Sub: Fair Enterprise Valuation of InvIT assets as per SEBI (Infrastructure Investment Trusts) Regulations, 2014, as amended ("the SEBI InvIT Regulations") as at 30th June 2026

Dear Sir(s)/ Madam(s),

I, Mr. S. Sundararaman ("**Registered Valuer**" or "**RV**" or "**I**" or "**My**" or "**Me**") bearing IBBI registration number IBBI/RV/06/2018/10238, have been appointed vide letter dated 8th June, 2026 (EL Ref.no: RV/SSR/26-27/JN/03) as an independent valuer, as defined under Regulation 2(zzf) of the SEBI InvIT Regulations, by **EAAA TransInfra Managers Limited ("ETML" or "the Investment Manager")** acting as the Investment manager for **Citius Transnet Investment Trust ("the Trust" or "Citius")**, an infrastructure investment trust, registered with the **Securities Exchange Board of India ("SEBI")** with effect from 1st August 2025, bearing registration number IN/InvIT/25-26/0032 and Axis Trustee Services Limited ("**the Trustee**") acting on behalf of the Trust for the purpose of the fair enterprise valuation of the special purpose vehicles (defined below and hereinafter together referred as "**the SPVs**") of the Trust as per the requirements of the Securities and Exchange Board of India (Infrastructure Investment Trusts) Regulations, 2014, as amended from time to time ("**SEBI InvIT Regulations**").

The Trust operates and maintains the following special purpose vehicles which are to be valued as per Regulation 21 read with Chapter V of the SEBI InvIT Regulations:

Sr No.	Name of the SPVs	Abbreviations	FCOD	Asset Type
1	Ahmedabad - Maliya Tollway Private Limited	AMTPL	22-Jun-23	State Toll
2	Deccan Tollways Private Limited	DTPL	17-Sep-19; 20-Oct-23	NHAI Toll
3	Panipat Elevated Corridor Private Limited	PECPL	17-Mar-11	NHAI Toll
4	Rajkot - Vadinar Tollway Private Limited	RVTPL	17-Jun-23	State Toll
5	Samkhiali Bhachau Gandhidham Tollway Private Limited	SBGTPL	09-Dec-24	NHAI Toll
6	Sambalpur-Rourkela Tollway Private Limited	SRTPL	30-Mar-21	State Toll
7	Thrissur Expressway Limited	TEL	14-Jun-24	NHAI Toll
8	Dhola Infra Projects Private Limited	Dhola	13-Oct-18	MoRTH Annuity
9	Dibang Infra Projects Private Limited	Dibang	12-Dec-18	MoRTH Annuity
10	Jorabat Shillong Expressway Limited	JSEL	30-Aug-19	NHAI Annuity*

(Hereinafter all the ten companies mentioned above are together referred to as "**the SPVs**")

* Authority has been changed from NHAI to NHIDCL vide a Tripartite agreement dated 07th Aug 2026 between NHAI, NHIDCL and Concessionaire.

These SPVs were acquired by the Trust and are to be valued as per Regulation 21(5) contained in the Chapter V of the SEBI InvIT Regulations.

As per Regulation 21(5) of Chapter V of the SEBI InvIT Regulations:

"A half yearly valuation of the assets of the InvIT shall be conducted by the valuer for the half-year ending September 30th for a publicly offered InvIT for incorporating any key changes in the previous six months and such half yearly valuation report shall be submitted by the Investment Manager to the designated stock exchanges(s) along with the quarterly financial results for quarter ending 30th September.

If the consolidated borrowings and deferred payments of an InvIT, in terms of regulation 20 of these regulations, exceeds forty nine per cent.; a quarterly valuation of the assets of InvIT shall be conducted by the valuer as at the end of the quarters ending June, September and December for incorporating any key changes from the previous quarter and such quarterly valuation report shall be submitted by the investment manager to the designated stock exchange(s) along with the quarterly financial results of the corresponding quarter."

I understand from the Investment Manager that Investment Manager and the Trustee intends to undertake the fair enterprise valuation of the SPVs as on 30th June 2026 for incorporating any key changes from the period ended 31st March 2026 till 30th June 2026 for internal assessment purposes.

I am enclosing the independent valuation Report providing opinion on the fair enterprise value of the SPVs as defined above on a going concern basis as at 30th June 2026. ("**Valuation Date**")

Enterprise Value ("**EV**") is described as the total value of the equity in a business plus the value of its debt and debt related liabilities, minus any cash and cash equivalents to meet those liabilities. The attached Report details the valuation methodologies used, calculations performed, and the conclusion reached with respect to this valuation.

I was further requested by the Investment Manager to provide the adjusted enterprise value of the SPVs as at 30th June 2026, where the adjusted enterprise value ("**Adjusted EV**") is derived as EV as defined above plus cash and cash equivalents (including Investments and FD with Banks) of the SPVs as at 30th June 2026.

I have relied on explanations and information provided by the Investment Manager. Although I have reviewed such data for consistency, those are not independently investigated or otherwise verified. My team and I have no present or planned future interest in the Trust, the SPVs or the Investment Manager except to the extent of this appointment as an independent valuer and the fee for this Valuation Report ("**Report**") which is not contingent upon the values reported herein. The valuation analysis should not be construed as investment advice, specifically, I do not express any opinion on the suitability or otherwise of entering into any financial or other transaction with the Trust.

The analysis must be considered as a whole. Selecting portions of any analysis or the factors that are considered in this Report, without considering all factors and analysis together could create a misleading view of the process underlying the valuation conclusions. The preparation of a valuation is a complex process and is not necessarily susceptible to partial analysis or summary description. Any attempt to do so could lead to undue emphasis on any particular factor or analysis.

The information provided to me by the Investment Manager in relation to the SPVs included but not limited to historical financial statements, forecasts/projections, other statements and assumptions about future matters like forward-looking financial information prepared by the Investment Manager. The forecasts and projections as supplied to me are based upon assumptions about events and circumstances which are yet to occur.

I have not tested individual assumptions or attempted to substantiate the veracity or integrity of such assumptions in relation to the forward-looking financial information, however, I have made sufficient enquiry to satisfy myself that such information has been prepared on a reasonable basis.

Notwithstanding anything above, I cannot provide any assurance that the forward-looking financial information will be representative of the results which will actually be achieved during the cash flow forecast period.

The valuation provided by me and the valuation conclusion are included herein and the Report complies with the SEBI InvIT Regulations and guidelines, circular or notification issued by Securities and Exchange Board of India ("**SEBI**") thereunder.

Please note that all comments in the Report must be read in conjunction with the caveats to the Report, which are contained in Section 11 of this Report. This letter, the Report and the summary of valuation included herein can be provided to Trust's advisors and may be made available for the inspection to the public and with the SEBI, the stock exchanges and any other regulatory and supervisory authority, as may be required.

<< This space is intentionally left blank >>

I draw your attention to the limitation of liability clauses in Section 11 of this Report.

This letter should be read in conjunction with the attached Report.

Yours faithfully,

S. Sundararaman

1. Executive Summary

Background

1.1. The Trust

Citius TransNet Investment Trust (**"the Trust"** or **"InvIT"**) was established on 21st July 2025 as an irrevocable trust pursuant to the trust deed under the provisions of the Indian Trusts Act, 1882. The Trust is registered as an Indian infrastructure investment trust with the Securities and Exchange Board of India (**"SEBI"**) with effect from 1st August 2025, bearing registration number IN/InvIT/25-26/0032, pursuant to the SEBI (Infrastructure Investment Trusts) Regulations, 2014, as amended from time to time (**"the SEBI InvIT Regulations"**).

The Trust is an infrastructure investment trust established to acquire, manage and invest in a portfolio of infrastructure assets across sectors and/or securities of companies engaged in the infrastructure sector. The Trust has acquired the SPVs and would be responsible for holding the SPVs in trust and for the benefit of the unitholders, undertaking the activities and other duties specified as per the SEBI InvIT Regulations.

Axis Trustee Services Limited (**"the Trustee"**) has been appointed as the Trustee of the Trust.

The InvIT currently involves a portfolio of 10 road projects (7 Toll Projects & 3 Annuity Projects) in the states of Haryana, Gujarat, Karnataka, Telangana, Kerala, Arunachal Pradesh, Assam, Meghalaya & Odisha.

The units of the Trust are listed on the National Stock Exchange of India Limited and BSE Limited since 29th April 2026.

The Unit holding pattern of the Trust as on 30th June 2026 is as under:

Sr. No	Category	No. of Units	%
1	Sponsors & Sponsor Group	39,90,90,541	65.42%
2	Public Unitholders	21,09,09,459	34.58%
Total		61,00,00,000	100.00%

Source: Investment Manager

1.2. The Sponsor

Epic Transnet Infrastructure Private Limited (**"the Sponsor"** or **"ETIPL"**) is the Sponsor of the Trust. The Sponsor is a private company limited by shares and was originally incorporated as 'Watrak Infrastructure Private Limited' in India under the Companies Act, 2013, pursuant to a certificate of incorporation issued by the Registrar of Companies, Central Registration Centre dated 18th November 2001. Subsequently, a fresh certificate of incorporation dated 18th September 2025 was issued by the Registrar of Companies, Central Registration Centre, pursuant to the change in the name of the Sponsor from 'Watrak Infrastructure Private Limited' to 'Epic Transnet Infrastructure Private Limited'.

The Sponsor has also entered into engineering, procurement and construction contract/supply and installation agreements.

The Sponsor, in its capacity as the settlor set up the Trust, namely, Citius TransNet Infrastructure Trust on 21st July, 2025, as a contributory, determinate, irrevocable infrastructure investment trust under the provisions of the Indian Trusts Act, 1882, pursuant to the Trust Deed. The Trust was registered as an infrastructure investment trust with the SEBI under the Securities and Exchange Board of India (Infrastructure Investment Trusts) Regulations, 2014 on 1st August, 2025 having registration number IN/InvIT/25-26/0032.

The Sponsor is wholly owned by Infrastructure Yield Trust (through its schemes Infrastructure Yield Plus II, Infrastructure Yield Plus IIA and India Infrastructure Yield Plus II), an AIF managed by EAAA India Alternatives Limited (**"EAAA"**).

The Equity Shareholding Pattern of the Sponsor as on 30th June 2026 is as under:

Sr. No	Particulars	No. of shares	%
1	Infrastructure Yield Trust (along with its schemes)	3,12,87,294	100.00%
Total		3,12,87,294	100.00%

Source: Investment Manager

1.3. The Investment Manager

EAAA TransInfra Managers Limited (“ETML” or “the Investment Manager”) has been appointed as the Investment Manager to the Trust by the Trustee and will be responsible to carry out the duties of such person as mentioned under the SEBI InvIT Regulations. The Investment Manager is a 100% subsidiary of EAAA India Alternatives Limited.

The Equity Shareholding Pattern of the Investment Manager as on 30th June 2026 is as under:

Sr. No	Particulars	No. of Shares	%
1	EAAA India Alternatives Limited	71,850*	100.00%
	Total	71,850	100.00%

*Includes shares held by the nominees of EAAA India Alternatives Limited

Source: Investment Manager

1.4. The Project Manager

Epic Transnet Project Management Private Limited (formerly known as Chennai-Tada Tollway Private Limited) (“ETPMPL” or “the Project Manager”) has been appointed the project manager of the Trust. ETMPL is a wholly owned subsidiary of ETIPL.

The Equity Shareholding Pattern of the Project Manager as on the 30th June 2026 is as under:

Sr. No	Particulars	No. of shares	%
1	Epic Transnet Infrastructure Private Limited	4,20,00,000*	100.00%
	Total	4,20,00,000	100.00%

*Includes shares held by the nominees of Epic Transnet Infrastructure Private Limited

Source: Investment Manager

< This space is intentionally left blank >>

1.5. Financial Asset to be Valued

The following SPVs are to be considered for Fair Enterprise Valuation & Adjusted Enterprise Value:

Sr. No	Name of the SPVs	Term	Asset Type
1	Ahmedabad - Maliya Tollway Private Limited	AMTPL	State Toll
2	Deccan Tollways Private Limited	DTPL	NHAI Toll
3	Panipat Elevated Corridor Private Limited	PECPL	NHAI Toll
4	Rajkot - Vadinar Tollway Private Limited	RVTPPL	State Toll
5	Samkhiali Bhachau Gandhidham Tollway Private Limited	SBGTPL	NHAI Toll
6	Sambalpur-Rourkela Tollway Private Limited	SRTPL	State Toll
7	Thrissur Expressway Limited	TEL	NHAI Toll
8	Dhola Infra Projects Private Limited	Dhola	MoRTH Annuity
9	Dibang Infra Projects Private Limited	Dibang	MoRTH Annuity
10	Jorabat Shillong Expressway Limited	JSEL	NHAI Annuity*

(Hereinafter referred to as "the SPVs")

* Authority has been changed from NHAI to NHIDCL vide a Tripartite agreement dated 07th Aug 2026 between NHAI, NHIDCL and Concessionaire

1.6. Purpose of Valuation

As per Regulation 21(5) of Chapter V of the SEBI InvIT Regulations:

"A half yearly valuation of the assets of the InvIT shall be conducted by the valuer [as at the end of] the half-year ending September 30th for a publicly offered InvIT for incorporating any key changes in the previous six months and such half yearly valuation report shall be [submitted by the investment manager to the designated stock exchange(s) along with the quarterly financial results for the quarter ending September 30th.]

If the consolidated borrowings and deferred payments of an InvIT, in terms of regulation 20 of these regulations, exceeds forty nine per cent.; a quarterly valuation of the assets of InvIT shall be conducted by the valuer as at the end of the quarters ending June, September and December for incorporating any key changes from the previous quarter and such quarterly valuation report shall be submitted by the investment manager to the designated stock exchange(s) along with the quarterly financial results of the corresponding quarter"

I understand from the Investment Manager that Investment Manager and the Trustee intends to undertake the fair enterprise valuation of the SPVs as on 30th June 2026 for incorporating any key changes from the period ended 31st March 2026 till 30th June 2026 for internal assessment purposes.

In this regard, the Investment Manager has appointed me, Mr. S. Sundararaman ("**Registered Valuer**" or "**RV**" or "**I**" or "**My**" or "**Me**") bearing IBBI registration number IBBI/RV/06/2018/10238 to undertake fair valuation of the SPVs at the enterprise level as per the extant provisions of the SEBI InvIT Regulations issued by SEBI.

Enterprise Value ("**EV**") is described as the total value of the equity in a business plus the value of its debt and debt related liabilities, minus any Cash and Cash Equivalents to meet those liabilities.

Further, on the request of the Investment Manager, I have calculated Adjusted Enterprise Value ("**Adjusted EV**") of the SPVs which is derived as the EV as defined above plus cash and cash Equivalents of the SPVs and HoldCos as at the Valuation Date.

I declare that:

- I am competent to undertake the financial valuation in terms of the SEBI InvIT Regulations;
- I am not an associate of the Sponsor(s) or Investment Manager or Trustee and I have not less than five years of experience in valuation of infrastructure assets;
- I am independent and have prepared the Report on a fair and unbiased basis;
- I have valued the SPVs based on the valuation standards as specified / applicable as per SEBI InvIT Regulations.

This Report covers all the disclosures required as per the SEBI InvIT Regulations and the Valuation of the SPVs is impartial, true and fair and in compliance with the SEBI InvIT Regulations.

(Please refer to Appendix 10 for further information about myself)

1.7. Scope of Valuation

i. Nature of the Asset to be Valued

The RV has been mandated by the Investment Manager to arrive at the Enterprise Value (“**EV**”) of the SPVs. Enterprise Value is described as the total value of the equity in a business plus the value of its debt and debt related liabilities, minus any Cash and Cash Equivalents to meet those liabilities.

Further, on the request of the Investment Manager, I have calculated Adjusted Enterprise Value (“**Adjusted EV**”) of the SPVs which is derived as the EV as defined above plus cash and cash Equivalents of the SPVs as at the valuation date.

ii. Valuation Base

Valuation Base means the indication of the type of value being used in an engagement. In the present case, I have determined the fair value of the SPVs at the enterprise level. Fair Value Bases defined as under:

Fair Value

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the valuation date. It is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction in the principal (or most advantageous) market at the measurement date under current market conditions (i.e. an exit price) regardless of whether that price is directly observable or estimated using another valuation technique. Fair value or Market value is usually synonymous to each other except in certain circumstances where characteristics of an asset translate into a special asset value for the party(ies) involved.

iii. Valuation Date

Valuation Date is the specific date at which the value of the assets to be valued gets estimated or measured. Valuation is time specific and can change with the passage of time due to changes in the condition of the asset to be valued. Accordingly, valuation of an asset as at a particular date can be different from other date(s).

The Valuation Date considered for the fair enterprise valuation of the SPVs is 30th June 2026 (“**Valuation Date**”). The attached Report is drawn up by reference to accounting and financial information as on 30th June 2026. The RV is not aware of any other events having occurred since 30th June 2026 till date of this Report (“**Report Date**”) which he deems to be significant for his valuation analysis, except for any events disclosed by the Investment Manager during the valuation exercise.

iv. Premise of Value

Premise of Value refers to the conditions and circumstances of how an asset is deployed. In the present case, RV has determined the fair enterprise value of the SPVs on a Going Concern Value defined as below:

Going Concern Value

Going Concern value is the value of a business enterprise that is expected to continue to operate in the future. The intangible elements of going concern value result from factors such as having a trained work force, an operational plant, necessary licenses, systems, and procedures in place etc.

<< This space is intentionally left blank >>

1.8. Summary of Valuation

I have assessed the fair enterprise value of the SPVs on a stand-alone basis by using the Discounted Cash Flow (“DCF”) method under the income approach. Following table summarizes my explanation on the usage or non-usage of different valuation methods:

Valuation Approach	Valuation Methodology	Used	Explanation
Cost Approach	Net Asset Value	No	NAV does not capture the future earning potential of the business. Hence NAV method is considered only for background reference.
Income Approach	Discounted Cash Flow	Yes	For Annuity SPVs: The revenue of NHAI/MoRTH Annuity SPVs is mainly derived from the annuity fees that are typically pre-determined with NHAI/MoRTH (as specified in the respective concession agreement) and cannot be modified to reflect prevailing circumstances like inflation & interest rates. For Toll SPVs: Toll SPVs derive almost all their revenue from their toll-road operations. The value of these SPVs are substantially dependent on the accuracy of the traffic volume forecasts for their respective projects. Accordingly, since all the SPVs are generating income based on pre-determined agreements/mechanisms and since the Investment Manager has provided me the financial projections for the balance tenor of the concession agreements, DCF Method under the income approach has been considered as the appropriate method for the present valuation exercise.
Market Approach	Market Price	No	Currently, the equity shares of the SPVs are not listed on any recognized stock exchange in India. Hence, I was unable to apply the market price method.
	Comparable Companies	No	In the absence of any exactly comparable listed companies with characteristics and parameters similar to that of the SPVs, I have not consider this method for the current valuation.
	Comparable Transactions	No	In the absence of adequate details about Comparable Transactions, I was unable to apply the CTM method.

Under the DCF Method, the Free Cash Flow to Firm (“**FCFF**”) has been used for the purpose of valuation of the SPVs. In order to arrive at the fair EV of the SPVs under the DCF Method, I have relied on Provisional Financial Statements for the period ended 30th June 2026 prepared in accordance with the Indian Accounting Standards (Ind AS) and the financial projections of the respective SPVs prepared by the Investment Manager as at the Valuation Date on their best judgement.

The discount rate considered for the SPVs for the purpose of this valuation exercise is based on the Weighted Average Cost of Capital (“**WACC**”) for each of the SPVs.

As the SPVs under consideration have executed projects under the DBFOT/BOT model, the operating rights of the underlying assets shall be transferred back to the appointing authority after the expiry of the concession period. At the end of the agreed concession period, the operating rights in relation to the roads, the obligation to maintain the road reverts to the government entity that granted the concession by the SPVs. Accordingly, terminal period value i.e. value on account of cash flows to be generated after the expiry of concession period has not been considered.

Based on the methodology and assumptions discussed further, RV has arrived at the fair enterprise value of the SPVs as on the Valuation Date:

INR Mn					
Sr. No.	SPVs	Balance Life***	WACC	Enterprise Value*	Adjusted Enterprise Value**
1	AMTPL Base	~ 6 years 11 months	9.47%	14,041	14,756
	AMTPL Extension	~ 3 years 11 months [#]	10.47%	1,913	1,913
2	DTPL	~ 17 years 9 months	10.47%	19,413	19,503
3	PECPL	~ 0 years 7 months	9.59%	250	950
4	RVTPPL	~ 3 years 8 months	10.28%	4,369	4,515
5	SBGTPL	~ 8 years 5 months	10.67%	12,237	12,676
6	SRTPL	~ 14 years 5 months	9.53%	28,809	32,735
7	TEL	~ 10 years 3 months	9.62%	13,137	13,940
8	Dhola	~ 3 years 8 months	7.61%	3,174	3,368
9	Dibang	~ 4 years 5 months	7.62%	2,142	2,516
10	JSEL	~ 4 years 7 months	7.86%	4,813	4,850
Total				1,04,298	1,11,723

[#]from 5th June 2033

*Enterprise Value ("EV") is described as the total value of the equity in a business plus the value of its debt and debt related liabilities, minus any cash and cash equivalents to meet those liabilities.

**Further, at the request of the Investment Manager, I have calculated Adjusted Enterprise Value of the SPVs as the EV (derived as above) plus operating cash and cash like items (which includes cash and cash equivalent and current investment) of the SPVs as at the Valuation Date.

***The balance life of the SPVs has been calculated using the revised concession dates after including extension.
(Refer Appendix 1, 2 & 3 for the detailed workings)

The fair EV of the SPVs is estimated using DCF method. The valuation requires Investment Manager to make certain assumptions about the model inputs including forecast of cash flows, discount rate, and credit risk.

