Post-retirement medical benefit includes hospitalization cover & benefits on Cessation of Employment for the Policy. This cover is applicable only to employee and spouse as per the limits specified for the last grade while in employment. This coverage does not form part of essential terms and condition of employment, and is a benefit extended by the company as a part of its social benefit policies.
The policies of Medical, Health and Hospitalization insurance are subject to change based on contemporary market trends and practices.

The following tables summarise the components of net benefit expenses recognised in the statement of profit and loss and the funded status and amounts recognised in the balance sheet for the respective plans:

NOTES ACCOMPANYING TO THE RECASTED FINANCIAL STATEMENTS FOR THE FINANCIAL YEAR ENDED MARCH 31, 2017

Notes :

(i) The actuarial valuation of plan assets and the present value of the defined benefit obligation were carried out at 31st March, 2017. The present value of the defined benefit obligation and the related current service cost and past service cost, were measured using the Projected Unit Credit Method.

(ii) Discount rate is based on the prevailing market yields of Indian Government securities as at the balance sheet date for the estimated term of the obligations.

(iii) The salary escalation rate is arrived after taking into consideration the seniority, the promotion and other relevant factors, such as, demand and supply in employment market.

(c) **Provident Fund:**

The Company makes contribution towards provident fund which is administered by the trustees. The Rules of the Company's Provident Fund administered by a trust, require that if the Board of the Trustees are unable to pay interest at the rate declared by the Government under Para 60 of the Employees Provident Fund Scheme, 1972 for the reason that the return on investment is less for any other reason, then the deficiency shall be made good by the Company making interest shortfall a defined benefit plan. Accordingly, the company has obtained actuarial valuation and based on the below provided assumption there is no deficiency as at the balance sheet date. Hence, the liability is restricted towards monthly contributions only.

CG POWER AND INDUSTRIAL SOLUTIONS LIMITED

NOTES ACCOMPANYING TO THE RECASTED FINANCIAL STATEMENTS FOR THE FINANCIAL YEAR ENDED MARCH 31, 2017

49 Disclosures as required by Indian Accounting Standard (Ind AS) 108 Operating Segments

(Recasted)

As per Ind AS 108 - 'Operating Segments ', Recasted Segment information has been provided under the Notes to Recasted consolidated financial statements

(Original)

Operating Segments:

Power Systems : Transformer, Switchgear and Turnkey Projects

Industrial Systems : Electric Motors, Alternators, Drives, Traction Electronics and SCADA

Identifications of Segments:

The chief operational decision maker monitors the operating results of its Business Segments separately for the purpose of making decisions about resource allocation and performance assessment. Segment performance is evaluated based on profit or loss and is measured consistently with profit or loss in the financial statements. Operating segments have been identified on the basis of the nature of products / services and have been identified as per the quantitative criteria specified in the Ind AS.

Segment revenue and results:

The expenses and incomes which are not directly attributable to any business segment are shown as unallocable expenditure (net of unallocated income).

Segment assets and liabilities:

Segment assets include all operating assets used by the operating segment and mainly consist of property plant and equipment, trade receivables, cash and cash equivalents and inventories. Segment liabilities primarily include trade payables and other liabilities. Common assets and liabilities which cannot be allocated to any of the segments are shown as a part of unallocable assets / liabilities.

Inter segment transfer:

Inter segment prices are normally negotiated amongst segments with reference to the costs, market price and business risks. Profit or loss on inter segment transfers are eliminated at the Company level.

Summary of the Segmental Information as at and for the year ended March 31, 2017 is as follows:

₹ crore

The transactions with related parties are made on terms equivalent to those that prevail in arm's length transactions. This assessment is undertaken in each financial year through examining the financial position of the related party and the market in which the related party operates. Outstanding balances at the year-end are unsecured and settlement occurs in cash.

51 Disclosures as required by Indian Accounting Standard (Ind AS) 105 Non-current assets held for sale and discontinued operations

Automation Systems

The Board of Directors of the Company vide resolution dated November 07, 2016, accepted an offer for the sale of Company's B2B Automation business (Indian business) from Alfanar Electric Systems Company ("Alfanar") of the Kingdom of Saudi Arabia. Alfanar is a major player in the electrical manufacuring business, including the manufacturing of electrical construction products as well as related engineering services.

Consequently, CG incorporated, on November 18, 2016, a wholly owned subsidiary - a special purpose vehicle, ZIV Automation India Limited ("ZIV"). Effective January 01, 2017, the Company transferred its automation business in India to ZIV under slump sale agreement against shares issued by ZIV.

Subsequently, on March 06, 2017, CG's entire investment in ZIV was sold to Alfanar at ₹ 31.71 crore, pursuant to an agreement between CG and Alfanar. Thus, ZIV ceased to be subsidiary company of CG w.e.f. March 06, 2017.

The Discontinued operations have been disclosed as "Automation Systems" segment separately.

Consumer Products

The Company demerged its Consumer products business unit into a separate company (wholly owned subsidiary of CG till March 23, 2016), Crompton Greaves Consumer Electricals Limited ("CGCEL") with effect from October 01, 2015. For the year ended March 31, 2016, results up to September 30, 2015 have been presented under profit or loss from discontinued operations.

The Discontinued operations have been disclosed as "Consumer Products" segment separately.

Power Distribution

On June 01, 2011, the Company had entered into Power Distribution Franchise Agreement ('DFA') with Maharashtra State Electricity Distribution Company Limited ('MSEDCL') for distribution of power in Jalgaon region of Maharashtra, India.

As per the terms of the arrangements, the Company had obtained the right ('franchise') to distribute the electricity for the period of 10 years to the public at large.

MSEDCL shall supply / sale electricity to the Company at rate prescribed under regulatory guidelines (MERC directives on load shedding). The Company shall distribute and supply the electricity at the tariff determined by the regulatory authorities.

The Company shall conduct normal maintenance activities of network and other assets to maintain uninterrupted service. The Company is a private operator and MSEDCL is a Government body. The Company undertakes obligation of public service granted by MSEDCL. Thus, the arrangement is a public-to-private service concession. The electricity distribution service is totally regulated by the MSEDCL or other Government regulatory authorities.

MSEDCL had given right to the Company to use its distribution assets which will always belong to MSEDCL. During the tenure of the arrangement, if the Company incurs any capital expenditure, the same shall vest with MSEDCL at the end of the contract. MSEDCL shall reimburse the Company for the capital expenditure incurred at the then value calculated based on pre-determined depreciation rate. Thus, MSEDCL controls significant residual interest in the concession assets. Accordingly, the Company had a contractual right to receive cash from MSEDCL for the capital expenditure incurred.

Therefore, the arrangement is a Service concession arrangement under Appendix A to Ind-AS 11. The Company had a contractual right to receive the residual value of the capital expenditure done under the arrangement and accordingly, will recognise financial asset. Further, the Company had right to charge the consumers for the services and therefore, there was an intangible asset.

The revenues and losses in respect of Service Concession Arrangements recognised during the year are as follows:

₹ crore

Particulars	For the year ended March 31, 2017 (Recasted)	For the year ended March 31, 2017 (Original)	For the year ended March 31, 2016 (Recasted)	For the year ended March 31, 2016 (Original)

Consequent to the certain unresolved disputes arising out of the Distribution Franchisee Agreement (DFA) of the Company with Maharashtra State Electricity Distribution Company Limited (MSEDCL) at Jalgaon in Maharashtra, MSEDCL had exercised its step in rights and taken over the Distribution Franchisee in Jalgaon from the Company with effect from August 12, 2015. Accordingly, the Company has classified Power Distribution Segment as discontinued operations.

The Company and MSEDCL have raised demand on each other and the matter is under dispute. The Company and MSEDCL are in the process of constituting a Permanent Dispute Resolution Body (PDRB) to arrive at a solution in near future. The Company does not expect any adverse impact with respect to above.

₹ crore

Sr. No.	Particulars	In cash	Yet to be paid in cash	Total
(i)	Construction/acquisition of asset	-	-	-
(ii)	On purposes other than (i) above	2.29	-	2.29

(c) Out of the above, the Company has paid ₹ 0.65 crore (Previous year ₹ 6.00 crore) to Avantha Foundation towards CSR activities.

*The profit attributable to the demerged consumer business of the Company has been excluded to arrive at the average net profits of the past three financial years for calculating the CSR obligation of the Company for financial year 2016-17.

NOTES ACCOMPANYING TO THE RECASTED FINANCIAL STATEMENTS FOR THE FINANCIAL YEAR ENDED MARCH 31, 2017

54 Financial Instruments - Accounting Classifications and Fair Value Measurements

The fair values of the financial assets and liabilities are included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.

The following methods and assumptions were used to estimate the fair values:

1. Fair value of cash and short-term deposits, trade and other short term receivables, trade payables, other current liabilities, short term loans from banks and other financial institutions approximate their carrying amounts largely due to the short-term maturities of these instruments.

2. Financial instruments with fixed and variable interest rates are evaluated by the Company based on parameters such as interest rates and individual credit worthiness of the counterparty. Based on this evaluation, allowances are taken to account for the expected losses of these receivables.

The Company uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:

Level 1: quoted (unadjusted) prices in active markets for identical assets or liabilities

Level 2: other techniques for which all inputs which have a significant effect on the recorded fair value are observable, either directly or indirectly

Level 3: techniques which use inputs that have a significant effect on the recorded fair value that are not based on observable market data

55 Financial risk management objectives and policies

The Company's financial risk management is an integral part of how to plan and execute its business strategies. The Company's financial risk management policy is set by the Managing Board.

Market risk is the risk of loss of future earnings, fair values or future cash flows that may result from a change in the price of a financial instrument. The value of a financial instrument may change as a result of changes in the interest rates, foreign currency exchange rates, equity prices and other market changes that affect market risk sensitive instruments. Market risk is attributable to all market risk sensitive financial instruments including investments and deposits, foreign currency receivables, payables and loans and borrowings.

The Company manages market risk through a treasury department, which evaluates and exercises independent control over the entire process of market risk management. The corporate treasury department recommends risk management objectives and policies, which are approved by Senior Management and the Audit Committee. The activities of this department include management of cash resources, implementing hedging strategies for foreign currency exposures, borrowing strategies, and ensuring compliance with market risk limits and policies.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. In order to optimize the Company's position with regard to interest income and interest expenses and to manage the interest rate risk, treasury performs a comprehensive corporate interest rate risk management by balancing the proportion of fixed rate and floating rate financial instruments in its total portfolio.

25 bps increase - Decrease in profit	(1.66)	(1.66)	-	-
25 bps decrease - Increase in profit	1.66	1.66	-	-

Foreign currency risk

The Company operates internationally and portion of the business is transacted in several currencies and consequently the Company is exposed to foreign exchange risk through its sales and services in overseas and purchases from overseas suppliers in various foreign currencies.

Foreign currency exchange rate exposure is partly balanced by purchasing of goods, commodities and services in the respective currencies.

The Company evaluates exchange rate exposure arising from foreign currency transactions and the Company follows established risk management policies, including the use of derivatives like foreign exchange forward contracts to hedge exposure to foreign currency risk.

Credit risk

Credit risk arises from the possibility that counter party may not be able to settle their obligations as agreed. To manage this, the Company periodically assesses the financial reliability of customers, taking into account the financial condition, current economic trends, and analysis of historical bad debts and ageing of accounts receivable. Individual risk limits are set accordingly.

The Company considers the probability of default upon initial recognition of asset and whether there has been a significant increase in credit risk on an ongoing basis throughout each reporting period. To assess whether there is a significant increase in credit risk the company compares the risk of a default occurring on the asset as at the reporting date with the risk of default as at the date of initial recognition. It considers reasonable and supportive forwarding-looking information such as :

(i) Actual or expected significant adverse changes in business,
(ii) Actual or expected significant changes in the operating results of the counterparty,
(iii) Financial or economic conditions that are expected to cause a significant change to the counterparty's ability to meet its obligations,
(iv) Significant increases in credit risk on other financial instruments of thesame counterparty,
(v) Significant changes in the value of the collateral supporting the obligationor in the quality of third-party guarantees or credit enhancements

Financial assets are written off when there is no reasonable expectation of recovery, such as a debtor failing to engage in a repayment plan with the company. The company categorises a loan or receivable for write off when a debtor fails to make contractual payments greater than 2 years past due. Where loans or receivables have been written off, the Company continues to engage in enforcement activity to attempt to recover the receivable due. Where recoveries are made, these are recognised in profit or loss.

