Innovaccer and Coforge Partner to Accelerate AI Transformation in Healthcare

- *G-Forge launched to help healthcare organizations scale AI and improve enterprise decision-making by integrating siloed data and ultimately driving better health outcomes*

SAN FRANCISCO/ GREATER NOIDA, 26 JANUARY, 2026 – Innovaccer Inc., a leading healthcare AI company, and Coforge, a global digital services and solutions provider, today announced a strategic partnership across the healthcare ecosystem designed to improve care delivery and patient outcomes. This partnership will combine Coforge's domain expertise in driving organizational transformation with Innovaccer's AI infrastructure and data platform, driving measurable improvements in clinical, financial and administrative results for healthcare organizations. The two firms launched G-Forge, a joint initiative designed to help healthcare organizations scale AI, integrate siloed data, and improve enterprise decision-making.

G-Forge brings together Innovaccer's Gravity platform and Coforge's expertise in large-scale implementation and organizational transformation to support healthcare providers, payers, life sciences organizations, and healthcare technology companies as they modernize operations and adopt AI across the enterprise.

As the preferred platinum implementation partner for Innovaccer's Gravity AI platform, Coforge will also establish a Healthcare AI Center of Excellence. Together, Innovaccer and Coforge will develop industry-specific accelerators and solutions in the areas of member and provider experience, care management, and revenue cycle management tailored to the needs of healthcare organizations, while offering end-to-end implementation, integration, and managed services to support Gravity deployments.

"With G-Forge, healthcare organizations can accelerate AI adoption across the enterprise and translate intelligence into measurable outcomes faster," said Abhinav Shashank, Co-founder and CEO of Innovaccer. "The combination of Gravity's healthcare intelligence platform with Coforge's deep experience in enterprise transformation will help organizations modernize their data foundations, improve operational performance, and enable more informed decision-making at scale."

Sudhir Singh, CEO & Executive Director, Coforge, said, "This partnership reflects our shared belief that the future of healthcare lies in the convergence of intelligent automation, data and patient-centric design. As Innovaccer's platinum implementation partner, Coforge will bring the certainty of deployment and scale to help healthcare enterprises realize the full potential of Gravity AI. Together, we aim to unlock new business models, establish co-innovation labs, and deliver measurable outcomes that improve care delivery and operational efficiency."

"We are incredibly excited to embark on this strategic partnership with Innovaccer. Our clients across the healthcare ecosystem are demanding solutions that deliver measurable impact, not just incremental improvements. By combining our deep expertise in healthcare technology along with Innovaccer's breakthrough AI platform Gravity, we are creating a unified value proposition that drives innovation, strengthens clinical and administrative performance and drives sustainable cost efficiency." said Preeti Singh, EVP and Head of North America Business Unit, Coforge.

The initiative will be supported by dedicated forward-deployed engineers from Innovaccer, alongside Coforge professionals trained on the Gravity platform, with deep healthcare domain and functional expertise. These teams will work side by side with customers to design, deploy, and operate AI solutions across clinical, financial, and administrative use cases.

G-Forge will also serve as a hub for co-innovation, enabling the development of industry-specific accelerators and scalable AI solutions built on Gravity's secure, HITRUST-compliant foundation.

About Innovaccer
Innovaccer activates the flow of healthcare data, empowering providers, payers, and government organizations to deliver intelligent and connected experiences that advance health outcomes. The Healthcare Intelligence Cloud equips every stakeholder in the patient journey to turn fragmented data into proactive, coordinated actions that elevate the quality of care and drive operational performance. Leading healthcare organizations like Orlando Health, Adventist Healthcare, and Banner Health trust Innovaccer to integrate a system of intelligence into their existing infrastructure, extending the human touch in healthcare.