Further to above, considering that present valuation exercise is based on the future financial performance and based on opinions on the future credit risk, cost of debt assumptions, etc., which represent reasonable expectations at a particular point of time, but such information, estimates or opinions are not offered as predictions or as assurances that a particular level of income or profit will be achieved, a particular event will occur or that a particular level of income or profit will be achieved, a particular event will occur or that a particular price will be offered or accepted. Actual results achieved during the period covered by the prospective financial analysis will vary from these estimates and variations may be material. Accordingly, a sensitivity analysis is considered on the following unobservable inputs:

- WACC by increasing / decreasing it by 0.5%
- WACC by increasing / decreasing it by 1.0%
- Expenses by increasing / decreasing it by 20%
- Revenue of Toll SPVs by increasing / decreasing it by 10%

1. Sensitivity Analysis of Enterprise Value

a) Fair Enterprise Valuation Range based on WACC parameter (0.5%)

INR Mn						
Sr. No	SPVs	WACC +0.5%	EV	Base WACC	EV	WACC -0.5%

*Since these are annuity-based assets with fixed and predetermined revenue streams, revenue sensitivity analysis has not been carried out for these projects. Nevertheless, the assets have been included in the summary table above to facilitate completeness and ease of comparability across all projects.

Key Changes During the Quarter ended 30th June 2026:

1. For SBGTPL, a project-specific risk premium (CSRP) of 2.0% has been incorporated to reflect the underachievement of revenue and the uncertainty in traffic volumes likely to have been arising from the prevailing geopolitical situation. While management expects traffic volumes to recover and align with the original projections once the geopolitical situation stabilizes, the additional CSRP has been considered to reflect the heightened risk as of the valuation date.

Following is the Enterprise Values of all the SPVs during the previous Valuations:

		INR Mn				
Sr. No	SPVs	Acquisition Date	Jun-25	Dec-25	Mar-26	Jun-26

2. Procedures adopted for current valuation exercise

I have performed the valuation analysis, to the extent applicable, in accordance with ICAI Valuation Standards 2018 ("IVS") issued by the Institute of Chartered Accountants of India.

In connection with this analysis, I have adopted the following procedures to carry out the valuation analysis:

- i. Requested and received financial and qualitative information relating to the SPVs;
- ii. Obtained and analyzed data available in public domain, as considered relevant by me;
- iii. Discussions with the Investment Manager on:
 - Understanding of the business of the SPVs - business and fundamental factors that affect its earning-generating capacity including strengths, weaknesses, opportunities and threats analysis and historical and expected financial performance;
- iv. Undertook industry analysis:
 - Research on publicly available market data including economic factors and industry trends that may impact the valuation;
 - Analysis of key trends and valuation multiples of comparable companies/comparable transactions, if any, using proprietary databases subscribed by me;
- v. Analysis of other publicly available information;
- vi. Selection of valuation approach and valuation methodology/(ies), in accordance with IVS, as considered appropriate and relevant by me;
- vii. Conducted physical site visit of the road stretch of the SPVs;
- viii. Determination of Fair EV of the SPVs on a going concern basis till the end of concession period at the Valuation Date and determination of fair value of the Adjusted EV of the SPVs on a going concern basis till the end of the concession period as at the Valuation Date on request of the Investment Manager.

3. Overview of InvIT and SPVs

3.1. The Trust

Citius TransNet Investment Trust ("**the Trust**" or "**Citius**") was established on 21st July 2025 as an irrevocable trust pursuant to the trust deed under the provisions of the Indian Trusts Act, 1882. The Trust is registered as an Indian infrastructure investment trust with the Securities and Exchange Board of India ("**SEBI**") with effect from 1st August 2025, bearing registration number IN/InvIT/25-26/0032, pursuant to the SEBI (Infrastructure Investment Trusts) Regulations, 2014, as amended from time to time ("**the SEBI InvIT Regulations**").

EAAA TransInfra Managers Limited is the Investment Manager, Epic Transnet Project Management Private Limited ("**ETPMPL**") is the Project Manager and Epic Transnet Infrastructure Private Limited ("**ETIPL**") is the sponsor of the Citius TransNet Investment Trust ("**Trust**" or "**InvIT**").

Axis Trustee Services Limited ("**the Trustee**") has been appointed as the Trustee of the Trust.

The units of the Trust are listed on the National Stock Exchange of India Limited and BSE Limited since 29th April 2026.

The Trust is an infrastructure investment trust established to acquire, manage and invest in a portfolio of infrastructure assets across sectors and/or securities of companies engaged in the infrastructure sector. The Trust has acquired the SPVs and would be responsible for holding the SPVs in trust and for the benefit of the unitholders, undertaking the activities and other duties specified as per the SEBI InvIT Regulations.

Following is a map of India showing the area covered by the SPVs acquired by the Trust:

Following is the table of the Trust as on the Valuation date displaying the equity stake and amount of debt outstanding in the SPVs provided by the Trust :

					INR Mn
Sr. No.	SPVs	HoldCos	Equity Stake Acquired ¹	Acquisition Cost of Trust's Equity Stake as on report date	Outstanding Debt from the Trust to the SPV ²
1	AMTPL		100%		6,839
2	DTPL		100%		18,777
3	PECPL	Epic Concesiones 3 Private Limited	100%	24,599	1,695
4	RVTPL		100%		3,799
5	SBGTPL		100%		12,794
6	SRTPL		100%		6,355
7	TEL*	-	100%	18	13,458

10	JSEL		100%		3,465

*Direct Equity purchase

- Equity Interest:** I understand the Trust has acquired 100% Equity Stake in the above-mentioned HoldCos and SPV as on 21st April 2026[#]

[#]As per Investment Manager, 21st April 2026 has been considered as the effective date of acquisition, as this is the date on which the shares of the respective HoldCos (including its subsidiaries i.e. 9 SPVs) and direct SPV (TEL) were transferred to and credited in the demat account of Citius TransNet Investment Trust.

- Debt Interest:** The amount of outstanding debt payable by the SPV to the Trust as on the Valuation Date.

<< This space is intentionally left blank >>

Acquisitions by the Trust

The Trust has acquired two Holding Companies and one SPV as on 21st April 2026.

(As per Investment Manager, 21st April 2026 has been considered as the effective date of acquisition, as this is the date on which the shares of the respective HoldCos (including its subsidiaries i.e. 9 SPVs) and direct SPV (TEL) were transferred to and credited in the demat account of Citius TransNet Investment Trust.)

- A. Epic Concesiones 3 Private Limited (EPIC3),
- B. SRPL Roads Private Limited (SRPL) and
- C. Thrissur Expressway Limited (TEL)

A. EPIC3 holds 6 BOT (Toll) SPVs namely:

- (i) Ahmedabad - Maliya Tollway Private Limited (AMTPL)
- (ii) Deccan Tollways Private Limited (DTPL)
- (iii) Panipat Elevated Corridor Private Limited (PECPL)
- (iv) Rajkot - Vadinar Tollway Private Limited (RVTPL)
- (v) Samkhiali Bhachau Gandhidham Tollway Private Limited (SBGTPL)
- (vi) Sambalpur-Rourkela Tollway Private Limited (SRTPL)

The Equity Shareholding of EPIC3 as on the Valuation date is as under:

Sr. No	Particulars	No. of shares	%
1	Citius Transnet Investment Trust	2,80,78,966	100.00%
2	Bhavyang R Oza*	1	0.00%
Total		2,80,78,967	100.00%

**Shares held by nominee of Citius Transnet Investment Trust*

Source: Investment Manager

B. SRPL holds 3 BOT (Annuity) SPVs namely:

- (i) Dhola Infra Projects Private Limited ("Dhola")
- (ii) Dibang Infra Projects Private Limited ("Dibang")
- (iii) Jorabat Shillong Expressway Limited ("JSEL")

The Equity Shareholding of SRPL as on the Valuation date is as under:

Sr. No	Particulars	No. of shares	%
1	Citius Transnet Investment Trust	72,49,999	100.00%
2	Bhavyang R Oza*	1	0.00%
Total		72,50,000	100.00%

**Shares held by nominee of Citius Transnet Investment Trust*

Source: Investment Manager

C. Thrissur Expressway Limited ("TEL"):

The Equity Shareholding of TEL as on the Valuation date is as under:

Sr. No	Particulars	No. of Shares	%
1	Citius Transnet Investment Trust	77,291	100.00%
2	Bhanuprakash Anisetti*	1	0.00%
3	Manish Chitkara*	1	0.00%
4	Mohankumar Kolli*	1	0.00%
5	Niraj Mohanty*	1	0.00%
6	Parveen Kumar*	1	0.00%
7	Sandip Das*	1	0.00%
Total		77,297	100.00%

**Shares held by nominees of Citius Transnet Investment Trust*

3.2. Background of the SPVs

(i) A) Ahmedabad - Maliya Tollway Private Limited ("AMTPL- Base")

- The project involves development of SH-17 which starts from Ahmedabad (Sarkhej) to Viramgam Km. 13/930 to Km. 61/430 and of SH-7 starts from Viramgam to Maliya (Km. 61/430 to Km. 194/633) to 4-lane divided carriageway including strengthening of existing carriageway, between Ahmedabad to Maliya (Km. 13/930 to Km. 194/633) in Gujarat including bypasses at Sachana, Dhrangdhra and Halvad.
- It has been undertaken on a Build -Operate- Transfer (BOT) Basis, with Gujarat State Road Development Corporation (GSRDC) as the implementing agency. The Project achieved Provisional Commercial Operation Date (PCOD) in a phased manner. Subsequently, all works forming part of the four-laning scope are completed in accordance with the provisions of the Concession Agreement and the Settlement Agreement. The Independent Engineer issued the final Completion Certificate for the entire stretch on 22nd June 2023.
- The corridor forms a primary freight route between Ahmedabad and the Kandla, Mundra, and other Kutch/Saurashtra ports. It links directly with NH-27 and NH-947 at Maliya, feeding into Gujarat's west-coast port cluster. This ensures faster evacuation of goods from industrial hubs in central/north Gujarat to ports for export. The map below illustrates the location of the project and the corridor it covers.

- Summary of project details of AMTPL are as follows:

Parameters	Details
Total Length	180.703 km
Lane km	722.812 km
No. of Lanes	4
No. of Toll Plazas	4
SH	SH-17 and SH-7
State Covered	Gujarat
Area (Start and End)	Ahmedabad to Viramgam to Maliya
Project Cost	INR 10,153.6 Mn
PPP Model	BOT
Project Type	Tolling, Operation, Maintenance and Transfer
Concession Granted by	Gujarat State Road Development Corporation (GSRDC)
FCOD Date	22-Jun-23
PCOD Date	Section I – 27-Aug-12
	Section II – 01-Nov-12
	Section III – 07-Apr-12
	Section IV – 05-May-12
Appointed Date	12-Oct-09
Original Concession Period (CP)	22 years
Original Concession End Date	11-Oct-2031
Total Extension Days	602 days
Extension days as per New Concession agreement	1445 days
Estimated Concession End Date (AMTPL-Base)	4-Jun-33
Estimated Concession End Date (AMTPL-Extension)	19-May-37

Source: Investment Manager

- The following are the salient features of AMTPL:

Sr. No	Salient Features	Units
1	Total Length of Main Carriageway with Rigid Pavement	Only at Toll Plazas
2	Total Length of Main Carriageway with Flexible Pavement	180.703 kms
3	Total length of Service Roads	0.80 km
4	Total length of Slip Roads	NIL
5	No of Toll Plazas	4
6	No of Bus Bays with Bus Shelters	85
7	Number of Truck Lay Bays	NIL
8	No of Rest Areas	NIL
9	No of Major Junctions	11
10	No of Minor Junctions	102
11	No of Vehicular underpasses	2
12	No of Light Vehicular underpasses	NIL
13	No of Pedestrian underpasses	7
14	No of Subways	NIL
15	No of Flyovers	NIL
16	No of Major Bridges	9
17	No of Minor Bridges	74
18	No of Hume Pipe Culverts	241
19	No of Box / Slab Culverts	37

**The Concessionaire has been granted an additional 1,445 days to the concession period under a new concession agreement executed with the GSRDC on 30th October 2025 for the upgradation of four to six-laning of a section of the project highway of 28.752 kilometers near Sanand. These approvals have been incorporated into the revised project scope and timeline.*

- Modification in the Concession Period due to target traffic clause as per Concession Agreement

As per the Article 29 of the concession agreement between GSRDC and AMTPL provided to us by the Investment Manager, if the actual traffic falls short or exceeds target traffic on a defined date, the concession period shall be revised subject to calculation specified therein. Accordingly, the concession period extends by 4.54% as given above.

B) Ahmedabad - Maliya Tollway Private Limited ("AMTPL- Extension")

- To strengthen connectivity and support industrial growth in the Sanand region, the Government of Gujarat, through GSRDC, has initiated the upgradation of State Highway-17 from Shantipura Chokdi to Khoraj GIDC Chokdi (Chainage 13+930 to 42+683).
- The project involves converting the existing four-lane section into a six-lane highway with service roads, covering a length of 28.752 km. This work, will be executed on a Build-Operate-Transfer (BOT) basis and includes construction, operation, and maintenance ending of existing concession.
- The remaining stretch of the Ahmedabad–Viramgam–Maliya Toll Road (Chainage 42+683 to 194+633) of AMTPL will continue under the existing concession until the Existing Transfer Date.
- Following this, the concessionaire will operate and maintain the entire toll road (Chainage 13+930 to 194+633, total 180.703 km) for an additional period of 3 years, 11 months, and 15 days commencing from COD, as per the new concession agreement.
- GSRDC awarded the concession to Ahmedabad-Maliya Tollway Private Limited via Letter of Acceptance dated 7th October, 2025. Under the agreement, the concessionaire is granted exclusive rights to implement the project in accordance with the stipulated terms and conditions. The Concession Agreement was signed on 30th October, 2025.
- Summary of project details of AMTPL- Sanand Six Lane Extension are as follows:

Particulars	Unit
Total Length	28.752 km
No. of Lanes	6
SH	SH-17
State Covered	Gujarat
Area (Start and End)	Shantipura Chokdi to Khoraj GIDC Chokdi
PPP Model	BOT
Project Type	Tolling, Operation, Maintenance and Transfer
Concession Granted by	Gujarat State Road Development Corporation (GSRDC)
LOA Date	07-Oct-25
Concession Period (CP)	3 years 11 months
Concession Start Date	05-Jun-33 (after completion of existing concession and extension therein)
Concession End Date	19-May-37

(ii) **Deccan Tollways Private Limited ("DTPL")**

- The National Highway 65, commonly referred to as NH-65 (Old NH-9) is an 841 Km long National Highway in South India. It runs along the states of Maharashtra, Karnataka, Telangana and Andhra Pradesh. It starts at Pune and ends at Machilipatnam. Major cities on this route are Pune, Solapur, Hyderabad, Suryapet, Vijayawada and Machilipatnam.
- The Govt. of India had entrusted to National Highways Authority of India (NHAI) for development, maintenance and management of NH-9 including section from km 348.800 to km 493.000 (approx. km 145) on Design, Built, Fund, Operate and Transfer (DBFOT)-BOT TOLL basis. Currently, at site revised chainages exists, connecting Sangareddy to Karnataka/Maharashtra from km 352.000 to km 497.000 of NH-65 (old NH-9). The length of project road is equally spread between the states of Karnataka and Telangana.
- Provisional Certificate for the length of 142.786 km of the Project highway was issued by the Independent Engineer (IE) w.e.f. 14th October 2017 along with Punch lists and the Project Highway was placed in Commercial Operation. Subsequently, the Concessionaire completed the Punchlist and Completion Certificate for the said length was issued on 17th September 2019. Further, Final Completion Certificate achieved on 20th October 2023.
- The map below illustrates the location of the project and the corridor it covers:

Appointed date	Date	1-Apr-14
Original concession end date	Date	31-Mar-39
Revised concession end date	Date	6-Apr-44

- Modification in the Concession Period due to target traffic clause as per Concession Agreement

As per the Article 29 of the concession agreement between NHAI and DTPL provided to us by the Investment Manager, if the actual traffic falls short or exceeds target traffic on a defined date, the concession period shall be revised subject to calculation specified therein. Accordingly, the concession period extends by 20% as given above.

- My team had conducted physical site visit of the road stretch of DTPL on 31st October 2025. Refer below for the pictures of the road stretch. A subsequent physical site visit will be conducted prior to 31st March 2027 as part of the valuation exercise.

(iii) **Panipat Elevated Corridor Private Limited ("PECPL")**

- The Government of India had entrusted to National Highways Authority of India (NHAI) for development, maintenance, and management of National Highway No. 44 (old NH-1) which includes. - Widening of existing 4 lane portion from KM 86 to KM 96, covering Panipat City on NH-44 in Haryana, to 6 lanes elevated structure covering Gohana Road, Sanauli Road, Asandh Road Crossings, City Bus Stand and Skylark Tourist Complex and widening and construction of Peripheral Lanes on BOT basis.
- The Concession Agreement was executed on 27th July 2005. The Appointed Date for the project was declared as 23rd January 2006, marking the commencement of the 20-year Concession Period from that date
- The Panipat Elevated Corridor Project is a major infrastructure initiative aimed at decongesting traffic and ensuring smooth flow of vehicles along the Delhi–Ambala section of National Highway-44 (old NH1), one of the busiest arterial highways in North India. NH-44 is a heavily trafficked corridor carrying long-distance freight, intercity, and local traffic simultaneously. Severe traffic congestion, bottlenecks at junctions, and frequent delays were observed within the city stretch. The elevated corridor provides segregation of through traffic from local traffic, ensuring faster transit, improved safety, and reduced pollution.
- The map below illustrates the location of the project and the corridor it covers:

Source: Investment Manager

- Summary of project details of PECPL are as follows:

Parameters	Details
Total Length	10 km
Lane km	60 km
No. of Lanes	6
No. of Toll Plazas	1

(iv) Rajkot-Vadinar Tollway Private Limited (“RVTPL”)

- The project involves development of SH-25 starts from Rajkot to Vadinar Km. 3.000 to Km. 129.350 including spur road length 5.300 km to 4-lane divided carriageway in Gujarat. It has been undertaken under the Viability Gap Funding (VGF) scheme of the Government of India on a Build -Operate- Transfer (BOT) Basis, with Gujarat State Road Development Corporation (GSRDC) as the implementing agency.
- The Concession Agreement was executed on 17th September 2008. The Appointed Date for the project was declared on 12th September 2009, marking the commencement of the 20-year Concession Period from that date. The Project achieved Provisional Commercial Operation Date (PCOD) on 27th January 2012. COD of the project is achieved on 17th June 2023.
- This State Highway-25 forms a primary east-west spine in Saurashtra, linking the regional growth center of Rajkot with the coastal industrial and port cluster spanning Jamnagar–Sikka–Vadinar. The corridor serves heavy industries (refining, petrochemicals, engineering), logistics parks, fisheries, and port operations, and provides connectivity to tourist and pilgrimage circuits in Dwarka district.
- The map below illustrates the location of the project and the corridor it covers.

Source: Investment Manager

Original concession period	years	22
Increase in concession period (Max. upto 20%)	%	20%
Estimated change in concession period due to change in Target Traffic		1606
Revised concession period	years	26.4
Appointed date	Date	15-Jul-14
Original concession end date	Date	14-Jul-36
Revised concession end date	Date	6-Dec-40

Note: COVID extension of 102.82 days, 190 days for MAE and 7.14 days for trucker's strike was recommended by IE in a letter dated 02-Feb-2023, this has not yet been approved by the Odisha Works Department. This extension has not been considered in the projection period.

- Modification in the Concession Period due to target traffic clause as per Concession Agreement**
As per the Article 29 of the concession agreement between Odisha Works Department and SRTPL provided to us by the Investment Manager, if the actual traffic falls short or exceeds target traffic on a defined date, the concession period shall be revised subject to calculation specified therein. Accordingly, the concession period extends by 20% as given above.
- My team had conducted physical site visit of the road stretch of SRTPL on 17th November 2025. Refer below for the pictures of the road stretch. A subsequent physical site visit will be conducted prior to 31st March 2027 as part of the valuation exercise.

(vii) **Thrissur Expressway Limited ("TEL")**

- The project involves upgrading the existing two-lane carriageway to a six-lane dual carriageway configuration, including strengthening and widening of the existing two lanes to three lanes of NH – 47 (New NH 544), between Km 240.000 (Exiting km 236.135) at Vadakancherry and Km 270.000 (Exiting km 264.490) near Thrissur with a six-lane twin-tube tunnel, the Kuthiran Tunnel, near Kuthiran hills.
- The Concession Agreement was executed on 24 August 2009. The Appointed Date for the project was declared as 15th September 2012, marking the commencement of the 20-year Concession Period from that date. The Provisional Completion Certificate for the project was achieved on 09th March 2022, followed by the issuance of the Final Completion Certificate on 14th June 2024.
- The Kuthiran Tunnel has been constructed to mitigate traffic bottlenecks and reduce the frequency of accidents along the Kuthiran hill stretch, a previously challenging and accident-prone section of the highway. By bypassing this difficult terrain, the tunnel significantly reduces travel time and enhances road safety. Notably, this is Kerala's first-ever road transport tunnel and stands as South India's longest six-lane road tunnel. This stretch of NH-544 forms a critical segment of the highway corridor connecting Kochi in Kerala to Salem in Tamil Nadu. The route traverses several key cities including Thrissur, Palakkad, Coimbatore, and Erode.
- The map below illustrates the location of the project and the corridor under the SPV's purview.