As at March 31, 2017	**91.85**	**91.85**

During the year 2015-16 the Company had recognised loss allowance of ₹ 1359.14 crores under 12 months expected credit loss model.

No significant changes in estimation techniques or assumptions were made during the reporting period.

Liquidity risk

Liquidity risk is defined as the risk that the Company will not be able to settle or meet its obligations on time or at a reasonable price. The Company's treasury department is responsible for liquidity, funding as well as settlement management. In addition, processes and policies related to such risks are overseen by senior management. Management monitors the Company's net liquidity position through rolling forecasts on the basis of expected cash flows.

Maturity profile of financial liabilities

The table below provides details regarding the remaining contractual maturities of financial liabilities at the reporting date based on contractual undiscounted payments.

Capital management

For the purposes of the Company's capital management, capital includes issued capital and all other equity reserves. The primary objective of the Company's Capital Management is to maximise shareholder value. The company manages its capital structure and makes adjustments in the light of changes in economic environment and the requirements of the financial covenants.

The company monitors capital using gearing ratio, which is total debt divided by total capital plus debt.

NOTES ACCOMPANYING TO THE RECASTED FINANCIAL STATEMENTS FOR THE FINANCIAL YEAR ENDED MARCH 31, 2017

59 Standards issued but not yet effective

In March 2017, the Ministry of Corporate Affairs issued the Companies (Indian Accounting Standards) (Amendments) Rules, 2017, notifying amendments to Ind AS 7, 'Statement of cash flows' and Ind AS 102, 'Share-based payment'. The amendments are applicable to the Company from April 1, 2017.

Amendment to Ind AS 7:

The amendment to Ind AS 7 requires the entities to provide disclosures that enable users of financial statements to evaluate changes in liabilities arising from financing activities, including both changes arising from cash flows and non-cash changes, suggesting inclusion of a reconciliation between the opening and closing balances in the balance sheet for liabilities arising from financing activities, to meet the disclosure requirement.
The Company is evaluating the requirements of the amendment and the effect on the financial statements.

Amendment to Ind AS 102:

The amendment to Ind AS 102 provides specific guidance to measurement of cash-settled awards, modification of cash-settled awards and awards that include a net settlement feature in respect of withholding taxes.
Currently Ind AS 102 is not applicable to the company and hence there is no impact.

60 Amounts shown as 0.00 represents amount below ₹ 50,000 (Rupees Fifty Thousand).

61 Figures for the previous year have been regrouped wherever necessary.

INDEPENDENT AUDITOR'S REPORT

To The Members of CG Power and Industrial Solutions Limited

Report on the Recasted Consolidated Financial Statements

We have been appointed as auditors of CG Power and Industrial Solutions Limited (the 'Holding Company') and its Subsidiaries vide Appointment Letter issued by Ministry of Corporate Affairs ("MCA") dated 1st February, 2021 pursuant to the order of Hon'ble National Company Law Tribunal (NCLT) dated 5th March, 2020 to carry out audit of Recasted Consolidated Financial Statements as recasted by another firm of Chartered Accountants ('Recasting Accountants') appointed under section 130 of Companies Act, 2013 ("the Act") by MCA. We draw attention to Notes 1B of the Recasted Consolidated Financial Statements which describes in detail the significant developments which have resulted in reopening and recasting of the Consolidated Financial Statements.

We have audited the accompanying Recasted Consolidated Financial Statements of the Company,(hereinafter referred to as "Holding Company") and its subsidiaries (the Holding company and its subsidiaries together referred to as the group), its Associates and Jointly controlled entity, which comprise the Recasted Consolidated Balance Sheet as at 31st March, 2017, the Recasted Consolidated Statement of Profit and Loss (including Other Comprehensive Income), Recasted Statement of changes in Equity and the Recasted Consolidated Cash flow Statement for the year then ended and a summary of Significant Accounting Policies and other explanatory information (hereinafter referred to as "Recasted Consolidated Financial Statements").

Responsibility of the Recasting Accountants and Management for the Recasted Consolidated financial statements

The Recasting Accountants are primarily responsible for preparation of the Recasted Consolidated Financial Statements that give a true and fair view of the consolidated financial position, consolidated financial performance (including Other Comprehensive Income), Consolidated Changes in Equity and consolidated cash flows of the group in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards specified under Section 133 of the Act, read with the Companies (Indian Accounting Standards) Rules, 2015, as amended. The present management of the holding company is responsible for providing sufficient appropriate information required by the Recasting Accountants for the preparation of these Recasted Consolidated Financial Statements to the extent of their knowledge and are also responsible for maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of the group, its associates and jointly controlled entity and for preventing and detecting frauds and other irregularities; selection and

CNK & ASSOCIATES LLP MUMBAI Chartered Accountants

application of appropriate accounting policies; making judgements and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the accompanying Recasted Consolidated Financial Statements that give true and fair view and are free from material misstatements, whether due to fraud or error which have been used for the purpose of preparation of the Recasted Consolidated Financial Statements by Directors of the Holding Company as aforesaid.

Auditor's Responsibility

Our responsibility is to express an opinion on these Recasted Consolidated Financial Statements based on our audit.

We have taken into account the provisions of the Act, the accounting and auditing standards and matters which are required to be included in the audit report under the provisions of the Act and the Rules made thereunder.

We conducted our audit in accordance with the Standards on Auditing specified under Section 143(10) of the Act. Those Standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the Recasted Consolidated Financial Statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and the disclosures in the Recasted Consolidated Financial Statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the Recasted Consolidated Financial Statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal financial control relevant to the Holding Company's preparation of the Recasted Consolidated Financial Statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances but not for the purpose of expressing an opinion on whether the Holding Company has an adequate internal controls system over financial reporting in place and the operating effectiveness of such controls. An audit also includes evaluating the appropriateness of the accounting policies used and the reasonableness of the accounting estimates made by the Holding Company's Directors, as well as evaluating the overall presentation of the Recasted Consolidated Financial Statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Recasted Consolidated Financial Statements

Opinion

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid Recasted Consolidated Financial Statements give the information required by the Act and give a true and fair view in conformity with the accounting principles generally accepted in India of the Recasted Consolidated State of affairs of the group, its associates and jointly controlled entity as at 31st March, 2017 and their Recasted Consolidated Loss (including other Comprehensive income), Recasted Consolidated changes in Equity and their Recasted Consolidated Cash Flows for the year ended on that date.

Emphasis of Matter

1. We refer to Note 1D (ii) of the Recasted Consolidated Financial Statements wherein the impact of the recasting adjustments has been stated and Note 1D (iv) of the Recasted Consolidated Financial Statements wherein it is stated that impact, if any, arising from the ongoing Serious Fraud Investigation Office (SFIO) investigation is not considered in the Recasted Consolidated Financial Statements due to reasons mentioned therein. Our report has to be read in conjunction with those disclosures;

2. We draw attention to Note 1B (ii) to the Recasted Consolidated Financial Statements regarding the possible outcome of the various regulatory proceedings which are currently in progress and may result in a possible non-compliance with applicable laws and regulations, the impact whereof is currently not ascertainable. As stated in Note 1D (v) of the Recasted Consolidated Financial Statements, the Group believes that the Board of Directors and Key Managerial Personnel appointed after the change of Management on 26th November 2020 cannot be made liable for any violations or non-compliance of any of the provisions of law in respect of certain past transactions up to the 31st March, 2017 arising out of the above;

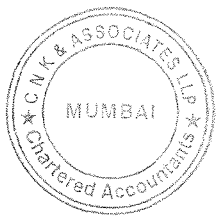

3. We draw attention to Note 1E to the Recasted Consolidated Financial Statements wherein it is stated that all events that occurred up to the date of approval of the original financial statements have been considered in the preparation of these Recasted Consolidated Financial Statements;

4. We have carried out the process of obtaining external confirmations for the parties selected by us for the purpose of checking the correctness of the outstanding balances. Such confirmations have been received from few parties. We have relied upon the balances as per Recasted Consolidated Financial Statements in cases where no responses were received.

Our Opinion is not modified in respect of these matters.

Other Matter

1. The Recasted Consolidated Financial Statements also include the Group's share of net loss of Rs. 1.57 crores for the year ended 31st March, 2017, as considered in the Recasted Consolidated Financial Statements, in respect of a jointly controlled entity, whose financial statements have not been audited by us. These financial statements have been audited by other auditors whose reports have been furnished to us by the Management and our opinion on the Recasted Consolidated Financial Statements, in so far as it relates to the amounts and disclosures included in respect of this jointly controlled entity, and our report in terms of Section 143(11)(3) of the Act, in so far as it relates to the aforesaid jointly controlled entity, is based solely on the reports of the other auditors.

2. The Recasted Consolidated Financial Statements also include the groups share of net profit/loss of Rs. NIL for the year ended 31st March 2017 as considered in the Recasted Consolidated Financial Statements, in respect of 3 associates, whose financial statements have not been audited by us. These unaudited financial statements as certified by the management and our opinion on the Recasted Consolidated Financial Statements, in so far as it relates to the amounts and disclosures included in respect of these associates, and our report in terms of Section 143(11)(3) of the Act, in so far as it relates to the aforesaid associate, is based on such management certified financial statements.

Our opinion is not modified in respect of these matters.

Report on Other Legal and Regulatory Requirements

1. As required by section 143 (3) of the Act, we report to the extent applicable that:

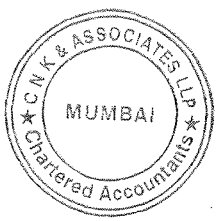

a) We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purpose of our audit of the aforesaid Recasted Consolidated Financial Statements, except as mentioned in the Emphasis of Matter and Other Matter paragraph;

b) In our opinion, proper books of accounts as required by law relating to preparation of the aforesaid Recasted Consolidated Financial Statements have been kept so far as it appears from our examination of those books and the reports of the other auditors;

c) The Recasted Consolidated Balance Sheet, the Recasted Consolidated Statement of Profit and Loss (including Other comprehensive income), Recasted statement of changes in Equity, and the Recasted Consolidated Cash Flow Statement dealt with by this Report are in agreement with the relevant books of account maintained for the purpose of preparation of the Recasted Consolidated Financial Statements;

d) In our opinion, the aforesaid Recasted Consolidated Financial Statements comply with the Indian Accounting Standards specified under Section 133 of the Act read with the Companies (Indian Accounting standards) Rules, 2015, as amended;

e) We have relied on the written representations received from the directors of the Holding company and its subsidiaries, incorporated in India and taken on record by the respective Board of Directors, while adopting the original Consolidated financial statements and in terms thereof none of the directors was disqualified as on 31st March 2017 from being appointed as a director in terms of section 164 (2) of the Act;

f) With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to explanations given to us:

i) The Recasted Consolidated Financial Statements disclose the impact of pending litigations on the Recasted Consolidated Financial position of the Group – refer Note No.39 to the Recasted Consolidated Financial Statements;

ii) The group did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses;

iii) There has been no delay in transferring amounts, required to be transferred, to the Investor Education and Protection Fund by the group;

iv) We have relied on the report of the auditors on the original financial statements of the Holding Company with respect to reporting on the requisite disclosures in Note 51 to the Recasted Consolidated financial statements as to the holdings of the specified bank notes on 8th November, 2016 and 30th December, 2016 as well as dealings in specified bank notes during the period from 8th November, 2016 and 30th December, 2016.

1A. Corporate information

CG Power and Industrial Solution Limited (the "Company" or "Holding Company") is a limited company incorporated and domiciled in India whose shares are publicly traded. The registered office is located at 6th Floor, CG house, Dr. Annie Besant Road, Worli, Mumbai - 400030, India.

The Company was formerly known as Crompton Greaves Limited. Pursuant to the approval of the members of the Company vide special resolution dated January 25, 2017 and the Central government/ Registrar of companies, Mumbai on February 27, 2017, the Company changed its name from "Crompton Greaves Limited" to "CG Power and Industrial Solutions Limited effective February 27, 2017.

