Dear Sir/Madam,

Subject: Press Release

Pursuant to applicable provisions of SEBI (Listing Obligations & Disclosure Requirements) Regulations, 2015, as amended, (“SEBI Listing Regulations”) please find enclosed press release of the Company announcing that **“Coforge Introduces AI Launchpad, the Open-Weight AI Ecosystem for the Enterprise.”**

We request you to take the above on record.

For Coforge Limited

**Barkha Sharma
Company Secretary & Compliance Officer**

Encl.: As above

Coforge Introduces AI Launchpad, the Open-Weight AI Ecosystem for the Enterprise

Deployable across any cloud, with frontier models on demand.

Princeton, NJ, USA | Greater Noida, India | September 2, 2026 — Coforge Limited (NSE: COFORGE), a global AI-native engineering services leader, today introduced a new enterprise AI offering, Coforge AI Launchpad, which enables organizations to build, fine-tune, deploy, and operate a self-owned AI stack entirely within their own controlled environments.

Despite open-weight AI models gaining mainstream enterprise adoption, the journey from pilot to production remains difficult for many organizations due to talent shortages, fragmented infrastructure, and governance and auditability requirements.

Powered by Coforge Nuuron, Coforge AI Launchpad was designed to overcome these barriers with an integrated platform and managed services approach that allows organizations to route workloads across open-weight and frontier models based on business, regulatory, performance, and economic requirements without being locked into a single technology stack.

"Enterprise AI is entering a new phase where control matters as much as capability," said **Lalit Wadhwa, Chief Technology Officer, Coforge**. "Organizations need the optionality to leverage the best AI models available without creating new forms of technology dependency. Coforge AI Launchpad gives enterprises a governed foundation that preserves ownership of data, intellectual property, and AI environment while remaining flexible enough to adapt as the market evolves."

Coforge is already implementing this offering for clients in industries with business-critical data sovereignty, governance, and regulatory requirements. Current deployments include a sovereign AI environment for a U.S. clinical healthcare intelligence company and managed AI routing that helped a major U.S. bank reduce AI run costs while maintaining governance and auditability.

"Enterprises spent the first wave of AI renting intelligence. The next wave will be about owning it," said **Anup Nair, Chief AI Commercial Officer, Coforge**. "Too many companies are building critical capabilities inside environments they don't fully control. Coforge AI Launchpad gives clients the transparency, flexibility, and governance they need to create AI on their own terms and evolve it as their business evolves."

Coforge AI Launchpad is packaged as a suite of six integrated services: Strategy and Advisory, Infrastructure and Platform, Model Engineering and Customization, Deployment and Integration, LLMops, Observability and Guardrails, and Governance, FinOps and Managed Run services.

About Coforge

Coforge is an AI-native engineering services leader, where AI is the very foundation of how we design, build, and deliver intelligent solutions for our clients. We use AI and hyperspecialized industry expertise to engineer autonomous enterprises. We combine AI agents with our AI-enabled workforce, including specialized FDEs in hybrid pod-based delivery units. With a deep focus on trusted AI, our solutions are secure, governed, and enterprise-grade. We are outcome-led by design. Moving beyond AI experimentation, we deliver measurable business outcomes—lower operating costs, faster cycle times, higher conversion rates, and sustained margin growth.
