Company Secretary & Compliance Officer**

**Encl.: As above**

## Coforge strengthens its AI capabilities with new AI-driven accelerators on the Coforge Quasar AI platform

**Greater Noida, December 1, 2025** — Coforge Limited (NSE: COFORGE), a global digital services and solutions provider, today announced the expansion of the [Coforge Quasar AI platform](#) with a new suite of AI-driven accelerators designed to boost enterprise productivity, drive responsible innovation, and scale AI adoption across industries.

Over the last two years, since its launch Coforge Quasar AI platform has witnessed 300+ paid AI deployments, delivered 200+ industry-specific solutions, and established 20+ strategic partnerships, enabling rapid business outcomes for enterprises worldwide. Building on this success that already provides thousands of users secure, governed access to AI models and deployable agents, Coforge has launched new accelerators to deepening workflow integration, strengthening responsible AI governance, and unlocking greater scale and adaptability.

The new accelerators available on the Coforge Quasar AI platform include:

- **AgentSphere:** An advanced marketplace that lets organizations discover, deploy, and orchestrate AI agents for diverse business needs. Designed for rapid workflow automation, and integrates intelligent agents into core processes, boosting efficiency, adaptability, and scalability across functions and industries.
- **Trust AI:** Governance protocols, privacy frameworks, and compliance controls to ensure ethical, transparent, and scalable AI adoption.
- **LLM Router:** An intelligent orchestration engine that dynamically selects the most effective large language model for each task, ensuring efficiency, cost optimization, and compliance.
- **Model Garden:** A centralized environment giving developers and client teams access to a diverse portfolio of generative AI models, supporting experimentation, prototyping, and faster integration.
- **RAG as a Service:** Managed Retrieval-Augmented Generation that grounds AI responses in proprietary enterprise knowledge bases, ensuring context-rich, accurate, and citation-driven outputs.

The accelerators complement Quasar GenAI Central and Quasar Marketplace that are enterprise-grade, secure GenAI playground and all-in-one destination for AI capabilities respectively.

Coforge's unified approach to enterprise AI ensures seamless integration, scalability, and governance—helping clients to production at speed. With the new accelerators, enterprises accelerate research, automate operations, and create smarter workflows, while upholding the highest standards of responsible AI adoption and paving the way for the next wave of enterprise AI innovation. **Vic Gupta, Chief Technology Officer, Coforge, added,** "At Coforge, we are at the forefront of collaborating with our strategic partners, developer ecosystems, and domain specialists to turn cutting-edge AI trends into business reality. We see the accelerated move from decision support to AI-powered decision execution, and our approach integrates new-age architectures and federated AI models deeply into client business flows. By relentlessly focusing on responsible AI, persistent learning, and strong governance, we empower enterprises to harness next-generation AI for measurable outcomes, industry-scale adoption, and transparent innovation."

Coforge Quasar AI is driving measurable impact across industries. In banking, clients report a 9% reduction in defaulter lists and an 80% drop in manual compliance workloads. Travel clients are benefiting from AI-driven self-service, with ticket volumes falling by 60%, while insurance clients have cut submission intake times by 66%. Beyond these sector-specific results, engineering teams have increased developer productivity by 30% and boosted test generation fivefold, and IT operations have shortened resolution times by 60%, achieving up to 20% savings in support costs. **Vikrant Karnik, Executive Vice President and Head of AI initiatives, Coforge, said,** "The rapid uptake of Quasar over the last year is testament to its alignment with what matters

most to our clients: business outcomes. Organizations are no longer content with AI as a side experiment and the Coforge Quasar AI platform is helping them embed AI within real workflows and see high ROI, often within months. Our clients choose Coforge because we deliver platforms that break through the barriers of scaling beyond proof-of-concept, driving genuine operational impact and industry transformation, not just technology upgrades."

### About Coforge

Coforge is a global digital services and solutions provider, that leverages emerging technologies and deep domain expertise to deliver real-world business impact for its clients. A focus on select industries, a deep domain understanding of the underlying processes of those industries and partnerships with leading technology platforms, enables Coforge to be a trusted partner of its clients in their transformation initiatives. Coforge leads with its Product Engineering approach and leverages AI, Cloud, Data, Integration and Automation technologies to transform businesses into intelligent, high growth enterprises. Coforge has 33 global delivery centers and is present in 25 countries.