The Company and its subsidiaries ("Group") is a global enterprise providing end-to-end solutions to utilities, industries and consumers for management and application of efficient and sustainable electrical energy. It offers products, services and solutions in three main business segments, viz. Power Systems, Industrial Systems and Consumer Products and Automation systems.

1B. Background for re-opening and Recasting of Consolidated financial statements:

i) On August 19, 2019, the Company filed information with the Bombay Stock Exchange (BSE) and the National Stock Exchange (NSE) and disclosed as under:

a) That the Company had constituted an Operations Committee (Ops Committee) in March,2019 under the Chairmanship of one of the independent Director of the Company;

b) That the Committee found some unauthorised transactions by certain identified "Company personnel, including certain non-executive directors, certain Key Management Personnel and other identified employees" ("CIP");

c) That the Committee came to know certain interest payment failure, but the committee was unable to trace the said transactions from the financials of the Company;

d) That the Managing Director of the Company received a request from a Bank to replace a cheque but the obligation could not relate to any obligations of the Company;

e) That the Company appointed an independent law firm to conduct an investigation on certain transactions. Further, S R B C & Co. LLP, Chartered Accountants, one of the joint statutory auditors of the Company, had vide letter dated May 9, 2019 sought information and explanation from the Company under section 143(12) of the Companies Act, 2013;

f) That the law firm submitted its interim report dated August 5, 2019 to the Risk and Audit Committee ('RAC') and an analysis of the report has also been submitted by Ops Committee;

g) Those unauthorised and undisclosed transactions and accounting entries identified during further verifications, have been brought to the knowledge of RAC;

h) That the RAC has received from the management, the compilation of unaudited standalone and consolidated financial position and profit and loss of the Company for the year ended March 31, 2019 and restated financial information and profit and loss for the year ended March 31, 2018 and statement of financial position as on April 1, 2017.

ii) Ministry of Corporate Affairs (MCA) by its order dated November 6, 2019 ordered investigation to be carried out by the Serious Fraud Investigation Office (SFIO), into the affairs of the Company, 2 of its subsidiary companies and 13 other companies;

iii) On filing of petition of MCA, the National Company Law Tribunal (NCLT) vide its order dated March 5, 2020 allowed for reopening of the books of account and Recasting of financial statements of CG Power and Industrial Solutions Limited and its subsidiary companies for 5 (Five) years ended as on March 31, 2019;

iv) Pursuant to the above Order of NCLT, MCA under section 130 of the Companies Act, 2013 ('the Act') vide their letter dated February 1, 2021 appointed Kalyaniwalla & Mistry LLP, Chartered Accountants ('Recasting Accountants') to re cast the financial statements and C N K & Associates LLP, Chartered Accountants to audit the Recasted financial statements of the Company for period of five years ended March 31, 2019.

1C. Approval of Consolidated Financial Statements:

i) The original consolidated financial statements of the group for the year ended March 31, 2016 were authorised for issue in accordance with a resolution of the erstwhile Board of Directors on May 27, 2016 and approved by the shareholders in the General Meeting held on August 30, 2016.

ii) These Recasted consolidated financial statements of the group for the year ended March 31, 2016 were noted and taken on record by the present Board of Directors in its Board meeting held on September 9, 2021.

1D. Summary of Recasting adjustments and impact on the consolidated financial statements:

i) Pursuant to the above background, the Recasting adjustments have been carried out for the Holding Company and the Subsidiaries In case of Associates, the original financial statements have been considered for the purpose of these Recasted financial statements.

ii) Pursuant to the above background, the following table summarises the Recasting adjustments identified by Recasting Accountants based on the findings of investigation reports, review of books of account, various records and minutes, scrutiny of material transactions as per previously audited financial statements, inquiry with the management and considered in preparation of the Recasted consolidated financial statements for the year ended March 31, 2016.

iii) The Recasting adjustments disclosed in the above table may also have an impact on other disclosures to the Recasted Consolidated financial statements. These disclosures should also be read in conjunction with the above.

iv) As on the date of adoption of these Recasted consolidated financial statements, the Holding Company is not aware about submission of investigation reports by SFIO to the Central Government. Therefore, no adjustments and disclosures that may arise in this regard have been considered in these Recasted financial statements.

v) The Company believes that the Board of Directors and Key Managerial Personnel appointed after the change of Management on November 26, 2020 cannot be made liable for any violations or non-compliance of any of the provisions of law in respect of certain past transactions up to March 31, 2016 arising out of the above.

1E. Subsequent Events:

All events that occurred up to the date of approval of the original consolidated financial statements by the Board of Directors as stated in Note 1C(i) have been considered in the preparation of these Recasted consolidated financial statements

1F. Balances of Trade Receivables, Trade Payable, Loans and Advances, certain Bank Balance and Borrowings are subject to confirmations/reconciliations/adjustment, if any.

2.1 Basis of preparation of Recasted Consolidated Financial Statements

Ministry of Corporate Affairs notified roadmap to implement Indian Accounting Standards ("Ind AS") notified under the Companies (Indian Accounting Standards) Rules, 2015 as amended by The Companies (Indian Accounting standards) (Amendment) Rules, 2016, in India as per the said roadmap, the Company is required to apply Ind AS starting from financial year beginning on or after April 1, 2016. However, the Company has vide its board meeting dated February 2, 2016 decided for voluntary adoption of Ind AS from the financial year beginning April 1, 2015. Accordingly, the Recasted financial statements of the Group have been prepared in accordance with the Ind AS.

For all periods up to and including the year ended March 31, 2015, the Group prepared its Recasted financial statements in accordance with the Accounting Standards notified under the section 133 of the Companies Act 2013, read together with Companies (Accounts) Rules 2014 (Indian GAAP). These Recasted financial statements for the year ended March 31, 2016 are the first the Company has prepared in accordance with Ind-AS. (Refer to note 53 for information on how the Company has adopted Ind AS).

The Recasted consolidated financial statements have been prepared on a historical cost basis, except for the following assets and liabilities which have been measured at fair value:

- Derivative financial instruments,
- Certain financial assets and liabilities measured at fair value (refer accounting policy regarding financial instruments),

The Recasted consolidated financial statements are presented in Indian Rupees ("INR") and all values are rounded to the nearest crores, except when otherwise indicated.

2.2 Basis of consolidation

The Group consolidates all entities which are controlled by it. The consolidated financial statements comprise the financial statements of the Company and its subsidiaries. Control exists when the Holding Company has power over the entity, is exposed, or has rights, to variable returns from its involvement with the entity and has the ability to affect those returns by using its power over the entity. Power is demonstrated through existing rights that give the ability to direct relevant activities, those which significantly affect the entity's returns. The entities are consolidated from the date control commences until the date control ceases.

The consolidated financial statements of the Group companies are consolidated on a line-by-line basis and intra-group balances and transactions including unrealised gain / loss from such transactions are eliminated upon consolidation. These consolidated financial statements are prepared by applying uniform accounting policies in use at the Group. Profit or loss on each component of other comprehensive income (OCI) are attributed to the equity holders of the Holding Company of the Group and to the non-controlling interests, even if this results in the non- controlling interest having a deficit balance.

If the Group loses control over a subsidiary, it derecognises the related assets (including goodwill), liabilities, non-controlling interest and other components of equity while any resultant gain or loss is recognised in consolidated statement of profit and loss. Any investment retained is recognised at fair value.

Changes in the Group's holding that do not result in a loss of control are accounted for as equity transactions. The carrying amount of the Group's holding and the non-controlling interests are adjusted to reflect the changes in their relative holding. Any difference between the amount by which the non-controlling interests are adjusted and the fair value of the consideration paid or received is recognised directly in equity and attributed to owners of the Company.

Joint Ventures are entities over which the Group has joint control. Associates are entities over which the Group has significant influence but not control. Investments in Joint Ventures and Associates are accounted for using the equity method of accounting. The investment in initially recognised at cost, and the carrying amount is increased or decreased to recognise the investor's share of the profit or loss of the investee after the acquisition date. The Group's investment in Joint Ventures and Associates includes goodwill identified on acquisition.

SIGNIFICANT ACCOUNTING POLICIES

3.1 Property, plant and equipment:

Property, plant and equipment are stated at cost, net of accumulated depreciation and accumulated impairment losses, if any. The cost comprises the purchase price, net of trade discounts and rebates, directly attributable costs of bringing the asset to its working condition for its intended use and capitalised borrowing costs. When significant parts of the plant and equipment are required to be replaced at intervals, the Group depreciates them separately based on their specific useful lives.

Subsequent expenditure related to an item of property, plant and equipment is capitalised only if it is probable that future economic benefits associated with the item will flow to the Group. All other repair and maintenance costs are recognised in the consolidated statement of profit and loss as incurred.

Capital work-in-progress includes cost of property, plant and equipment under installation / under development as at the balance sheet date and stated at cost, net of accumulated impairment loss, if any.

An item of property, plant and equipment and any significant part initially recognised is de-recognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on de-recognition of the asset is recognised in the consolidated statement of profit and loss when the asset is derecognised.

Depreciation is provided on straight-line method over the useful lives of assets. Depreciation commences when an asset is ready for its intended use. The management's estimate of useful lives are in accordance with Schedule II to the Companies Act, 2013, other than the following asset classes, where the useful lives was determined by technical evaluation. Freehold land is not depreciated. Depreciation on additions to / deductions from assets is provided on pro-rata basis with reference to the month of addition / deletion.

The range of useful lives of the property, plant and equipment are as follows:

- Plant and machinery – 1 to 21 years
- Furniture and fittings – 1 to 15 years
- Office equipment's – 1 to 15 years
- Buildings – 3 to 60 years
- Vehicles – 1 to 8 years
- Leasehold land – 24 to 999 years

Leasehold lands are amortised over the period of lease. Buildings constructed on leasehold land are depreciated based on the useful life specified in Schedule II to the Companies Act, 2013, where the lease period of land is beyond the useful life of the building.

In other cases, buildings constructed on leasehold lands are amortised over the primary lease period of the land.

The estimated useful lives, residual values and depreciation method are reviewed at the end of each financial year end, with the effect of any changes in estimate accounted for on a prospective basis.

Foreign companies

Depreciation on property, plant and equipment has been provided at the rates required / permissible by the GAAPs of the respective countries. The management believes that these estimated useful lives are realistic and reflect fair approximation of the period over which the assets are likely to be used.

On transition to Ind AS, the Group has elected to continue with the carrying value as per the previous GAAP for Plant and machinery, Furniture and fittings, Office equipment's and Vehicles as its deemed cost. Also, the Group has elected to measure Freehold land, Leasehold Land and Building at its fair value and considered it as deemed cost as on the date of transition to Ind AS.

3.2 Investment properties

Investment properties comprise portions of freehold land and office buildings that are held for long-term rental yields and/or for capital appreciation. Investment properties are initially recognised at cost. Subsequently investment property comprising of building is carried at cost less accumulated depreciation and accumulated impairment losses.

The cost includes the cost of replacing parts and borrowing costs for long-term construction projects if the recognition criteria are met. When significant parts of the investment property are required to be replaced at intervals, the Group depreciates them separately based on their specific useful lives. All other repair and maintenance costs are recognised in profit and loss as incurred.

Depreciation on building is provided over the estimated useful lives as specified in Schedule II to the Companies Act, 2013. The residual values, useful lives and depreciation method of investment properties are reviewed, and adjusted on prospective basis as appropriate, at each financial year end. The effects of any revision are included in the statement of profit and loss when the changes arise.

Though the group measures investment property using cost based measurement, the fair value of investment property is disclosed in the notes. Fair values are determined based on an annual evaluation performed by an accredited external independent valuer applying a valuation model recommended by the International Valuation Standards Committee.

Investment properties are derecognised when either they have been disposed of or when the investment property is permanently withdrawn from use and no future economic benefit is expected from its disposal.

The difference between the net disposal proceeds and the carrying amount of the asset is recognised in the statement of profit and loss in the period of de-recognition.

3.3 Intangible assets:

Intangible assets are recognised when it is probable that the future economic benefits that are attributable to the assets will flow to the Group and the cost of the asset can be measured reliably. Intangible assets acquired separately are measured on initial recognition at cost. Following initial recognition, intangible assets are carried at cost less accumulated amortisation and accumulated impairment losses.

The useful lives of intangible assets are assessed as either finite or indefinite. Intangible assets with finite useful lives are amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis.