Source: Investment Manager

- Summary of the project details of TEL are as follows:

Parameters	Details
Total Length	28.36 km
Lane km	170.13 km
No. of Lanes	6 Lane
No. of Toll Plazas	1
NH	NH-544 (Old NH-47)
State Covered	Kerala
Area (Start and End)	Vadakkencherry to Mannuthy
Project Cost	INR 6,170 Mn
PPP Model	DBFOT(Toll)
Project Type	Design, Build, Finance, Operate and Transfer
Concession Granted by	NHAI
PCOD Date	09-Mar-22
FCOD Date	14-Jun-24
Appointed Date	15-Sept-12
Original Concession Period (CP)	20 years
Total Extension Days	1461 days
Estimated Concession End Date	14-Sep-36

Source: Investment Manager

- The following are the salient features of TEL

Sr. No	Salient Features	Units
1	Total Length of Main Carriageway with Rigid Pavement	2.746 kms (Toll Plaza and Tunnel)
2	Total Length of Main Carriageway with Flexible Pavement	26.98 Kms
3	Total length of Service Roads	Completed as per CA Scope - 31.42 Kms, Under COS - 9.65 Kms
4	Total length of Slip Roads	Nil
6	No of Toll Plazas	1
7	No of Bus Bays with Bus Shelters	21
8	Number of Truck Lay Bays	1
9	No of Rest Areas	NIL
10	No of Major Junctions	3
11	No of Minor Junctions	7
12	No of Vehicular underpasses	4
13	No of Light Vehicular underpasses	1
14	No of Pedestrian underpasses	4
15	No of Subways	NIL
16	No of Flyovers	2
17	No of Major Bridges	1
18	No of Minor Bridges	1
19	No of Hume Pipe Culverts	29
20	No of Box / Slab Culverts	58

(ix) Diband Infra Projects Private Ltd ("Diband")

- The Govt. of India (GOI) through Ministry of Roads & highways (MoRTH) resolved to Construct bridges across Diband river systems and connecting road between Bomjir-Meka (NH-13) covering length of 18.95 Km & construct bridge across river Lohit at Alubari Ghat and connecting road between Chowkham - Digaru covering length of 12.00 Km in Arunachal Pradesh (total 30.95 Km) on BOT Annuity basis under Arunachal Pradesh package of Road and Highways.
- IE has issued PCOD on dated 7th December 2018 with effective date of PCOD as 19th May 2018 and completion certificate received on dated 10th October 2019 with effective date of Completion certificate as 12th Dec 2018.
- National Highway 13 (NH-13) originates from Baihata Chariali near Guwahati and runs along the northern bank of the mighty Brahmaputra River, connecting several important towns and villages such as North Lakhimpur, Banderdewa, Akajan, and Jonai in Assam. From Jonai, the highway enters the state of Arunachal Pradesh, passing through key locations including Pasighat, Bomjur, Roing, Digaru, Tezu, Parshuram Kund, Chowkham, Namsai, and Dirak. It then re-enters Assam at Dirak and terminates at Rupai on National Highway 37 (NH-37).
- The map below illustrates the location of the project and the corridor under the SPV's purview.

Source: Investment Manager

- Summary of Project details of Diband are as follows:

Parameters	Details
Total Length	29.635 km
Lane km	59.27 km
No. of Lanes	2 Lane
No. of Toll Plazas	0
SH	NH 13 (Old NH-52)
State Covered	Arunachal Pradesh
Area (Start and End)	Section 1-Start at Digaru Junction and Ends at chowkham Junction; Section 2-Start at Bomjir and Ends at Meka junction
Project Cost	INR 7,640 Mn

<< This space is intentionally left blank >>

(x) Jorabat Shillong Expressway Limited ("JSEL")

- The Govt. of India (GOI) through National Highways Authority of India (NHAI) as "Authority" undertook the construction and augmentation of the Jorabat–Shillong (Barapani) section of NH 06, spanning from km 0.000 to km 61.800 traversing the states of in Assam and Meghalaya. The project was implemented under the Design–Build–Finance–Operate–Transfer (DBFOT) model on an Annuity basis, as part of the Special Accelerated Road Development Programme for the North Eastern Region (SARDP-NE).
- Following the satisfactory completion of construction works, Independent Engineer (IE) issued the PCOD with effect from on 28th January 2018. The Final Completion Certificate was later issued on 30th August 2019.
- This stretch of NH-40 (now part of NH 6) provides a critical link from Guwahati to Shillong, further connecting to Tripura, Mizoram, and access towards the India–Myanmar border via the East Khasi Hills. This expressway traverses challenging terrain characterized by hilly topography, dense vegetation, and one of India's highest rainfall zones and thus supporting regional commerce, mobility, and socio-economic development.
- Authority has been changed from NHAI to NHIDCL vide a Tripartite agreement dated 07th Aug 2026 between NHAI, NHIDCL and Concessionaire.
- The map below illustrates the location of the Project and the corridor it covers:

Source: Investment Manager

- Summary of project details of JSEL are as follows:

Parameters	Details
Total Length	61.80 km
Lane km	247.2 km
No. of Lanes	4 Lane
No. of Toll Plazas	1
NH	NH-06
State Covered	Assam & Meghalaya
Area (Start and End)	Jorabat- Barapani
Project Cost	INR 5,360 Mn

4. Structure of the Trust

Following is the structure of Citius TransNet Investment Trust:

Source: Investment Manager

¹EAAA Platform has signed definite documents to acquire ROFO assets. It has completed acquisition of 5 assets and is in process of completing the acquisition for balance 6 assets. These assets are proposed to be offered to Citius under a Right of First Offer (ROFO) agreement post stabilization.

<< This space is intentionally left blank >>

5. Overview of the Industry

5.1 Transport infrastructure sector in India

Overview of the Transport Infrastructure Sector

- India's rapid economic growth necessitates a robust and efficient transport infrastructure to support mobility, trade and regional integration. In response, the government has prioritised modernisation of the transport sector through sustained investments, structural reforms and targeted policy initiatives. Total infrastructure investments are expected to nearly double from ₹47.8 trillion during FY2019-24 to ~₹93 trillion in FY2025-30, reflecting sustained public spending and growing private sector participation. Transport infrastructure alone is projected to attract ₹42-45 trillion over FY2025-30.
- Budgetary allocations for the infrastructure sector have risen from \$88 billion in fiscal 2020 to a projected \$123 billion in fiscal 2026, logging a strong CAGR of 11.3%. Of the overall budgetary outlay for this fiscal, the transport sector accounts for over half the allocation at ~52%. The consistent upward trend in the outlay underscores policy continuity and the government's recognition of infrastructure as a key driver of productivity and competitiveness. Additionally, the Government has also continued support to states through ₹1.5 lakh crore of 50-year interest-free loans to boost infrastructure investment.
- After the successful monetisation of assets worth \$44 billion under the first phase of the NMP between fiscals 2022 and 2024, the government has launched the second phase, targeting \$115 billion in asset monetisation between fiscals 2025 and 2030. This is expected to unlock value from existing assets and channel funds into new infrastructure development.
- Budgetary allocation for the infrastructure sector in India (\$ billion)

Note: Includes budget allocations to the Ministry of Road Transport and Highways, Ministry of Railways, Ministry of Ports, Shipping and Waterways, Ministry of Civil Aviation and allocations to metro rails under the Ministry of Housing and Urban Affairs

Source: Budget estimates, Ministry of Finance, Crisil Intelligence

Investment trends: Public expenditure on transport infrastructure as a share of GDP

- e. The share of public spending on transport infrastructure in GDP has almost doubled from 0.86% in fiscal 2021 to 1.66% in fiscal 2025. In contrast, most other countries show either stagnation or decline in incremental spending as a share of GDP. For instance, in the US, it fell from 0.74% to 0.5% and in the UK from 1.13% to 0.66% during the period, while in Brazil and South Africa it remained stable at 1.3% and 0.3%, respectively, indicating slower growth in developed and other emerging economies.
- f. India's higher and rising investments reflect its aggressive infrastructure push under the PM Gati Shakti, NIP, NMP and Bharatmala programmes. As already mentioned, these initiatives aim to close the infrastructure gap, improve logistics efficiency and support rapid urbanisation and economic growth. In contrast, advanced economies such as the US, the UK and Japan, already run mature transport systems, leading to lower incremental spending as a share of GDP. India's strong capex focus is, thus, not only a developmental necessity but also a strategic move to sustain high economic growth.
- g. Capex in the domestic transport sector has been strategically directed towards strengthening connectivity, improving logistics efficiency and enhancing competitiveness. The focus remains on developing multimodal infrastructure, with roads and railways continuing to dominate budgetary allocations, while metro, ports and airports receive relatively smaller but targeted investments.
- h. Based on fiscal 2025 RE, roads and highways account for the largest share of transport capex, underscoring their central role in enabling last-mile connectivity and facilitating both passenger and freight movement. The strong allocation growth reflects policy emphasis on national highway expansion, expressway development and rural connectivity through programmes, such as the Bharatmala and Pradhan Mantri Gram Sadak Yojna (PMGSY). The railways form the second-largest component, driven by modernisation, network decongestion and electrification initiatives. Capex for the railways has more than tripled since fiscal 2020, reflecting the government's sustained focus on capacity enhancement and safety. Metro systems have also seen steady investments aligned with the government's urban transport priorities and growing need for sustainable mobility solutions. While ports and airports account for a smaller share in the overall transport capex, these represent strategic investments to expand trade competitiveness and regional air connectivity. Allocations in these segments are aligned with the Ude Desh Ka Aam Naagrik (UDAN) scheme, port modernisation initiatives and multimodal logistics development under the PM Gati Shakti Master Plan.
- i. Sector-wise split of budgetary allocation for transport infrastructure for fiscal 2025 (RE; \$ billion)

Source: Budget documents, Crisil Intelligence

Indian Government's Initiatives in the Transport Sector

j. National Infrastructure Pipeline

Launched in 2019, the NIP was a landmark initiative to systematically identify and develop large-scale infrastructure projects across India over fiscals 2020-2025. The goal of the NIP was to provide a structured framework for improving project preparation, accelerating approvals and aligning public as well as private investments. Of the planned capital outlay, the transportation sector accounted for ~55% share, reflecting its strategic importance in enabling economic integration and improving logistics efficiency. As of last fiscal, over 9,766 projects totalling \$1,839 billion were tracked under the NIP in 37 sub-sectors.

k. National Monetisation Pipeline

The NMP, launched in August 2021, focuses on unlocking the value of existing public infrastructure assets through monetisation. It aims to recycle capital by attracting private investment into brownfield assets, thereby reducing the fiscal burden on the government and reinvest the monetisation proceeds into new infrastructure creation. Also, it complements the NIP by mobilising private capital for reinvestment in new infrastructure, creating a sustainable cycle of asset development and monetisation.

The NMP employs models such as PPP, InvITs and TOT to ensure predictable returns for investors while maintaining government ownership of the core assets. Between fiscals 2022 and 2025, asset monetisation of \$44 billion was achieved across roads, railways, power, oil and gas, and ports.

The NMP is set to launch its second phase, spanning fiscals 2026-2030, with a substantial portfolio of assets valued at \$115 billion for monetisation. It aims to unlock capital by leasing public assets such as roads, railways, airports, ports and power to the private sector for a defined period, which can then be reinvested into new infrastructure projects. NMP 2.0 will also focus on developing vacant public land and cover a broader range of assets compared with phase one.

l. Pradhan Mantri Gati Shakti

The platform enables real-time data integration through over 1,500 data layers from ministries and states, supporting evidence-based project planning under the PM Gati Shakti-National Master Plan framework. It aligns with flagship programmes such as Bharatmala, Sagarmala and UDAN, focusing on last-mile connectivity and logistics efficiency. As of July 2025, over 293 infrastructure projects totalling \$154 billion were assessed under this initiative. The initiative supports the government's Viksit Bharat @ 2047 vision by ensuring seamless infrastructure connectivity.

m. National Logistics Policy

The NLP, launched in September 2022, seeks to build an integrated, efficient and technology-driven logistics ecosystem. The policy targets reducing logistic costs from the currently estimated 13-14% of GDP to global benchmarks of below 10% by 2030, thereby improving India's trade competitiveness and supply chain resilience. Its objectives include enhancing multimodal integration, promoting data-driven decision-making through the ULIP and improving India's Logistics Performance Index (LPI) ranking to among the top 25 countries by 2030.

In the World Bank's LPI 2023, India's rank improved to 38th from 54th in 2014, reflecting notable progress in port connectivity, infrastructure development and supply chain digitisation. Along with NIP, NMP and PM Gati Shakti, the NLP reinforces India's commitment to building a globally competitive and sustainable logistics network.

Modal split of freight movement in India

- n. Investments in core transport infrastructure, such as roads, railways, ports and logistics parks, play a pivotal role in reducing logistics costs and enhancing the efficiency of freight movement across India. By developing integrated, multimodal transport corridors, these investments enable smoother interlinkages between different modes of transport, facilitating seamless cargo transfer.
- o. Strengthened first- and last-mile connectivity through highways, rail sidings and port-access roads ensure faster movement of goods and minimises delays caused by modal fragmentation. Development of MMLPs and dedicated freight corridors (DFCs) further reduce turnaround times and promote aggregation of cargo volume, optimising both cost and time efficiency.

- p. As logistics costs decline, driven by better infrastructure and coordination, there is a gradual rebalancing of the billion tonne kilometre (BTKM) mix.
- q. Road transport remains the preferred choice for transporting low-volume, high-value commodities on account of its superior service quality, reliability, personalised touch and end-to-end connectivity. It compensates for the limitations of rail transport, which is geared towards bulk freight. Also, the rail sector's modal share has increased notably, to 25% in fiscal 2025 from 21% in fiscal 2020, driven by the development of the DFCs and the government's decision to allow private companies to own terminals. In contrast, the modal shares of coastal and pipeline transport have been steady at 5% and 7%, respectively, since fiscal 2020, and are expected to remain so until fiscal 2030.
- r. Share of freight movement by transportation mode:

P – projected, E – estimated

Note: BTKM is estimates

Source: Crisil intelligence

- s. Ongoing projects across sectors by value (construction contracts and PPP)

5.2 Introduction of Indian Infrastructure Industry

As India strives towards becoming a developed economy, the transport sector plays a crucial role. In the 2026-27 Budget, the total capital expenditure allocation is set at Rs 12.2 lakh crore.

During the Financial Year 2024–25, the National Highway Authority of India (NHAI) constructed 5,614 km of National Highways, exceeding its target of 5,150 km. Capital expenditure for highway development reached a record ₹2,50,000 crore, surpassing the target of ₹2,40,000 crore. This included both government budgetary support and NHAI's own funds. Compared to previous years, this marked a 21% increase from ₹2,07,000 crore in FY 2023–24 and a 45% rise from ₹1,73,000 crore in FY 2022–23.

Rs 1.5 lakh crore have been outlaid for 50-year interest free loans to states for capital expenditure and incentives for reforms.

The second asset monetization plan for 2025-30 is to be launched for generating capital of Rs 10 lakh crore for new projects.

5.3 Other Sectors in India

Logistics Sector

The logistics sector encompasses various modes of transportation, enabling infrastructure and associated services, which complement and enhance the competitiveness of the overall flow of goods. Logistics is crucial to India's economic progress as it enables the smooth movement, storage and flow of goods, services and information from origin to consumption. As a country with a growing manufacturing base, expanding services sector and rising consumer demand, India needs an efficient logistics sector to ensure competitiveness, price stability and market access.

An efficient logistics infrastructure drives productivity, boosts consumption and enables competitiveness in the global markets. It remains central for industrial progress, urbanisation and sustaining a diversified and resilient business ecosystem. This section presents an overview of the logistics landscape in India and the highlights how logistics contributes to economic growth. It also identifies policy initiatives, challenges and opportunities that are shaping the country's logistics ecosystem.

Airport Infrastructure

India has become the third-largest domestic aviation market in the world. The country's aviation sector has grown rapidly, driven by rising passenger demand, regional connectivity focus and infrastructure modernisation. Beyond core airport infrastructure, ancillary services offer significant opportunities. These services include ground handling, car parking, retail spaces and other airport-linked facilities, especially in PPP-operated airports.

Airport capex is projected to exceed Rs 1 trillion between fiscals 2026 and 2030, up from Rs 750-800 billion during fiscals 2021 to 2025, driven by strong passenger and investor demand. Ongoing expansion projects will sustain the capex surge till fiscal 2025, with a further rise expected from fiscals 2026 to-2030 as 25 airports are slated for privatization. Greenfield investments will also contribute to growth, led by projects such as Jewar, NMIA, Bhogapuram.

Metro Rail Infrastructure

India has the third-largest metro network globally, spanning over 1,000 km across 23 cities in 11 states and Union territories, providing safe and efficient transport daily to millions. Driven by rapid urbanization, rising population density and traffic congestion, metro rail has emerged as a sustainable alternative to road transport, cutting travel time and emissions. Strong policy backing through the Metro Rail Policy, 2017, multi-source funding (central/state, PPPs and international financial institutions or IFIs) and advances in automation and digital infrastructure have accelerated expansion.

Ropeway Infrastructure

Ropeways in India are being scaled up under the National Ropeways Development Programme, or the Parvatmala Pariyojana, announced in the Union Budget for fiscal 2023-2024. The programme is spearheaded by the MoRTH and supported by agencies such as the NHAI. It aims to expand ropeway connectivity across states with hilly and difficult terrain through the PPP framework. At present, over 25 ropeways are operational in India, spread across 13 states and largely concentrated in Uttarakhand, Gujarat and the Union territory of Jammu and Kashmir. This initiative represents a significant shift towards a coordinated national programme designed to enhance regional accessibility, support local economies and promote sustainable mobility, moving away from sporadic ropeway projects that were previously limited to individual tourist or pilgrimage destinations.

5.4 Road Network in India

India is the second-largest road network in the world. The length of National Highways was 91,287 km in 2013-14 there has been an increase of about 60% extending 146,204 km in FY25 serving as the country's primary arterial routes. As of March 31, 2025, India has more than 63 lakh km of road network, out of which National Highways is 1,46,195 km, State Highways is 1,79,535 km and 60,19,723 km other road. To further strengthen and expand this network, the Government has launched several major initiatives, including the Bharatmala Pariyojana (along with NHDP), the Special Accelerated Road Development Programme for the Northeastern Region (SARDP-NE), and Externally Aided Projects (EAP).

Over 64.5% of all goods in the country are transported through roads, while 90% of the total passenger traffic uses road network to commute.

Source: MoRTh, Government of India

NHs constitute around 2 per cent of the total road network in the country but carry about 40% of the road traffic. The density of India's highway network at 1.89 km of roads per square kilometer of land – is similar to that of the France (1.98) and much greater than China's (0.49) or USA's (0.68).

National Highway (NH) network increased by ~60% from 91,287 km in 2014 to 1,46,204 km in FY 2024-25.

<< This space is intentionally left blank >>

Following table provides the construction of Km per day for NH:

Year	Construction (per year)	Project Awarded (in km)	Construction (in km/day)
2015-16	6,061	6,397	16.6
2016-17	8,231	4,335	22.6
2017-18	9,829	7,400	26.9
2018-19	10,855	6,000	29.7
2019-20	10,237	8,948	28.1
2020-21	13,327	10,467	36.5
2021-22	10,457	12,731	28.6
2022-23	10,331	7,497	28.3
2023-24	12,349	8,581	33.8
2024-25	10,421	3,100	21.3
2025-26	10,660	1951	17.1

Source: MoRTH, Government of India, PIB Year End Review, April 2026

5.5 Government Agencies for Road Development

The Ministry of Road Transport & Highway ("MoRTH") is responsible for development of Road Transport and Highways in general and construction & maintenance of National Highways. The National Highways Authority of India ("NHAI") is an autonomous agency of the Government of India, set up in 1988 and is responsible for implementation of National Highways Development Project ("NHDP").

In 2025, the Indian government, through the Ministry of Road Transport and Highways (MoRTH), is focusing on constructing 10,000 km of national highways, including 5,800 km of high-speed corridors, and developing 700+ wayside amenities (WSAs) along national highways and expressways. A significant allocation of Rs 1,16,292 crore has been made towards roads and bridges in the 2025-26 financial year.

The NHDP in the context of NHs is nearing completion- in seven phases. Later, the other highway development programmes like Special Accelerated Road Development Programme for Development of Road Network in Northeastern States (SARDP- NE) and National Highways Interconnectivity Improvement Project (NHIIP) were also taken up by MoRTH. Further, Bharatmala Pariyojana is ongoing. For majority of the projects under NHDP and Bharatmala Pariyojana, NHAI is the implementation agency. Other NH related programmes/works are being implemented through agencies like National Highways Infrastructure Development Corporation Limited (NHIDCL), State Public Works Departments (PWDs), State Road Development Corporations and the Border Road Organization.

MoRTH has defined a Vision 2047 for the National Highways sector which serves as the guiding principle for the Master Plan of National Highways and allied infrastructure. Vision 2047 for the National Highways aims to provide equity, efficiency and strategic connectivity to meet 5 key objectives which are to access to high-speed corridor within 100-150 km to all citizens, India to rank amongst top 10 countries in G20 for high-speed corridor density, equitable access to National Highways in under-developed regions, improve passenger convenience with world class Passenger Amenities, reduction in logistics cost as a share of GDP

5.6 Trend of Road and Highways Construction

The current rate of road construction is almost three times that in 2007-08 as of June 2025. The length of India's National Highway network has surged by 60 per cent in the last 10 years from 91,287 km in 2014 to 146,204 km in March 2025, making it the second largest road network in the world, according to the year-end review of the Ministry of Road Transport and Highways.

In the last 11 years (2014-25), India has amplified 54,917 kms to the National highways network.

