Sub: Corrigendum to Notice of the 99th Annual General Meeting (AGM).

Please find enclosed the Corrigendum issued, in "Financial Express" (English Daily) on July 12, 2018, in continuation of the Notice dated July 2, 2018 for the 99th Annual General Meeting ("99th AGM") of the Company to be held on Monday, July 30, 2018 at 3:00 p.m. IST at the Walchand Hirachand Hall, Indian Merchant Chambers Bldg, IMC Marg, Churchgate, Mumbai, Maharashtra 400020, India.

All the concerned have been informed that,

1. **No Book Closure for AGM** : The Register of the Members and Share Transfer Books will not remain closed during the period July 23, 2018 to July, 29, 2018 for the purpose of the AGM.

2. **E-Voting Period and Cut-off Date** : The e-voting period commences 9.00 a.m. IST on July 25, 2018 and ends at 5.00 p.m. IST on July 29, 2018. During this period, members holding shares either in physical or dematerialized form, as on the cut-off date, i.e. July 23, 2018, may cast their vote electronically.

This is for your information and record.

Thanking you.

Yours faithfully,

For The New India Assurance Company Limited

Jayashree Nair

Telecom Commission clears new national telecom policy

FE BUREAU
New Delhi, July 11

THE TELECOM COMMISSION on Wednesday approved the National Digital Communications Policy (NDCP), or the new national telecom policy, which aims to create 4 million jobs and bring in investments to the tune of \$100 billion.

"It has approved the NDPC, which now will go for Cabinet approval," telecom secretary, Aruna Sundararajan told reporters after the meeting of the Telecom Commission (TC). The Department of Telecommunications (DoT) will now send the policy for Cabinet approval in about two weeks, after which it will be placed before Parliament for approval. Earlier, telecom minister Manoj Sinha had said the policy will be placed before Parliament in the monsoon session, which is scheduled to start from July 18.

The DoT received feedback from the public and the industry on the NDPC in May. From providing a minimum download speed of 50

Mbps and enabling 10 Gbps connectivity to all gram panchayats, to attracting \$100-billion investment in digital communications by 2022, the DoT has envisaged a very ambitious road map under the NDPC 2018.

The policy spells the government's strategic objective as broadband for all, creating 4 million in digital communications as well as increasing the country's GDP to 8% from around 6% last year, all by 2022.

"The NDPC will propel India into the top 50 countries in the ICT Development Index from the current 134 and will take Digital India to the homes in the country. This policy will help revolutionise the telecom and digital ecosystem in the country," Sundararajan noted. Telecom operator's body COAI welcomed the approval of the NDPC 2018 stating that it is a forward-looking policy that promises to usher India into a new era of digital communications, thereby making the Prime Minister's

Telecom secretary
Aruna Sundararajan

Digital India dream a reality.

The Telecom Commission also cleared DoT's proposals for installing Wi-Fi hotspots in gram panchayats and development institutions.

"The Gram Net and Jan Wi-Fi have been approved. These are very important schemes. There will be 5 Wi-Fi hotspots in every gram panchayat. We want to complete it by December 2018. Tenders for this will be out by tomorrow or day after," DoT sources said. The government will provide a viability gap funding of ₹6,000 crore for installing around 10-12 lakh Wi-Fi hotspots across all the gram panchayats in the country. All police stations, post offices, high schools and secondary schools, primary health centres and community centres will be covered. Interested companies can also form a consortium with telecom operators and internet service providers or they can bid on their own for installing these hotspots.

The policy for Nagar Net, or Wi-Fi hotspots in urban areas, will come out soon. DoT sources said the commission has approved removal of double taxation for VNOs. It was on the basis of TDS recommendations. "This was one of the reasons why VNO service provisioning could not grow in India as expected even when the department gave 67 licences as they were subject to double taxation or three times cascading taxation. With this, now VNOs will only have to pay adjusted gross revenue (AGR) to value added, the same principle as the GST."

