WR installs over 2,000 RFID tags for 'Kavach' protection system

Abhishek Pathak
MUMBAI

Western Railway has installed 2,206 of the 2,217 planned Radio Frequency Identification (RFID) tags between Churchgate and Virar for the Kavach train protection system. The remaining installation work is targeted for March 2027.

The tags, fitted to railway sleepers, help locomotives determine their location and speed, supporting automatic braking to prevent collisions, signal violations and overspeeding.

A reader beneath the locomotive scans each passive, battery-free tag as the train passes. Information reaches onboard Kavach equipment, identifying the train's position, direction, station ID and next tag location. The system combines location data with speed to calculate braking distance and apply brakes when required.

The tags form part of a system certified to Safety Integrity Level 4 (SIL-4), the highest safety integrity level for railway signalling.

Kavach will not directly increase local train speeds or frequencies. Any improvement depends on track capacity, signalling infrastructure and other technical requirements. However, advanced signalling could help trains operate with safer, potentially shorter separation, supporting additional services.

The installation is intended to strengthen safety along one of the country's busiest suburban corridors, where millions of commuters depend on frequent services daily.

Mumbai's suburban network operates around 3,254 local services daily, carrying an estimated 63–68 lakh passengers. Central Railway runs 1,840 services and Western Railway 1,414. Officials have indicated that services could eventually increase to 4,000, although additional infrastructure improvements would be necessary.

Western Railway is also preparing for proposed Kavach 5.0 technology, which would display signal information inside locomotive drivers' cabins, helping them during heavy rain, fog and poor visibility. Conventional signal posts would remain during the transition.

"Western Railway is expanding the indigenous Kavach signalling system to make travel safer for Mumbaikars. The installation of RFID technology on suburban routes will further strengthen the signalling system," said Vineet Abhishek, Chief Public Relations Officer, Western Railway.

Torrent's carbon claim challenged before PMO

Carbon loss from felling 32,490 trees under scrutiny

Environmentalists have questioned Torrent Power's claim that the carbon loss from felling 32,490 trees for its proposed pumped storage project in Karjat could be offset within 10 days of operations beginning.

NatConnect Foundation has approached the Prime Minister's Office (PMO), seeking an independent scientific investigation into the project's carbon accounting and net climate benefits.

"Given the decades required for compensatory plantations to accumulate carbon stocks comparable to mature forests, the assertion that the carbon loss from felling over 32,000 trees could be offset within just 10 days of project operation appears highly implausible," the Foundation said.

Nandakumar Pawar, director of Sagar Shakti, has challenged the proposed felling count, alleging that at least 1.5 lakh trees could be affected. If established, the higher estimate would mean significantly greater carbon loss and a longer recovery period.

The project involves diverting 233 hectares of forest land. NatConnect argues that carbon accumulated in mature trees, roots and forest soil must be included in calculations assessing the project's climate benefits. It believes the actual carbon payback period could extend well beyond a decade.

Citing a United Nations Environment Programme report, the Foundation said deforestation can release carbon stored in biomass, roots and soil. It sought a site-specific inventory covering above-ground and below-ground biomass and soil carbon.

NatConnect also cited the Forest Survey of India's India State of Forest Report 2023, which recognises carbon stocks in biomass, dead wood.

It sought clarification on whether carbon-credit revenue projected in the environmental impact assessment rests on eligibility under an approved mechanism or a notional valuation of avoided emissions.

The Foundation urged the PMO to refer the matter to the Ministry of Environment, Forest and Climate Change for an independent review of carbon stocks and avoided-emission calculations. It also sought appraisal records and suspension of project work, including forest clearance, until claimed climate benefits are independently verified.

FPJ News Service
NAVI MUMBAI

A woman and her two minor children died after allegedly jumping from the 11th floor of their residential building at Hiranandani Fortune City, Panvel, on Monday around 8.55pm, following harassment over a Rs2 lakh loan. The deceased were identified as Mansi Machindra Popete, 32, and her children Rudra, 11, and Hansika, 6, residents of Minerva Society.