Under Asset Monetisation following TOT (Toll Operate and Transfer) model, NHAI monetises four TOT bundles realising Rs. 15,968 Crore during FY 2023-24 totalling Rs. 42,334 Crore by 2024

MoRTH plans network of 35 Multimodal Logistics Parks to be developed as part of Bharatmala Pariyojana.

Out of 108 (3700 km) port connectivity road projects, 8 (294 km) are completed, 28 (1808 km) are awarded and DPR under-progress for 72 (1595 km) projects

With the Government permitting 100% Foreign Direct Investment (FDI) in the road sector, several foreign companies have formed partnerships with Indian players to capitalise on the sector's growth. Cumulative FDI inflows in construction development stood at US\$ 33.91 billion between April 2000 - March 2024.

PRAGATI (Pro-Active Governance and Timely Implementation) Launched on March 25, 2015, PRAGATI is a transformative initiative aiming at strengthening governance and infrastructure development through the integration of cutting-edge technology with administrative processes. The most recent, 46th PRAGATI meeting took place on April 30, 2025. During this session, the Prime Minister reviewed eight critical infrastructure projects valued at over ₹90,000 crore. Since its launch, 363 projects have been reviewed under the PRAGATI initiative.

The GST on construction equipment has been reduced to 18% from 28%, which is expected to give a boost to infrastructure development in the country.

The NHDP is a program to upgrade, rehabilitate and widen major highways in India to a higher standard. The project was started in 1998 to be implemented in 7 phases.

The Indian government launched Gati Shakti-National Master Plan, which has consolidated a list of 81 high impact projects, out of which road infrastructure projects were the top priority. The major highway projects include the Delhi-Mumbai expressway (1,350 kilometres), Amritsar-Jamnagar expressway (1,257 kilometres) and Saharanpur-Dehradun expressway (210 kilometres). This comprehensive initiative is to improve multimodal infrastructure connectivity across India's economic zones. Rs. 100 lakh crores are being efficiently utilized through this integrated platform. Anchored on seven key sectors—railways, roads, ports, waterways, airports, mass transport, and logistics infrastructure—it promotes synchronized development across ministries and state governments.

The main aim of this program is a faster approval process by digitizing the process through a dedicated Gati shakti portal.

The development of market for roads and highways is projected to exhibit a CAGR of 36.16% during 2016-2025, on account of growing government initiatives to improve transportation infrastructure in the country.

<< This space is intentionally left blank >>

5.7 Economic and Financial Outlook

GDP Growth

India's real GDP growth in FY27 is expected to be between 6.8 and 7.2%. The industrial sector is estimated to grow by 6.3 per cent in FY26. Strong growth rates in construction activities and electricity, gas, water supply and other utility services are expected to support industrial expansion.

Source: IBEF – Indian Economy, National Statistics Office (MoSPI)

Government Spending

The Ministry of Road and Transport have been allocated Rs2.87 lakh crore under Budget 2025-26 which accounts to 5.7% of the total expenditure. This is an increase of 2.4% compared to the revised estimate for FY25.

Nearly 60% of the total allocation is set aside for the National Highways Authority of India (NHAI) at Rs1.7 lakh crore.

National Highways Authority of India (NHAI) spent a record-breaking Rs. 2,07,000 crore (US\$ 24.79 billion) on the construction of national highways in the fiscal year 2023-24. This was the highest capital expenditure ever recorded, representing a 20% increase from last year

<< This space is intentionally left blank >>

Financing & Capital Structure Government Spending

Public Financing - Funding from government sources includes budgetary allocations, which are financed from taxes, cesses, or dedicated road funds. Publicly funded projects are usually given to contractors under various contract models such as the Engineering Procurement Construction (EPC).

Private Financing - Under private financing, the private developer builds a road, and in return has the right to collect toll for a specified period of time. The developer is responsible for the maintenance of roads during this period.

5.8 Implementation of important projects and expressways:

Bharatmala Pariyojna

Bharatmala Pariyojana is a new umbrella program for the highways sector that focuses on optimizing efficiency of freight and passenger movement across the country by bridging critical infrastructure gaps through effective interventions like development of Economic Corridors, Inter Corridors and Feeder Routes, National Corridor Efficiency Improvement, Border and International connectivity roads, Coastal and Port connectivity roads and Green-field expressway.

The Bharatmala Pariyojana envisages development of about 26,000 km length of Economic Corridors, which along with Golden Quadrilateral (GQ) and North-South and East-West (NS-EW) Corridors are expected to carry majority of the Freight Traffic on roads.

In Bharatmala Pariyojana, 60% projects are on Hybrid Annuity Mode (HAM), 10% projects on BOT (Toll) Mode and 30% projects on EPC mode have been envisaged respectively.

Till March 2025, 20,378 km has been constructed as part of Bharatmala Pariyojana.

Components under Bharatmala Pariyojana Phase-I are as given below:

Component	Length (Km)	Cost (INR Mn)
Economic corridors development	9,000	12,00,000
Inter-corridor & feeder roads	6,000	8,00,000
National Corridors Efficiency	5,000	10,00,000
Border & International connectivity	2,000	2,50,000
Coastal & port connectivity roads	2,000	2,00,000
Expressways	800	4,00,000
Sub Total	24,800	38,50,000
Other works - under NHDP	10,000	15,00,000
Total	34,800	53,50,000

Source: Ministry of Road Transport and Highways, Government of India

Pradhan Mantri Gram Sadak Yojana (PMGSY)

Government has approved Pradhan Mantri Gram Sadak Yojana - IV (PMGSY-IV) on September 11, 2024 to provide all-weather connectivity to eligible unconnected habitations of designated population size. Under PMGSY-IV, 25,000 unconnected eligible habitations are targeted for providing connectivity by constructing 62,500 km all-weather roads. The scheme will be implemented from financial year 2024-25 to 2028-29 with a total outlay of Rs. 70,125 crore. A total of 8,37,022 km road length has been sanctioned under various ongoing interventions/verticals of PMGSY, out of which 7,80,401 km road length has already been completed and upgraded as of May 24, 2025. As of March 2025, a total expenditure of Rs. 4,056 crores have been incurred on the maintenance of rural roads constructed under the PMGSY scheme through the eMARG

The Network Planning Group (NPG)

It was established by the Department for Promotion of Industry and Internal Trade (DPIIT), where all central/state infrastructure ministries can coordinate and provide inputs on infrastructure projects presented in the meetings. 131 projects of the MoRT&H have been presented for consultation till April 15, 2025. In addition to these projects, multiple Ministries/ Departments like MoD, MoPSW, NICDC, M/o Steel, D/o Fertilizer etc., have also sent requests for taking up projects to alleviate Critical Infrastructure Gaps out of which 100 projects have been identified as Critical Infrastructure Gap Projects (of which 65 projects pertain to MoRT&H). Details of these 65 Critical Infrastructure Gap Projects are:

Status	No.	Length (Km)	Cost (INR Mn)
Completed	4	459.50	102,476.3
Under Implementation	5	156.81	51,482.7
To be approved in FY25-26	12	462.00	105,117.0
Non-NH Projects	44	850.00	232,240.0
No. of Projects taken up by State Government/Port Authorities/Other Agencies	16	202.00	66,020.0
Non-NH Projects (to be planned based on prioritization by MoPSW)	28	648.00	166,220.0

Char Dham Vikas Mahamarg Pariyojna:

This project envisages development of easy access to the four dhams in India – Gangotri, Yamunotri, Kedarnath and Badrinath. Development of this route of 889 km route is expected at an estimated cost of INR 12,000 Crores.

Eastern peripheral and western peripheral expressway

These two projects will connect NH-1 and NH-2 from western and eastern side of Delhi.

NH-544G Bengaluru–Vijayawada Economic Corridor

Mr. Nitin Gadkari has recently approved the development of 32 km long 6-lane Access Controlled Greenfield Highway on NH-544G Bengaluru–Vijayawada Economic Corridor in Hybrid Annuity Mode in Andhra Pradesh worth US\$ 157 million (Rs. 1,292.65 crores).

Setu Bharatam:

This project aims to replace crossings on NHs with Road Over Bridges and Road under Bridges. It is projected to construct 174 such structures.

5.9 Opportunities in road development & maintenance in India

India has joined the league of 15 of global alliance which will work towards the ethical use of smart city technologies. The Government aims to construct 65,000 kms of national highways at a cost of Rs. 53.5 lakh Mn (US\$ 741.51 billion). Road building in India is second least expensive in Asia.

5.10 Asset Monetization

TOT Model – Under this model, the right of collection of user fee (toll) in respect of selected operational highways constructed through public funding are assigned through a concession agreement as a result of bidding for a specified period of 15-30 years to the Concessionaire against upfront payment of a lump-sum amount quoted to the Government/NHAI. During the concession period, the responsibility for operations and maintenance of the road assets rests with the Concessionaire.

InVIT Model – NHAI has set up an InvIT under the SEBI InvIT Regulations, 2014 which is a pooled investment vehicle that issues units to investors, while having three entities for management of the Trust – Trustee, Investment Manager and Project Manager. The three entities have defined roles and responsibilities under the SEBI Regulations.

Securitization through SPVs Model – A SPV/DME (100% owned by NHAI), has been created by bundling road assets under consideration and securitizing the future user fee from the road assets. NHAI will collect tolls, maintain the road assets and periodically transfer payments to the SPV sufficient for servicing debt obligations at the SPV level. About Rs.3,70,000 Mn has already been raised through this method (DME- Delhi Mumbai Expressway) by NHAI so far.

Utility Corridors

Working towards development of around 10,000 km of Optic Fibre Cables (OFC) infrastructure across the country by FY2024-25, National Highways Logistics Management Limited (NHLML), a fully owned Company of NHAI, is implementing the network of Digital Highways by developing integrated utility corridors along the National Highways to develop OFC infrastructure. Around 1,367 km on Delhi – Mumbai Expressway and 512 km on Hyderabad - Bangalore Corridor have been identified for the Digital Highway Development.

5.11 Public Private Partnership (“PPP”) Models of road development and maintenance in India

India has a well-developed framework for Public-Private-Partnerships (PPP) in the highway sector. PPP has been a major contributor to the success story of the roads and highway sector in India. With the emergence of private players over the last decade, the road construction market has become fragmented and competitive. Players bidding for projects also vary in terms of size. PPP modes have been used in India for both development and operation & maintenance of road assets.

<< This space is intentionally left blank >>

5.12 Road Asset Development Models

BOT Toll

In a BOT toll project, the concessionaire is responsible for designing, building, financing, operating, maintaining, tolling and transferring the project to the relevant authority at the end of the concession period. The concession period is project specific but is usually for 20-25 years. In BOT Toll model, the concessionaire earns revenue primarily in the form of toll revenue which in turn depends on the traffic on the road stretch. Toll rates are regulated by the government through rules.

Source: IBEF Report

BOT Annuity

Similar to a BOT Toll projects, is BOT Annuity project, the concessionaire is responsible for designing, building, financing, operating, maintaining, tolling and transferring the project to the relevant authority at the end of the concession period. However, in these projects, the right to collect toll on road stretch lies with the government. The concessionaire earns revenue in the form of pre-determined semi-annual annuity payments.

HAM

Similar to a BOT projects, in HAM project, the concessionaire is responsible for designing, building, financing, operating, maintaining and transferring the project to the relevant authority at the end of the concession period. However, in these projects, the right to collect toll on road stretch lies with the government. The construction period for HAM projects is project specific and a fixed operation period of 15 years.

5.13 Growth Drivers

Robust Demand:

In the period of April to March 2025, domestic sales of passenger vehicles reached 43,01,848 units. Sales of commercial vehicles totalled 9,56,671 units during the same period. Three-wheeler sales were recorded at 7,41,420 units, while two-wheeler sales amounted to 1,96,07,332 units. These figures reflect the strong demand across various segments in the automotive industry during this period.

Increasing Investment:

Under the Union Budget 2025-26, the government has allocated Rs. 3,09,875.3 crore (US\$ 37.06 billion) to the Ministry of Road Transport and Highways, reflecting a modest increase of 8% over the Budget Estimates of the previous financial year.

Policy Support:

Infrastructure development is a critical driver of economic growth and development, and a reliable source of funding is essential to support the timely and efficient deployment of large-scale infrastructure projects. As such, NaBFID aims to be a key partner in helping India achieve its ambitious infrastructure development objectives – responsibly and sustainably.

To achieve its US\$ % trillion , it is imperative for pivotal role in helping India meet its arduous infrastructural resolve, by providing the necessary financing, expertise, technology, and analytics to support the development of this sector.

5.14 Challenges & Issues in the Sector

Land Acquisition Delays & Cost:

- Land acquisition cost has increased more than 30% since 2017, primarily due to enhanced compensation payment requirements as per 'The Right to Fair Compensation and Transparency in Land Acquisition, Rehabilitation and Resettlement Act, 2013'.
- Delay in pre-construction activities (such as land acquisition, relocation) affects project timelines. Land acquisition for road projects involves various stages. Each stage involves a number of stakeholders and regulatory bodies. Thus processes consume considerable time.

Regulatory Approvals & Disputes:

- Road development process requires a number of approvals such as environmental clearance, forest clearance, railways clearance, etc. Each of these activities takes considerable time and non-adherence to timelines result in cost overruns due to delays.
- Claims arising out of disputes between the concessionaire/ contractor and the government authorities are also a significant cost which can lead to large liabilities.

Operational Issues:

- Uncertainty of toll revenue collection and variation of collected toll revenue compared to projected levels as Actual traffic is much less than the anticipated traffic.
- Often unforeseen weather conditions require unplanned O&M, over and above the routine and periodic maintenance activities. This results in enhanced O&M expenses. The increase in O&M costs is also affecting the project returns.

Financing road construction projects:

- In the case of toll motorways, the challenge of financing construction projects is different but still remains. Traditionally, the construction of toll motorways is a profitable investment but in the times of recession, funding may be rare or nonexistent.
- Powerful national economies may be able to efficiently tackle the problem but weaker economies can hardly find the financing sources for road construction projects.

Climate Change:

- The road sector is vulnerable to climate change impacts. Climate change and extreme weather events pose a significant challenge to the safety, reliability, effectiveness and sustainability of road transportation systems. Tsunami waves, wildfires, floods and hurricanes constitute a big risk for passengers, vehicles and goods, as well as for the integrity of the transport infrastructure.
- Since reliable road transport is an essential driver of economic growth and social wellbeing worldwide, national road authorities and motorway operators must adapt the infrastructure to climate change and increase the resilience of road transport to extreme weather

Economy and cost effectiveness:

- Among all modes of transport, road transport occupies a significant place in short- and medium distance travel operations. However, the unit cost of transportation (per ton × km), compared with other modes of transport, remains high and is getting higher and cost ineffective as the travel distance increases.
- Road transport cost comprises direct costs (fuel, capital depreciation, maintenance, motorway tolls, ferry fares and wages) and external costs (noise, congestion, infrastructure damages, health and environmental issues).

5.15 Recent Initiatives by Government

Bhoomi Rashi – Land Acquisition Portal

The ministry has collaborated with the National Informatics Centre, to create Bhoomirashi, a web portal which digitises the cumbersome land acquisition process and also helps in processing notifications relating to land acquisition online. Processing time, which was earlier two to three months has come down to one to two weeks now.

Central Road and Infrastructure Fund (CRIF)

A majority of the Ministry's expenditure is managed through transfers from CRIF. A portion of the cess collected on motor spirit and high-speed diesel is earmarked for the development of NHs and SHs, and the amount is transferred to the non-lapsable CRIF. This amount is eventually released to the NHAI, and to the state/UT governments for the development of road infrastructure, and other projects (such as ports, railway track, airports) in the country. For 2024-25, the transfer from CRIF towards the Ministry is estimated at Rs 3,46,400 Mn.

National Investment Fund (NIF)

The NIF was created in 2005 and is credited with proceeds from disinvestments of public sector enterprises. The Ministry finances the Special Accelerated Road Development Programme in Northeast (SARDP-NE) with funds from the NIF.

Investment in roads and other infrastructure

CareEdge Ratings estimates that India will require additional infrastructure investment of US\$ 18-20 trillion in the next 25 years to become a US\$ 25-30 trillion economy by 2047.

There is an increase of 6.4 times in Ministry investment on road infrastructure between 2013-14 and 2024-25.

The Cabinet Committee on Economic Affairs has given approval for the development of eight key National High-Speed Corridor projects, spanning a total length of 936 km, with an investment of Rs. 50,655 crore (US\$ 6.09 billion) nationwide.

FASTag – Electronic Toll Collection

National Electronic Toll Collection (NETC) system, has been implemented on pan India basis in order to remove bottlenecks and ensure seamless movement of traffic and collection of user fee as per the notified rates, using passive Radio Frequency Identification (RFID) technology. As on November 2025, collectively banks have issued more than 11.73 crores FASTags; the average daily collection through ETC is around Rs. 184 crores with penetration of about 98.5% in total fee collection.

Revival of languishing projects

Projects which were languishing for a number of years have been attempted to be revived, with the help of a number of policy measures taken by the government. Some of the policy measures like Premium deferment in stressed projects, extension of concession period for languishing projects to the extent of delay not attributable to concessionaires, One Time Capital Support for physical completion of languishing projects that have achieved at least 50 per cent physical progress, through one time fund infusion by NHAI, subject to adequate due diligence on a case-to-case basis.

Rural development

The Pradhan Mantri Gram Sadak Yojana (PMGSY) has constructed 69,666.09 km of road length across India from 2022 to February 2025 under various ongoing initiatives. The government has also approved PMGSY-IV to connect 25,000 unconnected habitations, with a proposed 62,500 km of road length to be constructed at a cost of ₹70,125 crore from 2024-25 to 2028-29

Improve safety standards

The Government of India has announced rules to improve road safety, such as fixed driving hours for commercial truck drivers and a mandate to install sleep detection sensors in commercial vehicles. A memorandum of understanding (MoU) has been signed with the National Highways Authority of India (NHAI) by Guru Nanak Dev University (GNDU) to conduct advanced research on various aspects, including highway architecture, protection and revitalisation. The GNDU will undertake studies on ~137 km length of the National Highways passing through Pathankot, Gurdaspur and Amritsar districts.

Portfolios in roads & highways sector

The National Investment and Infrastructure Fund (NIIF) is constantly making progress towards integrating its road and highway portfolio. The NIIF has acquired Essel Devanahalli Tollway and Essel Dichpally Tollway through the NIIF master fund. These road infra-projects will be supported by Athaang Infrastructure, NIIF's proprietary road network, assisted by a team of established professionals with diverse domain expertise in the transport field.

International Tie-ups

The Ministry of Road Transport and Highways signed a MoU with the Federal Ministry of Climate Action, Environment, Energy, Mobility, Innovation and Technology of the Republic of Austria on technology cooperation in the road infrastructure sector.

Encourage private funding to reduce finance constraints

The OPEC Fund for International Development (the OPEC Fund) is providing a US\$100 million loan to the government of India for the financing of the Chennai Peripheral Ring Road Project – Sections II & III in partnership with the Asian Infrastructure Investment Bank (AIIB) and the State of Tamil Nadu. The loan will support the construction of more than 50 km of new roads, helping to ease congestion and commercial traffic to ports, while reducing pollution and travel times. Chennai port handles the second largest volume of containers in India.

To date, the OPEC Fund has provided over US\$350 million of public sector financing in India for around 20 projects. The loans have supported energy, health, agriculture, education, transport and water & sanitation projects and promoted sustainable economic growth.

The World Bank, JICA, and ADB have provided loan assistance for various road projects in India. For example, the World Bank has signed an agreement for the construction of Green National Highway Corridors Project (GNHCP) with a loan assistance of \$500 million.

<< This space is intentionally left blank >>

5.16 Outlook

Development and maintenance of road infrastructure is a key Government priority, the sector has received strong budgetary support over the years. During the past years, the standardized processes for Public Private Partnership & public funded projects and a clear policy framework relating to bidding and tolling have also been developed.

The major initiatives undertaken by the Government such as National Infrastructure Pipeline (NIP) and the PM Gati Shakti National Master Plan will raise productivity and accelerate economic growth and sustainable development.

The highway sector in India has been at the forefront of performance and innovation. The government is committed towards expanding the National Highway network to 2 lakh kilometers emphasizing the construction of the World Class Road infrastructure in time bound & target-oriented way. India has a well-developed framework for Public-Private-Partnerships (PPP) in the highway sector.

The Asian Development Bank ranked India at the first spot in PPP operational maturity and designated India as a developed market for PPPs. The Hybrid Annuity Model (HAM) has balanced risk appropriated between private and public partners and boosted PPP activity in the sector.

The Government of India has allocated ₹11.21 lakh crore under the National Infrastructure Pipeline 2025-26. This allocation is part of the Union Budget 2025-26 and represents a 3.1% increase in GDP. There has been a 570% increase in road transport and highway budget from 2014 to 2023–24.

<< This space is intentionally left blank >>

6. Valuation Methodology and Approach

The present valuation exercise is being undertaken in order to derive the fair EV and Adjusted EV of the SPVs.

The valuation exercise involves selecting a method suitable for the purpose of valuation, by exercise of judgment by the valuers, based on the facts and circumstances as applicable to the business of the company to be valued.

There are three generally accepted approaches to valuation:

- (a) "Cost" approach
- (b) "Market" approach
- (c) "Income" approach

6.1. Cost Approach

The cost approach values the underlying assets of the business to determine the business value. This valuation method carries more weight with respect to holding companies than operating companies. Also, cost value approaches are more relevant to the extent that a significant portion of the assets are of a nature that could be liquidated readily if desired.

Net Asset Value ("NAV") Method

The NAV Method under Cost Approach considers the assets and liabilities, including intangible assets and contingent liabilities. The Net Assets, after reducing the dues to the preference shareholders, if any, represent the value of a company.