Intangible assets with indefinite useful lives, if any are not amortised, but are tested for impairment annually, either individually or at the cash-generating unit level. The assessment of indefinite life is reviewed annually to determine whether the indefinite life continues to be supportable. If not, the change in useful life from indefinite to finite is made on a prospective basis.

The amortisation expense on intangible assets with finite lives is recognised in consolidated statement of profit and loss.

Gains or losses arising from de-recognition of an intangible asset are measured as the difference between the net disposal proceeds and the Carrying amount of the asset and are recognised in the consolidated statement of profit and loss when the asset is derecognised.

Research and development expenditure:

Revenue expenditure on research activities is expensed under the respective heads of accounts in the period in which it is incurred.

Development expenditure on an individual project is capitalised as intangible asset, if all of the following criteria can be demonstrated:

I. The technical feasibility of completing the intangible asset so that it will be available for use or sale;

II. The Group has intention to complete the development of intangible asset and use or sell it;

III. The Group has ability to use or sell the intangible asset;

IV. The manner in which the probable future economic benefit will be generated including the existence of a market for output of the Intangible asset or the intangible asset itself or if it is to be used internally, the usefulness of the intangible asset;

V. The availability of adequate technical, financial and other resources to complete the development and to use or sell the intangible asset; and

VI. The Group has ability to measure the expenditure attributable to the intangible asset during the development.

Following initial recognition of the development expenditure as an asset, the asset is carried at cost less any accumulated amortisation and accumulated impairment losses. Amortisation of the asset begins when development is complete and the asset is available for use. It is amortised over a period of five years. During the period of development, the asset is tested for impairment annually.

Intangible assets are amortised as follows:

Computer software	Over a period of five to six years;
Technical know-how (including technology)	Over a period of five years; (From the date of availability for its use)
Commercial rights	Over a period of ten years;
Brand name and customer lists (including trade mark)	Over a period of ten years; and
Other intangible assets	Over a period of three to fifteen year

On transition to Ind AS, the Group has elected to continue with the carrying value as per the previous GAAP for all intangible assets as its deemed cost.

3.4 Impairment of non-financial assets:

At least at the end of each reporting period, the Group assesses whether there is an indication that an asset may be impaired and also whether there is an indication that previously recognised impairment losses no longer exist or have decreased. If any indication exists, or when annual impairment testing for an asset is required, if any, the Group determines the recoverable amount and impairment loss is recognised in the consolidated statement of profit and loss, when the carrying amount of an asset exceeds its recoverable amount.

Recoverable amount is determined:

In the case of an individual asset, at the higher of the fair value less cost to sell and the value in use; and

In the case of cash generating unit (a group of assets that generates identified, independent cash flows), at the higher of the cash generating unit's (CGU's) fair value less cost to sell and the value in use.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

3.5 Inventories:

Inventories are valued as under:

- Raw materials, packing materials, construction materials, stores and spares, loose tools and traded goods at lower of cost and net realisable value. Cost is determined on weighted average basis.

- Work-in-progress and finished goods (manufacturing) at lower of cost and net realisable value. Cost includes an appropriate share of production overheads based on normal operating capacity. Finished goods cost is determined on weighted average basis.

The cost of inventories comprises all cost of purchases, cost of conversion and other costs incurred in bringing the inventories to their present location and condition. Obsolete and slow moving items of inventories are valued at cost or net realisable value, whichever is lower. Goods and Materials in transit are valued at actual cost incurred up to the reporting date. Materials and supplies held for use in the production of inventories are not written down if the finished products in which they will be used are expected to be sold at or above cost.

Net realisable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and estimated costs necessary to make the sale.

3.6 Cash and cash equivalents:

Cash and cash equivalent in the balance sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

For the purpose of the consolidated statement of cash flows, cash and cash equivalents consist of cash and short-term deposits, as defined above.

3.7 Foreign currency transactions:

The Group's consolidated financial statements are presented in Indian Rupees ('₹'), which is also the Holding company's functional currency. For each entity the Group determines the functional currency and items included in the financial statements of each entity are measured using that functional currency.

Foreign currency transactions are recorded on initial recognition in the functional currency, using the exchange rate at the date of the transaction. At each balance sheet date, foreign currency monetary items are reported using the closing exchange rate. Exchange differences that arise on settlement of monetary items or on reporting at each balance sheet date of the Group's monetary items at the closing rate are recognised in the consolidated statement of profit and loss in the period in which they arise. Non-monetary items which are carried at historical cost denominated in a foreign currency are reported using the exchange rate at the date of the transaction. Non- monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value is determined. The gain or loss arising on translation of non-monetary items is recognised in line with the gain or loss of the item that gave rise to the translation difference (i.e. translation differences on items whose gain or loss is recognised in other comprehensive income or the consolidated statement of profit and loss is also recognised in other comprehensive income or the consolidated statement of profit and loss respectively).

3.8 Service concession arrangements:

The Group constructs or upgrades infrastructure (construction or upgrade services) used to provide a public service and operates and maintains that infrastructure (operation services) for a specified period of time.

These arrangements may include Infrastructure used in a public-to-private service concession arrangement for its entire useful life.

Under Appendix A to Ind AS 11 – Service Concession Arrangements, these arrangements are accounted for based on the nature of the consideration. The intangible asset model is used to the extent that the Group receives a right (i.e. a franchisee) to charge users of the public service. The financial asset model is used when the Group has an unconditional contractual right to receive cash or another financial asset from or at the direction of the grantor for the construction services. When the unconditional right to receive cash covers only part of the service, the two models are combined to account separately for each component. If the Group performs more than one service (i.e., construction or upgrade services and operation services) under a single contract or arrangement, consideration received or receivable is allocated by reference to the relative fair values of the services delivered, when the amounts are separately identifiable.

The Group manages concession arrangements which include constructing power distribution assets for distribution of electricity. The Group maintains and services the infrastructure during the concession period. These concession arrangements set out rights and obligations related to the infrastructure and the service to be provided.

The right to consideration gives rise to an intangible asset and financial receivable and accordingly, both the intangible asset and financial receivable models are applied. Income from the concession arrangements earned under the intangible asset model consists of the (i) fair value of contract revenue, which is deemed to be fair value of consideration transferred to acquire the asset; and (ii) payments actually received from the users. The intangible asset is amortized over its expected useful life in a way that reflects the pattern in which the asset's economic benefits are consumed by the Group, starting from the date when the right to operate starts to be used. Based on these principles, the intangible asset is amortized in line with the actual usage of the specific public facility, with a maximum of the duration of the concession.

Financial receivable is recorded at a fair value of guaranteed residual value to be received at the end of the concession period. This receivable is subsequently measured at amortised cost.

Any asset carried under concession arrangements is derecognized on disposal or when no future economic benefits are expected from its future use or disposal or when the contractual rights to the financial asset expire.

3.9 Revenue recognition:

Sale of goods
Revenue from sale of goods is recognised, when all significant risks and rewards are transferred to the buyer, as per the terms of the contracts and no significant uncertainty exists regarding the amount of the consideration that will be derived from the sale of goods. It also includes excise duty and price variations based on the contractual agreements and excludes value added tax / sales tax. It is measured at fair value of consideration received or receivable, net of returns and allowances, trade discounts and volume rebates

Rendering of services
Revenue from sale of services is recognised as per the terms of the contract with customers based on stage of completion when the outcome of the transactions involving rendering of services can be estimated reliably. Percentage of completion method requires the Group to estimate the services performed to date as a proportion of the total services to be performed.

Revenue from construction contracts
Revenue from construction contracts is recognised by applying percentage of completion method after providing for foreseeable losses, if any. Percentage of completion is determined as a proportion of the cost incurred upto the reporting date to the total estimated cost to complete. Foreseeable losses, if any, on the contracts is recognised as an expense in the period in which it is foreseen, irrespective of the stage of completion of the contract. While determining the amount of foreseeable loss, all elements of cost and related incidental income which is not included in contract revenue is taken into consideration. Contract is reflected at cost that are expected to be recoverable till such time the outcome of the contract cannot be ascertained reliably and at realisable value thereafter. Claims are accounted as income in the year of acceptance by customer.

Power distribution
Revenue from power distribution business is accounted on the basis of billings to the customers and includes unbilled revenues accrued upto the end of accounting year. Customers are billed as per the tariff rates issued by Electricity Regulatory Commission. Interest is accounted on accrual basis on overdue bills.

Dividend income
Dividend income is accounted for when the right to receive the same is established, which is generally when shareholders approve the dividend.

Lease income
Lease agreements where the risks and rewards incidental to the ownership of an asset substantially vest with the lessor are recognised as operating leases. Lease rentals are recognised on straight-line basis as per the terms of the agreements in the statement of profit or loss.

Interest income
For all financial instruments measured at amortised cost, interest income is recorded using the effective interest rate (EIR), which is the rate that exactly discounts the estimated future cash payments or receipts through the expected life of the financial instrument or a shorter period, where appropriate, to the net carrying amount of the financial asset. Interest income is included in finance income in the statement of profit or loss.

3.10 Employee benefits:

Short- term employee benefits:

All employee benefits payable wholly within twelve months after the end of the annual reporting period in which the employees render the related services, are classified as short term employee benefits. Benefits such as salaries, wages, short- term compensated absences, performance incentives etc. and the expected cost of bonus, ex- gratia are recognised during the period in which the employee renders related service.

Liabilities recognised in respect of short term employee benefits are measured at the undiscounted amounts of the benefits expected in exchange for the related services.

Post- employment benefits

Defined Contribution Scheme:

Payments to defined contribution retirement benefit plans are recognised as an expense when employees have rendered the service entitling them to the contribution.

Provident Fund:

Contributions to Provident Fund are made to a Trust administered by the Group and are charged to consolidated profit or loss as incurred. The Group is liable for the contribution and any shortfall in interest between the amount of interest realised by the investments and the interest payable to members at the rate declared by the Government of India in respect of the Trust administered by the Group making interest shortfall a defined benefit plan. Accordingly, the Group obtains actuarial valuation and based on the valuation if there is no deficiency as at the balance sheet date then, the liability is restricted towards monthly contributions only.

Defined Benefit Plans:

The cost of providing benefits under the defined benefit plan is determined using the projected unit credit method with the actuarial valuations being carried out at the end of each annual reporting period.

Remeasurements, comprising actuarial gains and losses, the effect of the asset ceiling and the return on plan assets (excluding net interest) , are recognised immediately in the balance sheet with a corresponding debit or credit to other comprehensive income in the period in which they occur. Remeasurements are not reclassified to the consolidated statement of profit or loss. Past service cost is recognised in the consolidated statement of profit and loss in the period of plan amendment or when the Group recognised related re- structuring costs.

The Group recognised the following changes in the net defined benefit obligation under employee benefit expenses in consolidated statement profit or loss:

- service costs comprising current service costs, past- service costs, gains and losses on curtailments and settlements;
- Net interest expense or income.

Gratuity:

Gratuity is a defined benefit obligation plan operated by the Holding Company and its Indian Subsidiaries for its employees covered under Group Gratuity Scheme. The cost of providing benefit under gratuity plan is determined on the basis of actuarial valuation using the projected unit credit method at the reporting date. The scheme is funded with Gratuity Fund of the Group. Remeasurements, comprising of actuarial gains and losses are recognised in full in the statement of other comprehensive income in the reporting period in which they occur. Remeasurements are not reclassified to the consolidated profit and loss subsequently. Some of the overseas subsidiaries operate Gratuity scheme plan for employees as per laws of the respective countries, liability in respect of the same is provided on the accrual basis, estimated at each reporting date.

Leave encashment:

Accumulated leave, which is expected to be utilised within the next twelve months, is treated as short-term employee benefit. The Group measures the expected cost of such absences as the additional amount that it expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The Company and its Indian subsidiaries treats accumulated leave expected to be carried forward beyond twelve months, as long- term employee benefit for measurement purposes. Such long- term compensated absences are provided for based on the actuarial valuation using the projected unit credit method at the reporting date. Remeasurements, comprising of actuarial gains and losses are recognised in full in the consolidated statement of profit and loss.

Overseas subsidiaries provide liability in respect of compensated absences for employees as per respective local entity's policies. The same is measured based on the accrual basis as the payment is required to be made within next twelve months.

