SUITS & SAYINGS

ET's roundup of the wackiest whispers and murmurs in corporate corridors & policy parlours

UNDER COVER

Refinancing around a billion dollars at highly competitive rates is something most corporate houses would like to publicise and celebrate, especially when many consider this group to be history while a few insist it's making a comeback. Why was such a positive development kept under wraps? Apparently, the corporate in question, which insists it's become debt free of late, was keen to make things widely known and had even kept a press release ready. But the boss of the lending institution chose to play it down. What's the actual reason—is it because this a fully functional coal-fired plant or the group in question evokes strong emotions?

Dadi's Discord

Recent festivities at the bungalow of this business personality to mark the nuptials of his son were a grand affair. The industrialist family's pioneering legacy has been a prime example of homegrown entrepreneurial chutzpah and the goodwill goes far beyond matrimonial alliances. But as we gathered, several old timers noted that the matriarch and her other son were missing in action. They are still overseas and the differences among different factions are only getting deeper with one side refusing to return unless the probate of their late father's will is fully executed.

Strike Out

Just three months after the celebration of a key milestone, comes news of a dramatic split at this celebrated law firm. In the past decade, it had created a niche for itself in transactional and corporate law, having been part of several high-profile cases, including the one that was billed as the mother of all corporate wars in recent times. A big surprise is that the senior litigation partner in question went his own way to start his eponymous firm that also names his acclaimed senior counsel father. There had been much bonhomie on display at the aforementioned event, so was this another case study of clashes in temperament getting in the way of joint success?

Starbucks India Losses Surge 65% in FY25, Sales Grow 5%

Sagar Malviya

Mumbai: Starbucks reported a 5% growth in sales to ₹1,277 crore, but losses widened 65% to ₹135.7 crore for its operations in India in FY25. In India, the US-headquartered coffee brand operates through an equal joint venture with Tata Consumer Products, under 'Tata Starbucks'. Out of its total loss, half or ₹67.6 crore was borne by Tata Consumer Products, it said in its latest annual report.

"The year witnessed demand softness in the overall QSR (Quick Service Restaurant) space consequently the sales growth was subdued. However, demand has started to rebound in the second half of the year. Profitability remained muted due to demand softness in the overall

QSR space," it said in the report. A year ago, it had reported a loss of ₹82 crore on sales of ₹1,218 crore. During the year, 58 new Starbucks stores opened, fewer than last year's 95. The company expanded into 19 new cities, which also included tier 2 cities. In total, the coffee brand now has 479 stores across 80 cities in India.

"We remain committed to increasing our store base in India and get to 1,000 outlets by FY28, despite a more moderate number of store openings in the short term," it said. N Chandrasekaran, chairman of Tata Consumer Products, in an address to shareholders said 2025 started on a positive note with expectations of stable global growth, falling inflation,

and tailwinds from falling interest rates, but the global macro narrative shifted with rising concerns around global growth and inflation as policy uncertainty rose sharply with dramatic shifts in trade policy.

"Amidst a volatile global economic environment, India remains one of the bright spots of economic growth. India's long-term growth is underpinned by strong demographic and economic fundamentals and ongoing structural reforms.

India's near term macro-outlook remains strong with stable growth expectation in 2025, falling inflation, and ongoing monetary easing. India's direct exposure to the US is limited as its goods exports to the US are just over 2% of its GDP, one of lowest among emerging markets," he said.