The NAV Method is appropriate in a case where the main strength of the business is its asset backing rather than its capacity or potential to earn profits. This valuation approach is also used in cases where the firm is to be liquidated, i.e. it does not meet the "Going Concern" criteria.

As an indicator of the total value of the entity, the NAV method has the disadvantage of only considering the status of the business at one point in time.

Additionally, NAV does not properly take into account the earning capacity of the business or any intangible assets that have no historical cost. In many aspects, NAV represents the minimum benchmark value of an operating business.

6.2. Market Approach

Under the Market approach, the valuation is based on the market value of the company in case of listed companies, and comparable companies' trading or transaction multiples for unlisted companies. The Market approach generally reflects the investors' perception about the true worth of the company.

Comparable Companies Multiples ("CCM") Method

The value is determined on the basis of multiples derived from valuations of comparable companies, as manifest in the stock market valuations of listed companies. This valuation is based on the principle that market valuations, taking place between informed buyers and informed sellers, incorporate all factors relevant to valuation. Relevant multiples need to be chosen carefully and adjusted for differences between the circumstances.

Comparable Transactions Multiples ("CTM") Method

Under the CTM Method, the value is determined on the basis of multiples derived from valuations of similar transactions in the industry. Relevant multiples need to be chosen carefully and adjusted for differences between the circumstances. Few of such multiples are EV/Earnings before Interest, Taxes, Depreciation & Amortization ("**EBITDA**") multiple and EV/Revenue multiple.

Market Price Method

Under this method, the market price of an equity share of the company as quoted on a recognized stock exchange is normally considered as the fair value of the equity shares of that company where such quotations are arising from the shares being regularly and freely traded. The market value generally reflects the investors' perception of the true worth of the company.

6.3. Income Approach

The income approach is widely used for valuation on a "Going Concern" basis. It focuses on the income generated by the company in the past as well as its future earning capability. The Discounted Cash Flow Method under the income approach seeks to arrive at a valuation based on the strength of future cash flows.

DCF Method

Under DCF Method value of a company can be assessed using the Free Cash Flow to Firm Method ("FCFF") or Free Cash Flow to Equity Method ("FCFE"). Under the DCF method, the business is valued by discounting its free cash flows for the explicit forecast period and the perpetuity value thereafter. The free cash flows represent the cash available for distribution to both the owners and creditors of the business. The free cash flows in the explicit period and those in perpetuity are discounted by the WACC. The WACC, based on an optimal vis-à-vis actual capital structure, is an appropriate rate of discount to calculate the present value of future cash flows as it considers equity-debt risk by incorporating debt-equity ratio of the firm.

The perpetuity (terminal) value is calculated based on the business' potential for further growth beyond the explicit forecast period. The "Constant Growth Model" is applied, which implies an expected constant level of growth for perpetuity in the cash flows over the last year of the forecast period.

The discounting factor (rate of discounting the future cash flows) reflects not only the time value of money, but also the risk associated with the business' future operations. The EV (aggregate of the present value of explicit period and terminal period cash flows) so derived, is further reduced by the value of debt, if any, (net of cash and cash equivalents) to arrive at value to the owners of the business.

6.4. Conclusion on Valuation Approach

It is pertinent to note that the valuation of any company or its assets is inherently imprecise and is subject to certain uncertainties and contingencies, all of which are difficult to predict and are beyond my control. In performing my analysis, I have made numerous assumptions with respect to industry performance and general business and economic conditions, many of which are beyond the control of SPVs. In addition, this valuation will fluctuate with changes in prevailing market conditions, and prospects, financial and otherwise, of the SPVs, and other factors which generally influence the valuation of companies and their assets.

<< This space is intentionally left blank >>

6.4.1 Cost Approach

In the present case, the SPVs operate and maintain the project facilities in accordance with the terms and conditions under the relevant concession agreement. During the concession period, the SPVs operate and maintain the road asset and earns revenue through Charges and collection of user fee in the form of Toll revenue and in the case of annuity-based projects through annuity payments received over the concession period. The charges, fees or tolls that may be collected are notified by relevant government authority, which are usually revised annually as specified in the relevant concessions and toll notifications. In such scenario, the true worth of the business is reflected in its future earning capacity rather than the cost of the project. Accordingly, I have not considered the cost approach for the current valuation exercise.

6.4.2 Market Approach

Comparable Company Method ("CCM")

The present valuation exercise is to undertake fair EV of the SPVs engaged in the road infrastructure projects for a predetermined tenure. Further, collection of user fee for Toll SPVs & Annuity payments for Annuity based projects, and their expenses are very specific to the SPVs depending on the nature of their geographical location, stage of project, terms of profitability. In the absence of any exactly comparable companies listed with characteristics and parameters similar to that of the SPVs, I have not considered CCM method in the present case.

Comparable Transactions Method ("CTM")

In the absence of adequate details about Comparable Transactions, I was unable to apply the CTM method as a measure of valuation.

Market Price Method

Currently, the equity shares of the SPVs are not listed on any recognized stock exchange of India. Hence, I was unable to apply market price method.

<< This space is intentionally left blank >>

6.4.3 Income Approach

Each of the SPVs operates under a BOT or DBFOT based concession agreement with the relevant regulatory authorities. Government authorities in India typically award highway infrastructure development projects under BOT concessions, which are characterized by three distinct phases:

- a. Build: upon successfully securing a project concession through a competitive bid, a concessionaire secures financing for, and completes construction, of a road;
- b. Operate: during the agreed concession period, the concessionaire operates, manages and maintains the road at its own expense and earns revenues by collecting tolls from vehicles using the road or annuity payments from the Concessioneing Authority; and
- c. Transfer: at the end of the agreed concession period, the ownership of the road (rights over the road under the concession), the obligation to maintain the road and the right to collect tolls from the vehicles using the road revert to the government entity that granted the concession.
- d. A DBFOT project involves, in addition to the activities required under a BOT project, the provision of engineering and design for such projects.

Currently, each of the SPVs are completed and are revenue generating.

The revenue of the Toll SPVs is based on tenure, tariff rates, traffic volumes, operations, macro-economic factors like GDP growth, WPI, and other factors that are unique to each of the Toll SPVs. The Toll SPVs derive almost all their revenue from their toll-road operations (toll collections) over the operation period. Traffic plying through the toll roads is primarily dependent on sustained economic development in the regions that they operate in and government policies relating to infrastructure development. The Toll SPVs are substantially dependent on the accuracy of their respective traffic volume forecasts. The rights in relation to the underlying assets of all the SPVs shall be transferred after the expiry of the Concession Period.

The revenue of Annuity SPVs is mainly derived from the annuity payments (annuity fees). The annuity fees are typically pre-determined with the relevant government authority (NHAI and MoRTH in this case) and cannot be modified to reflect prevailing circumstances. Interest on balance annuity payments are linked to bank rate, which is changed by RBI based on prevailing market conditions. The rights in relation to the underlying assets of the SPVs shall be transferred after the expiry of the Concession Period. Accordingly, since the SPVs are generating income based on pre-determined agreements / mechanism and since the Investment Manager has provided me with the financial projections of the SPVs for the balance tenor of the concession agreements, DCF Method under the income approach has been considered as the appropriate method for the present valuation exercise.

In the present exercise, my objective is to determine the Fair Enterprise Value of the SPVs as per the DCF Method. EV is described as the total value of the equity in a business plus the value of its debt and debt related liabilities, minus any cash or cash equivalents to meet those liabilities. Accordingly, in the present case, I have considered it appropriate to consider cash flows at FCFF (Free Cash Flow to Firm) level i.e., cash flows that are available to all the providers of capital (equity shareholders, preference shareholders and lenders). Therefore, cash flows required to service lenders and preference shareholders such as interest, dividend, repayment of principal amount and even additional fund raising are not considered in the calculation of FCFF.

While carrying out this engagement, I have relied extensively on the information made available to me by the Investment Manager. I have considered projected financial statement of the SPVs as provided by the Investment Manager. I have not tested individual assumptions or attempted to substantiate the veracity or integrity of such assumptions in relation to the forward-looking financial information, however, I have made sufficient enquiries to satisfy myself that such information has been prepared on a reasonable basis. Notwithstanding anything above, I cannot provide any assurance that the forward-looking financial information will be representative of the results which will be achieved during the cash flow forecast period.

Following are the major steps I have considered in order to arrive at the EV of the SPVs as per the DCF Method:

- Determination of Free Cash Flows to Firm which included:
 - a) Obtaining the financial projections to determine the cash flows expected to be generated by the SPVs from the Investment Manager;
 - b) Analyzed the projections and its underlying assumptions to assess the reasonableness of the cash flows;
- Determination of the discount rate; and
- Applying the discount rate to arrive at the present value of the cash flows.

7. Valuation of the SPVs

7.1. Key Assumptions:

The key assumptions of the projections provided to me by the Investment Manager are:

Revenue cash flows for Annuity Model SPVs (Annuity SPVs)

Under this model, concessionaire is responsible for designing, building, financing, operating, maintaining and transferring the project to the authority at the end of the concession period. Further, upon completion of the road project, the right and responsibility of tolling is with the government. Accordingly, only one mode of revenue is earned by these SPVs that is explained below:

Annuity Payments: The concessionaire earns revenue primarily in the form of pre-determined biannual annuity payments which are made by NHAI to the concessionaire based on the respective concession agreements.

Following table represents the balance number of biannual annuity installments expected to be received by the respective SPVs after 30th June 2026:

Sr. No.	SPV	Annuities received till valuation date	Balance Annuities to be Received
1	Dhola	17	8
2	Dibang	16	9
3	JSEL	20	10

Revenue cash flows for the Toll SPVs:

Under the Toll Model, SPVs are responsible for designing, building, financing, operating, maintaining and transferring the project to the authority at the end of the concession period. The concessionaire earns revenue primarily in the form of toll revenue under the Toll Models.

a. Toll Revenue: As per the concession agreements for the respective Toll SPVs, the concessionaire is allowed to levy, demand, collect and appropriate the fees (called as toll fees) from vehicles and persons liable to payment of fees for use of the relevant road stretch or any part thereof and refuse entry of any vehicle to the road asset if the due fee is not paid. Toll revenues depend on toll receipts, which in turn depend on traffic volumes and toll fees on the toll roads.

b. Concession Period

The Concession Period refers to the period where the Concessionaire has the responsibility to construct the road asset and post-construction is granted with the exclusive rights, license and authority to demand, collect and appropriate fee, operate, manage and maintain the project highway subject to the terms and conditions mention in their respective concession agreement. The cash flow projections are prepared by the Investment Manager for the balance concession period remaining from the Valuation Date as summarized below:

SPV	Concession Period End Date		Extension Period (in Days)	
	Original	Revised	For Traffic Variance	For Other Reasons*
AMTPL (Base)	11-Oct-31	4-Jun-33	365	237
AMTPL (Extension)	19-May-37	19-May-37		1445
DTPL	31-Mar-39	6-Apr-44	1825	8
PECPL	22-Jan-26	31-Jan-27	0	375
RVTPL	11-Sep-29	20-Feb-30	0	162
SBGTPL	10-Sep-34	12-Nov-34	0	63
SRTPL	14-Jul-36	6-Dec-40	1606	0
TEL	14-Sep-32	14-Sep-36	1461	0

I understand, as per the extant provisions of the Concession Agreements for the respective Toll SPVs in relation to the traffic variation, the concession period could be modified to take into the account shortfall or excess in actual average traffic vis-à-vis the target traffic ranging beyond 1% and such concession extension or truncation shall be subject to a cap of 20% extension for shortfall and 10% for truncation for excess.

Accordingly, the Investment Manager has considered an extension period based on its calculation which is subject to the approval from the respective Authorities in case of AMTPL, DTPL, SRTPL and TEL. I have relied on the information provided by the Investment Manager.

***Extension for Other Reasons:** Respective authorities vide their various orders have extended the concession period of the BOT Toll Projects for reasons including natural calamities, lockdowns on account of COVID-19, Farmer's/Trucker's Strike, Demonetisation and Materially Adverse Effects as per supplementary agreements, etc.

In case of AMTPL, the Concessionaire has been granted an additional 1,445 days to the concession period. Further, the Authority has issued new concession agreement for the extension of the project highway by 28.75 kilometres as part of the six-lane Sanand section. These approvals have been incorporated into the revised project scope and timeline.

I have considered the projection period for the current valuation exercise based on the balance concession period as represented by the Investment Manager, wherein expected extensions are considered for the Toll SPVs, but final approval from the authorities has not been received.

c. Traffic Volumes

Traffic volumes are directly or indirectly affected by a number of factors, many of which are outside of the control of the Toll SPVs, including: toll fees; fuel prices in India; the frequency of traveler use; the quality, convenience and travel efficiency of alternative routes outside the Toll SPV's network of toll roads; the convenience and extent of a toll road's connections with other parts of the local, state and national highway networks; the availability and cost of alternative means of transportation, including rail networks and air transport; the level of commercial, industrial and residential development in areas served by the Toll SPVs' projects; adverse weather conditions; and seasonal holidays.

d. Toll Rates

During the concession period, the Toll SPVs operate and maintain the road asset and earn revenues through charges, fees or tolls generated from the asset. The amount of charges, fees or tolls that they may collect are notified by the relevant government authorities, which are usually revised annually as specified in the relevant concessions and toll notifications.

The toll rates for the projected period have been derived in the manner stipulated in the individual concession agreements of the Toll SPVs.

In the present case, the Investment Manager has appointed **Crisil Intelligence Limited** an independent third-party research agency to forecast the traffic volumes and toll revenues for the SPV. As confirmed by the Investment Manager, the traffic volumes and toll revenues for the SPVs have been estimated by the traffic consultant after considering overall structure and condition of the projects including analysis of demand and supply and strategic geographical locations of the individual road projects. The Traffic Study Report dated September 2025 was one of the key inputs considered for projecting the toll revenues. In addition, the addendum dated March 2026 to the original Traffic Study Report, as provided by the Investment Manager, has also been referred to and considered as part of the assessment. The Traffic consultants have assumed a Wholesale Price Index (WPI) growth rate of approximately 3.0% to 4.3% per annum, which is an important factor for Tariff growth rate. Furthermore, the traffic growth for the SPVs, as considered based on the Traffic Study reports falls within the range of approximately 3.3% to 6.3%.

<< This space is intentionally left blank >>

Operating and Maintenance Expenses:

Since all the SPVs are operational on the Valuation Date, the following are the major costs incurred by the SPVs:

Operation and Maintenance Costs (Routine) ("O&M Costs")

These are routine costs incurred every year. These costs are related to the normal wear and tear of the road and hence involve repairing the patches damaged mainly due to heavy traffic movement. O&M Costs also include project manager fees, other service charges, staff salaries, consumables, security expenses, electricity, etc. In case of AMTPL, RVTPL and SRTPL, the O&M Costs also includes the Fastag related fees and charges. The primary purpose of these expenses is to maintain the road as per the specifications mentioned in the respective concession agreement. SPVs are generally responsible for carrying out operation and maintenance activities at its road during its concession period. Within the scope of such operation and maintenance obligations, the SPVs may be required to undertake routine maintenance of project roads, maintain and comply with safety standards to ensure smooth and safe traffic movement, deploy adequate human resources for incident management, maintain proper medical and sanitary arrangements for personnel deployed at the site, prevent any unauthorized entry to and exit from the project as may be required. The Investment Manager has escalated these costs by approximately 5% p.a. for all SPVs except Dhola and Dibang where it is 5.75% p.a.

The following table shows the broad breakup of Operations and Maintenance Cost for FY28:

Particulars	INR Mn			
	O&M Expense	PM Expense	CSR Expense	Total Payout
AMTPL (Base)	420	104	3	528
AMTPL (Extension)	-	-	-	-
DTPL	344	63	-	406
PECPL*	-	-	-	-
RVTPL	317	65	-	382
SBGTPL	290	74	-	363
SRTPL	469	71	-	540
TEL	175	40	-	216
Dhola	69	22	-	92
Dibang	70	16	-	86
JSEL	126	29	-	155

*Concession period ends on 31st January 2027, hence there are no expenses projected for FY28.

The Investment Manager has provided the estimated Operation & Maintenance Costs for the projected period and I have corroborated the said expenses based on the Technical Due Diligence ("TDD") Reports prepared by Ramboll India Private Limited for AMTPL, PECPL, RVTPL, SBGTPL and TEL; and by Samarth InfraEngg Technocrats Private Limited for Dhola, Dibang, JSEL, SRTPL and DTPL as provided to me by the Investment Manager. Given the technical nature of this study, I have relied on the expert's report for these costs. Further, no payment schedule for O&M Costs was provided to me and hence to that extent I have relied on the management's estimate.

Major Maintenance and Repairs Costs ("MMR Costs")**Estimating the MMR Costs**

Major maintenance expenses will be incurred on periodic basis. These are the costs incurred to bring the road assets back to its earlier condition or keep the road assets in its normal condition as per the concession agreement terms. These expenses are primarily related to the construction or re-laying of the top layer of the road. Accordingly, such costs include considerable amounts of materials and labour. The Investment Manager has a view that the escalation per annum for MMR in SRTPL and TEL is 2%, RVTPL is 1.5%, JSEL is 5%, Dhola & Dibang is 4% while AMTPL, DTPL, PECPL and SBGTPL is 2.5% for the forecasted period.

The Investment Manager has provided the estimated Major Maintenance Costs for the projected period and I have corroborated the said expenses based on the Technical Due Diligence ("TDD") Reports prepared by Ramboll India Private Limited for AMTPL, PECPL, RVTPL, SBGTPL and TEL; and by Samarth InfraEngg Technocrats Private Limited for Dhola, Dibang, DTPL, JSEL and SRTPL, as provided to me by the Investment Manager. Given the technical nature of this study, I have relied on the expert's report for these costs.

(Refer Appendix 6 for a detailed summary).

Provisions for MMR Costs and Cash Flow Adjustments

As per the financial requirements, provision is required for appropriate major maintenance expense over a period until the actual expenditure is incurred. These are non-cash expenses. Hence, for my DCF analysis, such provisions are added back in their respective years and the actual expenditure expected to be incurred during the particular interval is deducted in those respective years in order to arrive at net cash flows.

The Investment Manager has provided me the estimated Major Maintenance Expenses.

Depreciation and Amortization: In case of all SPVs except JSEL, the toll collection rights or the financial rights (intangible assets) of the SPVs are being amortized over the period of concession using the revenue-based amortization method prescribed under Schedule II to the Companies Act, 2013. In case of JSEL, the Written Down Value has been depreciated as per the Income Tax Act.

Revenue Share:

The revenues collected from the toll would be shared with GSRDC (in case of AMTPL and RVTPL) in the form of additional concession fee. The percentage of revenue that the SPV has to share with their respective appointing authority is defined in the Concession Agreement. This is applicable in case of AMTPL and RVTPL only.

SPV's	Date	Total Revenue share payable as per the Balance Sheet	Current Month Outstanding ¹	INR Mn	
				PV of Future Liability ²	
AMTPL	31 st March 2026	3,711	2		3,709
	30 th June 2026	3,819	79		3,739
RVTPL	31 st March 2026	2,078	-		2,078
	30 th June 2026	2,098	83		2,015

Note 1 - This amount pertains to current month outstanding of the Revenue share. I have considered the same as a working capital in my valuation exercise as represented by the Investment manager.

Note 2 - Yearly revenue share has been considered as an outflow of the respective SPV to arrive at FCFF for calculation of Enterprise Value. (Refer Appendix 1)

Premium payment:

The revenues collected from the toll would be shared with NHAI (in case of SGBTPL and DTPL) in the form of additional concession fee. The fixed amount that the SPV has to share with their respective appointing authority is defined in the Concession Agreement. This is applicable in case of SGBTPL and DTPL only.;

SPV's	Date	Total Liability as per Balance Sheet	Current Month Outstanding ¹	PV of Future Liability ²	INR Mn	
					Deferred Premium Liability payable converted as Debt ³	
SGBTPL	31 st March 2026	19,107	-	7,567		11,540
	30 th June 2026	8,299	106	8,192		-
DTPL	31 st March 2026	16,276	-	7,530		8,746
	30 th June 2026	10,082	103	9,979		-

Note 1 - This amount pertains to current month outstanding of the Premium Payable. I have considered the same as a working capital in my valuation exercise as represented by the Investment manager.

Note 2 - The SPVs have recognized present value of future premium payable as liabilities in accordance with relevant IND AS and in compliance with the relevant clauses of the Concession Agreement. Accordingly, Yearly premium payment has been considered as an outflow of the respective SPV to arrive at FCFF for calculation of Enterprise Value. (Refer Appendix 1)

Note 3 - As represented by the Investment manager, as per the settlement agreement between NHAI and SGBTPL and between NHAI and DTPL, the deferred premium payments of SGBTPL and DTPL for the period 11th June 2014 to 31st March 2025 and 14th October 2017 to 31st March 2029, respectively has been converted into debt carrying interest at Bank Rate + 2%. Considering it as debt equivalent, I had not considered this outstanding in my previous valuation exercise of Fair EV as on 31st March 2026. As represented by the Investment manager, this debt has been repaid as on 30th June 2026.

<< This space is intentionally left blank >>

Capital Expenditure ("Capex"):

Consequent to execution of AMTPL (Extension) concession agreement on 30th October 2025, a capital expenditure of INR 9,150 Mn has been assumed for AMTPL (Extension). I have relied on the estimates provided by the Investment Manager for the capex estimated for the AMTPL (extension). The Investment Manager has informed that the capex of INR 9,150 Mn, originally scheduled to be incurred by March 2028, has now been deferred to June 2028 due to the pending receipt of the appointed date from the authority. No other capex other than routine and major maintenance expense (as mentioned above) has been envisaged for other SPVs.