Termination benefits:

Termination benefits are recognised as an expense when the entity can no longer withdraw the offer of the termination benefits or when the entity recognises any related restructuring costs whichever is earlier.

3.11 Borrowing costs:

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time (generally over twelve months) to get ready for its intended use or sale are capitalised as part of the cost of the asset. All other borrowing costs are expensed in the period in which they occur. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds.

3.12 Segment accounting:

Operating segments are those components of the business whose operating results are regularly reviewed by the Chief Operating Decision Maker in the Group to make decisions for performance assessment and resource allocation. Segment performance is evaluated based on the profit or loss of reportable segment and is measured consistently.

The Operating segments have been identified on the basis of the nature of products / services.

i. Segment revenue includes sales and other income directly identifiable with / allocable to the segment including inter- segment revenue.

ii. Expenses that are directly identifiable with / allocable to segments are considered for determining the segment result. Expenses which relate to the Group as a whole and not allocable to segments are included under unallocable expenditure.

iii. Income which relates to the Group as a whole and not allocable to segments is included in unallocable income.

iv. Segment result includes margins on inter- segment sales which are reduced in arriving at the profit before tax of the Group.

v. Segment assets and liabilities include those directly identifiable with the respective segments. Unallocable assets and liabilities represent the assets and liabilities that relate to the Group as a whole and not allocable to any segment.

Inter-Segment transfer pricing:

Segment revenue resulting from transactions with other business segments is accounted on the basis of transfer price agreed between the segments. Such transfer prices are either determined to yield a desired margin or agreed on a negotiated basis.

3.13 Leases:

The determination of whether an arrangement is, or contains, a lease is based on the substance of the arrangement at the inception date, whether fulfilment of the arrangement is dependent on the use of a specific asset or assets or the arrangement conveys a right to use the asset, even if that right is not explicitly specified in arrangement.

Finance Leases that transfer substantially all of the risks and benefits incidental to ownership of the leased item, are capitalized at the commencement of the lease at the fair value of the leased property or if lower, at the present value of the minimum lease payments. Lease payments are apportioned between finance charges and reduction in lease liability so as to achieve constant interest rate on the remaining balance of liability. Finance charges are recognised in finance costs in the statement of profit and loss.

A leased asset is depreciated over the useful life of the asset. However, if there is no reasonable certainty that the Group will obtain ownership by the end of the lease term, the asset is depreciated over the shorter of the estimated useful life of the asset and the lease term.

Asset acquired on leases where a significant portion of the risks and rewards of ownership are retained by lessor are classified as operating leases. Lease rentals are charged to consolidated statement of profit and loss on straight line basis.

3.14 Earnings per share:

Basic earnings per share are calculated by dividing the net profit for the year attributable to equity shareholders by the weighted average number of equity shares outstanding during the year. The weighted average number of equity shares outstanding during the reporting period is adjusted for events such as bonus issue, bonus element in a rights issue, share split, and reverse share split (consolidation of shares) , if any occurred during the reporting period, that have changed the number of equity shares outstanding, without a corresponding change in resources.

For the purpose of calculating diluted earnings per share, the net profit for the year attributable to the equity shareholders and the weighted average number of equity shares outstanding during the year, are adjusted for the effects of all dilutive potential equity shares.

The number of shares and potential dilutive equity shares are adjusted retrospectively for all periods presented for any bonus shares issues including for changes effected prior to the approval of the consolidated financial statements by the Board of Directors.

3.15 Income taxes:

Income tax expense for the period comprises of current and deferred income tax. Income tax expense is recognised in the consolidated statement of profit and loss except when they are relating to items that are recognised in OCI or directly in equity, in which case, it is also recognised in relating to items recognised directly in OCI or equity respectively.

Current Tax:

Current tax comprises the expected income tax payable on the taxable income for the year and any adjustment to the tax payable or receivable in respect of previous years. It is measured using tax rates enacted or substantively enacted at the Balance Sheet date.

Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

Deferred Tax

Deferred tax assets and liabilities are recognised for all temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the reporting date.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are reassessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered.

Minimum alternate tax (MAT) credit is recognised as deferred tax asset only when and to the extent there is convincing evidence that the Group will pay normal income tax during the specified period. Such asset is reviewed at each Balance Sheet date and the carrying amount is written down to the extent the Company does not have convincing evidence that it will pay normal tax during the specified period.

3.16 Provisions, Contingent liabilities, Contingent assets and Commitments:

General

Provisions are recognised when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When provision is measured using the cash flow estimated to settle the present obligation, its carrying amount is the present value of these cash flows (when the effect of the time value of money is material)

Disclosure of contingent liability is made when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non- occurrence of one or more uncertain future events not wholly within the control of the Company or a present obligation that arises from past events where it is either not probable that an outflow of resources embodying economic benefits will be required to settle or a reliable estimate of amount cannot be made.

Provisions, contingent liabilities and contingent assets are reviewed at each balance sheet date.

Warranty provisions

Provisions for the expected cost of warranty obligations are recognised at the time of sale of relevant product or service, at the best estimate of the expenditure required to settle the Company's obligation.

Liquidated damages

Provision for liquidated damages are recognised on contracts for which delivery dates are exceeded and computed in reasonable manner.

Other Litigation claims

Provision for litigation related obligation represents liabilities that are expected to materialise in respect of matters in appeal.

Environmental obligations

Provision for environmental obligations represents liabilities towards the costs expected to be incurred to treat contaminated soil / effluents at its manufacturing locations, wherever required by local law.

Onerous contracts

If the Group has a contract that is onerous, the present obligation under the contract is recognised and measured as a provision. An onerous contract is considered to exist where the Group has a contract under which the unavoidable costs of meeting the obligations under the contract exceed the economic benefits expected to be received from the contract.

3.17 Government grants:

Government grants are recognised where there is reasonable assurance that the grant will be received and all attached conditions will be complied with.

Where the grant relates to an asset the cost of the asset is shown at gross value and grant thereon is treated as capital grant which is recognised as income in the statement of profit and loss over the period and in proportion in which depreciation is charged

Revenue grants are recognised in the statement of profit and loss in the same period as the related cost which they are intended to compensate are accounted for.

Where the Group receives non-monetary grants, the asset and the grant are recorded gross at nominal amounts and released to the statement of profit and loss over the expected useful life and pattern of consumption of the benefit of the underlying asset by equal annual instalments.

3.18 Exceptional items:

An item of income or expense which by its size, type or incidence is such that its disclosure improves the understanding of the performance of the Group, such income or expense is classified as an exceptional item and accordingly, disclosed as such in the consolidated financial statements.

3.19 Business combinations and goodwill

The Group accounts for its business combinations under acquisition method of accounting. Acquisition related costs are recognised in statement of profit and loss as incurred. The acquiree's identifiable assets, liabilities and contingent liabilities that meet the condition for recognition are recognised at their fair values at the acquisition date.

Purchase consideration paid in excess of the fair value of net assets acquired is recognised as goodwill. Where the fair value of identifiable assets and liabilities exceed the cost of acquisition, after reassessing the fair values of the net assets and contingent liabilities, the excess is recognised as capital reserve.

The interest of non-controlling shareholders is initially measured either at fair value or at the non-controlling interests' proportionate share of the acquiree's identifiable net assets. The choice of measurement basis is made on an acquisition-by acquisition basis. Subsequent to acquisition, the carrying amount of non-controlling interests is the amount of those interests at initial recognition plus the non-controlling interests' share of subsequent changes in equity of subsidiaries. Business combinations arising from transfers of interests in entities that are under the common control are accounted at historical costs. The difference between any consideration given and the aggregate historical carrying amounts of assets and liabilities of the acquired entity are recorded in shareholders' equity.

Goodwill arising on business combination is initially measured at cost, being the excess of the aggregate of the consideration transferred and the amount recognised for non-controlling interests and any previous interest held, over the net identifiable assets acquired and liabilities assumed. If the fair value of the net assets acquired is in excess of the aggregate consideration transferred, the Group re-assesses whether it has correctly identified all of the assets acquired and all of the liabilities assumed and reviews the procedures used to measure the amounts to be recognised at the acquisition date. If the reassessment still results in an excess of the fair value of net assets acquired over the aggregate consideration transferred, then the gain is recognised in other comprehensive income (OCI) and accumulated in equity as capital reserve. However, if there is no clear evidence of bargain purchase, the entity recognises the gain directly in equity as capital reserve, without routing the same through OCI.

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Group's cash generating units that are expected to benefit from the combination, irrespective of whether other assets or liabilities of the acquiree are assigned to those units.

A cash generating unit to which goodwill has been allocated is tested for impairment annually, or more frequently when there is an indication that the unit may be impaired. If the recoverable amount of the cash generating unit is less than its carrying amount, the impairment loss is allocated first to reduce the carrying amount of any goodwill allocated to the unit and then to the other assets of the unit pro rata based on the carrying amount of each asset in the unit. Any impairment loss for goodwill is recognised in profit or loss. An impairment loss recognised for goodwill is not reversed in subsequent periods.

3.20 Investment in associates and joint ventures:

An associate is an entity over which the Group has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee, but is not control or joint control over those policies.

A joint venture is a type of joint arrangement whereby the parties that have joint control of the arrangement have rights to the net assets of the joint venture. Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require unanimous consent of the parties sharing control.

The Group's investments in its associate and joint venture are accounted for using the equity method.

Under the equity method, the investment in an associate or joint venture is initially recognised at cost. The carrying amount of the investment is adjusted to recognise changes in the Group's share of net assets of the associate since the acquisition date. Goodwill relating to the associate or a joint venture is included in the carrying amount of the investment and is not tested for impairment individually.

The consolidated statement of profit and loss reflects the Group's share of the results of operations of the associate or a joint venture. Any change in OCI of those investees is presented as part of the Group's OCI. In addition, when there has been a change recognised directly in the equity of the associate or a joint venture, the Group recognises its share of any changes, when applicable, in the statement of changes in equity. Unrealised gains and losses resulting from transactions between the Group and the associate are eliminated to the extent of the interest in the associate.

The aggregate of the Group's share of profit and loss of an associate and a joint venture is shown on the face of the consolidated statement of profit and loss outside operating profit and represents profit and loss after tax of the associate and joint venture.

The financial statements of the associate are prepared for the same reporting period as the Group. When necessary, adjustments are made to bring the accounting policies in line with those of the Group.

After application of the equity method, the Group determines whether it is necessary to recognise an impairment loss on its investment in its associate or a joint venture. At each reporting date, the Group determines whether there is objective evidence that the investment in the associate or joint venture is impaired. If there is such evidence, the Group calculates the amount of impairment as the difference between the recoverable amount of the associate and its carrying value, and then recognises the loss as 'Share of profit of an associate or a joint venture' in the consolidated statement of profit or loss.

3.21 Current and non-current classification:

The Group presents assets and liabilities in the balance sheet based on current / non- current classification.

An asset is treated as current when it is:

- Expected to be realised or intended to be sold or consumed in normal operating cycle,
- Held primarily for the purpose of trading,
- Expected to be realised within twelve months after the reporting period, or
- Cash or cash equivalent unless restricted from being exchanged or used to settle a liability for at least twelve months after the reporting period.

All other assets are classified as non- current.

A liability is treated as current when:

- It is expected to be settled in normal operating cycle,
- It is held primarily for the purpose of trading,
- It is due to be settled within twelve months after the reporting period, or
- There is no unconditional right to defer the settlement of the liability for at least twelve months after the reporting period.

All other liabilities are classified as non- current.

Deferred tax assets / liabilities are classified as non- current.

Operating cycle:

A portion of the Group's activities (primarily long- term project activities) has an operating cycle that exceeds one year. Accordingly, assets and liabilities related to these long- term contracts, which will not be realised / paid within one year, have been classified as current. For all other activities, operating cycle is twelve months.

3.22 Fair value measurement:

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the Group has access at that date. The fair value of a liability reflects its non- performance risk. A number of the Group's accounting policies and disclosures require the measurement of fair values, for both financial and non- financial assets and liabilities.