DoT sources said the commission has approved removal of double taxation for VNOs. It was on the basis of TDS recommendations. "This was one of the reasons why VNO service provisioning could not grow in India as expected even when the department gave 67 licences as they were subject to double taxation or three times cascading taxation. With this, now VNOs will only have to pay adjusted gross revenue (AGR) to value added, the same principle as the GST."

Google, Facebook, Microsoft slam V band auction move

FE BUREAU
New Delhi, July 11

THE BROADBAND INDIA Forum, which represents tech companies like Facebook, Google and Microsoft, on Wednesday said the demand for auctioning the V band spectrum would not only impact growth, but also prove negative for rolling out Wi-Fi hotspots and will decelerate digital inclusion.

Without naming the COAI, BIF said the lobby group is falsely claiming that the V band spectrum has potential to be used as access spectrum and should be auctioned.

BIF wants to clarify that V band has unique technical characteristics of oxygen absorption, coupled with low coverage and high frequency, which makes it ideal for interference management and thus for high gigabit capacity for Wi-Fi. It is best used for secondary access (creation of Wi-Fi hotspots) as well as for short haul backhaul networks.

"For backhaul and Wi-Fi spectrum, the issue of auction does not arise at all, since neither has ever been auctioned in India or anywhere else. Has Wi-Fi spectrum in 2.4 GHz and 5 GHz currently permitted for secondary access and backhaul networks been auctioned? Has the microwave spectrum used for backhaul in the 6, 7, 8, 13, 15, 18 and 23 GHz bands been ever auctioned? When these have not been auctioned, why is noise now being made for auctioning V-Band?" BIF asked.

Last week, the COAI wrote to the Prime Minister's Office (PMO) and telecom minister Manoj Sinha urging that spectrum in E & V band should not

be delicensed.

BIF president TV Ramachandran said, "Any recommendation to auction it (V band) is hypocritical, self-seeking and grossly anti-consumer. Such a retrograde move stifles innovation, destroys the business case around both conventional telcos as well as the new age digital players rather than improving incumbent financial viability."

Attacking the COAI on its comment that delicensing would lead to a huge loss for the government in the form of revenues from licence fees, spectrum usage charge and value of spectrum, BIF said on the contrary, increase in number of Wi-Fi hotspots and the resultant explosive growth in access and backhaul traffic would lead to huge revenue growth.

BIF said India's mobile broadband penetration was a meagre 31% at the end of 2017, still considerably behind many of its peers. At present, there are about 36,000 commercial hotspots, as compared to China (6.1 million), Indonesia and Mexico (over 1.65 lakh each). Developed markets such as the US, the UK and France have about 30% of their total public data offloaded to public Wi-Fi networks as opposed to India's 16%.

India needs over 80 lakh hotspots with a view to reach the global level of one Wi-Fi hotspot for every 150 people, according to an Association of Deloitte joint study. Spectrum availability in Indian metros is about a tenth of the same in cities in developed countries. This has put a major roadblock in providing high-speed data services.

SynThera Biomedical gets funding from 1Crowd, BIRAC

GEETA NAIR
Pune, July 11

HEALTHCARE START-UP SYN-TERA Biomedical, which makes dental and orthopaedic implants, has raised investment from crowd funding platform 1Crowd and the Biotechnology Research Assistance Council's (BIRAC) Sustainable Entrepreneurship and Enterprise Development (SEED) fund.

SynThera is an incubate company at Venture Center in Pune. This investment was through the incubator Venture Center which hosts the SEED fund on behalf of BIRAC. The amount raised has not been disclosed. Pune-based SynThera is the first bioactive glass company from India and will provide biomaterial solutions. The investment will help us achieve expansion, approvals and launch our first line of bone graft substitute

products in the market, together with further development and testing on our patented bone graft product line, said Nitya Lakshkar, founder and chief executive of SynThera Biomedical.

SynThera focuses on R&D, manufacture and commercialisation of affordable biomaterial-based medical devices and has developed products that can be used in dental and orthopaedic surgeries. These are implantable materials for repair and regeneration of bone that is lost or damaged due to disease, injuries or congenital deformities.