Taxes and Tax Incentive:

As per the discussions with the Investment Manager, the new provisions of Income Tax Act 2025 has been considered for the projected period of the SPVs except for AMTPL, DTPL, SBTPL, SRTPL, TEL, Dhola, Dibang and JSEL wherein new provisions of Income tax act have been considered after lapse of benefits as per Section 138 of the act.

Working Capital:**For Toll SPVs,**

The Investment Manager has provided me with the projected Working Capital for the Toll SPV which mainly consists of a debtors with relation to delay in toll collection, advance income tax, revenue share payable, premium payable and the credit period allowed by the O&M contractor. I have relied on the same.

For Annuity SPVs,

The Investment Manager has provided projected financial information on biannual basis for all the SPVs. The biannual period is based on the annuity dates of the respective SPVs. The amount of O&M expenses payable to O&M contractor by the SPVs on the basis of their respective O&M Agreements is also due and payable on the basis of the annuity amount and date on which annuities are received. Hence, for all the SPVs where annuity payments are material component of revenue, there are no receivables and payables estimated to be outstanding at their respective annuity dates during the biannually prepared projected period. Other working capital items outstanding as at the Valuation Date mainly represent the advance income tax, GST input tax (and cash) credit, prepaid expenses, etc. that are separately adjusted in the calculation of the enterprise values of the SPVs. The Investment Manager has provided projected Working Capital information for all the SPVs. I have relied on the same.

GST Claim: The Investment Manager has informed us that due to the changes in extant provision of the Goods & Services Tax ("GST") laws, the SPVs are eligible to receive GST claim from NHAI which are as follows:

- i. **On Annuity:** As per the clarification notification of Ministry of Road Transport & Highways as on 27th August 2021 vis-à-vis Ministry of Finance circular dated 17th June 2021, SPVs are eligible to claim reimbursement of GST on annuity, considering change in law, after adjusting GST input credit lying with the SPVs.

<< This space is intentionally left blank >>

7.2. Calculation of Weighted Average Cost of Capital for the SPVs

7.2.1 Cost of Equity:

Cost of Equity (CoE) is a discounting factor to calculate the returns expected by the equity holders depending on the perceived level of risk associated with the business and the industry in which the business operates.

For this purpose, I have used the Capital Asset Pricing Model (CAPM), which is a commonly used model to determine the appropriate cost of equity for the SPVs.

$$K(e) = R_f + [ERP \times \text{Beta}] + \text{CSRP}$$

Wherein:

$K(e)$ = cost of equity

R_f = risk free rate

ERP = Equity Risk Premium

Beta = a measure of the sensitivity of assets to returns of the overall market

CSRP = Company Specific Risk Premium (In general, an additional company-specific risk premium will be added to the cost of equity calculated pursuant to CAPM).

For valuation exercise, I have arrived at adjusted cost of equity of the SPVs based on the above calculation (Refer Appendix 3 for detailed workings).

7.2.2 Risk Free Rate:

Conventionally, the Risk-Free Rate is the yield derived from the Zero-Coupon Yield Curve ("ZCYC") as on the valuation date. As is evident from the chart, the ZCYC rates during January, February, and June 2026 remained relatively stable, reflecting a lower degree of geopolitical risk during these periods. In contrast, the months of March, April, and May 2026 exhibited comparatively higher volatility, coinciding with heightened geopolitical uncertainty during that period.

Hence, as of 31 March 2026, this volatility was observed, and in the report as on 31 March 2026, since the difference between the daily average yield for the quarter ended 31 March 2026 and the valuation-date rate was considered significant, the quarterly average rate was adopted.

The chart below sets out the daily movement of the 10-year ZCYC rate over the period January 2026 to June 2026:

For the current valuation as of 30 June 2026, the primary basis for determining the risk-free rate remains the valuation-date ZCYC yield, consistent with prevailing valuation practice. As a reasonableness check, we compared the valuation-date yield with the average ZCYC yields observed during periods considered representative of normal market conditions following the easing of the temporary geopolitical disruptions experienced during March to May 2026. The daily average of the ZCYC yields for January, February, and June 2026 works out to 6.92%, as against the valuation-date rate of 6.81%. In our view, this appropriately reflects the underlying risk-free rate as of the valuation date, having regard to the long-term nature of the projected cash flows. The valuation-date yield also reflects prevailing market conditions, including the effect of regulatory and tax changes impacting the Government securities market that had become effective prior to the valuation date; accordingly, no further adjustment has been considered necessary.

For comparison, the previous valuation as of 31 March 2026 considered a risk-free rate of 6.90%, being the daily average yield for the quarter ended 31 March 2026, whereas the corresponding valuation-date ZCYC yield was 7.16%.

7.2.3 Equity Risk Premium (“ERP”):

The Equity Risk Premium (ERP) is a measure of the additional return that investors require for investing in equity markets over risk-free assets, such as government bonds. It is typically estimated by comparing historical realised returns on equity with the risk-free rate, often represented by 10-year government securities. For my estimation of the ERP for India, I have analysed rolling historical returns of the Nifty 50 Index over 10-year, 15-year, and 20-year periods, covering data from 2005 to 2026. As of 30th June 2026, the calculated ERP based on these rolling return periods stands at 6.24%, 6.49% and 7.90% for the 10-year, 15-year and 20-year periods respectively. These figures indicate variability in ERP over different investment horizons, but collectively they suggest a range around 6% to 8%. Considering the historical trends, variability across periods, and long-term expectations, an equity risk premium of 7% for India continues to be an appropriate and reasonable assumption. For comparison, the previous valuation as of March 2026 used an Equity Risk Premium of 7.00%.

7.2.4 Beta:

Beta is a measure of the sensitivity of a company's stock price to the movements of the overall market index. In the present case, I find it appropriate to consider the beta of companies in similar business/ industry to that of the SPVs for an appropriate period.

Toll SPVs

For the valuation of the Toll SPVs, I find it appropriate to consider the beta of IRB Infrastructure Developers Limited, Dilip Buildcon Limited, Ashoka Buildcon Limited, PowerGrid Infrastructure Investment Trust, and IRB InvIT Fund for an appropriate period. The beta so arrived, is further adjusted based on the factors of mentioned SPVs like completion of projects, revenue certainty, past collection trend, lack of execution uncertainty, etc. to arrive at the adjusted unlevered beta appropriate to the SPVs.

I have further unlevered the beta of such companies based on market debt-equity of the respective company using the following formula:

$$\text{Unlevered Beta} = \text{Levered Beta} / [1 + (\text{Debt} / \text{Equity}) * (1-T)]$$

Further I have re-levered it based on debt-equity at 50:50 based on the industry Debt: Equity ratio of a road toll based BOT/DBFOT projects using the following formula:

$$\text{Re-levered Beta} = \text{Unlevered Beta} * [1 + (\text{Debt} / \text{Equity}) * (1-T)]$$

Accordingly, as per above, I have arrived at re-levered betas of the Toll SPVs.
(Refer Appendix 2 for detailed workings)

Annuity SPVs

For the valuation of the Annuity SPVs, I find it appropriate to consider the beta of PowerGrid Infrastructure Investment Trust and IRB InvIT Fund for an appropriate period. The beta so arrived, is further adjusted based on the factors of mentioned SPVs like completion of projects, revenue certainty, past collection trend, lack of execution uncertainty, etc. to arrive at the adjusted unlevered beta appropriate to the SPVs.

I have further unlevered the beta of such companies based on market debt-equity of the respective company using the following formula:

$$\text{Unlevered Beta} = \text{Levered Beta} / [1 + (\text{Debt} / \text{Equity}) * (1-T)]$$

Further I have re-levered it based on debt-equity at 70:30 based on the industry Debt: Equity ratio of annuity-based road BOT/DBFOT projects using the following formula:

$$\text{Re-levered Beta} = \text{Unlevered Beta} * [1 + (\text{Debt} / \text{Equity}) * (1-T)]$$

Accordingly, as per above, I have arrived at re-levered betas of Annuity SPVs.
(Refer Appendix 2 for detailed workings)

7.2.5 Company Specific Risk Premium (“CSRP”):

Discount Rate is the return expected by a market participant from a particular investment and shall reflect not only the time value of money but also the risk inherent in the asset being valued as well as the risk inherent in achieving the future cash flows.

As the risk inherent in achieving the future cash flows. In the present case, considering the counter-party risk for Discount Rate is the return expected by a market participant from a particular investment and shall reflect not only the time value of money but also the risk inherent in the asset being valued as well certain SPVs, considering the length of the explicit period for the SPVs, and basis my discussion with Investment Manager, I found it appropriate to consider the following CSRP for the SPVs as on 30th June 2026 and for comparison the CSRP as of 31st March 2026 is as follows:

Sr. No.	SPVs	June-26	March-26
1	AMTPL (Base)	0%	0%
	AMTPL (Extension)	2%	2%
2	DTPL	2%	2%
3	PECPL	0%	0%
4	RVTPL	0%	0%
5	SBGTPL	2%	0%
6	SRTPL	0%	0%
7	TEL	0%	0%
8	Dhola	0%	0%
9	Dibang	0%	0%
10	JSEL	0%	0%

In our assessment, a project-specific risk premium has been incorporated to reflect elevated risks associated with factors such as potential schedule extensions, regulatory approval uncertainties, and construction-related contingencies. Based on these considerations, an additional risk premium of 2% has been applied in AMTPL, DTPL & SBGTPL.

In the case of AMTPL, the extension as per the new concession agreement for the Sanand section has been approved, comprising both an extended concession period and an expanded project scope. As the extension is currently under construction as of the valuation date, the expanded scope entails construction and execution-related risks. Accordingly, a project-specific risk premium has been incorporated to reflect the elevated risk profile arising from these considerations. Based on this assessment, an additional risk premium of 2% has been considered appropriate. For comparison, the previous valuation as on March 2026 considered a CSRP of 2% AMTPL.

In the case of DTPL, the proposed extension is still under approval, and the project remains exposed to uncertainties relating to approval outcomes and the projections based on the proposed extensions. To account for these elevated risks, a project-specific risk premium of 2% has similarly been applied. For comparison, the previous valuation as on March 2026 considered a CSRP of 2% DTPL.

For SBGTPL, a project-specific risk premium (CSRP) of 2.0% has been incorporated to reflect the underachievement of revenue and the uncertainty in traffic volumes likely to have been arising from the prevailing geopolitical situation. While management expects traffic volumes to recover and align with the original projections once the geopolitical situation stabilizes, the additional CSRP has been considered to reflect the heightened risk as of the valuation date. For comparison, the March 2026 valuation had considered a CSRP of 0.0%.

For the SPVs where the extension approval is currently pending, appropriate economic, financial, commercial, legal or contractual remedies are available. Accordingly, no company-specific risk premium (CSRP) has been applied for other SPVs. For comparison, the previous valuation as on March 2026 considered a CSRP of 0% for other SPVs.

7.2.6 Cost of Debt:

The calculation of Cost of Debt post-tax can be defined as follows:

$$K(d) = K(d) \text{ pre-tax} * (1 - T)$$

Wherein:

K(d) = Cost of debt

T = tax rate as applicable

For the valuation exercise, a pre-tax cost of debt of 7.50% has been considered for all SPVs, as represented by the Investment Manager. For comparison purposes, the previous valuation as March 2026 had also considered a cost of debt of 7.50%

7.2.7 Debt – Equity Ratio:

I have considered the target debt-equity ratio as per the industry standards. I have considered the industry benchmark since the cost of capital is a forward-looking measure and captures the cost of raising new funds to buy the asset at any valuation date (not the current actually deployed). Specifically, such benchmark is required to consider the nature of the asset class, and the comparative facts from the industry to arrive at the correct assumption.

Given the risk profile of Toll projects and considering the leverage at 50-60% of the total project cost based on a rating agencies report available in public domain, and further considering the InvIT Regulations allowing in general upto 49% leverage in assets where the AAA rating has not been obtained, a debt-to-equity ratio of 50% for Toll Assets was found to be appropriate. For comparison, the previous valuation as of March 2026 used a Debt-Equity Ratio of 50%.

Similarly, given the risk profile of Annuity projects, and considering the leverage at 70-80% of the total project cost based on a rating agencies report available in public domain and further considering the InvIT Regulations allowing in general upto 70% leverage in assets where the AAA rating has not been obtained, a debt-to-equity ratio of 70% for Annuity Assets was found to be appropriate. For comparison, the previous valuation as of March 2026 used a Debt-Equity Ratio of 70%.

7.2.8 Weighted Average Cost of Capital (WACC):

The discount rate, or the WACC, is the weighted average of the expected return on equity and the cost of debt. The weight of each factor is determined based on the company's optimal capital structure.

Formula for calculation of WACC:

$$WACC = [K(d) * \text{Debt} / (\text{Debt} + \text{Equity})] + [K(e) * (1 - \text{Debt} / (\text{Debt} + \text{Equity}))]$$

Accordingly, as per above, I have arrived the WACC for the explicit period of the SPVs. For comparison, WACC for previous valuation as of March 2026 is shown in the table below.

Particulars	AMTPL (Base)	AMTPL (Extension)	DTPL	PECPL	RVTPPL	SBGTPL	SRTPL	TEL
Mar-26	9.48%	10.48%	10.48%	9.88%	10.30%	9.78%	9.56%	9.64%
June-26	9.47%	10.47%	10.47%	9.59%	10.28%	10.67%	9.53%	9.62%

Particulars	Dhola	Dibang	JSEL
Mar-26	7.58%	7.60%	7.86%
June-26	7.61%	7.62%	7.86%

(Refer Appendix 3 for detailed workings)

7.2.9 Cash Accrual Factor (CAF) and Discounting Factor:

Discounted cash flow requires to forecast cash flows in future and discount them to the present in order to arrive at present value of the asset as on Valuation Date. To discount back the projections, we use the Cash Accrual Factor ("CAF"). The Cash Accrual Factor refers to the duration between the Valuation date and the point at which each cash flow is expected to accrue.

In case of Annuity Projects, the annuities are received bi-annually at a predetermined date and the concession agreement provides that the annuities would be realized in 30 days from the annuity date. Hence, we have considered the annuity realizations date for the purpose of determination of the CAF. Accordingly, the cash flows during each year of the projected period are discounted back from the respective annuity realization to Valuation Date.

In case of Toll Projects, since the cash inflows and outflows occur continuously year-round, it is assumed that the Cash Flows are received in the middle of the annual period, i.e., Mid-point factor. Accordingly, the cash flows during each year of the projected period are discounted back from the mid-year to Valuation Date.

Discounted cash flow is equal to sum of the cash flow in each period divided by present value factor, where the present value factor is determined by raising one plus discount rate (WACC) raised to the power of the CAF.

$$DCF = [CF1 / (1+r)^{CAF1}] + [CF2 / (1+r)^{CAF2}] + \dots + [CFn / (1+r)^{CAFn}]$$

Where,

CF = Cash Flows,

CAF = Cash accrual factor for particular period

r = Discount Rate (i.e. WACC)

At the end of the agreed concession period, the rights in relation to the underlying assets, its operations, the obligation to maintain the road reverts to the government authority that granted the concession. Hence, the SPVs is not expected to generate cash flow after the expiry of their respective concession agreements.

Accordingly, I found it appropriate not to consider terminal period value, which represents the present value at the end of explicit forecast period of all subsequent cash flows to the end of the life of the asset or into perpetuity if the asset has an indefinite life, in this valuation exercise.

<< This space is intentionally left blank >>

8. Valuation Conclusion

The current valuation has been carried out based on the discussed valuation methodology explained herein earlier. Further, various qualitative factors, the business dynamics and growth potential of the business, having regard to information base, management perceptions, key underlying assumptions and limitations were given due consideration.

I have been represented by the Investment Manager that there is no potential devolvement on account of the contingent liability as of valuation date; hence no impact has been factored in to arrive at fair EV of the SPVs.

Based on the above analysis, the fair EV and Adjusted Enterprise Value on the Valuation Date of the SPVs are as mentioned below:

Sr. No.	SPVs	Balance Life***	WACC	Enterprise Value*	INR Mn
					Adjusted Enterprise Value**
1	AMTPL Base	~ 6 years 11 months	9.47%	14,041	14,756
	AMTPL Extension	~3 years 11 months [#]	10.47%	1,913	1,913
2	DTPL	~ 17 years 9 months	10.47%	19,413	19,503
3	PECPL	~ 0 years 7 months	9.59%	250	950
4	RVTPL	~ 3 years 8 months	10.28%	4,369	4,515
5	SBGTPL	~ 8 years 5 months	10.67%	12,237	12,676
6	SRTPL	~ 14 years 5 months	9.53%	28,809	32,735
7	TEL	~ 10 years 3 months	9.62%	13,137	13,940
8	Dhola	~ 3 years 8 months	7.61%	3,174	3,368
9	Dibang	~ 4 years 5 months	7.62%	2,142	2,516
10	JSEL	~ 4 years 7 months	7.86%	4,813	4,850
Total				1,04,298	1,11,723

[#] from 5th June 2033

*Enterprise Value ("EV") is described as the total value of the equity in a business plus the value of its debt and debt related liabilities, minus any cash and cash equivalents to meet those liabilities. The Report details the valuation methodologies used, calculations performed, and the conclusion reached with respect to this valuation.

**Further, at the request of the Investment Manager, I have calculated Adjusted Enterprise Value of the SPVs as the EV (derived as above) plus operating cash and cash like items (which includes cash and cash equivalent and current investment) of the SPVs as at the Valuation Date. (Refer Appendix 1, 2 & 3 for the detailed workings)

***The balance life of the SPVs has been calculated using the revised concession dates after including extension. (Refer Appendix 1, 2 & 3 for detailed workings)

EV is described as the total value of the equity in a business plus the value of its debt and debt related liabilities, minus any cash or cash equivalents to meet those liabilities.

Adjusted Enterprise Value ("**Adjusted EV**") is described as the Enterprise Value plus any closing cash or cash equivalents as at the date of valuation.

The fair EV of the SPVs are estimated using DCF method. The valuation requires the Investment Manager to make certain assumptions about the model inputs including forecast cash flows, discount rate, and credit risk.

Valuation is based on estimates of future financial performance or opinions, which represent reasonable expectations at a particular point of time, but such information, estimates or opinions are not offered as predictions or as assurances that a particular level of income or profit will be achieved, a particular event will occur or that a particular price will be offered or accepted. Actual results achieved during the period covered by the prospective financial analysis will vary from these estimates and the variations may be material.

Accordingly, I have conducted sensitivity analysis on certain model inputs, the results of which are as indicated below for both Enterprise Value and Adjusted Enterprise Value:

1. WACC by increasing / decreasing it by 0.5%
2. WACC by increasing / decreasing it by 1.0%
3. Expenses by increasing / decreasing it by 20%
4. Revenue of Toll SPVs by increasing / decreasing it by 10%

The detailed results of the above sensitivity analysis are presented in **Section 1.8 – Summary of Valuation**, for reference and further consideration.

<< This space is intentionally left blank >>

9. Additional Procedures to be complied with in accordance with InvIT regulations

9.1. Scope of Work

The Schedule V of the SEBI InvIT Regulations prescribes the minimum set of mandatory disclosures to be made in the Full Valuation Report. Being a quarterly valuation report, all disclosures where there were material updates, during the quarter, are being disclosed. In this reference, the minimum disclosures in valuation report may include following information as well, so as to provide the investors with the adequate information about the valuation and other aspects of the underlying assets of the InvIT.

The additional set of disclosures, as prescribed under Schedule V of InvIT Regulations, to be made in the valuation report of the SPVs are as follows:

Schedule V of the SEBI InvIT Regulations	Reference In Report
i. Details of the project including whether the transaction is a related party transaction	Section 9.2 (A)
ii. Latest pictures of the project	Section 9.2 (B) & Section 3.2 - Background of the SPVs
iii. The existing use of the project	Section 3.2 – Background of the SPVs
iv. The nature of the interest the InvIT holds or proposes to hold in the project, percentage of interest of the InvIT in the project.	Section 3 – Overview of the InvIT and SPVs Appendix 5- Amount of outstanding debt payable by the SPVs to the Trust Section 4 – Structure of the Trust for percentage of equity interest
v. Date of inspection and date of valuation	Same as Point (ii) as mentioned above & Section 1- Executive summary
vi. Qualifications and assumptions	Section 7 – Valuation of the SPVs (Key Assumptions)
vii. Methods used for valuation	Section 6 – Valuation Methodology
viii. Valuation standards adopted	Section 2 – Procedures adopted for Valuation
ix. Extent of valuer's investigations and nature and source of data to be relied upon	Section 10 – Sources of information
x. Purchase price of the project by the InvIT (for existing projects of the InvIT)	Same as Point (i) as mentioned above
xi. Valuation of the project in the previous 3 years; (for existing projects of the InvIT)	Section 1- Executive Summary
xii. Detailed valuation of the project as calculated by the valuer;	Appendix 1,2,3,4
xiii. List of one-time sanctions/approvals which are obtained or pending;	Section 9.2 (C)
xiv. List of up to date/overdue periodic clearances;	Section 9.2 (D)
xv. Statement of assets	Section 9.2 (E)
xvi. Estimates of already carried as well as proposed major repairs and improvements along with estimated time of completion;	Section 9.2 (F)
xvii. Revenue pendencies including local authority taxes associated with InvIT asset and compounding charges, if any;	Section 9.2 (G)
xviii. On-going material litigations including tax disputes in relation to the assets, if any;	Section 9.2 (H)
xix. Vulnerability to natural or induced hazards that may not have been covered in town planning/ building control.	Section 9.2 (I)

9.2. Analysis of Minimum Disclosures for the SPVs

A. Purchase price of the SPVs by the InvIT:

As informed by the Investment Manager, the following represents the purchase price of the SPVs of the InvIT, against which units of Citius TransNet Investment InvIT were allotted during the IPO of the InvIT, for 100% equity in the HoldCo's (including its subsidiaries i.e. 9 SPVs) and direct SPV (TEL) as on the report date.

