Speciality & Semi Speciality Growth and Margins

- Expanding Speciality & Semi-Speciality films portfolio (high margin category) (FY23 62% volume; 13% CAGR over last 4 years).
- Target 80%+ volume from Speciality & Semi Speciality segment by 2025.

Notes:

- Specialty sales has been stagnant in FY23 from FY22 mainly due to supply chain issues and geo-political crisis in some export markets
- Margins denote per/kg contribution for respective films categories.

Management Commentary

- ❑ During Q4, commodity films margins both BOPP and BOPET suffered a further decline severely impairing the profitability of the industry. Cosmo with over two third of its revenue coming from speciality films could withstand the margin pressure and outperformed the industry once again.
- ❑ The Company expects the position to improve in the coming months bringing an end to QoQ declining phase, happening since last 3 quarters. The Company will continue to build its speciality products portfolio and maintain its lead over the other industry players.

March 2023 Quarter - Performance Snapshot

Management Commentary Continues

- ❑ The Company's Petcare vertical continue to grow rapidly and clocked monthly run rate revenue (GMV) of Rs. 2 crores from its 15 experience centres and increasing online presence through its website and mobile Apps. An acquisition opportunity in the on-line petcare space is in the final stage and expected to be closed soon. This would further accelerate the growth of the Petcare vertical.
- ❑ The Speciality Chemical subsidiary is set to launch newer adhesives which together with healthy growth in masterbatch vertical would enable the subsidiary to have further growth in FY 23-24.
- ❑ The Company's balance sheet remains strong with substantial cash reserve and net debt to EBITDA of about one time.
- ❑ The Board of Directors had recommended dividend of Rs 5 per equity share for the financial year FY 22-23 subject to approval of shareholders in the annual general meeting. This coupled with the 1:2 bonus in June 2022 and share buyback with tax free handsome gain over the market price in February 2023 affirms the Company's commitment to provide regular return and share prosperity with the shareholders.

Key Highlights – FY23 Results

- During FY23, BOPP and BOPET industry faced excess supply caused due to bunching of new production lines. The contribution margin has been dropping on BOPP and BOPET films each quarter continuously during FY23 and have reached below the sustainable levels in Q4, which impacted the whole BOPP and BOPET industry. Cosmo could still outperform and post double-digit EBITDA primarily due to 62% speciality films sales during FY23.
- While the near-term BOPP & BOPET outlook remain challenging, the Company's focus on speciality for BOPP and BOPET should keep the Company on leading front.

STRATEGIC PERSPECTIVE

BUSINESS OVERVIEW

“FILMS BUSINESS”

Films Business-India Industry Dynamics & Capex Strategy

Ahead Always

- Global BOPP demand is estimated to be approx 9 million(+) MT per annum
- The global demand and supply are broadly balanced

- Currently India BOPP production capability is estimated at approx. 850k MT per annum.
- India domestic BOPP consumption is approx. 650k MT per annum and remaining is broadly exported.
- Indian BOPP Industry has been growing at almost double of the India's GDP growth rate over long term

- Strong domestic and global demand is helping efficient capacity utilisation.

India BOPP Demand & Supply Dynamics:

- Considering low packaged food penetration in India and rising personal disposable income, the Industry is estimated to grow fast.
- Investment in organized retail industry and change in pack format from rigid to flexible is going to further add to increasing demand.
- Based on capacity addition announced in India, new capacity expected in the Industry may not be able to address growing India demand.

- Company's future capex strategy is aligned with target to increase speciality to 80% by 2025 and launch of specialized BOPET Line during FY23.
- Further expanding BOPP and CPP capacity by putting World's largest lines.
