PRESS RELEASE
Container Corporation of India Ltd.
New Delhi, Date 30/06/2025

Bulk Cement Movement Enters a New Era with CONCOR

Container Corporation of India Ltd. (CONCOR) has taken a significant step forward in transforming cement logistics in India by introducing specialized tank containers for the first time to facilitate the transportation of bulk cement in loose form.

The real-time movement of these specialized tank containers has commenced successfully from My Home Cement Siding (MMHM), Mellacheruvu in Andhra Pradesh to CONCOR ICD Whitefield at Bangalore. This initiative marks yet another milestone in CONCOR's continuous efforts to offer innovative and sustainable logistics solutions to key sectors of the Indian economy.

These tank containers are designed to support the cement industry by enabling efficient, safe, and eco-friendly bulk movement of cement through the rail network, thereby significantly reducing the dependency on conventional bagged transport. This not only enhances the operational efficiency of cement companies but also aligns with India's goal of promoting green and multimodal logistics.

By leveraging its robust infrastructure and multimodal capabilities, CONCOR remains committed to empowering industries with cutting-edge logistics solutions that are both cost-effective and environmentally responsible.