Sr. No.	SPVs	HoldCos	Purchase Price (INR Mn)	Acquisition Date [#]	Seller	Whether a Related party of Trust at Acquisition date
1	AMTPL	Epic Concesiones 3 Private Limited (EPIC3)	24,599	21 st April 2026	Infrastructure Yield Trust*	Yes
2	DTPL					
3	PECPL					
4	RVTPL					
5	SBGTPL					
6	SRTPL					
7	TEL***	-	18	21 st April 2026	Edelweiss Infrastructure Yield Plus**	No
8	Dhola	SRPL Road Private Limited (SRPL)	754	21 st April 2026	Edelweiss Infrastructure Yield Plus**	No
9	Dibang					
10	JSEL					

*Through its schemes Infrastructure Yield Plus II, Infrastructure Yield Plus IIA and India Infrastructure Yield Plus II

**As per the Investment Manager, the Sponsor of Trust is ETIPL, which is an entity wholly owned by schemes of the Infrastructure Yield Trust (IYT), which is an AIF registered with SEBI. Companies owned by IYT, including Epic3 and its subsidiaries, are proposed to be transferred to Trust. Hence, IYT and its schemes are related parties to Trust, being parties to the InvIT as per regulation 2(1)(zk) of SEBI InvIT Regulations. However, SRPL and its subsidiaries and TEL are owned by Edelweiss Infrastructure Yield Plus (EIYP), which is another AIF registered with SEBI and is not a party to the InvIT or a promoter of any party of the InvIT and it does not control or is controlled by the Sponsor or Sponsor Group of the Trust. Hence, EIYP is not a related party as per regulation 2(1)(zv) of SEBI InvIT regulations.

*** Direct Equity Purchase

[#]As per Investment Manager 21st April 2026 has been considered as the effective date of acquisition, as this is the date on which the shares of the respective HoldCos (including its subsidiaries i.e. 9 SPVs) and direct SPV (TEL) were transferred to and credited in the demat account of Citius TransNet Investment Trust.

B. Latest pictures of the project:

The details relating to the respective projects along with relevant pictures are disclosed in the background of each SPVs (Refer section 3.2).

C. List of one-time sanctions/approvals which are obtained or pending:

The list of sanctions/ approvals obtained by the SPVs till the date of this Report is provided in Appendix 7.

D. List of up to date/ overdue periodic clearances:

The Investment Manager has confirmed that SPVs are not required to take any periodic clearances and hence there are no up to date/ overdue periodic clearances as on 30th June 2026.

E. Statement of assets included:

The details of assets of the SPVs as per the Provisional Financial statements as of 30th June 2026 are as mentioned below:

Sr. No.	SPVs	INR Mn			
		Net Fixed Assets	Net Intangible Asset	Non-Current Assets*	Current Assets
1	AMTPL	23	10,950	455	1,144
2	DTPL	21	12,967	8	155
3	PECPL	4	127	1	795
4	RVTPPL	15	5,330	11	326
5	SBGTPL	14	11,601	2	505
6	SRTPL	28	5,988	23	3,945
7	TEL	11	6,100	4	938
8	Dhola	5	-	2,496	731
9	Dibang	6	-	1,725	599
10	JSEL	1	-	4,160	1,078
Total		128	53,064	8,884	10,216

Source: Investment Manager

*Non-Current Assets for Annuity SPVs include Non-Current Financial Assets in the form of Annuity Receivable from respective counterparties.

F. Estimates of already carried as well as proposed major repairs and improvements along with estimated time of completion:

I have been informed that maintenance is regularly carried out by SPVs to maintain the working condition of the assets. (Refer Appendix 6 for detailed working)

G. Revenue pendencies including local authority taxes associated with InvIT asset and compounding charges, if any:

Investment Manager has informed me that there are no material dues including local authority taxes (such as Municipal Tax, Property Tax, etc.) pending to be payable to the government authorities with respect to the SPVs (InvIT assets) except as may be disclosed in the financial statements. (Refer Appendix 8).

H. On-going material litigations including tax disputes in relation to the assets, if any:

As informed by the Investment Manager as on 30th June 2026, the ongoing litigations, status of arbitration matters and status of tax assessments are updated in Appendix 9. Further, Investment Manager has informed us that majority of the cases have low to medium risk and accordingly no material outflow is expected against the litigations, hence no impact has been factored on the valuation of the SPVs.

I. Vulnerability to natural or induced hazards that may not have been covered in town planning/ building control:

Investment Manager has confirmed to me that there are no such natural or induced hazards which may impact town planning/ building control, that have not been considered.

Other Matters:

There are no other material matters to report except those specifically disclosed above in this Valuation Report.

<< This space is intentionally left blank >>

10. Sources of Information

For the purpose of undertaking this valuation exercise, I have relied on the following sources of information provided by the Investment Manager:

- i. Audited Financial Statements of the SPVs for Financial Year ("FY") ended 31st March 2022, 31st March 2023, 31st March 2024, 31st March 2025 and 31st March 2026.
- ii. Provisional financial statements of the SPVs for Financial Year ("FY") ended 30th June 2026.
- iii. Projected financial information for the remaining project life for each of the SPVs;
- iv. Details of projected Major Maintenance & Repairs (MMR) Expenditure and Capital Expenditure (Capex).
- v. Traffic Study Report prepared by Crisil Intelligence for AMTPL, DTPL, PECPL, RVTPL, SBGTPPL, SRTPL and TEL.
- vi. Technical Due Diligence Reports prepared by Ramboll India Private Limited for AMTPL, PECPL, RVTPL, SBGTPPL and TEL; Samarth Infra Engg Technocrats Private Limited for Dhola, Dibang, JSEL, SRTPL and DTPL as provided to me by the Investment Manager.
- vii. Details of brought forward losses, MAT credit (as per Income Tax Act) and Written Down Value (WDV) of assets of the SPVs as at 30th June 2026.
- viii. Concession Agreement of each of the SPVs with their respective concessioning authority;
- ix. List of licenses / approvals, details of tax litigations, civil proceedings and arbitrations of the SPVs;
- x. The Shareholding pattern as on Valuation date of the SPVs and other entities mentioned in this Report;
- xi. Management Representation Letter by the Investment Manager dated 10th August 2026;
- xii. Relevant data and information about the SPVs provided to us by the Investment Manager either in written or oral form or in the form of soft copy;
- xiii. Information provided by leading database sources, market research reports and other published data.

The information provided to me by the Investment Manager in relation to the SPVs included but not limited to historical financial statements, forecasts/projections, other statements and assumptions about future matters like forward-looking financial information prepared by the Investment Manager. The forecasts and projections as supplied to me are based upon assumptions about events and circumstances which are yet to occur.

For the purpose of calculating raw beta, we have sourced the beta data from S&P Capital IQ.

I have not tested individual assumptions or attempted to substantiate the veracity or integrity of such assumptions in relation to the forward-looking financial information, however, I have made sufficient enquiries to satisfy myself that such information has been prepared on a reasonable basis.

Notwithstanding anything above, I cannot provide any assurance that the forward-looking financial information will be representative of the results which will actually be achieved during the cash flow forecast period.

<< This space is intentionally left blank >>

11. Exclusions and Limitations

- 11.1. My Report is subject to the limitations detailed hereinafter. This Report is to be read in totality, and not in parts, in conjunction with the relevant documents referred to herein.
- 11.2. Valuation analysis and results are specific to the purpose of valuation and is not intended to represent value at any time other than the valuation date of 30th June 2026 ("Valuation Date") mentioned in the Report and as per agreed terms of my engagement. It may not be valid for any other purpose or as at any other date. Also, it may not be valid if done on behalf of any other entity.
- 11.3. This Report, its contents and the results are specific to (i) the purpose of valuation agreed as per the terms of my engagements; (ii) the Valuation Date and (iii) are based on the financial information of the SPVs till 30th June 2026. The Investment Manager has represented that the business activities of the SPVs have been carried out in normal and ordinary course between 30th June 2026 and the Report Date and that no material changes have occurred in the operations and financial position between 30th June 2026 and the Report date.
- 11.4. The scope of my assignment did not involve me performing audit tests for the purpose of expressing an opinion on the fairness or accuracy of any financial or analytical information that was provided and used by me during the course of my work. The assignment did not involve me to conduct the financial or technical feasibility study. I have not done any independent technical valuation or appraisal or due diligence of the assets or liabilities of the SPVs or any of other entity mentioned in this Report and have considered them at the value as disclosed by the SPVs in their regulatory filings or in submissions, oral or written, made to me.
- 11.5. In addition, I do not take any responsibility for any changes in the information used by me to arrive at my conclusion as set out here in which may occur subsequent to the date of my Report or by virtue of fact that the details provided to me are incorrect or inaccurate.
- 11.6. I have assumed and relied upon the truth, accuracy and completeness of the information, data and financial terms provided to me or used by me; I have assumed that the same are not misleading and do not assume or accept any liability or responsibility for any independent verification of such information or any independent technical valuation or appraisal of any of the assets, operations or liabilities of the SPVs or any other entity mentioned in the Report. Nothing has come to my knowledge to indicate that the material provided to me was misstated or incorrect or would not afford reasonable grounds upon which to base my Report.
- 11.7. This Report is intended for the sole use in connection with the purpose as set out above. It can however be relied upon and disclosed in connection with any statutory and regulatory filing in connection with the provision of SEBI InvIT Regulations. However, I will not accept any responsibility to any other party to whom this Report may be shown or who may acquire a copy of the Report, without my written consent.
- 11.8. It is clarified that this Report is not a fairness opinion under any of the stock exchange/ listing regulations. In case of any third party having access to this Report, please note this Report is not a substitute for the third party's own due diligence/ appraisal/ enquiries/ independent advice that the third party should undertake for their purpose.
- 11.9. Further, this Report is necessarily based on financial, economic, monetary, market and other conditions as in effect on, and the information made available to me or used by me up to, the date hereof. Subsequent developments in the aforementioned conditions may affect this Report and the assumptions made in preparing this Report and I shall not be obliged to update, revise or reaffirm this Report if information provided to me changes.
- 11.10. This Report is based on the information received from the sources as mentioned in Section 10 of this Report and discussions with the Investment Manager. I have assumed that no information has been withheld that could have influenced the purpose of my Report.
- 11.11. Valuation is not a precise science and the conclusions arrived at in many cases may be subjective and dependent on the exercise of individual judgment. There is, therefore, no indisputable single value. I have arrived at an indicative EV based on my analysis. While I have provided an assessment of the value based

on an analysis of information available to me and within the scope of my engagement, others may place a different value on this business.

- 11.12. Any discrepancies in any table / Appendix between the total and the sums of the amounts listed are due to rounding-off.
- 11.13. Valuation is based on estimates of future financial performance or opinions, which represent reasonable expectations at a particular point of time, but such information, estimates or opinions are not offered as predictions or as assurances that a particular level of income or profit will be achieved, a particular event will occur or that a particular price will be offered or accepted. Actual results achieved during the period covered by the prospective financial analysis will vary from these estimates and the variations may be material.
- 11.14. I do not carry out any validation procedures or due diligence with respect to the information provided/extracted or carry out any verification of the assets or comment on the achievability and reasonableness of the assumptions underlying the financial forecasts, save for satisfying ourselves to the extent possible that they are consistent with other information provided to me in the course of this engagement.
- 11.15. My conclusion assumes that the assets and liabilities of the SPVs, reflected in their respective latest balance sheets remain intact as of the Report date.
- 11.16. Whilst all reasonable care has been taken to ensure that the factual statements in the Report are accurate, neither myself, nor any of my associates, officers or employees shall in any way be liable or responsible either directly or indirectly for the contents stated herein. Accordingly, I make no representation or warranty, express or implied, in respect of the completeness, authenticity or accuracy of such factual statements. I expressly disclaim any and all liabilities, which may arise based upon the information used in this Report. I am not liable to any third party in relation to the issue of this Report.
- 11.17. The scope of my work has been limited both in terms of the areas of the business & operations which I have reviewed and the extent to which I have reviewed them. There may be matters, other than those noted in this Report, which might be relevant in the context of the transaction and which a wider scope might uncover.
- 11.18. For the present valuation exercise, I have also relied on information available in public domain; however the accuracy and timelines of the same has not been independently verified by me.
- 11.19. In the particular circumstances of this case, my liability (in contract or under any statute or otherwise) for any economic loss or damage arising out of or in connection with this engagement, however the loss or damage caused, shall be limited to the amount of fees actually received by me from the Investment Manager, as laid out in the engagement letter for such valuation work.
- 11.20. In rendering this Report, I have not provided any legal, regulatory, tax, accounting or actuarial advice and accordingly I do not assume any responsibility or liability in respect thereof.
- 11.21. This Report does not address the relative merits of investing in InvIT as compared with any other alternative business transaction, or other alternatives, or whether or not such alternatives could be achieved or are available.
- 11.22. I am not an advisor with respect to legal, tax and regulatory matters for the proposed transaction. No investigation of the SPV's claim to title of assets has been made for the purpose of this Report and the SPV's claim to such rights have been assumed to be valid. No consideration has been given to liens or encumbrances against the assets, beyond the loans disclosed in the accounts. Therefore, no responsibility is assumed for matters of a legal nature.
- 11.23. I have no present or planned future interest in the Trustee, Investment Manager or the SPVs and the fee for this Report is not contingent upon the values reported herein. My valuation analysis should not be construed as investment advice; specifically, I do not express any opinion on the suitability or otherwise of entering into any financial or other transaction with the Investment Manager or SPVs.
- 11.24. I have submitted the draft valuation report to the Trust and Investment Manager for confirmation of accuracy of the factual data used in my analysis and to prevent any error or inaccuracy in this Report.

Limitation of Liabilities

- 11.25. It is agreed that, having regard to the RV's interest in limiting the personal liability and exposure to litigation of its personnel, the Sponsor, the Investment Manager and the Trust will not bring any claim in respect of any damage against any of RV personally.
- 11.26. In no circumstances RV shall be responsible for any consequential, special, direct, indirect, punitive or incidental loss, damages or expenses (including loss of profits, data, business, opportunity cost, goodwill or indemnification) in connection with the performance of the services whether such damages are based on breach of contract, tort, strict liability, breach of warranty, negligence, or otherwise, even if the Investment Manager had contemplated and communicated to RV the likelihood of such damages. Any decision to act upon the deliverables (including this Report) is to be made by the Investment Manager and no communication by RV should be treated as an invitation or inducement to engage the Investment Manager to act upon the deliverable(s).
- 11.27. It is clarified that the Investment Manager will be solely responsible for any delays, additional costs, or other liabilities caused by or associated with any deficiencies in their responsibilities, misrepresentations, incorrect and incomplete information including information provided to determine the assumptions.
- 11.28. RV will not be liable if any loss arises due to the provision of false, misleading or incomplete information or documentation by the Investment Manager.
- 11.29. Further, this Report is necessarily based on financial, economic, monetary, market and other conditions as in effect on, and the information made available to me or used by me up to, the date hereof. Subsequent developments in the aforementioned conditions may affect this Report and the assumptions made in preparing this Report and I shall not be obliged to update, revise or reaffirm this Report if information provided to me changes.

Justification of Companies used for calculation of Beta for Toll SPVs:

The following companies are integral players in the Indian infrastructure sector and contributes significantly to the development, operation and maintenance of road and highway project. Their strong market presence, diversified portfolios and cosistent involvement in the key road infrastructure projects make them relevant for the computation of beta of TollSPV in the context of road business valuation.

1) Powergrid Infrastructure Investment Trust

PG InvIT (PowerGrid Infrastructure Investment Trust) is an infrastructure trust . It is a relevant comparable for toll road infrastructure valuation. Structurally, PG InvIT shares key characteristics with the Citius Transnet Investment Trust both are SEBI-registered InvITs with stable, contracted cash flows from long-term concession visibility. Both entities generate predictable, cash flows from completed operational assets, thereby providing a realistic benchmark for understanding risk & return in the infrastructure trust asset class. The comparable regulatory framework, similar operational maturity, and analogous cash flow characteristics make PG InvIT an appropriate peer for beta estimation purposes.

2) IRB InvIT Fund

The IRB InvIT Fund is a dedicated infrastructure trust that manages toll road assets across India, with a portfolio comprising sixteen operational highway projects. Its focused strategy within the transportation infrastructure sector and operational maturity positions it as a relevant peer in the broader infrastructure trust landscape. Structurally, IRB InvIT shares several characteristics with Citius Transnet Investment Trust both are SEBI-registered InvITs with stable, income-generating infrastructure assets and long-term cash flow visibility. These similarities make IRB InvIT a reasonable comparable for evaluating Citius Transnet Investment Trust, particularly in the context of computing beta for valuation purposes. Moreover, like Citius Transnet Investment Trust, IRB InvIT is currently operating and generating cash flows from completed assets, thereby offering a realistic proxy for riskreturn dynamics in the infrastructure domain. Both entities offer annuity-like cash flows, similar investor profiles, and comparable regulatory frameworks. For these reasons, IRB InvIT is considered an appropriate peer for beta estimation in the valuation analysis of Citius Transnet Investment Trust

3) IRB Infrastructure Developers Limited

IRB Infrastructure Developers Limited is among the India's largest and most diversified integrated transport infrastructure developers, with a strong presence in the BOT sector. The company boasts a well-balanced portfolio that included BOT, TOT and HAM projects. As of the valuation date, approximately 80% of IRB's order book is composed of O&M projects, primarily under BOT and TOT models. Additionally, the company holds ownership stake in two InvIT's (Infrastructure Investment Trusts) that focus on the road sector. Together with these InvIT's, IRB generates a significant portion of its cash flows from toll assets. Accordingly, I have considered these factors appropriate for the computation of beta for toll assets, as they reflect the entity's underlying risk profile.

4) Ashoka Buildcon Limited

Ashoka Buildcon Limited operates toll and annuity road assets through its dedicated subsidiary Ashoka Concessions Limited (ACL), with a portfolio encompassing both BOT and HAM infrastructure projects. Ashoka Buildcon is a relevant operational peer in the toll infrastructure domain. While distinct from the InvIT structure, Ashoka's operational management of long-duration toll concessions and HAM assets provides comparable risk-return characteristics both entities generate stable, contracted cash flows. The similar regulatory environment, comparable asset duration, and cash flow predictability make Ashoka Buildcon an appropriate comparable for beta estimation in toll infrastructure valuation.

5) Dilip Buildcon Limited

Dilip Buildcon Ltd. is a prominent Indian infrastructure company, specializing in the construction of roads, highways, bridges, and other civil engineering projects. The company operates across multiple sectors, including road construction (EPC projects), road asset ownership (via toll roads and highway projects) and is heavily tied to infrastructure, especially highways, which exposes them to similar market risks to that of Citius Transnet Investment Trust such as policy changes, traffic volume, and toll revenue fluctuations. Hence, I deemed it appropriate to include Dilip Buildcon Ltd in my beta calculation, as its risk and policy aligns with the scope of this analysis similar to that of Toll SPV.

Appendix 2.2 – Computation of Unlevered and Re-levered Beta for Annuity SPVs

Particulars	Raw Beta	Debt to Market Capitalisation	Effective Tax Rate(%)	Unlevered Beta
Powergrid Infrastructure Investment Trust	0.14	2%	17.47%	0.14
IRB InvIT Fund	0.30	38%	25.17%	0.24
Average				0.19

Particulars	Unlevered Beta	Debt/ Equity Ratio	Effective Tax Rate of SPV (%)	Relevered Beta
Dhola	0.19	2.33	15.94%	0.55
Dibang	0.19	2.33	15.90%	0.55
JSEL	0.19	2.33	11.94%	0.57

Source: Information provided by S&P Capital IQ, database sources, market research, other published data and internal workings.

Justification of Companies used for calculation of Beta for Annuity SPV's:

The following companies are integral players in the Indian infrastructure sector and contributes significantly to the development, operation and maintenance of road and highway project. Their strong market presence, diversified portfolios and consistent involvement in the key road infrastructure projects make them relevant for the computation of beta of AnnuitySPV's in the context of road business valuation.

1) IRB InvIT Fund

The IRB InvIT Fund is a dedicated infrastructure trust that manages toll road assets across India, with a portfolio comprising sixteen operational highway projects. Its focused strategy within the transportation infrastructure sector and operational maturity positions it as a relevant peer in the broader infrastructure trust landscape. Structurally, IRB InvIT shares several characteristics with Citius Transet Investment Trust both are SEBI registered InvITs with stable, income-generating infrastructure assets and long-term cash flow visibility. These similarities make IRB InvIT a reasonable comparable for evaluating Citius Transet Investment Trust, particularly in the context of computing beta for valuation purposes. Moreover, like Citius Transet Investment Trust, IRB InvIT is currently operating and generating cash flows from completed assets, thereby offering a realistic proxy for risk-return dynamics in the infrastructure domain. Both entities offer annuity-like cash flows, similar investor profiles, and comparable regulatory frameworks. For these reasons, IRB InvIT is considered an appropriate peer for beta estimation in the valuation analysis of Citius Transet Investment Trust.

2) PG InvIT

PowerGrid InvIT (PG InvIT) primarily owns and operates high-voltage power transmission lines, which form a critical component of India's electricity infrastructure. The trust earns regulated revenues through long-term, fixed-fee contracts with utilities, offering predictable and stable cash flows over extended periods. Citius Transet Investment Trust, while operating in a different sector, roads sector shares key structural and financial characteristics with PG InvIT. Both entities are SEBI registered InvITs with long-term contracted revenues, asset-heavy models, and yield focused investment propositions. These similarities support the application of standard infrastructure valuation methodologies such as the Discounted Cash Flow (DCF) approach, which emphasizes long term cash flow generation and yield expectations. From a capital market perspective, both InvITs are designed to deliver long term returns to investors through consistent distributions, making them suitable peers in a comparative valuation context.