Her husband, real estate agent Machindra Narayan Popete, 42, alleged that Vishwanath Desai and Arun Vishwanath Desai had lent him Rs2 lakh in 2024 and threatened the couple repeatedly over repayment for 15 days.

According to a police official, the accused visited the family's home around 8.45pm on Monday. The complaint alleged that they kicked the main door, tried to force it open, abused the family and issued threats. The men had also threatened the couple over the phone. Police registered an FIR early Tuesday on charges including abetment to suicide, criminal intimidation and trespass. The two accused are absconding.

₹510 cr assets linked to RADAG attached

MUMBAI

The Enforcement Directorate (ED) has attached assets worth Rs510 crore, including two chartered aircraft, six land parcels, an office premises and financial holdings, in two bank fraud cases involving Reliance Anil Ambani Group (RADAG) companies.

The attachments relate to an alleged Rs263.05-crore bank fraud involving Reliance Home Finance Ltd (RHFL) and Reliance Commercial Finance Ltd (RCFL), and a Rs247.12-crore case involving Reliance Communications Ltd (RCOM).

In the RCOM case, attached assets include two chartered aircraft, six land parcels and an office premises in Maharashtra. In the RHFL-RCFL case, the ED attached two windmills in Tamil Nadu, bank balances and fixed deposits.

The ED said it has cumulatively attached or seized assets worth approximately Rs23,100 crore in various cases against the group under the PMLA and Foreign Exchange Management Act (FEMA).

Investigations began following multiple FIRs registered by the Central Bureau of Investigation (CBI), Delhi, and the Economic Offences Wing.

Companies under investigation include Reliance Communications Ltd, Reliance Home Finance Ltd, Reliance Commercial Finance Ltd, Reliance Infrastructure Ltd, Reliance Power Ltd and Reliance Capital Ltd.

According to the ED, its investigation revealed that the group siphoned off public funds from banks and financial institutions, misused provisions of the Insolvency and Bankruptcy Code (IBC) to fraudulently ring-fence corporate assets, and diverted funds to offshore tax havens. The agency alleged that a substantial portion of the funds was used for the personal benefit of promoters and their family. The ED has arrested 10 individuals and filed six prosecution complaints under PMLA.

Toothbrush removed from man's stomach

Raina Assainar
NAVI MUMBAI

Doctors at Medicover Hospitals in Kharghar removed a 19-cm toothbrush from the stomach of a 50-year-old man who accidentally swallowed it while brushing his teeth. The endoscopic procedure lasted 30 minutes and avoided surgery.

Rajendra Malusare, an auto-rickshaw driver from Pen who has a physical disability, experienced mild abdominal pain after swallowing the toothbrush. A local physician advised an X-ray, but the object was not detected. He was referred to the Kharghar hospital.

An endoscopy revealed the toothbrush lodged horizontally in his stomach. Doctors decided to extract it to prevent intestinal obstruction or perforation.

Dr Raosaheb Rathod, Consultant Gastroenterologist, Hepatologist and Therapeutic Endoscopist at Medicover Hospitals, said Malusare arrived three to four hours after swallowing the object.

"The procedure was challenging because the toothbrush was hard, straight and lying horizontally in the stomach. We used a hood attached to the tip of the endoscope to grip one end and carefully pull it out," he said.

The endoscopic procedure at Medicover Hospitals lasted 30 minutes and was carried out without surgery

However, the toothbrush became stuck at the gastroesophageal junction, where the stomach meets the food pipe. Doctors adjusted the patient's position and manoeuvred the instrument to move it past the junction.

It then became lodged near the upper oesophageal sphincter in the throat, requiring further manipulation before the team extracted it intact through the mouth.

A follow-up endoscopy confirmed no injury to either oesophageal sphincter. Malusare's symptoms improved, and he was discharged in stable condition within three to four hours after the procedure.

Doctors warned that swallowing large foreign objects requires immediate medical attention. They advised against inducing vomiting or trying to push an object down with food because of risks including bleeding, injury and obstruction.

Neeraj Lal, Regional Director for Maharashtra and Karnataka at Medicover Hospitals, stressed the need for accurate diagnosis and appropriate treatment in emergencies.
