For Coforge Limited

**Barkha Sharma
Company Secretary & Compliance Officer**

Encl.: As above

Coforge Recognized as a Leader and Star Performer in Everest Group's Duck Creek Services PEAK Matrix® Assessment 2026

Princeton, New Jersey, USA - April 28, 2026 - [Coforge](#), an AI-native engineering services leader and enterprise transformation partner to the global insurance industry, has been positioned as a Leader and Star Performer in the Everest Group Duck Creek Services PEAK Matrix® Assessment 2026. This positioning underscores Coforge's sustained momentum in the Duck Creek services market, as insurers accelerate cloud-native modernization and prioritize faster time-to-value from core platforms. It also reflects Coforge's decades of deep industry expertise and specialized delivery capabilities for Property and Casualty (P&C) insurance carriers and its ongoing investments in proprietary accelerators and Agentic AI-led solutions across Duck Creek delivery and key workflows.

The contenders of the Everest Group Duck Creek Services were evaluated across two key dimensions - market impact and vision & capability. Being recognized as both a Leader and a Star Performer reflects Coforge's strong performance across both dimensions, with the Star Performer designation recognizing providers that demonstrate the most significant year-on-year improvement across multiple parameters on the assessment.

"Coforge has accelerated its Duck Creek services momentum with a clear SaaS-first modernization approach, supported by its specialized playbooks and Duck Creek OnDemand (DCOD) remediation accelerators that improve delivery predictability for cloud migrations and upgrades," says **Rugved Sawant, Practice Director at Everest Group**. "Its ongoing investments in proprietary accelerators and AI-led solutions across Duck Creek delivery and key workflows, along with continued talent development across Duck Creek products, strengthen its ability to support commercial and specialty insurers at scale globally. These strengths have contributed to Coforge being positioned as a Leader and Star Performer in Everest Group's Duck Creek Services PEAK Matrix® Assessment 2026."

Coforge's recognition is grounded in sustained investments across AI-led solutions, agentic capabilities, and workforce reskilling. Its AI-powered agentic assets, like Submission Centre, State & Product Rollout Factory, Claims Triaging Centre, Global Expansion and Core Platform Modernisation, are delivering significant business outcomes, while Forge-X, its AI-enabled engineering platform, has driven up to 50% gains across the delivery lifecycle, enabling faster and more scalable modernization outcomes for insurers.

Rajeev Batra, Global Insurance Practice Head, Coforge, said, "We are proud to be recognized as a Leader and Star Performer in Everest Group's Duck Creek Services PEAK Matrix® Assessment 2026. This recognition reflects the success of our AI-native engineering approach, our deep P&C insurance Industry expertise, and our sustained investments in Agentic AI assets and modernization frameworks across the Duck Creek lifecycle. Our focus on industrialized delivery, integration-led engineering, and continuous release readiness enables insurers to manage complex modernization journeys with greater predictability, reduced risk, and stronger operational resilience. As an enterprise transformation partner to

leading insurers, we are committed to pairing deep Industry expertise with Agentic AI to help our clients become truly AI-native enterprises."

Coforge's Duck Creek services practice is built on deep P&C and specialty insurance industry leadership, insurance-trained AI agents, a scaled pool of Duck Creek-certified talent, and a comprehensive delivery footprint globally. **Rohit Mehra, Chief Business Officer, Coforge** added, "Over the years we have strengthened our delivery capabilities on the Duck Creek platform with over 1200+ certified professionals across North America, Europe, rest of Asia and our nerve center in India." Coforge's proprietary accelerators span the full Duck Creek lifecycle and embed Agentic AI responsibly via our AI platform, from implementation and DCOD cloud migration to testing automation, release adoption, and post-go-live support, enabling commercial and specialty insurers to pursue end-to-end enterprise transformation with confidence.

About Coforge:

Coforge is an AI-native engineering services leader, where AI forms the foundation of how we design, build, and deliver intelligent solutions for global enterprises. We combine advanced AI capabilities with hyperspecialized industry expertise to engineer scalable, resilient, and autonomous enterprises. Our AI agents work alongside an AI-enabled workforce, including specialized Full-Stack Digital Engineers (FDEs) operating in hybrid, pod-based delivery models. With a strong focus on trusted and responsible AI, Coforge delivers secure, governed, and enterprise-grade solutions across the full engineering and delivery lifecycle. Moving beyond AI experimentation, we are outcome-led by design — enabling clients to achieve measurable business outcomes such as reduced operating costs, accelerated cycle times, improved operational resilience, and sustained business growth.