Note No.	Remarks
Note 1	Risk free rate has been considered, based on the zero-coupon yield curve as of 30 th June 2026 for 10-year Government securities, as quoted on CCIL's website. (Refer Section 7.2.2 - Valuation of the SPVs)
Note 2	Based on historical realized returns on equity investments over a risk free rate represented by 10 years government bonds, a 7% equity risk premium is considered appropriate for India. (Refer Section 7.2.3 - Valuation of the SPVs)
Note 3	Beta has been considered based on the beta of companies operating in the similar kind of business in India.
Note 4	Base Ke = Rf + (β x ERP)
Note 5	Risk Premium/ Discount Specific to the SPVs
Note 6	Adjusted Ke = Rf + (β x ERP) + CSRP
Note 7	As per Management Representation Letter. (Refer Section 7.2.6 - Valuation of the SPVs)
Note 8	Average tax rate for the life of the SPVs have been considered
Note 9	Effective cost of debt. Kd = Pre tax Kd * (1-Effective Tax Rate)
Note 10	The debt - equity ratio computed as [D/(D+E)] is considered as 50% for toll SPVs and 70% for Annuity SPVs as per industry standard.
Note 11	WACC = [Ke*(1-D/(D+E))]+[Kd*(1-t)*(D/(D+E))]

Appendix 9 – Summary of Ongoing Litigations

Appendix 9.1: Summary of Ongoing Litigations of DTPL

Sr No	Case	Forum	Details of Matter	Amount Involved (in Mn)
1	Mahesh Vs DTL	Senior Civil Judge, Basavakalyan	<u>MVC 392 of 2023</u> Matter is originating from an accident involving Route Patrol Vehicle (RPV) KA39A0200 of the Project during its routine patrol of the Project Highway. The Vehicle rammed into a moped (KA56J9523), when the latter overtook the patrol vehicle, and suddenly applied brake in front of the RPV, on the slow lane of LHS at KM 384.400. The rider and the pillion of the moped were thrown onto the ground. The injured were picked up by the RPV and rushed to the Government Hospital in Humnabad. First Aid was administered to one of the injured, while the other was referred to Government Hospital in the District Head Quarter- Bidar town. Tests were conducted for both at Bidar Hospital. One is said to have sustained minor, while the other a serious injury. The latter is said to have received multiple wounds and suffered a fracture on his left lower limb. Occupant of the Moped have now approached the Basavakalyan Court seeking compensation of Rs. 15 lakhs with 15% interest p.a. The last date of hearing was 07.08.2026.	0.272
2	Santosh Vs DTL	Senior Civil Judge, Basavakalyan	<u>MVC 210 of 2023</u> Matter is originating from an accident involving Route Patrol Vehicle (RPV) KA39A0200 of the Project during its routine patrol of the Project Highway. The Vehicle rammed into a moped (KA56J9523), when the latter overtook the patrol vehicle, and suddenly applied brake in front of the RPV, on the slow lane of LHS at KM 384.400. The rider and the pillion of the moped were thrown onto the ground. The injured were picked up by the RPV and rushed to the Government Hospital in Humnabad. First Aid was administered to one of the injured, while the other was referred to Government Hospital in the District Head Quarter- Bidar town. Tests were conducted for both at Bidar Hospital. One is said to have sustained minor, while the other a serious injury. The latter is said to have received multiple wounds and suffered a fracture on his left lower limb. Occupant of the Moped have now approached the Basavakalyan Court seeking compensation of Rs. 15 lakhs with 15% interest p.a. The last date of hearing was 07.08.2026.	1.5
3	State of Telangana Vs Parmisetty Ajay Kumar	JMFC Court Sangareddy	<u>CC 1098 of 2020 Filing no CC 1179 of 2020</u> Case involves a scuffle in the TP between the Security Staff and the Complainant, who is a lawyer. The next date of hearing is 14.08.2026.	NIL
4	DTL Vs Ravinder Shamrao Bhandare	State Consumer Commission, Shambhajnagar	<u>SC/CB1/27/FA/372/2025</u> Complainant had reached the said Toll Plaza at about 7.48 PM. At that time when the complainant reached toll booth, the FASTag was not scanned by the reader installed in the lane. The Complainant was asked to pay the double Fees as per the direction of MoRTH/NHAI. Accordingly, he had paid Rs.190/- (applicable Fee of Rs.95/- + penalty amount of Rs.95/-) in cash at 7.50 PM and moved ahead. As per the complainant, he had paid the amount (three times) more than the fixed toll amount of the vehicle even when the FASTag account of the complainant vehicle was active, and subsequently he received a message that an amount of Rs.95/- was deducted from the FASTag Account. In the complaint the Complainant has asked for a refund of Rs 285 and a compensation of Rs. 5,00,000/-. The last date of hearing was 05.05.2026.	0.06
5	DTL/NHAI Vs Telangana State Electricity Regulatory Commission	TGERC	<u>O.P. No. 52 of 2025</u> The National Highways Authority of India (NHAI) has filed a petition under Sections 61, 62, and 86 of the Electricity Act, 2003, read with the TSERC (Multi Year Tariff) Regulations, 2023. The petition is filed pursuant to the liberty granted by the Hon'ble Telangana State Electricity Regulatory Commission (TSERC) in its Order dated 29.04.2025 in O.P. Nos. 21 and 22 of 2025. Orders Reserved.	NIL

Appendix 9.2: Summary of Ongoing Litigations of PECPL

Sr No	Case	Forum	Details of Matter	Amount Involved (in Mn)
1	PECL Vs Government of Haryana & Ors	Punjab & Haryana High Court	<u>Civil Writ Petition No. 18453 of 2020</u> PECL has filed the above Petition before the High Court of Punjab and Haryana, challenging the claim of Municipal Corporation of Panipat towards property tax and penalty amounting to around INR 97 lakhs made against PECL. As per the CA, PECL is exempted from paying the Property Tax. The last hearing was scheduled on 31.07.2026.	9.7 Mn
2	Pankaj Kaushik Vs NHAI and PECL	State Consumer Commission Panchkula	<u>SC/6/A/549/2023</u> This case is filed by the Petitioner against NHAI and 4 other Concessionaires including PECL, claiming compensation for the cost of tyre, cost of wheel, alignment due to poor maintenance of the road, etc. Matter was dismissed by the District Commission and further the appellant approached the State Forum. Pankaj Kaushik has challenged the Order of the District Commission before the State Commission, Panchkula. The next date of hearing is 01.02.2027.	NIL
3	Dr. Neeraj Kumar Vs NHAI and PECL	District Consumer Forum, Ludhiana	<u>DC/36/CC/204/2023</u> Complainant filed a complaint before the District Commission against NHAI and PECL for collecting double toll in cash despite the fact that Rs. 35 was deducted from his FASTag. Complainant filed the complaint asking for refund of Rs.10,000/-, compensation of Rs.1,00,000/- and litigation cost of Rs. 22,000/-. The next date of hearing is 01.09.2026	0.132 Mn
4	Gaurav Vs NHAI and PECL	DCDRF, Karnal	<u>DC/67/CC/173/2025</u> On 4 November 2024 at 16:14 hrs, Mr. Gaurav's vehicle (HR05AC4350) arrived at lane 20 of the Panipat Toll Plaza. The FASTag reader identified the tag as blacklisted, a status corroborated by the attached NPCI mapper screenshot showing "Low Balance" for the same date. Despite this, upon Mr. Gaurav's insistence that the tag had sufficient funds, the toll collector attempted a manual transaction using the vehicle registration number. However, the system (ICICI, the acquiring bank) still failed to deduct the toll fee due to the blacklisted status, as reflected in the attached manual transaction details. Mr. Gaurav was informed of the tag's status and asked to pay the applicable double toll fee in cash, as per existing rules. He refused, showed an unidentified item on his mobile (not clarified or submitted in the notice), and blocked the toll lane for approximately five minutes, causing inconvenience to other road users. This conduct, despite the available chargeback mechanism under NETC, was obstructive and in violation of lawful procedures. In light of these facts, the allegation of service deficiency by the toll staff is baseless, and the irresponsible actions of your client are duly noted. The next date of hearing is 19.08.2026.	0.251 Mn
5	Gurudeep Singh Vs NHAI and PECL	DCDRF, Delhi	<u>DC/82/CC/853/2025</u> A complaint has been filed against Panipat Elevated Corridor Private Limited and NHAI by Mr. Gurdeep Singh, a lawyer based in Delhi, before the District Consumer Forum, Delhi (Case No. CC/853/2024), in relation to an incident that occurred at the Panipat Toll Plaza on 13.03.2025. The key facts are summarized below: The Complainant was travelling by car from New Delhi to Punjab on 13.03.2025. The vehicle is registered in the name of his wife, Mrs. Promila Singh. At approximately 8:00 AM, he reached the Panipat Toll Plaza, where he alleges that he had to wait in the queue for over 15 minutes. He claims that, under the purported "FASTag 10-second rule" issued by NHAI, he was not liable to pay the toll. He has sought a refund of ₹40 paid as toll, along with compensation of ₹54,000 towards expenses allegedly incurred, ₹1,00,000 for alleged mental and physical harassment, and ₹50,000 towards litigation costs. The last date of hearing was scheduled on 08.07.2026.	0.244 Mn
6	Nitin Desodiya VS Panipat Elevated Corridor Private limited and HDFC payments Bank	DCDRF, Gurugram	<u>CC/750/2025</u> The complaint alleges that the complainant, a practising advocate in Gurugram, had requested the cancellation of his FASTag with Respondent No. 2 (the payment gateway bank). Although the cancellation was accepted without dispute, payments were allegedly deducted by PECPL on two occasions. The complainant has now filed a case seeking compensation of ₹2,71,040 for mental agony, deficiency in service, unfair trade practice, and litigation expenses. The Next Date of hearing is 07.09.2026	0.225 Mn

Appendix 9.3: Summary of Ongoing Litigations of SBTPL

Sr No	Case	Forum	Details of Matter	Amount Involved (in Mn)
1	State of Gujarat through the Deputy Collector Stamps Vs L&T SBTPL	Gujarat High Court	Letter Patent Appeal No. 593 of 2019 SBGTPL filed a Special Civil Application before the Single Bench of Gujarat High Court challenging the order dated April 30, 2013 passed by the Deputy Collector for visiting and entering the toll plaza on February 25, 2013 after office hours and for violations of the Gujarat Stamp Act, 1958. The Deputy Collector had directed payment of stamp duty of INR 80.53 crore on the concession agreement to a development agreement and an obligation to pay duty as provided under Article 13 of the Gujarat Stamp Act, 1958. State Govt had filed the present LPA against the order of single bench of GHC on 11.04.2014 along with CA for condonation of delay and stay. As per the said order of 11.04.2014, GHC had quashed the order dated 30.04.2013 of Dy. Collector for impounding stamp duty and directed Government to examine the conduct of Dy. Collector and take appropriate decision. On 12.03.2019, after hearing both the parties at length, the GHC held that the LPA filed by the State was required to be considered and cannot be dismissed at the threshold. Hence, the CA for delay in filing LPA was condone, CA for stay of GJ HC was rejected and LPA was admitted. Presently, matter is pending for final arguments. The next date of hearing is awaited.	805.3 Mn

Appendix 9.4: Summary of Ongoing Litigations of SRTPL

Sr No	Case	Forum	Details of Matter	Amount Involved (in Mn)
1	Biswaranjan Beura Vs State of Orissa and others, including SRTL	Orissa High Court	WP (C) 5081 of 2018 Mr. Biswaranjan Beura filed this petition against the State of Orissa and others including SRTL challenging the Orissa Toll Policy of permitting the SRTL to collect higher User Fees from vehicles carrying major minerals as being arbitrary and against the fundamental rights of transporters to carry business. The State of Odisha has filed counter affidavit and additional counter Affidavit, inter alia stating that there are justified grounds for taking different User Fees from various category of vehicles as provided under the Orissa State Roads Tolls Act, 2010 read with the State Roads Tolls Rules, 2010. The Petitioner has filed a Rejoinder to the counter affidavit of the State stating that certain rules in the State Roads Tolls Rules are not framed for carrying out the purposes of the Orissa State Roads Tolls Act, 2010 and needs to be struck down. The next date of hearing is awaited.	NIL
2	SRTL Vs Dharmesh Kumar Patel	State Consumer Commission, Cuttack	SC/21/A/70/2024 It is the case of the Complainant that he obtained a local pass for his car bearing registration number OD-16F-1234 and that despite validly possessing local personal user monthly pass, an amount of Rs. 90/- was collected from him at SRTL's Mansikani toll plaza on 3 different dates, totaling Rs. 270/- in the month of November, 2022. This was due to the transponder installed at the toll plaza failing to read the monthly pass. Every time, after heated arguments, the Complainant was made to pay the User Fee and only then was allowed to pass through the toll plaza. It is also alleged that the staff at the toll plaza has detained him till the time User Fee was paid. Being aggrieved, the Complainant filed the above complaint. The Commission, vide ex-parte interim order dated 5.1.2023, directed SRTL not to collect toll from the Complainant till the final disposal of the matter. It is further averred by the Complaint that despite the interim directions not to collect toll from the Complainant till the disposal of the matter and also possessing a valid monthly local personal user pass, toll fees in the form of cash was collected at SRTL toll plaza on six different dates in the month of January, 2023, totaling to Rs. 540/-. Upon realizing that the Complainant had a valid monthly pass, SRTL tried to return the amount of Rs. 810/- collected from the Complainant but the offer was rejected. After taking note of the pleadings and the arguments of the parties, the District Commission vide its Order dated 28.12.2023 (copy of the Order is attached herewith for ready reference) found L&T SRTL deficient in providing service and has directed SRTL to : 1.to pay Rs.270/- + Rs.540/- to the Complainant by issuing fresh cheques/drafts . 2.to pay compensation of Rs. 50,000/- and litigation expenses of Rs.5,000/- within one month of this order. SRTL has filed an appeal before State Consumer Dispute Redressal Commission, Cuttack. The matter is admitted before the commission and next date of hearing is awaited.	0.055 Mn
3	D Anuradha and 3 Ors Vs Chief Engineer and SRTL	MACT, Jharisguda	MAC/54/2024 On 27.06.2024, at 21:45 Hrs, a Maruti Ertiga car met with an accident at Km. 25.800 LHS, at our project highway, near Rengali, where one person sustained major injury who was immediately taken to the nearest hospital at Rengali by our Plaza Ambulance and immediately was referred to Govt Hospital Sambalpur. Police arrived at the spot and conducted investigation and found that there was rash driving wherein the car had gone over the speed braker in an unstable manner and collided at the kerb. The patient later died and the dependents have filed a claim at the tribunal. It may be noted that the speed breakers were constructed by OWD , much before the COD itself due to public pressure. The next date of hearing is 18.08.2026	22.8 Mn
4	Sudhanshu Panda Vs SRTL	District Consumer Forum, Sambalpur	DC/371/EA/97/2025 Vide DCDRF Order dated 05.08.2025, SRTL is directed to refund Rs.60 with 9% pa wed from 22.01.2025 and compensation of Rs.20,000 and litigation expense of Rs.10,000/- to the Complainant. EP has been filed. Last date of hearing was 07.08.2026.	0.14 Mn

Appendix 9.8: Summary of Ongoing Claim Disputes of AMTPL

Sr No	Details of Matter	Amount Involved (in Mn)
1	As per the terms of the AMTPL CA, AMTPL is responsible for submitting a monthly O&M report ("Report") to GSRDC. On March 16, 2024, GSRDC instructed an independent engineer ("IE") to examine the Report and furnish their comments on the same. Pursuant to review of the Report for February 2024, the IE determined damages aggregating to ₹ 947.70 million on AMTPL, due to delays in rectifying deficiencies identified in the Report. In this regard, the GSRDC has also been advised by the IE to proceed with the necessary steps to facilitate recovery of damages as per the AMTPL CA. AMTPL had clarified that IE has not taken into consideration the settlement agreement dated April 27, 2023 entered into between GSDRC and AMTPL, whereby parties had agreed to settle all outstanding and pending claims and counter claims as on the date of the settlement agreement and per its terms. AMPTL has also clarified that the methodology adopted by the IE was erroneous. The matter is currently dormant from last one year.	947.7
2	As per Article 29 of Concession Agreement, the Concessionaire needs to arrive the Actual Average Traffic in terms of PCU from the Traffic survey that will be conducted one year prior to the Target Date, on the Target Date and one year after Anniversary. If the Actual Average Traffic is found to be lower/higher than the Target Traffic mentioned in Article 29, then the Concession Period shall be modified accordingly as per Article 29 of the Concession Agreement. GSRDC based on IE's recommendation had communicated the reduction in Concession Period of 2.2 years. Details clarification had already been provided by the Concessionaire. Further details requested by GSRDC which is yet to be given by the Concessionaire due to the conversion factor issue that has bearing on revenue share.	Reduction in Concession Period by 2.2Years
3	The Office of the Superintendent of Stamps and Registration, Gandhinagar vide its letter dated May 15, 2025 has alleged that the AMTPL CA was not adequately stamped and has instructed AMTPL to pay ₹ 281.80 million. AMTPL vide its letter dated July 8, 2025 has denied the allegations.	281.8
4	Loss of Revenue claim against GSRDC due to delay in approval and implementation of annual revision of User Fee w.e.f. 00:00 hrs of 01.04.2026 to 23:59:59 hrs of 30.04.2026. IE has recommended vide its letter 1648 dated 01.08.2026	4.3

1	NHAI citing the Model Code of Conduct in respect of recent Lok Sabha election held by Election Commission of India, had requested all the Concessionaire/Contractor to implement the Fee revision as per Clause 29.2 after the poll dates. Hence, the revised Fee was implemented since June 3, 2024. Extension of Concession Period for 1.63 days is eligible as per the MoRTH's mechanism for compensation of loss of revenue into Concession Period. Currently MoRTH has issued policy circular on 19.12.2025. Claim of extension of Concession Period for 1.63 days is not submitted considering the discussions with NHAI at HQ on show cause notice.	Extension in Concession Period by 1.63 days
2	As per Article 29 of Concession Agreement, the Concessionaire needs to arrive the Actual Average Traffic in terms of PCU from the Traffic survey that will be conducted one year prior to the Target Date, on the Target Date and one year after Anniversary. If the Actual Average Traffic is found to be lower/higher than the Target Traffic mentioned in Article 29, then the Concession Period shall be modified accordingly as per Article 29 of the Concession Agreement. NHAI without cognisance of the Concessionaire's submitted had arrived 1.89 years reduction. Concessionaire had requested details of calculation for arriving the reduction in Concession Period which is yet to be received from Authority. Currently industry wise issue. will be invoking arbitration shortly	Reduction in Concession Period by 1.89 Years
3	Illegal excavation of gravel from Mella Kunta Tank, Vellore against the permission of the Mines and Geology Department. Executive Engineer, Irrigation Division No. 1, Sangareddy has reported based on the grievances that M/s DTPL has excavated the soil abnormally and requesting DTL to restore/backfill the slope and obtain NOC from concerned departments. Currently the matter is under discussion with Irrigation Department by L&T TIIC who is EPC Contractor for this Project. Since the EPC Contractor has only extracted the approved quantities i.e., 29000 Cum., the allegation of Irrigation Department that 69,280 Cum was extracted, is unsubstantiated. EPC Contractor is in discussion with the Irrigation department on this matter.	Additional quantity is 69,280 Cum
4	On November 13, 2025, the National Highways Authority of India (NHAI) issued a Show Cause Notice (SCN) to DTPL, citing the non-fulfillment of specific Operation and Maintenance (O&M) obligations. This notice was prompted by the Independent Engineer (IE), who had previously highlighted discrepancies in DTPL's O&M performance through letters dated November 8 and November 10, 2025. In response, DTPL submitted updates to both the IE and NHAI on November 14 and November 20, 2025, detailing the work undertaken to rectify the reported deficiencies and fulfill their contractual O&M duties. The resolution of this matter is currently pending.	Nil
5	As informed by the Management, NHAI issued a show cause notice dated November 13, 2025 to DTPL, alleging non-fulfillment of certain operations and maintenance ("O&M") obligations. It is noted that the IE, vide its letters dated November 8, 2025 and November 10, 2025, had highlighted certain discrepancies in relation to the said O&M obligations. DTPL, vide its response letters dated November 14, 2025 and November 20, 2025, apprised both the IE and NHAI of the remedial work undertaken towards fulfillment of its O&M obligations. The matter is currently pending.	Nil

Sr No	Details of Matter	Amount Involved (in Mn)
1	Due to delays in completion of the Project due to various factors, including delay in handing over the land by MORTH, force majeure events, change of scope etc. Owing to the delays in completion of the Project, Dibang claimed it suffered significant losses in terms of idling of manpower, plant and equipment, increased interest on loan amount during construction, etc.	7,711.5
2	Dibang has put forward a claim against MORTH relating to a required Change of Scope (CoS) for the Dibang Project, specifically involving the construction of additional river protection infrastructure. This supplemental work, which was not part of the original Concession Agreement, included building nine repelling spurs—a measure recommended by the independent engineer to protect the main bridge and the project highway. Dibang is seeking reimbursement for the costs already incurred for these works, totaling ₹ 118.30 million. Furthermore, Dibang is also pursuing official Change of Scope approval for subsequent river protection measures planned for the upstream section of the project. This claim is currently awaiting MORTH's review and official response.	1,188.49