The company's products — SynTooth and PorosSyn — are synthetic bone graft substitute products made from bioactive glass materials. Both products are used in dental and orthopaedic surgeries as implantable materials for repair and regeneration of bone.

NEC roped in for Chennai-A&N submarine cable system

FE BUREAU
Chennai, July 11

JAPANESE MULTINATIONAL PROVIDER of information technology services and products NEC will manufacture the optical submarine cable and provide technical assistance for the turnkey implementation of the optical submarine cable system connecting Chennai and the Andaman and Nicobar Islands (A&N) Islands, being bid by Bharat Sanchar Nigam (BSNL).

BSNL has placed a purchase order with NEC, the Indian arm of NEC, to design, engineer, supply, install, test and implement the project.

The contract is for a system that includes a segment with repeaters from Chennai to Port Blair and seven segments with out repeaters between the islands of Havelock, Little Andaman (Hutbay), Car Nicobar, Kamorta, the Great Nicobar Islands, Long Island and Rangit. The total cable length will be approximately 2,300 km and carry 100Gbps optical waves.

The cable system will provide the A&N Islands with sufficient bandwidth for supporting voice and data connectivity that enables the implementation of e-governance initiatives, such as the establishment of enterprises and e-commerce facilities, according to a statement issued by NEC. The system will also assist educational institutions in the sharing of knowledge and will play a significant role in driving the Digital India vision, a campaign launched by the Centre to ensure that government services are made available to citizens electronically.

"BSNL is pleased to select NEC for implementing this prestigious project. We trust NEC for the technological edge they hold in the domain and their commitment to adherence of timelines to ensure successful completion of the project," said Anupam Shrivastava, chairman and MD, BSNL, in a statement.

Chinese gaming firm begins India operations

GEETA NAIR
Pune, July 11

TOP CHINESE GAMING company, Youzou Interactive has set up operations in India and has scaled up business. While the entry point was gaming, the Chinese company is looking at expanding it into Indian media and entertainment space that includes organic growth and acquisitions. The company's VC fund arm would also be looking at investing in companies that are fit for investment.

"We are open to opportunities to build local ecosystems," said Anuj Tandon, CEO, Youzoo Games. If there are existing opportunities, the cheque book is open for investing, he added. They will not be short of investments because the company views this a growing business in the country, said Tandon.

The company plans to foray into the media and entertainment space and Tandon said his mandate is to look at all these opportunities.

But for now the focus will be on gaming and developing con-

tent appropriate for India, he added.

The company's name has been customised a bit for India to be in sync with its global aspirations. Their first recruit was an India CEO, Tandon, who earlier co-founded Rolocube, a gaming start-up, and later joined Nazara Technologies as head of mobile game publishing.

Youzoo now has a team of 30 in Pune which is expected to go up to 70 in a year. Youzoo has just moved into a new facility that will house 100 people. The entire team is Indian and there are no Chinese at Youzoo as they want local innovation to flourish, said Tandon.

Youzoo was founded by 38-year-old Lin Qi in 2009 and went public in 2014.

Post IPO, the company diversified business into movies, sports and event management and VC funding.

Around 50% of Youzoo's business in gaming comes from outside China, which prompted them to expand with operations in Germany, Seoul, Tokyo, Singapore and now India.

MobiKwik launches instant loan service

FE BUREAU
Bengaluru July 11

FINTech PLATFORM, MOBIKWIK, announced the launch of an instant loan of ₹5,000 on its app, in partnership with NBFC, Bajaj Finserv. The amount credited can be utilized by the app users for bill payments, cab calls, as well as payments to offline and online merchants.

The Bengaluru-based startup said the instant disbursement of credit happens in a matter of 10 seconds, by following three simple steps on its app.

Uppasana Taku, Co-founder and Director, MobiKwik, said, "Instant credits for small ticket amounts is an untapped opportunity. The smartphone user base expected to grow by about 16% this year and the online transacting user base growing by over 30% YoY. We have already pre-approved ₹3,500 crore of loans for millions of customers across the country."