Fair values are categorised into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

- Level 1 – Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 – Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 – Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

3.23 Non- current assets held for sale and discontinued operations:

Non-current assets and disposal groups are classified as held for sale if their carrying amounts will be recovered principally through a sale transaction rather than through continuing use. Non-current assets and disposal groups classified as held for sale are measured at the lower of their carrying amount and fair value less costs to sell this condition is regarded as met only when the sale is highly probable and the asset or disposal group is available for immediate sale in its present condition. Management must be committed to the sale, which should be expected to qualify for recognition as a completed sale within one year from the date of classification.

Discontinued operations are excluded from the results of continuing operations and are presented as a single amount as profit and loss after tax from discontinued operations in the statement of profit or loss.

Assets and liabilities classified as held for distribution are presented separately from other assets and liabilities in the balance sheet.

A disposal group qualifies as discontinued operation if it is a component of the Group that either has been disposed of, or is classified as held for sale, and:

- Represents a separate major line of business or geographical area of operations,
- Is part of a single co-ordinated plan to dispose of a separate major line of business or geographical area of operations,
- Or
- Is a subsidiary acquired exclusively with a view to resale.

An entity shall not depreciate (or amortise) a non- current asset while it is classified as held for sale or while it is part of a disposal group classified as held for sale.

3.24 Financial instruments

The Group recognises financial assets and financial liabilities when it becomes a party to the contractual provisions of the instrument.

(i) Financial assets:

Initial recognition and measurement

Financial assets are measured at fair value on initial recognition, except for trade receivables which are initially measured at transaction price. Transaction costs that are directly attributable to the acquisition of financial assets, which are not at fair value through profit or loss, are added to the fair value on initial recognition.

Subsequent measurement

All recognised financial assets are subsequently measured in their entirety either at amortised cost or at fair value depending on the classification of the financial assets.

Where financial assets are measured at fair value, gains and losses are either recognised entirely in the statement of profit and loss (i.e. fair value through profit or loss or 'FVTPL'), or recognised in other comprehensive income (i.e. fair value through other comprehensive income or 'FVTOCI').

A financial asset is measured at amortised cost (net of any write down for impairment) if it is held within a business model whose objective is to hold the asset in order to collect contractual cash flows and the contractual terms of the financial asset give rise on specified dates to cash flows that represent solely payments of principal and interest on the principal amount outstanding.

A financial asset is measured at FVTOCI if it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and the contractual terms of the financial asset give rise on specified dates to cash flows that represents solely payments of principal and interest on the principal amount outstanding.

All other financial assets are measured at fair value through profit or loss.

All equity investments are measured at fair value, with fair value changes recognised in the consolidated statement of profit and loss, except for those equity investments for which the entity has elected to present fair value changes in 'other comprehensive income'. However, dividend on such equity investments are recognised in consolidated statement of profit and loss when the Group's right to receive payment is established.

Impairment of financial assets

The Group uses 'Expected Credit Loss' (ECL) model, for evaluating impairment of financial assets other than those measured at fair value through profit and loss. Expected credit losses are measured through a loss allowance at an amount equal to:

- The 12-month expected credit losses (expected credit losses that result from those default events on the financial instrument that are Possible within 12 months after the reporting date); or
- Full lifetime expected credit losses (expected credit losses that result from all possible default events over the life of the financial Instrument).

For Trade Receivables the Group applies 'simplified approach' which requires expected lifetime losses to be recognised from initial recognition of the receivables. The Group uses historical credit loss experience to determine impairment loss on the portfolio of trade receivables. At every reporting date these historical default rates are reviewed and changes in the forward-looking estimates are analysed. For other assets, the Group uses 12 month ECL to provide for impairment loss where there is no significant increase in credit risk. If there is significant increase in credit risk full lifetime ECL is used.

Derecognition

The Group derecognises a financial asset when the contractual rights to the cash flows from the financial asset expire or it transfers the financial asset and the transfer qualifies for Derecognition under Ind AS 109.

(ii) Financial liabilities:

Initial recognition and measurement

Financial liabilities are measured at fair value on initial recognition. Transaction costs that are directly attributable to the issue of financial liabilities, which are not at fair value through profit or loss, are deducted from the fair value on initial recognition.

The Group's financial liabilities include trade and other payables, loans and borrowings including bank overdrafts, and derivative financial Instruments.

Subsequent measurement

Financial liabilities are classified as measured at amortised cost or fair value through profit or loss ('FVTPL'). A financial liability is classified as at FVTPL if it is classified as held-for-trading, it is a derivative or it is designated as such on initial recognition. Financial liabilities at FVTPL are measured at fair value and net gains and losses, including any interest expense, are recognised in profit or loss. Other financial liabilities are subsequently measured at amortised cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognised in consolidated statement of profit or loss. Any gain or loss on Derecognition is also recognised in profit or loss.

Financial guarantee contracts

A Financial guarantee contracts is a contract that requires the Group to make specified payment to reimburse the holder for a loss it incurs because the specified debtor fails to make a payment when due in accordance with the terms of a debt instrument. Financial guarantee contracts issued by the Group are initially measured at their fair values and, if not designated as at FVTPL, are subsequently measured at the higher of, the amount of loss allowance determined as per impairment requirements of Ind AS 109 and the amount initially recognised less cumulative amount of income recognised.

Derecognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the de-recognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the consolidated statement of profit or loss.

(iii) Derivative financial instruments and hedge accounting:

The Group uses various derivative financial instruments to hedge foreign currency / price risk on unexecuted firm commitments and highly probable forecast transactions. Such derivative financial instruments are initially recognised at fair value and are subsequently remeasured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative.

Any gains or losses arising from changes in the fair value of derivatives are taken directly to consolidated statement of profit and loss, except for the effective portion of cash flow hedges, which is recognised in other comprehensive income and presented as a separate component of equity which is later reclassified to the consolidated statement of profit and loss when the hedge item affects profit and loss.

At the inception of a hedge relationship, the Group formally designates and documents the hedge relationship to which the Group wishes to apply hedge accounting and the risk management objective and strategy for undertaking the hedge. The documentation includes identification of the hedging instrument, the hedged item or transaction, the nature of the risk being hedged and how the entity will assess the effectiveness of changes in the hedging instrument's fair value in offsetting the exposure to changes in the hedged item's fair value or cash flows attributable to the hedged risk. Such hedges are expected to be highly effective in achieving offsetting changes in fair value or cash flows and are assessed on an ongoing basis to determine that they actually have been highly effective throughout the financial reporting periods for which they were designated.

Cash flow hedges

The effective portion of the gain or loss on the hedging instrument is recognised in OCI in the cash flow hedge reserve, while any ineffective portion is recognised immediately in the consolidated statement of profit and loss as other expenses.

The Group uses forward currency contracts as hedges of its exposure to foreign currency risk in forecast transactions and firm commitments, as well as forward commodity contracts for its exposure to volatility in the commodity prices. The ineffective portion relating to foreign currency contracts is recognised in finance costs and the ineffective portion relating to commodity contracts is recognised in other operating income or expenses.

Amounts recognised as OCI are transferred to profit or loss when the hedged transaction affects profit or loss, such as when the hedged financial income or financial expense is recognised or when a forecast sale occurs. When the hedged item is the cost of a non-financial asset or non-financial liability, the amounts recognised as OCI are transferred to the initial carrying amount of the non-financial asset or liability.

If the hedging instrument expires or is sold, terminated or exercised without replacement or rollover (as part of the hedging strategy), or if its designation as a hedge is revoked, or when the hedge no longer meets the criteria for hedge accounting, any cumulative gain or loss previously recognised in OCI remains separately in equity until the forecast transaction occurs or the foreign currency firm commitment is met.

(iv) Offsetting of financial instruments:

Financial assets and financial liabilities are offset and the net amount is reported in the consolidated balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis or to realise the assets and settle the liabilities simultaneously.

4. Significant accounting judgements, estimates and assumptions

The preparation of the Group's consolidated financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the accompanying disclosures. Uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in within the next financial year.

Judgements

a) Service concession arrangements:

Management has assessed applicability of Appendix A of Ind AS 11: Service Concession Arrangements to power distribution arrangements entered into by the Group. In assessing the applicability, management has exercised significant judgment in relation to the underlying ownership of the assets, terms of the power distribution arrangements entered with the grantor, ability to determine prices, fair value of construction service, assessment of right to guaranteed cash etc. Based on detailed evaluation, management has determined that this arrangement meet the criteria for recognition as service concession arrangements.

Discontinued operation

- Consumer products segment

In pursuant to the demerger of the Consumer Product business unit, the Board considered the consumer product business unit to meet the criteria to be classified as held for distribution at that date for the following reasons:

The actions to complete the distribution were initiated and expected to be completed within one year from the date of commitment to demerger the business i.e. February 19, 2015.

Consumer product represents a separate major line of business of operations

The shareholders approved the distribution in August 2015

The Scheme of demerger was approved by the Honourable High court of judicature of Bombay, November 20, 2015 (the appointed date).

- Power distribution business

In pursuant to the certain unresolved disputes arising out of the Distribution Franchisee Agreement (DFA) of the group with Maharashtra State Electricity Distribution Company Limited (MSEDCL) at Jalgoan in Maharashtra, MSEDCL has exercised its step in rights and taken over the Distribution Franchisee in Jalgoan from the Company with effect from August 12, 2015. The operations were terminated with immediate effect and the final claim settlement between the Group and MSEDCL is in progress. The

Group have classified the Power distribution segment as held for disposal from August 12, 2015 for the following reasons:

- Power distribution segment represents a separate major line of business of operations
- The operations were abandoned with immediate effect from August 12, 2015 and hence the carrying amount will not be recovered principally through continuing use.

- Sale of transmission and distribution (T&D) business outside India

Pursuant to the Group's plan to dispose of the T&D business, the Group has classified the operations of T&D business as discontinued operation during the year w.e.f. March 9, 2016 based on:

- Receiving the binding letter of offer from First Reserve International Limited, a US Private Equity fund.
- Expectation to complete the transaction within a period of one year along with required approvals.

Lease of equipment not in legal form of lease

Significant judgment is required to apply lease accounting rules under Appendix C to Ind AS 17: Determining whether an Arrangement contains a Lease. In assessing the applicability to arrangements entered into by the Group, management has exercised judgment to evaluate the right to use the underlying assets, substance of the transaction including legally enforced arrangements and other significant terms and conditions of the arrangement to conclude whether the arrangements meet the criteria under Appendix C to Ind AS 17.

Estimates and assumptions

The key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below.

(i) Useful lives of property, plant and equipment

Management reviews useful lives of property, plant and equipment at least once a year. Such lives are dependent upon an assessment of both the technical lives of the assets and also their likely economic lives based on various internal and external factors. This reassessment may result in change in depreciation expected in future period.

(ii) Fair value measurement of financial instruments

When the fair values of financial assets and financial liabilities recorded in the balance sheet cannot be measured based on quoted prices in active markets, their fair value is measured using valuation techniques including the Discounted Cash Flow (DCF) model. The inputs to these models are taken from observable markets where possible, but where this is not feasible, a degree of judgement is required in establishing fair values. Judgements include considerations of inputs such as liquidity risk, credit risk and volatility. Changes in assumptions about these factors could affect the reported fair value of financial instruments.

Contingent consideration, resulting from business combinations, is valued at fair value at the acquisition date as part of the business combination. When the contingent consideration meets the definition of a financial liability, it is subsequently remeasured to fair value at each reporting date. The determination of the fair value is based on discounted cash flows. The key assumptions take into consideration are the probability of meeting each performance target and the discount factor.

(iii) Development costs

Development costs are recognised as an asset when all the criteria are met, whereas research costs are expensed as incurred. Management assesses and monitors whether the recognition requirements for development costs continue to be met. There is inherent uncertainty in the economic success of any product development. The Group uses judgment in assessment of development cost eligible for capitalisation.

(iv) Impairment of non-financial assets

In case of non-financial assets company estimates asset's recoverable amount, which is higher of an asset's or cash generating units (CGU's) fair value less costs of disposal and its value in use.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used.

(v) Impairment of financial assets

The impairment provisions for financial assets are based on assumptions about risk of default and expected loss rates. The Group uses judgment in making these assumptions and selecting the inputs to the impairment calculation, based on Group's past history, existing market conditions as well as forward looking estimates at the end of each reporting period.

(vi) Income taxes

Deferred tax assets for unused tax losses are recognised only when it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgment is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and the level of future taxable profits.

