Dear Sir / Madam,

Sub.: Press Release

In Compliance with Regulation 30 of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015, as amended, we enclosed herewith the copy of press release titled "**CP PLUS owner Aditya Infotech to acquire 30% stake in AI video-compression firm BLUE".**

This Disclosure will also be hosted on our Company's website viz. https://www.adityagroup.com/

Kindy take the same on record.

For and on behalf of **Aditya Infotech Limited**

Company Secretary & Compliance Officer

FOR IMMEDIATE RELEASE

CP PLUS owner Aditya Infotech to acquire 30% stake in AI video-compression firm BLUE

*₹45.4 crore investment brings **proprietary technology that can reduce** video storage and bandwidth requirements by up to 90%, **while strengthening CP PLUS's AI-led surveillance capabilities***

Noida, November 5, 2026: Aditya Infotech Limited (BSE: 544466 | NSE: CPPLUS), one of India's leading providers of video surveillance and security technology solutions and owner of the flagship CP PLUS brand, **has received Board approval to invest** ₹45.4 crore in KGraph AI Solutions Private Limited (BLUE), an AI-powered video compression technology company, for a 30% stake on a fully diluted basis. The investment will strengthen the technology capabilities behind CP PLUS products and advance its next-generation surveillance solutions.

The transaction will comprise a combination of fresh equity infusion and purchase of shares from existing shareholders. **It implies** a post-money valuation of approximately ₹151 crore and is expected to be completed by November 5, 2026, subject to customary closing conditions. The deal marks another step in CP PLUS 2.0, the brand's evolution from a hardware-led surveillance business into an integrated security solutions provider. BLUE's technology addresses a growing requirement of modern surveillance infrastructure: managing increasing volumes of video data efficiently while preserving essential visual information.

BLUE is led by six co-founders **who bring 15 to over 20 years of experience, with academic backgrounds from IIT Bombay and IIM Bangalore. The company has a 10-patent pipeline, with three applications filed and seven in progress.**

BLUE's proprietary Semantic Codec technology uses a perception-aware compression layer over the standard H.264 video codec to identify redundant visual information and reduce data volumes while preserving essential details. **Based on its deployment data, the technology can reduce** video storage and bandwidth requirements by up to 90%. **It operates on cost-efficient edge hardware without requiring GPU infrastructure** and is compatible with existing cameras and recording systems. This **can help** customers extend video retention and optimise deployment costs without replacing **their** existing infrastructure.

As surveillance expands across smart cities, government infrastructure, enterprises and critical infrastructure, the industry is moving towards more intelligent, connected and insight-led security solutions. This shift calls for stronger capabilities in data management, edge computing, AI-powered analytics and cloud integration. BLUE's technology complements the **CP PLUS** roadmap by strengthening this critical layer and creating opportunities to enhance existing solutions and develop more scalable AI-enabled monitoring, video analytics and cloud-based services.

BLUE will continue to operate independently while collaborating with Aditya Infotech's R&D and engineering teams across Noida, Ahmedabad and Taiwan. The partnership will combine BLUE's expertise in computer vision, embedded systems and video compression with Aditya Infotech's engineering, manufacturing and market capabilities to advance the development of intelligent security solutions.

Commenting on the investment, Aditya Khemka, Managing Director, Aditya Infotech Limited, said: "Video compression is foundational to the next phase of surveillance. As cameras multiply and resolutions rise, the cost of storing and moving video becomes the real constraint. BLUE **addresses this challenge on cameras already in the field and brings a highly experienced team with expertise** in computer vision and embedded systems. This investment is an important step in our CP PLUS 2.0 journey towards intelligent, connected security for a safer India."

The partnership provides BLUE with an opportunity to scale its technology by leveraging Aditya Infotech's established surveillance ecosystem, engineering capabilities and customer reach. It also brings together complementary expertise to explore emerging applications of intelligent video technology across enterprise, industrial and infrastructure environments.

Kunal Kislay, Co-founder and CEO, BLUE, said: "Our vision at BLUE has been to make video intelligence more efficient and accessible by addressing the growing challenges of video storage and bandwidth. Partnering with Aditya Infotech gives us the opportunity to take our technology to a wider market, combining our specialised capabilities with CP PLUS's established surveillance ecosystem, engineering strengths and customer reach. We look forward to contributing to the next phase of intelligent and connected surveillance solutions."

About Aditya Infotech Limited:
Aditya Infotech Limited (BSE: 544466 | NSE: CPPLUS) is one of India’s leading video security and surveillance companies. Through its flagship CP PLUS brand and a multi-brand portfolio, it offers advanced products and solutions for enterprise and consumer customers, backed by one of the industry’s widest distribution and service networks across India. With large-scale integrated manufacturing in India, expanding across new facilities, and the largest portfolio of STQC-certified products, CP PLUS is a leading force behind the Make in India and Atmanirbhar Bharat initiatives.

About BLUE:

BLUE is an Indian deep-tech company pioneering a new category of AI-native video infrastructure through its Semantic Video Data Lake and proprietary Semantic Codec technologies. The platform transforms continuous video streams into intelligent, searchable and actionable enterprise data, enabling organisations to store, manage, analyse and derive insights from video at scale. Its proprietary Semantic Codec significantly reduces video bandwidth and storage requirements while accelerating AI inference, making large-scale video intelligence more efficient and economically viable. Designed for enterprises across manufacturing, infrastructure, energy, logistics, retail and public safety, BLUE enables

organisations to extend their video surveillance into an AI-powered video data infrastructure. BLUE is redefining how machines comprehend, manage and reason over visual information.

Safe Harbor Statement:
