Dear Sir/Madam,

Subject: Press Release

Pursuant to applicable provisions of SEBI (Listing Obligations & Disclosure Requirements) Regulations, 2015, as amended, please find enclosed press release of the Company announcing that “Coforge Launches Momentum AI, a Specialized FDE Operating Unit Built to Turn Enterprise AI into Measurable Outcomes”

We request you to take the above on record.

Thanking you.

Yours faithfully,

For **Coforge Limited**

Barkha Sharma
Company Secretary & Compliance Officer
Encl: as above

Coforge Launches Momentum AI, a Specialized FDE Operating Unit Built to Turn Enterprise AI into Measurable Outcomes

New division leverages FDEs, Human + Agent delivery pods, and the Coforge Nuuron AI Operating System to accelerate enterprise transformation and execution at scale

Princeton, NJ, USA | Greater Noida, India | July 30, 2026 - Coforge Limited (NSE: COFORGE), a global AI-native engineering services leader, today announced the launch of **Momentum AI**, a specialized operating unit built around the company's Forward Deployed Engineer (FDE) model and designed to help enterprises accelerate AI transformation and deliver measurable business outcomes.

Momentum AI is a new operating unit designed specifically to execute enterprise AI projects. It enters the market with FDEs and human + agent pods already deployed within multiple global enterprises, an outcome-based pricing model, and a dedicated academy already producing the next generation of AI-native talent.

The division takes its name from a simple belief: Transformation is not instantaneous, but a sustained effort propelled by a constant drive to innovate. Working side-by-side with clients, Momentum AI's FDEs turn every interaction, insight, and innovation into continuous progress, helping organizations move quickly from ideas to execution and from experimentation to measurable business value.

A critical enabler of the model is the company's AI Operating System, [Coforge Nuuron](#). It provides the intelligence layer that connects enterprise knowledge, workflows, decisions, and actions, enabling Momentum AI teams to rapidly operationalize business context, deploy AI agents, and accelerate execution across the enterprise.

Lalit Wadhwa, Chief Technology Officer, Coforge, said,

"When it comes to AI, most organizations struggle with execution, not ideas. Momentum AI was built to close that gap. Our FDEs work within client teams, take ownership of business outcomes, and rapidly transform enterprise knowledge and business context into production systems that create measurable value. Just as importantly, we have built a new talent architecture and enablement engine to continuously develop the next generation of FDEs, ensuring we can scale capability, not just headcount."

To support the growth of the business, Coforge is scaling its FDE ecosystem through a 90-day applied AI academy, ongoing skills development programs, and a pod-based operating structure that pairs experienced Senior FDEs with high-potential associates. The model is designed to enable

rapid deployment while preserving the executive judgment, domain expertise, and production rigor required for enterprise AI initiatives.

Momentum AI represents Coforge's long-term organizational commitment to the FDE model, creating a dedicated operating structure, talent system, and delivery methodology focused exclusively on enterprise AI execution.

Sudhir Singh, Chief Executive Officer, Coforge, said,

"The next competitive advantage will not come from having access to AI. It will come from having the capability to deploy it repeatedly, rapidly, and at scale. While the market spent the last few years announcing AI strategies, investment commitments, and hiring targets, we focused on building the operating system, talent model, and delivery model to make AI work at enterprise scale. Momentum AI is the convergence of all three, enabling our clients to create the organizational velocity to turn intelligence into action faster than their competitors."

About Coforge

Coforge is an AI-native engineering services leader, where AI is the very foundation of how we design, build, and deliver intelligent solutions for our clients. We use AI and hyperspecialized industry expertise to engineer autonomous enterprises. We combine AI agents with our AI-enabled workforce, including specialized FDEs in hybrid pod-based delivery units. With a deep focus on trusted AI, our solutions are secure, governed, and enterprise-grade. We are outcome-led by design. Moving beyond AI experimentation, we deliver measurable business outcomes – lower operating costs, faster cycle times, higher conversion rates, and sustained margin growth.
