## **Coforge Named a Leader in Everest Group Quality Engineering (QE) Services for AI Applications and Systems PEAK Matrix® Assessment 2026**

GREATER NOIDA, India, October 26, 2026 – Coforge Limited (NSE: COFORGE), a global AI-native engineering services leader, today announced it has been positioned as a Leader in Everest Group's Quality Engineering (QE) Services for AI Applications and Systems PEAK Matrix® Assessment 2026.

The recognition reflects Coforge's ability to help enterprises validate, secure, and govern production AI systems as AI adoption accelerates across customer experiences, business processes, and core technology environments.

The assessment evaluated 40 service providers based on market impact, overall vision, and capability. The evaluation criteria included the breadth of capabilities in AI model validation, generative AI and retrieval-augmented generation (RAG) evaluation, agentic AI assurance, responsible AI, security testing, AI observability, specialized talent, partner ecosystems, and demonstrated client outcomes.

As AI moves from experimentation to production, enterprises require assurance frameworks that deliver reliability, governance, and operational resilience across the AI lifecycle. Coforge's AI-led QE portfolio helps organizations reduce deployment risk, accelerate innovation, and scale AI responsibly.

"AI is fundamentally changing how organizations build, operate, and scale. As enterprise systems become more autonomous, quality engineering cannot stop at validating functionality; it must establish trust across the entire AI lifecycle," said **Raghu Krovvidy, Executive Vice President and Head of Quality Engineering, Coforge**. "This recognition validates our investments in AI-native quality engineering, combining deep domain expertise, proprietary accelerators, and governance-led assurance frameworks that help clients confidently deploy AI at scale."

Coforge's QE portfolio spans advisory, transformation, digital assurance, regulatory compliance, and a suite of AI-powered solutions that transform quality engineering into a strategic business enabler that supports greater enterprise autonomy.

### **About Coforge:**

Coforge is an AI-native engineering services leader, where AI is the very foundation of how we design, build, and deliver intelligent solutions for our clients. We use AI and hyperspecialized industry expertise to engineer autonomous enterprises. We combine AI agents with our AI-enabled workforce, including specialized FDEs in hybrid pod-based delivery units. With a deep focus on trusted AI, our

solutions are secure, governed, and enterprise-grade. We are outcome-led by design. Moving beyond AI experimentation, we deliver measurable business outcomes – lower operating costs, faster cycle times, higher conversion rates, and sustained margin growth.