(vii) Defined benefit obligation

In accounting for post-retirement benefits, actuarial method uses several statistical and other factors to anticipate future events that are used to calculate defined benefit obligation. These factors include expected return on plan assets, discount rate assumptions and rate of future compensation increases. To estimate these factors, actuarial consultants also use estimates such as withdrawal, turnover, and mortality rates which require significant judgment. The actuarial assumptions used by the Group may differ materially from actual results in future periods due to changing market and economic conditions, regulatory events, judicial rulings, higher or lower withdrawal rates, or longer or shorter participant life spans.

(viii) Contingencies

In the normal course of business, contingent liabilities may arise from litigation and other claims against the Group. Potential liabilities that are possible but not probable of crystallising or are very difficult to quantify reliably are treated as contingent liabilities. Such liabilities are disclosed in notes but are not recognised, the cases which have been determined as remote by the Group are not disclosed.

NOTES ACCOMPANYING TO THE RECASTED CONSOLIDATED FINANCIAL STATEMENTS

7. INTANGIBLE ASSETS

₹ crore

Goodwill is tested for impairment on annual basis and whenever there is an indication that the recoverable amount of a cash generating unit is less than its carrying amount based on a number of factors including business plan, operating results, future cash flows and economic conditions. The recoverable amount of cash generating units is determined based on higher of value in use and fair value less cost to sell. For the purpose of impairment testing, goodwill is allocated to a CGU representing the lowest level within the Group at which goodwill is monitored for internal management purposes, and which is not higher than the Group's operating segment.

The Group generally uses discounted cash flow based methods to determine the recoverable amount. These discounted cash flow calculations use five-year projections that are based on financial forecasts. Cash flow projections take into account past experience and represent management's best estimate about future developments.

Discount rates represent the current market assessment of the risks specific to each CGU, taking into consideration the time value of money and the risks specific to the asset for which the future cash flow estimates have not been adjusted. The discount rate calculation is derived from weighted average cost of capital (WACC) of the Company. Terminal value growth rates take into consideration external macroeconomic sources of data and industry specific trends.

The following table presents the key assumptions used to determine value in use / fair value less costs to sell for impairment test purposes.

	As at March 31, 2017 (Recasted)	**As at March 31, 2017 (Recasted)**	As at March 31, 2016 (Recasted)	As at March 31, 2016 (Recasted)
Terminal value growth rate	1%	1%	1%	1%
Pre tax discount rate	9.39%	9.39%	11.70%	11.70%

* The pre tax discount rate (WACC) used 10.83% (previous year 14.50%)

No impairment was identified except the impairment of ₹ 43.61 crore (previous year ₹ 40.31 crore) for one of the Power Unit due to economic down turn, slow growth etc. An analysis of the calculation's sensitivity to a change in the key parameters (revenue growth, operating margin, discount rate and long-term growth rate) based on reasonably probable assumptions, did not identify any probable scenarios where the CGU's recoverable amount would fall below its carrying amount.

CG POWER AND INDUSTRIALSOLUTIONS LIMITED

NOTES ACCOMPANYING TO THE RECASTED CONSOLIDATED FINANCIAL STATEMENTS

20. SHARE CAPITAL (Contd...)

(h) Dividend paid and proposed:
No dividends have been proposed, declared or paid during the financial year 2016-17 (Previous year 2015-16 ₹ Nil) or after the financial year but before the financial statements were approved for issue.

(i) Nature and purpose of reserves:

(1) Capital redemption reserve:
Capital redemption reserve was created on buy back of shares. A company may issue fully paid-up bonus shares to its members out of the capital redemption reserve account.

(2) Securities premium account:
Securities premium account is created when shares are issued at premium. A company may issue fully paid-up bonus shares to its members out of the securities premium reserve account, and company can use this reserve for buy-back of shares.

(3) Capital reserve:
The Group had paid certain deferred sales tax liabilities in accordance with the scheme formulated by the State Government of Maharashtra for such optional prepayments. The resultant surplus of ₹ 19.12 crore, representing the excess of the recorded liability over the amount paid was credited to Capital Reserve.

During the financial year ended 31st March,2016, the capital reserve of ₹ 652.53 crore is recognised due to demerger of consumer products segment pursuant to the transfer of all assets and liabilities to the resulting company i.e. Crompton Greaves Consumer Electricals Limited (Refer note 45).

(4) Statutory reserve:
Statutory reserve represents profits set aside as per the local statutory requirement of overseas subsidiaries and the same is not available for distribution.

(5) Capital reserve on consolidation:
Capital reserve on consolidation is on account of subsidiaries acquired.

(6) Government grant:
Grants are recognized as non-repayable when the requirements established for receiving them are met and are recognized directly in equity, net of corresponding tax effect.

Present value of minimum lease payments	0.04	0.04	0.04	0.04	7.95	7.95	7.95	7.95

During the financial year 2016-17, the Company has made reassessment of an arrangement after its inception, which was earlier assessed as containing a finance lease. The reassessment was necessitated on account of change in the contractual terms (which did not relate only to renewal or extension of the arrangement). The arrangement is now reassessed as not containing a lease and thus, lease accounting ceased to apply from the date when the change in circumstances giving rise to the reassessment occurred.

The difference between the carrying amount of the leased assets and the lease liability, amounting to ₹ 3.07 crore has been recognised in the Statement of profit and loss.

Additional provision made during the year and reversal of unused amount are included in the respective head of accounts.
* Carrying amounts comprise of non-current and current provisions.

(2) Nature of provisions:

(a) Product warranties: The Group gives warranties on certain products and services in the nature of repairs / replacement, which fail to perform satisfactorily during the warranty period. Provision made represents the amount of the expected cost of meeting such obligation on account of rectification / replacement. The timing of outflows is expected to be within a period of two years.

(b) Provision for sales tax /VAT represents liability on account of non-collection of declaration forms and other legal matters which are in appeal under the Act / Rules.

(c) Provision for excise duty / customs duty / service tax represents the differential duty liability that is expected to materialise in respect of matters in appeal.

(d) Provision for liquidated damages has been made on contracts for which delivery dates are exceeded and computed in reasonable and prudent manner.

(e) Provision for litigation related obligations represents liabilities that are expected to materialise in respect of matters in appeal.

(f) Provision for environmental obligations represents liabilities towards the costs expected to be incurred to treat contaminated soil / effluents at its manufacturing locations, wherever required by local law.

(g) Provision for onerous contracts have been made on contracts when it is probable that the estimated cost will exceed the total contract revenue.

Note:
The % voting rights that Parent Company holds in all its subsidiaries is equal to the % of corresponding shareholding except in case of Serial No. 12 PT CG Power Systems Indonesia. The Parent Company holds 95% of shareholding in PT CG Power Systems Indonesia through its subsidiary CG Power Systems Belgium N.V. and balance 5% is held by other partner. However, the parent Company through its subsidiary CG Power Systems Belgium N.V. has 100% voting rights since 5% shares held by other partner has no voting rights.

In the case of CG Power Solutions Saudi Arabia Limited and Saudi Power Transformers Co. Ltd., the financial statements as at 31st December, 2016 have been considered. There were no material adjustments required for any significant events or transactions for the three months upto March 31, 2017.

For the purposes of consolidation, the financial statements of the foreign subsidiaries and associates as at March 31, 2017, have been restated to comply with Generally Accepted Principles in India.

Gratuity

The Group provides for gratuity, a defined benefit retirement plan covering eligible employees. The Gratuity Plan provides a lump sum payment to vested employees at retirement, death, incapacitation or termination of employment, of an amount equivalent to 15 to 30 days' salary for each completed year of service subject to a maximum of ₹ 0.10 crore. Vesting occurs upon completion of five continuous years of service in accordance with Indian law.

The Group makes annual contributions to the Crompton Greaves Limited Gratuity Trust, which is funded defined benefit plan for qualifying employees.

Post-retirement medical benefit

Post-retirement medical benefit includes hospitalization cover & benefits on cessation of employment for the policy. This cover is applicable only to employee and spouse as per the limits specified for the last grade while in employment. This coverage does not form part of essential terms and condition of employment, and is a benefit extended by the Group as a part of its social benefit policies. The policies of Medical, Health and Hospitalization insurance are subject to change based on contemporary market trends and practices.

The following tables summarise the components of net benefit expenses recognised in the statement of profit and loss and the funded status and amounts recognised in the balance sheet for the respective plans:

Pension obligation

The Group operates post retirement pension plan for its eligible employees, a defined benefit retirement plan with assets held in a separately administered funds . The scheme provides retirement benefits on the basis of members' final salary.

The Group also provides other post-employment termination benefits, which is separation pay. The separation pay benefit is paid to employees in the case of voluntary resignation, subject to a minimum number of years of service. This benefit has been accounted for using the same methodology as for the defined benefit pension plan.

The following tables summarise the components of net benefit expenses recognised in the statement of profit and loss and the funded status and amounts recognised in the balance sheet for the respective plans:

Above defined benefit plans for pension obligation forms part of continuing and discontinued operations as at 31st March, 2017

(c) **Provident fund:**

The Group makes contribution towards provident fund which is administered by the trustees. The Rules of the Group's Provident Fund administered by a trust, require that if the Board of the Trustees are unable to pay interest at the rate declared by the Government under Para 60 of the Employees Provident Fund Scheme, 1972 for the reason that the return on investment is less for any other reason, then the deficiency shall be made good by the Group making interest shortfall a defined benefit plan. Accordingly, the Group has obtained actuary valuation and based on the below provided assumption there is no deficiency as at the balance sheet date. Hence, the liability is restricted towards monthly contributions only.

44 Segment information

Operating Segments:

Power Systems :Transformer, Switchgear and Turnkey Projects
Industrial Systems :Electric Motors, Alternators, Drives, Traction Electronics and SCADA

Identification of Segments:

The chief operational decision maker monitors the operating results of its Business Segments separately for the purpose of making decisions about resource allocation and performance assessment. Segment performance is evaluated based on profit or loss and is measured consistently with profit or loss in the financial statements.
Operating segments have been identified on the basis of the nature of products / services and have been identified as per the quantitative criteria specified in the Ind AS.

Segment revenue and results:

The expenses and incomes which are not directly attributable to any business segment are shown as unallocable expenditure (net of unallocated income).

Segment assets and liabilities:

Segment assets include all operating assets used by the operating segment and mainly consist of property, plant and equipment, trade receivables, cash and cash equivalents and inventories. Segment liabilities primarily include trade payables and other liabilities. Common assets and liabilities which cannot be allocated to any of the segments are shown as a part of unallocable assets / liabilities.

Inter segment transfer:

Inter segment prices are normally negotiated amongst segments with reference to the costs, market price and business risks. Profit or loss on inter segment transfers are eliminated at the Group level.

45 Discontinued Operations

Sale of Automation Business

The Board of Directors of the Group vide resolution dated November 7, 2016, accepted an offer for the sale of Group's B2B Automation business, comprising of ZIV Aplicaciones y Technologia, S.L, (Spain), its subsidiaries alongwith the related Automation business in United Kingdom, Ireland, France and India at an enterprise value of EUR 120 million from Alfanar Electric Systems Group ('Alfanar') of the Kingdom of Saudi Arabia. Alfanar is a major player in the electrical manufacturing business, including the manufacturing of electrical construction products as well as related engineering services.

Subsequently, on March 6, 2017, the Group along with its subsidiary, CG International BV, completed the sale upon execution of Share Purchase Agreements and other related transactional documents with Alfanar Electric LLC and ZIV Aplicaciones y Technologia, S.L. Thus, ZIV automation India Limited, the wholly owned subsidiary housing the India Automation Business ceased to be a subsidiary of the Company.

The Discontinued operations have been disclosed as 'Automation Systems' segment separately.

Sale of Transmission and Distribution (T&D) business

During the previous year ended March 31, 2016, the Group entered into binding transaction agreement with First Reserve for sale of transmission and distribution (T&D) businesses at Indonesia, Hungary, Ireland, France, North America and Belgium at an enterprise value of €115 million. First Reserve is a leading global private equity and infrastructure investor exclusively focused on energy.
However, the Group could not complete the disposal of T&D business as the Group terminated Share Purchase Agreement entered into with First Reserve, an offshore private equity (PE) firm for sale of overseas Power T&D businesses of the Group at Hungary, Ireland, France, US and Belgium. The Group will continue to identify new buyers for the sale of these businesses in near future and hence, these businesses will continue to be reflected as discontinued operations.

Moreover, during the year ended March 31, 2017 the Group has decided to continue with business at Indonesia and accordingly the profit and loss statement of the previous year has been restated.

Further, the Group announced the decision of its Board of Directors to sell CG Power Solutions Ltd (India). Business of Power Systems focuses on power transmission, distribution, power solutions, setting up of integrated on shore and off shore power systems and associated services businesses. At March 31, 2017, Power Solutions Ltd (India) has been classified as a discontinued operation.

Consumer Products

The Group demerged its Consumer products business unit into a separate company (wholly owned subsidiary of Crompton Greaves Limited till March 23, 2016), Crompton Greaves Consumer Electricals Limited ('CGCEL') with effect from October 01, 2015. For the year ended March 31, 2016, results up to September 30, 2015 have been presented under profit or loss from discontinued operations.
The Discontinued operations have been disclosed as 'Consumer Products' segment separately.

Power Distribution

On June 1, 2011, the Group had entered into Power Distribution Franchise Agreement ('DFA') with Maharashtra State Electricity Distribution Company Ltd ('MSEDCL') for distribution of power in Jalgaon region of Maharashtra, India.

As per the terms of the arrangement, the Group had obtained the right ('franchise') to distribute the electricity for the period of 10 years to the public at large.

MSEDCL shall supply/ sale electricity to the Group at rate prescribed under regulatory guidelines (MERC directives on load shedding). The Group shall distribute and supply the electricity at the tariff determined by the regulatory authorities.

The Group shall conduct normal maintenance activities of network and other assets to maintain uninterrupted service. The Group is a private operator and MSEDCL is a Government body. The Group undertakes obligation of public service granted by MSEDCL. Thus, the arrangement is a public-to-private service concession. The electricity distribution service is totally regulated by the MSEDCL or other Government regulatory authorities.

MSEDCL had given right to the Group to use its distribution assets which will always belong to MSEDCL. During the tenure of the arrangement, if the Group incurs any capital expenditure, the same shall vest with MSEDCL at the end of the contract. MSEDCL shall reimburse the Group for the capital expenditure incurred at the then value calculated based on pre-determined depreciation rate. Thus, MSEDCL controls significant residual interest in the concession assets. Accordingly, the Group had a contractual right to receive cash from MSEDCL for the capital expenditure incurred.

Therefore, the arrangement is a Service concession arrangement under Appendix A to Ind-AS 11. The Group had a contractual right to receive the residual value of the capital expenditure incurred under the arrangement and accordingly, will recognise financial asset. Further, the Group had right to charge the consumers for the services and therefore, there was an intangible asset.

The revenues and losses in respect of Service concession arrangements recognised during the year are as follows:

₹ crore

Consequent to the certain unresolved disputes arising out of the Distribution Franchisee Agreement (DFA) of the Group with Maharashtra State Electricity Distribution Company Limited (MSEDCL) at Jalgaon in Maharashtra, MSEDCL had exercised its step in rights and taken over the Distribution Franchisee in Jalgaon from the Group with effect from August 12, 2015. Accordingly, the Group has classified Power Distribution Segment as discontinued operations.

The Group and MSEDCL have raised demand on each other and the matter is under dispute. The Group and MSEDCL are in process of constituting the Permanent Dispute Resolution Body (PDRB). The financial impact of the dispute will be known after the final outcome from PDRB.

45 Discontinued Operations (contd.)

Others

The Group announced the decision of its Board of Directors to sell Crompton Greaves Consumer Products Limited (CGCPL). At March 31, 2017, CGCPL has been classified as a discontinued operation and disclosed as 'Others' segment separately.

46 Financial Instruments - Accounting Classifications and Fair Value Measurements

The fair values of the financial assets and liabilities are included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale.

The following methods and assumptions were used to estimate the fair values:-

1. Fair value of cash and short-term deposits, trade and other short term receivables, trade payables, other current financial liabilities, short term loans from banks and other financial institutions approximate their carrying amounts largely due to the short-term maturities of these instruments.

2. Financial instruments with fixed and variable interest rates are evaluated by the Group based on parameters such as interest rates and individual credit worthiness of the counterparty. Based on this evaluation, allowances are taken to account for the expected losses of these receivables. Accordingly, fair value of such instruments is not materially different from their carrying amounts.

The Group uses the following hierarchy for determining and disclosing the fair value of financial instruments by valuation technique:

Level 1: quoted (unadjusted) prices in active markets for identical assets or liabilities

Level 2: other techniques for which all inputs which have a significant effect on the recorded fair value are observable, either directly or indirectly

Level 3: techniques which use inputs that have a significant effect on the recorded fair value that are not based on observable market data

47 Financial risk management objectives and policies

The Group's financial risk management is an integral part of how to plan and execute its business strategies. The Group's financial risk management policy is set by the Managing Board.

Market risk is the risk of loss of future earnings, fair values or future cash flows that may result from a change in the price of a financial instrument. The value of a financial instrument may change as a result of changes in the interest rates, foreign currency exchange rates, equity prices and other market changes that affect market risk sensitive instruments. Market risk is attributable to all market risk sensitive financial instruments including investments and deposits, foreign currency receivables, payables and loans and borrowings.

The Group manages market risk through a treasury department, which evaluates and exercises independent control over the entire process of market risk management. The treasury department recommends risk management objectives and policies, which are approved by Senior Management and the Audit Committee. The activities of this department include management of cash resources, implementing hedging strategies for foreign currency exposures, borrowing strategies, and ensuring compliance with market risk limits and policies.

Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. In order to optimize the Group's position with regard to interest income and interest expenses and to manage the interest rate risk, treasury performs a comprehensive corporate interest rate risk management by balancing the proportion of fixed rate and floating rate financial instruments in its total portfolio.

Exposure to interest rate risk

Particulars	As at March 31, 2017 Recasted	As at March 31, 2017 Original	As at March 31, 2016 Recasted	As at March 31, 2016 Original
Floating rate borrowings	1190.46	1190.46	1453.19	1453.19

Interest rate sensitivity

A change of 25 basis points in interest rates would have following impact on profit before tax.

Particulars	As at March 31, 2017 Recasted	As at March 31, 2017 Original	As at March 31, 2016 Recasted	As at March 31, 2016 Original
25 bp increase - Decrease in profit	(2.97)	(2.97)	(3.48)	(3.48)
25 bp decrease - Increase in profit	2.97	2.97	3.48	3.48

Foreign currency risk

The Group operates internationally and portion of the business is transacted in several currencies and consequently the Group is exposed to foreign exchange risk through its sales and services in overseas and purchases from overseas suppliers in various foreign currencies. Foreign currency exchange rate exposure is partly balanced by purchasing of goods, commodities and services in the respective currencies.

The Group evaluates exchange rate exposure arising from foreign currency transactions and the Group follows established risk management policies, including the use of derivatives like foreign exchange forward contracts to hedge exposure to foreign currency risk.

Credit risk

Credit risk arises from the possibility that counter party may not be able to settle their obligations as agreed. To manage this, the Group periodically assesses the financial reliability of customers, taking into account the financial condition, current economic trends, and analysis of historical bad debts and ageing of accounts receivable. Individual risk limits are set accordingly.

The group considers the probability of default upon initial recognition of asset and whether there has been a significant increase in credit risk on an ongoing basis throughout each reporting period. To assess whether there is a significant increase in credit risk the Group compares the risk of a default occurring on the asset as at the reporting date with the risk of default as at the date of initial recognition. It considers reasonable and supportive forwarding-looking information such as:

(i) Actual or expected significant adverse changes in business,

(ii) Actual or expected significant changes in the operating results of the counterparty,

(iii) Financial or economic conditions that are expected to cause a significant change to the counterparty's ability to meet its obligations,

(iv) Significant increases in credit risk on other financial instruments of thesame counterparty,

(v) Significant changes in the value of the collateral supporting the obligation or in the quality of third-party guarantees or credit enhancements.

Financial assets are written off when there is no reasonable expectation of recovery, such as a debtor failing to engage in a repayment plan with the Group. The Group categorises a loan or receivable for write off when a debtor fails to make contractual payments greater than 2 years past due. Where loans or receivables have been written off, the Group continues to engage in enforcement activity to attempt to recover the receivable due. Where recoveries are made, these are recognised in profit or loss.

Liquidity risk

Liquidity risk is defined as the risk that the Group will not be able to settle or meet its obligations on time or at a reasonable price. The Group's treasury department is responsible for liquidity, funding as well as settlement management. In addition, processes and policies related to such risks are overseen by senior management. Management monitors the Group's net liquidity position through rolling forecasts on the basis of expected cash flows.

Maturity profile of financial liabilities:

The table below provides details regarding the remaining contractual maturities of financial liabilities at the reporting date.

Capital management

For the purposes of the Group's capital management, capital includes issued capital and all other equity reserves. The primary objective of the Group's capital management is to maximise shareholder value. The Group manages its capital structure and makes adjustments in the light of changes in economic environment and the requirements of the financial covenants.

The Group monitors capital using gearing ratio, which is total debt divided by total capital plus debt.

Fair value of foreign currency forward contracts designated as hedging instruments	1.96	1.49	0.62	5.76

(Original) ₹ crore

Particulars	As at March 31, 2017 Original		As at March 31, 2016 Original	
	Assets	Liabilities	Assets	Liabilities
Fair value of foreign currency forward contracts designated as hedging instruments	1.96	1.49	0.62	5.76

The fair value of derivative liabilities have been determined using rates quoted by the Group's bankers at the reporting date which are calculated by reference to the market interest rates and foreign exchange rates.

The Group entered into forward exchange and commodity contracts to manage its exposure to the variability of cash flows, primarily related to future sales and purchases of inventories denominated in foreign currencies over the next 12 months.

As at March 31, 2017, the gain on derivatives of ₹ 3.71 crore (March 31, 2016: net loss of ₹ 4.14 crore) incurred from changes in the fair value of forward foreign exchange and commodity contracts that are highly effective, has been recognized in hedging reserve.

The Group expects that substantially all of this amount will be credited into the profit or loss within 12 months from the reporting date.

48 Disclosures of leases pursuant to Indian Accounting Standard (Ind AS) 17 "Leases"

(a) Operating lease commitments - Group as lessor

The Group has not entered into operating leases.

(b) Operating lease commitments - Group as lessee

(i) The Group has taken various residential/ commercial premises and plant and equipment under cancellable operating leases. These lease agreements are normally renewed on expiry.

(ii) The Group has taken certain assets on non cancellable operating lease, the future minimum lease payment in respect of which are as follows:

Particulars	Minimum Lease Payments		Minimum Lease Payments	
	As at March 31, 2017 Recasted	As at March 31, 2017 Original	As at March 31, 2016 Recasted	As at March 31, 2016 Original

The term 'Specified Bank Notes' shall have same meaning provided in the notification of the Government of India, in the Ministry of Finance, Department of Economic Affairs number S.O. 3407(E), dated November 8, 2016.

52 Standards issued but not yet effective

In March 2017, the Ministry of Corporate Affairs issued the Companies (Indian Accounting Standards) (Amendments) Rules, 2017, notifying amendments to Ind AS 7, 'Statement of cash flows' and Ind AS 102, 'Share-based payment.' The amendments are applicable to the Group from April 1, 2017.

Amendment to Ind AS 7:

The amendment to Ind AS 7 requires the entities to provide disclosures that enable users of financial statements to evaluate changes in liabilities arising from financing activities, including both changes arising from cash flows and non-cash changes, suggesting inclusion of a reconciliation between the opening and closing balances in the balance sheet for liabilities arising from financing activities, to meet the disclosure requirement.
The Group is evaluating the requirements of the amendment and the effect on the financial statements.

Amendment to Ind AS 102:

The amendment to Ind AS 102 provides specific guidance to measurement of cash-settled awards, modification of cash-settled awards and awards that include a net settlement feature in respect of withholding taxes.
Currently Ind AS 102 is not applicable to the Group and hence there is no impact.

53 Amounts shown as 0.00 represents amount below ₹ 50,000 (Rupees Fifty Thousand).

54 Figures for the previous year have been regrouped wherever necessary.
